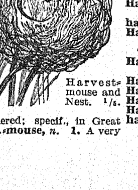
2. Figuratively, to receive as a reward or harvest, or as the result of any exertion or labor; as, he will surely *harvest* the fruit of his evil acts.— **har'vest-ing=ma-chine",** *n.* A harvester.

har'vest, *n.* **1.** A crop or collection of crops, especially of grain, gathered or ready for gathering; by extension, a supply of anything, as fruit, ice, etc., gathered, or to be gathered, and stored up; as, the farmer rejoices in an abundant *harvest;* a large ice=*harvest.* **2.** The time of gathering ripened grain, fruits, etc., as summer or early autumn.



That Power who bids the ocean ebb and flow,
Bids seed=time, *harvest*, equal course maintain.
POPE *Moral Essays* essay iii, l.165.

3. Figuratively, the product of any toil or effort, whether physical or mental, or the result of any course of conduct or action; gain; reward; as, the *harvest* of his follies; *harvests* of the slain. **4.** The act or process of gathering in a crop or crops. [< AS. *hærfest*, autumn.]

Syn.: crop, fruit, growth, increase, ingathering, proceeds, produce, product, reaping, result, return, yield. *Harvest*, from the Anglo=Saxon, signified originally "autumn," and as that is the usual season of gathering ripened *crops* in northern lands, the word came to its present meaning of the season of gathering ripened grain or *fruits*, whether summer or autumn, and hence a *crop* gathered or ready for gathering; also, the act or process of gathering a *crop* or *crops.* "The *harvest* truly is great, but the laborers are few," *Luke* x, 2. "Lift up your eyes and look on the fields, for they are white already to *harvest*," *John* iv, 35. *Harvest* is the elegant and literary word; *crop* is the common and commercial expression; we say a man sells his *crop*, but we should not speak of his selling his *harvest;* we speak of an ample or abundant *harvest*, a good *crop*. *Harvest* is applied almost wholly to grain; *crop* applies to almost anything that is gathered in; we speak of the potato=*crop*, not the potato=*harvest;* we may say either the wheat=*crop* or the wheat=*harvest.* *Produce* is a collective word for all that is produced in farming or gardening, and is, in modern usage, almost wholly restricted to this sense; we speak of *produce* collectively, but of a *product* or various *products;* vegetables, fruits, eggs, butter, etc., may be termed farm=*produce*, or the *products* of the farm. *Product* is a word of wider application than *produce;* we speak of the *products* of manufacturing, the *products* of thought, or the *product* obtained by multiplying one number by another. The word *proceeds* is chiefly used of the *return* from an investment; we speak of the *produce* of a farm, but of the *proceeds* of the money invested in farming. The *yield* is what the land gives up to the farmer's demand; we speak of the *return* from an expenditure of money or labor, but of the *yield* of corn or oats. *Harvest* has also a figurative use, such as *crop* more rarely permits; we term a religious revival a *harvest* of souls; the *result* of lax enforcement of law is a *harvest* of crime. As regards time, *harvest, harvest=tide*, and *harvest=time* alike denote the period or season when the crops are or should be gathered (*tide* being simply the old Saxon word for *time*). *Harvest=home* ordinarily denotes the *festival* of *harvest*, and when used to denote simply the season always gives a suggestion of festivity and rejoicing, such as *harvest* and *harvest=time* by themselves do not express. See HARVEST=HOME.

>
> G. J. HOLYOAKE *Reformation* p. 273. [A. 1854.]

Syn.: anger, animosity, antipathy, aversion, enmity, grudge, hate, hostility, ill will, malevolence, malice, malignity, rancor, repugnance, resentment, revenge, spite. *Repugnance* applies to that which one feels himself summoned or impelled to do or to endure, and from which he instinctively draws back. *Aversion* is the turning away of the mind or feelings from some person or thing, or from some course of action, etc. *Hate*, or *hatred*, as applied to persons, is intense *aversion*, usually with disposition to injure; *anger* is sudden and brief; *hatred* is lingering and enduring: "Her wrath became a *hate*," TENNYSON *Pelleas and Ettarre* st. 16. As applied to things, *hatred* is intense *aversion*, which desires to destroy or remove; *hatred* of evil is a righteous passion, akin to abhorrence, but more vehement. *Malice* involves the active intent to injure by the legal sense, malice is the intent to injure, even tho with no personal *ill will*; as, a highwayman would be said to entertain malice toward the unknown traveler whom he attacks. *Malice* is direct, in the Pawnee pressing toward a result; *malignity* is deep, ceremony of lingering, and venomous, tho often dissimulated in act; *rancor* (akin to *rancid*) is cherished *malignity* that has soured and festered and is virulent and implacable. *Spite* is petty *malice* that delights to inflict stinging pain; *grudge* is deeper than *spite*; it is sinister and bitter: both *grudge* and *revenge* are retaliatory, *grudge* being the disposition, *revenge* the determination to repay real or supposed ingury. *Enmity*, *hostility*, and *animosity* denote also the retaliatory act; *resentment*, the best word of the three, always holds itself to be justifiable, but looks less certainly to action than to every *revenge*. *Antipathy* and *aversion* express the *hatred* of the wicked; they will be moved to *revenge* only by what they deem an injury or affront. See ABHORRENCE; ANIMOSITY; ANTIPATHY. Compare ANIMOSITY.—

I will *have* mercy on whom I will *have* mercy. *Rom.* ix, 15.

18. To engage in; perform; experience; keep up; as, we *had* a controversy; they will *have* recourse to the law; let me *have* a chance to speak. **19.** [Colloq.] To possess an advantage over; hold embarrassed, nonplussed, or vanquished; as, I *had* him at a disadvantage; he *had* me there; in a bad sense, to trick; cheat. **20.** [Colloq.] To possess an acquaintance with or a knowledge of; understand; as, my cook *has* no English. **21.** Archaic. To cause to come or go; as, to *have* one go. As *have* him away: chiefly in the imperative, and commonly indicating urgency.

Have is also used as an auxiliary with a past participle — often in connection with another auxiliary — in certain compound verb forms denoting completed action; as, I *have* eaten; I shall *have* been rewarded. It was originally used only with the participles of transitive verbs, and with the principal verb of the phrase, denoting possession of the object in the state indicated by the past participle; thus, "I *have* bought a horse" meant originally "I possess a horse bought"; but *have* is now used with the past participles of both transitive and intransitive verbs; as, I *have* gone back.

Have is sometimes used in a wrong sense, using another past tense, a use often indiscriminately condemned, the sometimes proper and necessary. **II.** *Improper construction.* Where what was "meant," "intended," or the like was, at the time when intended, some act (as of going, writing, or speaking) *future* in its purpose and not *past,* and therefore not to be expressed by a *past tense;* as, "He meant *to have gone,*" for "He meant *to go*"; "I meant *to have written* to you but forgot it," for "I meant *to write,*" etc.; "I had intended *to have spoken* to him about it," for "I had intended *to speak,*" etc.; "I should like *to have gone,*" for "I should have liked *to go.*" The infinitive with *to* expresses the relation of an act as so conceived, so that both analogy and prevalent usage require "meant to go," instead of "meant to have gone." Such construction, altho instances of it occur oc-

casionally in works of authors of the highest literary reputation and are still often heard in conversation, is now generally regarded as ungrammatical.

(2) *Proper construction.* The doubling of the past tenses in connection with the use of *have* with a past participle is *proper* and *necessary* when the completion of the future act was intended before the occurrence of something else mentioned or thought of. Attention to this qualification, which has been overlooked in the criticism of tense-formation and connection, is especially important and imperative. If one says "I meant *to have visited* Paris and *to have returned* to London before my father *arrived* from America," the past infinitive in the dependent clause is necessary for the expression of the completion of the acts purposed. "I meant *to visit* Paris and *to return* to London before my father *arrived* from America," may convey suggestively the thought intended, but does not express it.

II. *i.* To be; hold; go; come.

In certain phrases of preference, as **had liefer, had rather, had better, had as lief,** etc., the *had*, early *hadde*, subjunctive preterit, is equivalent to the modern potential, *would have, might have; I had rather die* = I would have death rather; *I had liefer die* = I would have (hold) it, *i. e.*, to die, liefer, dearer. From Anglo-Saxon to Chaucer, *me were liefer die*, to me it would be dearer to die, was the more common idiom; from 1450 to 1550, *I had liefer*; from 1550 onward, *I had rather*. Since Johnson, some grammarians and reformers have urged *I would rather*. [< AS. *habban*, have.]

Humming-bird Hawk-moth. 1/3

Most of the hawk-moths fly by twilight and have a long tongue with which they suck the sweets from flowers, and the larvæ are commonly green and have a caudal spine. The mode of feeding and flight of some of the species, as of the humming-bird hawk-moth, (*Macroglossa stellatarum*), is similar to that of the humming-bird. See illus. under DEATH'S-HEAD MOTH.

The hawk-*moths* or humming-bird moths are among the largest and stoutest of *Lepidoptera*. The body is very stout, spindle-shaped, with narrow, powerful wings. Their flight, is consequently, exceedingly swift and powerful. . . . The tongue, or maxille, is remarkably long, so that the insect is able, while on the wing, to explore the interior of deep flowers. This habit of remaining for a considerable time poised in the air on their rapidly vibrating wings causes them to be mistaken for humming-birds. . . . The larvæ of hawk-moths, as in the last segment is an acute horn sometimes represented by a simple tubercle. At rest they stand with the fore part of the body elevated in a supposed Sphinx-like attitude.

hear'ing, 1 hīr'iŋ; 2 hēr'ing, *n.* **1.** The capacity or ability to hear; the auditory faculty; as, his *hearing* is somewhat impaired. The sensations of hearing may be divided into two groups, viz., those of noise and those of tone; simple tones result from a wave-movement of the air in the form of a simple sinusoidal curve, while simple noise is the outcome of a disturbance of the air by concussion. Compare PITCH; TONE; VIBRATION.

[In the] sensation of *hearing,* the normal ear can hear as tones sound vibrations which occur from 16 to 24 times per second. Slower vibrations *occasion simply sensations of puffing or throbbing* of the air. When the vibrations exceed 40,000 a second, few people can detect tone, but certain sensitive ears can apparently discern as tone vibrations as rapid as 50,000 a second.

heart, } 1 hārt; 2 härt, *v.* **I.** *t.* **1.** To build with a solid
hart[S], } core or center; as, to *heart* a wall. **2.** To hearten. **II.** *i.* To form into a heart, or heart-like structure or fiber, as a head of cabbage.

heart, *n.* **1.** The central organ of the vascular system of animals, a hollow muscular structure that propels the blood by alternate contractions and dilatations. Compare AURICLE; VENTRICLE; and see illus. under CIRCULATION; VENTRICLE.

Heart.
a, aorta; *b,* Botal's ligament; *c,* pulmonary artery; *d, d,* auricular appendages; *e,* left ventricle; *f,* right ventricle; *g,* apex; *h,* right auricle; *i,* descending vena cava.

In the mammalian embryo, as in man, the heart first appears as two tubes lying under the head and immediately behind the first visceral arches, but gradually moves back and becomes lodged in the thorax. In mammals and birds it is four-chambered, consisting of right and left auricles and ventricles, and is generally situated obliquely with the apex (ventricles) downward or backward and to the left. The blood flows along the systemic veins through the superior and inferior venæ cavæ to the right auricle, from which it is forced to the right ventricle and thence through the pulmonary artery to the lungs, where it is purified by the action of air. From the lungs it flows by the pulmonary veins to the left auricle, and thence to the left ventricle, from which it passes out by the great systemic artery or aorta. The heart of most reptiles and amphibians has but one ventricle and two auricles. In most fishes it consists of one auricle and one ventricle. The heart of the lancelets is a simple contractile undivided tube. The heart of invertebrates is merely analogous to that of vertebrates, and is manifest under numerous modifications.

With reference to its action, the *heart* may thus be compared to two pumps working side by side — the right and the left *hearts.* The venous blood flows into the right auricle, which contracts and forces it into the right ventricle; this in turn forces the blood into the lungs to be oxygenated and to give off the impurities it has collected in its passage through the body. REISSIG AND JELLIFFE *Standard Family Physician* p. 61. [F. & W. '07.]

2. In common and literary usage: (1) The seat of the affections and passions as distinguished from the intellect and will; the emotional nature; feelings; as, his *heart* is better than his head; to win one's *heart.*

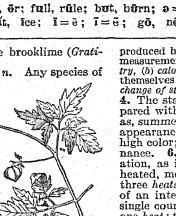
It is constantly said that human nature is *heartless*. Do not believe it. RUSKIN *Lectures on Art* p. 72. [CL. P. 1870.]



2. Destitute of spirit or courage; without heart; cowardly; craven. 3. Without a heart.— **-ly**, *adv.*— **-ness**, *n.*

heart'rend"ing, 1 härt'ren"ding; 2 härt'rĕn"ding, *a.* Extremely grievous; very depressing; dreadful.

hearts, 1 härts; 2 härts, *n.* A game of cards played by 2 to 12 persons, with a full pack, and counters or money put in a pool, in which the object is to take no hearts. The pool is divided among the players who have taken no hearts or given to the side that has taken fewest.

hearts'ease", 1 härts'ēz'; 2 härts'ēz', *n.* 1. The pansy (*Viola tricolor*); also, sometimes, some other species of violet, as a yellow one of Europe, *V. lutea*. 2. [Local, U. S.] A species of knotweed, lady's-thumb (*Polygonum persicaria*). **3.** The common wallflower. **4.** [Austral.] A species of the *Scrophulariaceæ*; the brooklime (*Gratiola pedunculata*). **heart's'-ease**†.

heart'seed", 1 härt'sēd'; 2 härt'sēd", *n.* Any species of *Cardiospermum*, a genus of climbing plants; especially, the cultivated balloon-vine (*C. halicacabum*), a native in tropical America; adventive in the United States.

heart'seine", **h.-throb**, etc. See HEART, *n.*

heart'sick, 1 härt'sik'; 2 härt'sĭk', *a.* 1. Deeply grieved or sad. 2. Expressing or indicating deep grief.

heart'sore", 1 härt'sōr'; 2 härt'sōr', *a.* Deeply grieved; sore of heart. 2. Expressing or indicating deep grief.

heart'sore", *n.* **1.** Pain or grief of heart. **2.** The cause of heartsore. **3.** A cordial disease in horses.

heart'wa"ter, 1 härt'wô'ter; 2 härt'wą"ter, *n.* [S. Afr.] *Vet.* A serious disease of sheep and goats, probably caused by some micro-organism and transmitted by a tick; characterized by inflammation of the mucous membrane of the mouth, nasal discharge, soreness of the feet, etc.

heart'whole", 1 härt'hōl'; 2 härt'hōl', *a.* 1. Having the affections not in love. 2. Having unshaken courage; undaunted. 3. Single-hearted; sincere.

heart'worn", 1 härt'wôrn'; 2 härt'wôrn', *a.* Worn with care and trouble.

heart'wurf", 1 härt'wûrf'; 2 härt'wûrf', *n.* **1.** The birthwort (*Aristolochia clematitis*). **2.** Same as HARTWORT. **3†.** A species of mint. **4†.** Mellot.

heart'y, 1 härt'i; 2 härt'y, *a.* [HEART'-IER; HEART'-IEST.] **heart'y**, 1 E-ST.] **1.** Proceeding from or prompted by the heart; earnest; cordial; sincere; as, *hearty* assistance.

The *hearty* good-will of this truly noble race.

H. SPENCER *Lake Dwellings in Cent. Africa* p. 72. [s. 1887.]

2. Full of health and strength; sound; vigorous.

Scots is a hale, *hearty* man, through all his writings.

E. P. WHIPPLE *Essays, Feats of 19th Cent.* vol. i, p. 306. [s. 1848.]

3. Craving, consuming, or supplying abundant strength or nourishment; as, a *hearty* meal; a *hearty* appetite; a *hearty* eater. **4.** Well fitted to bear crops; fertile; said of land. **5.** Full of courage; bold. **II.** n. [=pl.] A brave, vigorous, hearty fellow, as a sailor; especially in the phrase *my hearty!* Syn.: see AMICABLE; HEALTHY; HOSPITABLE.— **heart'y-hale"**, *a.* Wholesome for the heart.

heat, 1 hēt; 2 hēt, *n.* **I.** 1. To make or cause to become hot; impart heat or warmth to; as, to *heat* water; to *heat* a room. 2. To make feverish; as, wine *heats* the blood. **3.** To excite with passion or emotion; make ardent or eager; inflame; as, to *heat* a multitude; inflame; as, to *heat* the feelings; *heated* with passion. **4.** To cause to ferment. **5.** To run over in a heat or in heats, as in a race. **II.** *i.* **1.** To become hot or warm; as, the iron *heats*; mutual relations *heat* and cool. **2.** To generate heat through fermentation or chemical action; as, fodder *heats* if stored green. **3.** To become inflamed or excited; to wax warm. [< AS. *hēatan*, < *hāt*, hot.]

heat, *n.* **I.** *Physical science.* A form of energy generated by the transformation of some other form of energy, as by combustion, chemical action, or the stoppage of mass-motion by friction. Two forms of heat are recognized: **heat proper**, which is sensible to bodies, and **latent heat**, which is a form of wave-motion occurring in luminiferous ether. It was formerly believed to be caused by the action of a peculiar material substance, termed caloric, but scientific investigation has demonstrated that it is the energy of molecular motion, which varies in direction and degree and is transmitted as a wave-motion. Heat is regarded is solid, fluid, or gaseous. This motion only ceases entirely at the absolute zero-point and can in theory be increased indefinitely. A source of heat, which is transferred some of its energy to any body approaching it, which in part increases the temperature of the latter and in part enables it to do external work, that is, to expand and press back the surrounding atmosphere, etc. The three most marked effects of heat upon a given body are: (1) increase of temperature; (2) increase of volume; and (3) change of condition or state, as from a solid to a liquid. A large amount of heat is required to produce the latter effect, as, for instance, to vaporize water. The heat used in this process is termed **latent**, and may be transformed into **sensible heat** by condensation. Heat may be transmitted from one body to another in three ways: (1) by *conduction*, as in the case of an iron bar, one end of which is plunged in a fire, where a great rise of temperature will be noted from the heated toward the cool end of the rod, by a process of conduction from molecule to molecule throughout the mass; (2) by *convection*, as in the case of a mass of liquid over a flame, in which the heated layer expands and, becoming less dense, rises in accordance with the law of gravity, to be replaced by the heavier layer above it, which rises again in turn, until the whole column is heated to boiling-point; (3) by *radiation*, in which the heat of a body causes vibrations in the luminiferous ether surrounding it, which are transmitted to other wave-motions traveling with the velocity of light. When these rays impinge upon a body they are absorbed by it and the energy they carry is communicated to its molecules and manifested as a heat effect. An example of this may be obtained by exposing the hand to sunlight. The shorter of these radiant heat-waves are luminous and identical with light-waves, but those propelling the most marked thermal effects are of greater length than those of which the eye takes cognizance as light, and have a longer vibrating period. They are susceptible of reflection, refraction, diffraction, and polarization, exactly as are the light-rays. See CALORIC; ENERGY; TEMPERATURE.

The heat thrown out from every square yard of the Sun's surface is greater than that which would be produced by burning six tons of coal on it each hour.

J. N. LOCKYER *Elements of Astron.* p. 67. [A. 1889.]

2. The sensation produced by this physical agent. **3.** *Physics.* The branch of physics that treats of the effects produced by the force defined above. It treats (1) of the measurement of the effects of heat, including (*a*) *thermometry*, (*b*) *calorimetry*, and (*c*) *hygrometry*; and (2) of the effects themselves and their relations, including (*a*) *expansion*, (*b*) *change of state*, (*c*) *conductivity*, and (*d*) *thermodynamics*. **4.** The state of being hot; a temperature high as compared with a mean, standard, or normal temperature; as, *summer heat*; swelling attended by *heat*. **5.** Color; appearance, or condition indicating high temperature; high color; redness; flush; as, *heat* visible in the countenance. **6.** A single heating, melting, or smelting operation, as in working iron or glass, or in fusing material heated, melted, etc., at one time; as, the foundry runs three *heats* a day. **7.** A single effort or action, or one of an interrupted series of such efforts; especially, a single course or division of a race; as, to do the work at one *heat*; to run several *heats*. **8.** Greatest vehemence or fury; excitement or agitation; unusual animation; ardor; fervency; as, the *heat* of the strife; the *heat* of anger; the *heat* of debate. **9.** Sexual excitement in animals, especially in females. **10.** Fermentation. **11.** *Physiol.* The sensation of warmth experienced when the heat-spots are stimulated. **12†.** An exercise gallop given to a race-horse when preparing for a race. **13†.** *Medical Physiol.* A fundamental quality of elements, humors, and bodies in general; opposed to *cold*. [< AS. *hǽtu*, < *hāt*.] — **black heat**, a mere trace of heat in a metal insufficient to change the color of the metal.— **black-red h.**, the temperature of a metal at which it begins to be luminous by daylight.— **blue h.** (*Forging*), the degree of heat that produces an oxidized film of blue on steel.— **bright h.**, a temperature of at least 1700° F.— **cherry-red h.**, a heat more intense than the dull red and less vivid than the bright red of glowing iron when exposed to view in daylight.— **dynamical theory of h.** 1. The theory which supposes heat to be, not a peculiar kind of matter, but a peculiar form of molecular energy. — **h.-absorbing**, *a.* Same as DIATHERMANOUS. — **h.-agitate**, *v.t.* To subject to the action of heat.— **h.-agitator**, *n.* A device for producing a current in a conductor, proportional to the time of flow, the resistance, and the square of the strength of the current. — **kilogram-centigrade h.-unit**, same as GREATER CALORY.— **latent h.**, potential energy of heat, as in a change in the internal constitution of a substance, produced by the absorption of heat without rise of temperature, as in fusion or vaporization.

All the *heat* which is necessary to boil off a liquid, becomes *latent* in its vapor.

YOUMANS *Hand-Book Household Science* p. 46. [L. 1857.]

— **latent h. of fusion**, the heat required in the molecular work of changing a substance from the solid to the liquid state.— **latent h. of vaporization**, the heat, in calories, required to change one mass of a liquid into vapor. — **h. of vaporization**†.— **low red h.**, the temperature (about 1300° F.) that gives a deep-red color to iron subjected to it. — **molecular h.**, the specific heat of a substance multiplied by its molecular weight.— **molecular h.**, of gas, a unit, the product of a body's heat of vaporization by its molecular weight.— **mow-h.**, *n.* A disease of hay or corn due to fermentation when it is stacked in a mow.— **prickly h.**, a summer rash of bright-red pimples, with heat, itching, and pricking as if by needles.— **radiant h.**, heat passing through space as light, or in vibrations similar to those of light but of a wave-length too long to affect the optic nerve; radiant energy.— **red h.**, the temperature at which metals and some other substances give forth a red light.— **rut**, *n.* A state of strong passion or emotion.— **refining h.**, the heat required to give fineness of grain to steel. It is computed as 655° C.

or 1211° F.— **reversible h.** (*Elec.*), the heat normally generated at the junction of dissimilar electric conductors when reversal of the current absorbs heat.— **sensible h.**, heat not latent, and therefore productive of a rise of temperature.— **specific h.**, the number of units of heat required to raise a unit of mass of any substance one degree in temperature. — **stagnation of h.**, accumulation of heat caused by surrounding nonconductors, as in a sealy boiler.— **thermometric h.**, the heat of a material substance: opposed to *radiant heat*.— **total h.**, the amount of heat required to change a mass of liquid, from melting-point to saturated vapor.— **white h.**, the temperature of a metal at which it emits a white light; hence, a state of the most intense passion.

heat, *t.* het [Archaic & Dial.], *imp. & pp.* of HEAT, *v.*

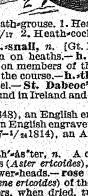
heat'-een"ters, h.-drop, etc. See HEAT, *n.*

heat'er, 1 hīt'ər; 2 hēt'er, *n.* One who or that which heats. Specif.: (1) A heating-apparatus, as a coil of steam-pipes or a radiator; as, a *bath-heater; gas-heater.* (2) A pan for giving cane-juice or maple-juice a first heating before it goes to the vacuum-pan. (3) A mass of iron intended to be heated and placed in a hollow smoothing-iron. (4) One of the workmen who assists in the operation of rolling large steel armor-plates. (5) *Cooperage.* A package of large shavings burned in a crate inside of a barrel, to shrink the staves. (6) *Elec.* That part of a Nernst lamp which, when the current is started, becomes heated and thus in turn starts the glower. (7) *Weaving.* A rog in a loose-reed loom.

— Baltimore heater, a latrobe.— **electric h.,** a device for heating by electricity, consisting of circuits of refractory substances of high resistance through which a current is passed.— **feed-water h.,** an apparatus for heating water before it is fed to a boiler.— **heat'er-coil",** *n.* A coil of pipe for containing hot water or steam for heating.— **h.-piece,** *n.* [Local, U. S.] A small hearse-shaped piece of land.— **h.-plate,** *n.* A device, operating by conduction, for keeping the oil in a lamp from chilling.— **h.-shaped,** *a.* Of triangular form, like the heater of a box iron.— **king h.** [U. S.], an oval-shaped sheet-iron heating-stove.

heat'-dl"ter, etc. See under HEAT, *n.*

heat'ful, 1 hīt'ful; 2 hēt'ful, *a.* Full of heat or warmth.



heath, 1 hīth; 2 hēth, *n.* To clothe or cover with heath.

heath', *n.* 1. Open land; any uncultivated, desolate tract covered with shrubs and coarse herbage. 2. Any shrub of the genus *Erica* and *Calluna vulgaris*, the common heath (heather) of the family *Ericaceæ*, or more widely, any plant of the family: in this last sense the equivalent of *heathwort.* (1) The **common heath** is the true "heather" of Scotland, a very dense evergreen undershrub, indifferent to soil, climate, or temperature, and in consequence covering large tracts of hills and moorlands. It has opposite and numerous leaves crowded and imbricated on the branches, and close one-sided spike-like racemes of rose-colored flowers. It is used for fuel and a variety of domestic purposes. (2) The **cross-leaved heath** (*E. tetralix*), which are also exceedingly hardy and widely diffused over Great Britain.

Oh! beautiful those wastes of *heath*
Stretching for miles to lure the bee.
MARY HOWITT *Autumn* st. 12.

3. In Coverdale's and later versions of the Old Testament, a desert plant; identified both as tamarisk (*Tamarix gallica*) and savin (*Juniperus sabina*). *Jer.* xvii. 6; xviii. 6. 4. One of various satyrid butterflies; as, the large *heath* (*Brisenda tithonus*). 5. *Obs.* A heathen.

— alkali heath, a deep-rooted perennial (*Frankenia grandifolia*), the most characteristic plant in the "gooselands" of California. It possesses excessive powers of secreting mineral salts in the soil and unsuitability for the raising of wheat and stone-fruit.— **American false h.,** a small heath-like shrub of the rock-rose family, with scaly evergreen leaves and yellow flowers. It belongs to the northeastern United States.— **Australian h.,** any of various species of *Epacris*, cultivated in greenhouses, especially *E. grandiflora.*— **besom-h.,** n. The cross-leaved heath.— **black-berried h.,** same as HEATHBERRY.— **Cantabrian h.,** same as ST. DABROC'S HEATH. [W.].— **Cornish h.,** a low-growing plant (*Erica vagans*) found in Cornwall, England, and on the coasts of the Mediterranean.— **h.-bell,** *n.* Same as HEATHER-BELL.— **heath'ber"ry,** *n.* The crowberry (*Empetrum nigrum*).— **h.-bird,** *n.* The heathcock.— **h.-brambler,** *n.* The English dewberry.— **h.-butterfly,** *n.* Same as HEATH, 4.— **h.-clad,** *a.* Covered or crowned with heath.— **h.-cock,** *n.* 1. The male of the heath-grouse (*Tetrao tetrix*) found in the heathcountry of Great Britain, the male (black-cock or heath-cock) of which is mostly black with a lyre-shaped tail. **h.-grouse,** *n.* 2. **hen,** *n.* 1. The female of the heath-grouse. 2. One of various Northamerican grouse, especially *Tympanuchus cupido*, now extinct except on Martha Vineyard.— **h.-pea,** *n.* A European perennial herb (*Lathyrus macrorhizus*) of the bean family, producing pods resembling peas, which are eaten like potatoes.— **h.-peat,** *n.* Peat derived chiefly from decomposed heather.— **h.-poult,** *n.* The young of the heath-grouse. **h.-pout,** *n.*— **rose,** *n.* The rose of Sharon.— **h.-snail,** *n.* [Gk. Brit.] A small (*Helix ericetorum*) common on heaths.— **h.-tax,** *n.* [Local, Eng.] A fee or due levied on members of the Newmarket race-club for the upkeep of the course.— **h.-thistle,** *n.* [Local, Eng.] The ring-ousel.— **St. Dabeoc's h.,** a heathwort (*Menziesia polifolia*) found in Ireland and western Europe. **Irish h.,** ?.

Heath-cock.

Heath, n. 1. **Charles** (1784–1‡18‡8), an English engraver. 2. **James** (1‡/11‡777–11/11‡834), an English engraver; father of Charles. 3. **William** (1/1737–1/11‡814), an American Revolutionary general.

heath'-as"ter, 1 hīth'-as"tər; 2 hēth'-as'ter, *n.* A common aster of the eastern United States (*Aster ericoides*), having thick clusters of small white flower-heads.— **rose heath-aster,** a white-frayed aster (*Leucelene ericoides*) of the southwestern United States. Its flowers, when dried, turn red.

Heath'coat, 1 hīth'kōt; 2 hēth'cōt, **John** (1/11‡753–1/11‡851), An English mechanic; inventor of a lace-making machine.

heath'en, 1 hī'thn; 2 hē'thn (XIII), *a.* 1. Gentile or pagan; as, *heathen gods.* 2. Irreligious; rude; barbarous.

heath'en, *n.* [HEATHENS, or collectively **heathen,** *pl.*] 1. A person belonging to a nation or race neither Christian, Jewish, nor Mohammedan; in strict use, one of such a nation who has not abandoned his original creed; one who does not acknowledge the God of the Bible. The term originally included Mohammedans, but has become restricted in modern usage to those peoples whose beliefs are polytheistic and whose civilization and culture are rudimentary.

The Christian Church has at last an awakened consciousness of its debt of love to the *heathen.*
J. M. HOPPS *Natural Theology* pt. vi, p. 573. [P. & W. 1884.]

2. *Spirit.* A person belonging to any nation except the Jews; a Gentile; hence, from the prevalence of idolworship among those nations, an idolater: in specific use, *the heathen.* 3. Any irreligious, rude, or uncultured person; collectively, a class of such persons. 4. A hoyden. 5†. A dweller on a heath. [E.] [< AS. *hæthen*, heathen, < *hæth*, country.] SYN.: see GENTILE.

heath'en-dom, 1 hī'thn-dum; 2 hē'thn-dum, *n.* 1. The condition or state of a heathen; heathenism.

Out of the dead, deep night of *heathendom.*
TENNYSON *Queen Mary* act iii, *sc.* 3.

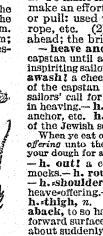
2. The regions of the world, collectively, inhabited by heathen peoples; also, heathen peoples collectively.

heath'en-shood†.

heath'en-ish, 1 hī'thn-ish; 2 hē'thn-ish, *a.* Pertaining to, characteristic of, or resembling heathen; hence, irreligious; rude; offensive; barbarous; cruel. **heath'ni-cal†.**

Scorates— the least *heathenish* of heathen men.
MILDRED *Studies of Christianity* p. 201. [A. D. A. 1875.]

— hen'then-ish-ly, *adv.*— **hea'then-ish-ness,** *n.*



hea'then-ism, 1 hī'thn-izm; 2 hē'thn-izm, *n.* 1. Heathen religious practises, beliefs, or systems; paganism; idolatry. 2. The condition, manners, or morals of heathen; ignorance; barbarism. **hea'then-ship†.**

The social condition has created this domestic *heathenism.*
BOOTH *Free Church app.*, p. 31. [P. & W. 1890.]

hea'then-ize, 1 hī'thn-iz; 2 hē'thn-īz, *vt.* & *vi.* [-IZED; -IZING.] To render heathen or heathenish; practise heathenism.

hea'then-ness, 1 hī'thn-nes; 2 hē'thn-nēs, *n.* [Poet.] 1. The state of being heathen. 2. The regions inhabited by the heathen. **hea'then-esse†** [Archaic]. [heathendom.

heath'er, 1 hī'thər; 2 hē'ther (XIII), *n.* 1. Heath; esp. heather" of Scotland, a very dense evergreen undershrub, indifferent to soil, climate, or temperature, and in consequence covering large tracts of hills and moorlands. It has opposite and numerous leaves crowded and imbricated on the branches, and close one-sided spike-like racemes of rose-colored flowers. It is used for fuel and a variety of domestic purposes. (2) Any species of *Erica*. 3. **fine-leaved heath** (*E. cinerea*) and the **cross-leaved heath** (*E. tetralix*), which are also exceedingly hardy and widely diffused over Great Britain.

Common Heather (*Calluna vulgaris*).

Oh! beautiful those wastes of *heath*

MARY HOWITT *Autumn* st. 12.

heath'-bell", 1 hīth'-bel"; 2 hēth'-bel", *n.* The bell-like flower of the heather, especially of *Erica cinerea* and *E. tetralix.* **heath'-bell‡.**

— h.-bird, *n.* [Scot.] Stalks and roots of burnt heather.— **h.-bleat,** *n.* [Ireland.] The snipe. **h.-bleater†.**— **h.-cat,** *n.* [Scot.] A wild cat found among the heather. 2. Hence, figuratively, a person of roving habits.— **h.-claw,** *n.* A dewclaw.— **h.-cress,** *n.* An unimportant British species of grass (*Triodia decumbens*), flourishing on wet, cold soils. **heath'-grass‡.**— **h.-linnet,** *n.* [Local, Eng.] The meadow-pipit.— **h.-peeper,** *n.* [Local, Brit.] The European ring-ousel (*Turdus torquatus*).— **h.-whin,** *n.* A small, straggling prickly shrub (*Genista anglica*) of Europe.— **mountain-h.,** *n.* The sand-myrtle. See under LEIOPHYLLUM.— **scarlet h.,** a beautiful, low evergreen ericaceous shrub (*Calluna vulgaris-alba*) with imbricated scale-like leaves and white racemose flowers: a native of the north temperate zone.— **tree-h.,** *n.* Clothed in heather.— **heath'er-i-ness,** *n.* Heathery character or quality.

heath'er-y, 1 hēth'er-i; 2 hēth'er-y, *a.* Of, resembling, or abounding in heather; heathy.

heath'er-y, 1 hīth'ər-i; 2 hēth'er-y, *n.* [-IES, 1 -iz; 2 -īs, *pl.*] A house in which heaths are grown; also, a place where heath grows.

Heath'field, 1 hīth'fīld; 2 hēth'fēld, **Lord** (1‡/11‡717–1/11‡790). George Augustus Elliott; an English general who defended Gibraltar against the French and Spanish, 1779–1783.

heath'-fowl", **h.-grass, h.-hen,** etc. See HEATH", *n.*

Heath Town. An urban district in Staffordshire, England.

heath'-wort", 1 hīth'wūrt"; 2 hēth'wurt", *n.* Any plant of the heath family (*Ericaceæ*) usually in the plural — the *heathworts* — as the equivalent of *heath family.*

heath'y, 1 hīth'i; 2 hēth'y, *a.* Of, pertaining to, or resembling heath; covered by or abounding with heaths.
The solemn wastes of *heathy* hill Sleep in the July sunshine still.
MATTHEW ARNOLD *Resignation* st. 4.

heat'ing, 1 hīt'iŋ; 2 hē'tiŋ, *ppr.* & *vbl. n.* of HEAT, *v.*

— heat'ing-back", *n.* A chamber back of a forge, in which the air intended for the blast is heated.— **h.-coil,** *n. Elec.* A coil of wire of a heat-capacity sufficient to maintain its temperature when heated by an electric current.— **h.-machine,** *n.* A heating-furnace combined with an automatic feeder and conveying-machine.— **h.-pan,** *n.* Any pan for heating; specif., in sugar-making, the first pan of a series in which cane-juice is heated.— **h.-surface,** *n.* That surface in a steam-boiler or similar apparatus from which the heat passes to the liquid to be heated; the heated fire-surface.— **h.-tube,** *n.* A water-tube exposed to the fire in a steam-boiler.— **parallel h.,** the heating of a liquid flowing inside a tube by a warmer liquid flowing outside in the same direction opposed to *counter-current heating*, in which the liquids flow in opposite directions. **parallel-current heating†.**

heat'less, 1 hīt'i-lis; 2 hē'ty-ly, *adv.* In a heating manner; in a way to make or become hot.

heat'less, 1 hīt'les; 2 hē'tles, *a.* Without heat; cold.

heat'-light"ning, **h.-measure,** etc. See HEAT, *n.*

Heat'on Nor'ris, 1 hī'tən nor'is; 2 hē'tən nōr'is, An urban district and town in Lancashire, England.

heat'-rash", etc. See HEAT, *n.*

heaume', *n.* In medieval armor, a helmet; especially, a large helmet that rested on the shoulders.

he-au"to-mor'phism, 1 hī-ŝ"to-mōr'fizm; 2 hē-ş"to-mōr'fizm, *n.* Same as AUTOMORPHISM. [< *Gr. heauton*, of oneself, + *morphē*, form.]

he"au-toph'a-ny, 1 hī"o-tof'a-ni; 2 hē"ş-tof'a-ny, *n.* [Rare.]

he-au'to-type, 1 hī-ŝ'to-tīp; 2 hē-ş'to-typ, *n.* A plant or animal of a species identical with one already known and scientifically described. [< *Gr. heauton*, of oneself, + TYPE.]

heave, 1 hīv; 2 hēv, *v.* [HEAVED or (chiefly nautical) **heav'n**; HOVE; HEAV'ING.] **I.** *t.* 1. To raise with effort, as something heavy; move upward or onward by putting forth exertion; formerly, to lift in any way; raise; hoist; as, to *heave* a large stone.

Who *heaves* old Ocean, . . . POPE *Essay on Man* ep. i, l. 158.

2. To throw or cast forth with a toss; cast over: chiefly nautical; as, to *heave* the lead.

Heaved all their guns, their bundering bark to wave.
CAMPBELL *Pleasures of Hope* pt. ii, st. 12.

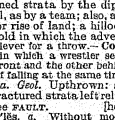
3. To cause to swell or rise; as, to *heave* the bosom. 4. To bring forth from the breast with effort; give vent to or utter with difficulty or pain; as, to *heave* a sigh or groan. 5†. To elevate in feeling or in one's state of mind; also, to raise in condition or rank; elate; as, to be *heaved* up with emotion; to *heave* one into honor. 6. *Geol. & Mineral.* (1) To fracture and actually throw out of position, either vertically or horizontally, as where a mineral vein is thrown upward or aside by a later fault-vein.

Instances are mentioned where an intersected lode is not *heaved* at a depth of 150 feet.
Pamphlet on *Geol.* vol. i, pt. i, p. 318. [CL. P. 1886.]

(2) To produce by vertical faulting (a horizontal separation between parts of mineral veins or strata), giving the appearance of horizontal dislocation. 7. *Naut.* To pull: haul: draw; move into a certain place; as, to *heave* the anchor; to *heave* a ship aback, etc. S. [Prov. Eng.] To try the weight of by lifting; weigh. 9†. To lift at baptism, as a child; baptize; hence, to be sponsor for at baptism. 10†. To increase.

II. *i.* 1. To be thrown or raised up; rise or swell up; bulge out.

When *heave* the turf in many a mouldering heap,
GRAY *Elegy* st. 5.



The rude forefathers of the hamlet sleep.

2. To rise and fall alternately and heavily, as the waves of a heavy sea, or the bosom in labored breathing. 3. To pant from labor or exertion; as, to *heave* for breath. 4. To make mighty efforts; struggle; contend. 5. To make an effort to vomit; retch. 6. *Naut.* (1) To push or pull: used with *at*; as, to *heave at* the capstan, *at* a rope, etc. (2) To move: said of a ship; as, the *heaves* ahead: the brig *heaves* astern. heav'en, *n.* 1. The abode of God and of blest spirits; the dwelling-place or state of existence of righteous souls after their life on earth. In the religious system of the Greeks and Romans heaven was reserved to the gods and deified heroes or demigods; the Elysian Fields of the lower worlds held the place now held by heaven in the

doctrine of retribution for good and evil. The Jewish mystics adopted the notion of seven heavens rising above one another like the stages of a building: the first, the space between the clouds and the earth; the second, the region of the clouds; the third, fourth, fifth, and sixth, the home of the various grades of angels; the seventh, the abode of God and the seraphim. The Koran adopted this teaching and placed the happiness of heaven in the delights of sense, which was also the belief of the German warriors and the Indian hunters. Dante's notion of heaven, as shown in his *Paradiso*, extended to the seven planetary systems, the region of the fixed stars, and the *primum mobile*, ranged in gradually expanding circles beneath the empyrean, at the center of which was the fixed throne of God. 2. The region or regions surrounding the earth; especially, the expanse over the earth, within the observer's horizon, which seems like a great dome or arch containing the sun, moon, and stars; the sky; firmament: frequently used in the plural; as, the starry *heavens*; the *heaven* is overcast with clouds.

In the Bible all the depths of space beyond the surface of the earth are designated by the general term *heaven*, the heights, or the things which are high. J. W. DAWSON *Nature and the Bible* lect. ii, p. 50. [c. a BRIGG. 1875.]

3. Any place or condition of supreme happiness; a state of bliss; exalted felicity; as, a *heaven* of love; the *heaven* of imagination. 4. The *Hegelian* Logic is at once a Logic and a Metaphysic. E. CAIRD *Hegel* p. 195.

II. n. An adherent of this system. After Hegel's death it was customary in Germany to speak of a *Right* and *Left Wing*, and a *Middle*, to the Hegelians, as dependent chiefly on the nearness of their relations to theistic philosophy.

He-ge'li-an-ism, *n.* The philosophical system of Hegel (1770–1831). Its controlling assumption was the so-called Hegelian *dialectic*, or principle which enables reflective thinking to arrange all the categories, or necessary conceptions of reason, in an order of development that corresponds to the actual order, in development, of all reality. The law of the identity of thought and being Hegel considered as making possible a complete and final philosophy. In his earlier work, the *Phenomenology* (1807), he sketched the system as it appears in the thinking of the race. In his *Logic* he gave the exposition of the controlling principle in its pure form, and in his later works he applied the principle to art, history, comparative religions, the philosophy of ethics and politics, and to the history of philosophy itself. The system of Hegel is customarily and not inappropriately, characterized as *absolute idealism*. **He'gel-ism†.**

He-ge'li-an-ize, *v.* [-IZED; -IZING.] *I. t.* To make or modify after the pattern of Hegelianism. **II. i.** To go speculatively in the direction of Hegelianism.— **He'gel-iz"er**, *n.* One who imitates Hegel.

Nor honored less than he who *heirs* Is he who founds a line. WHITTIER *Amy Wentworth* st. 11.

heir, *n.* *I. Law.* One who on the death of another becomes entitled by operation of law to succeed to the deceased person's estate, as an estate of inheritance; an heir at law.

The term *heir* has a very different signification at common law from what it has in those states of the Union which have adopted the civil law. In the latter, the term applies to all persons who are called to the succession, whether by the act of the party or by operation of law. The person who is vested universal successor by a will is called the testamentary *heir* and the next of kin by blood is the testacy, called the *heir* at law, or *heir* by intestacy. The executor of the common law is in many respects not unlike the testamentary *heir* of the civil law. Again, the administrator in many respects corresponds with the *heir* by intestacy. BOUVIER *Law Dict.* Rawle's revision, p. 941.

2. One who or that which succeeds to any qualities of another, by reason of community of origin, or inherits anything by transmission; as, Napoleon III. was not *heir* to the military genius of his distinguished uncle.

Bot.* A genus of erect, tall, coarse herbs of the aster family, natives of North and Central America, having alternate simple leaves and pedunculed heads of yellow flowers: popularly called *sneezeweed* and *sneezewort.* [< Gr. *helenion,* kind of plant, perhaps < *Helenē,* Helen, wife of Menelaus.] — **he-le'ni-oid,** *a.*

Hel'ens-burgh, 1 hel'enz-bur-ə; 2 hĕl'ĕnz-bûr-ŏ, *n.* A fishing town in Dumbartonshire, Scotland.

Hel'e-nus, 1 hel'ı-nus; 2 hĕl'ē-nŭs, *n.* In Homer's *Iliad,* a Trojan soothsayer and son of Priam and Hecuba; captured by Ulysses while in retirement at Mt. Ida, he was compelled to declare how Troy could be taken; after the city's destruction, he fell to the share of Pyrrhus, who gave him Andromache in marriage and made him his successor in the kingdom of Epirus; introduced into Shakespeare's *Troilus and Cressida.* Also spelt HELENUS [Gr.].

Hel'e-och-a'ris, 1 hel'ı-ok'-ə-ris; 2 hĕl'ē-ŏc'a-rĭs, *n.* Same as ELEOCHARIS.

He'leph, 1 hī'lef; 2 hē'lĕf, *n. Bib. Josh.* xix, 33.

he-lep'o-lis, 1 hı-lep'o-lis; 2 hē-lĕp'ō-lĭs, *n.* [Gr.] *Class. Ar-cheol.* A movable war-tower.

He'ler, 1 hī'lər; 2 hē'lĕr, *n. Bib. 1 Chron.* xi, 27.

Helf'fer-ich, 1 helf'ar-ik; 2 hĕlf'ĕr-ĭc, **Karl T. H.** (?–1872–1924). A German statesman.

Hel'ga, 1 hel'gə; 2 hĕl'ga, *n. Ice. Sagas.* The elder son of Bele, and after him king, jointly with his brother Halfdan; slain by Frithiof. See BELE.

Hel'go-land, 1 hel'gō-land; 2 hĕl'gō-lănd, *n.* A German island and fortress in the North Sea: 1 by ⅔ m.; 36 m. N. W. of the Elbe: traded by Great Britain, 1890. The British fleet defeated the German fleet off **H. Bight,** Aug. 28, 1914.

hel'gram-ite, *n.* Same as HELLGRAMMITE.

Hel'grind, 1 hel'grınd; 2 hĕl'grĭnd, *n. Norse Myth.* The portals of Hel's abode. **Hel'gate‡.**

Hel'heim, 1 hel'hīm; 2 hĕl'hīm, *n. Norse Myth.* The habitation of Hel, goddess of death. Turbid rivers, full of mud, venom, and swords, flow through it: a dog with bloodstained breast howls at the entrance; hosts at all comers; the gates creak harshly; and a gloomy fog envelopes all.

He'li, 1 hī'lī; 2 hē'lī, *n. Bib. Luke* iii, 23.

he'li-, 1 hī'lı-; 2 hē'lĭ-. From Greek *hēlios,* the sun: a combining form.

he-li'a-cal, 1 hı-lī'ə-kəl; 2 he-lī'a-cal, *a.* Of or pertaining to the sun: in the ancient astronomy, designating those risings and settings of the stars that took place as near the sun as they could be observed.
Hellenic literature abounds in metaphoric allusions to the disappearance of the stars amid the sun's rays, and their appearance in the morning twilight — their *heliacal* settings and risings.
HUMBOLDT *Cosmos* tr. by Otté, vol. iii, p. 118. (a. 1859.)
[< LL. *heliacus,* < Gr. *hēliakos,* of the sun, < *hēlios,* sun.] **he-li'a-cal-ly,** *adv.* **he-li'a-cal-ness,** *n.*

he-li'ac-al, 1 hı-lī'ə-kəl; 2 he-lī'a-cal. *a.* Same as HELIACAL.

he-li'ad-e-Ra'du-les'cu, 1 hē'lı-ad-ē'rə-dū-les'kū; 2 hē'lĭ-ăd-ē'ra-dū-lĕs'cū, Nicolae (1800?–91 or 1872). A Rumanian poet.

he'li-a-ea, 1 hī'lı-ē'ə; 2 hē'lĭ-ē'a, *n.* A court of the dicasts in ancient Athens.
The most important tribunal was the *Heliæa.*
Farrow *Greece* vol. ii, p. 97. (tr. & v. 1867.)

2. The place in which a court or dicastery sat. [< Gr. *hēliaia,* public court at Athens.]

He'li-an-the'ra, 1 hī'lı-an-thē'rə; 2 hē'lĭ-ăn'tē-ra, *n. Bot.* A monotypic genus of the American pitcher-plants. *H. mutans* of Guiana is the pitcher-plant.

He'li-an'the-rin, 1 hī'lı-an'thē-rin; 2 hē'lĭ-ăn'tē-rĭn, *n. Bot.* A monotypic genus of the American pitcher-plants. *H. mutans* of Guiana is the pitcher-plant.

He'li-an'thic, *a. Bot.* Of, pertaining to, or resembling *Helianthus.*— **He'li-an'the-mum,** *n. Bot.* A considerable genus of spreading shrubs of the family *Cistaceæ* having simple subwoolly leaves and often showy 5-petaled ingenious flowers. *H. vulgare* is a cultivated sunrose. See *rock-rose.*— **he'li-an'thic,** *a.* Designating a colorless acid ($C_{11}H_{10}O_6$) found in sunflower-seeds, which produces a fermentable sugar and a violet-coloring substance.— **he'li-an'thin,** *n. Chem.* A complex coal-tar orange dye used on silk and wool; gold orange; methyl orange.— **he'li-an'thoid,** *a.* & *n.* Same as *Helianthoideæ.*— **He'li-an'thoi-dē'æ,** *n. pl.* = *Helianthoideæ.*— **He'li-an-thoi'de-æ,** *n. pl.* **I.** *Zoöph.* The *Actinaria.* **2.** *Bot.* A subfamily of the order Asterales, the family Asteraceæ. They have opposite leaves, a chaffy receptacle and a non-plumose pappus. **He'li-an-thoi'dal**‡.— **he'li-an-thoi'de-an,** *a.* & *n.*— **He'li-an'thus,** *n. Bot.* A large genus of mainly North American annual or perennial plants of the aster family — the sunflowers — with usually opposite leaves and large heads of yellow flowers. *H. annuus* is the common sunflower, and *H. tuberosus* the Jerusalem artichoke.

He-li'as, 1 hı-lī'əs; 2 he-lī'as, *n. Bib.* (Apocrypha). **2** *Esd.* vii, 39.

he'li-ast, 1 hī'lı-ast; 2 hē'lĭ-ăst, *n.* Same as DICAST. [< Gr. *hēliastēs,* < *hēlia,* heliæa.] See HELIÆA.— **he'li-as-ter'i-dæ,** 1 hī'lı-as-ter'ı-dē; 2 hē'lĭ-as-tĕr'ĭ-dē, *n. pl. Echin.* A family of holothuroidean starfishes having the abactinal skeleton reticulate, the ambulacral papulæ, and double interbranchial septa. **He'li-as'ter,** *n.* (t. g.)— **he'li-as'ter-id,** *n.*— **he'li-as'ter-oid,** *a.* & *n.*

hel'ic-, 1 hel'ık-; 2 hĕl'ĭc-. From Gr. *helix,* a spiral (see HELIX): combining forms.—

He'li-ca'ce-a, *n. pl. Conch.* The *Helicidæ.*

Other words beginning with these prefixes will be found in alphabetical place, either singly or in groups.

hel'i-cal, 1 hel'ı-kəl; 2 hĕl'ĭ-cal, *a.* **1.** Pertaining to, shaped like, or following the course of a helix or spiral. **2.** Of pertaining to the helix or the helix of the external ear; as, the *helical* muscles. **hel'ic‡.**

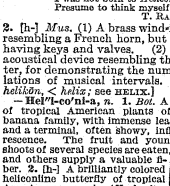
He'li-ca'nus, 1 hel'ı-kā'nus; 2 hĕl'ĭ-cā'nŭs, *n.* In Shakespeare's *Pericles,* a lord of Tyre.

hel'i-ces, 1 hel'ı-sēz; 2 hĕl'ĭ-cēz, *n.* Plural of HELIX.— **hel'iced,** *a.* Provided with helices; having helices or whorls.

He'li-chry'sum, 1 hel'ı-krəi'səm; 2 hĕl'ĭ-cry'sŭm, *n. Bot.* A vast genus of herbs or shrubby plants with alternate entire leaves and rather large heads with a radiate scarious involucre. The color is retained after drying. Everlasting flower: species in cultivation are known as *everlastings* or *immortelles.* See *flus,* under IMMORTELLE. [< HELI + Gr. *chrysos,* golden.]

He'lic-i-da, *n. pl. Conch.* A family of terrestrial pulmonate gastropods, especially those having an entire arched jaw, the lateral lingual teeth bicuspid or tricuspid but with internal cusps obsolete, the marginal teeth short and transverse, and the genital system bauhiniform: including most common land-shells.— **he'li-cid,** *n.*— **he-lic'i-form,** *a.* Helix-shaped; helical.— **hel'i-cin,** *n. Chem.* A white crystalline compound ($C_{13}H_{16}O_7$) from the acetone of salicin + acid on salicin.— **He'li-ci'næ,** *n. pl. Conch.* A subfamily of *Helicidæ,* containing typical genera.— **hel'i-cine,** *a.* **1.** Spirally twisted; as, the *helicine* arteries, tendril-like vessels found in erectile tissue. **2.** Situated near the helix of the ear; as, the *helicine* fossa.— **hel'i-cin't-an,** *a. Conch.* Helicoid.— **He'li-ci'o-dæ,** *n. pl. Conch.* A family of terrestrial rhipidoglossate gastropods, especially those having the lateral teeth very large, the marginal very numerous, and the shell helicform and with a semicircular aperture. **He-lic'i-na,** *n.* (t. g.) — **he-lic'i-nid,** *n.*— **he-lic'i-noid,** *a.*— **hel'i-cite,** *n.* A fossil helicoid shell.— **hel'i-co-graph,** *n.* An instrument for describing spiral lines: used in flat drawing.— **hel'i-co-gy'rate,** *a.* Having a ring passing obliquely around its, as a spore-case of *Trichomanes.*

hel'i-coid, 1 hel'ı-koid; 2 hĕl'ĭ-coid, *a.* **1.** Coiled so as to resemble a helix or snail-shell. **2.** Of or pertaining to the *Helicidæ.* [< Gr. *helikoeidēs,* < *helix* (see HELIX) + *eidos,* form.] **hel'i-col'dal.**— **helicoid cyme,** a one-sided flower-cluster; bostryx.— **h. dichotomy,** a theoretical branching of stems in which the branches are either all on the left hand or all on the right hand.— **h. gingiymus,** a hinge-joint in which there is a slight lateral shifting during flexion and extension, due to the screw-like arrangement of the surfaces. The elbow-joint is an example.— **h. parabola,** the plane spiral into which a parabola is changed when its axis is bent round the circumference of a circle of which all the ordinates become radii.— **h. saw,** an endless steel cable used to cut marble, etc., by the aid of sand and water.— **h. spore,** a spore called in the form of a helix.



hel'i-cold, *n. Math.* A surface resembling that of a screw; especially, one generated by a straight line one end of which moves along an axis while the other describes a spiral about it.— **developable helicoid,** a surface generated by a moving straight line which constantly touches a fixed helix.— **oblique h.,** a warped surface generated by a moving straight line gliding along a fixed helix in such a manner as to maintain a constant angle with its axis. — **right h.,** one in which the angle maintained by the generatrix with the fixed helix is a right angle.

hel'i-col'din, 1 hel'ı-kəl'dın; 2 hĕl'ĭ-cŏl'dĭn, *n. Chem.* A colorless crystalline substance ($C_{28}H_{24}O_4 + H_2O$) arising from the union of salicin and helicin. [< HELICOIN.]

hel'i-com'e-try, 1 hel'ı-kom'ı-trı; 2 hĕl'ĭ-cŏm'e-try, *n.* The art of drawing or measuring spirals on a plane. [< HELICO- + Gr. *metron,* measure.]

Hel'i-con, 1 hel'ı-kon; 2 hĕl'ĭ-cŏn, *n.* **1.** *Gr. Myth.* A mountain range in southwestern Bœotia, celebrated as the favorite seat of Apollo and the Muses. On its slopes were the fountains of Aganippe and Hippocrene, reputed to impart poetic inspiration.
I was not to Helicon that dare
Presume to think myself a Muse's heir. BENJOLSON *To Ben Jonson* l. 1.

2. [h-] *Mus.* (1) A brass wind-instrument resembling a French horn, but larger, and having keys and valves. (2) An ancient acoustical device resembling the sonometer, for demonstrating the exact ratio of vibrations of musical intervals. [< Gr. *helikōn,* < *helix;* see HELIX.]

Yellow-banded Heliconian. ⅓ nat. size.

— **He'li-co'ni-a,** *n.* **1.** *Bot.* A genus of tropical American herbs of the banana family, with immense leaves and a terminal, often showy, inflorescence. The fruit and young shoots of several species are eaten, and others supply a valuable fiber. **2.** [h-] A brilliantly colored heliconine butterfly of tropical America; one species (*H. charitonius*) is found in the southern United States.— **He'li-co'ni-an,** *a.* **1.** Belonging or relating to Helicon.
All the lands that lie
Subjected to the *Heliconian* ridge.
TENNYSON *Tiresias* st. 6.

Helicon.

2. [h-] Heliconine.— **Heliconian maids,** the Muses.— **hel'i-co-nid'e-ous,** *a.* Heliconine. — **He'li-co'ni-i'næ,** *n. pl. Entom.* A subfamily of papilionid butterflies with slender body, wings produced, and discoidal cellules closed. **He'li-co'ni-us,** *n.* (t. g.)— **he'li-co'nine,** *a.* Of or pertaining to the *Heliconiinæ.* **he' i-co'nist,** *n.*— **he'li-con'ist†,** *n.* A poet.— **he'li-co-noid,** *a.* Heliconine.

Hel'i-co-peg'ma-ta, 1 hel'ı-ko-peg'mə-tə; 2 hĕl'ĭ-co-pĕg'ma-ta. *n. pl. Conch.* An order of arthropomatous brachiopods with spiral branched organs. Also in *Spirifericte.*— **hel'i-co-peg'ma-tous,** *a.*— **hel'i-co-pep'tin,** *n.* A peptic ferment contained in snails.— **hel'i-co-pro'te-id,** *n. Chem.* A nucleoalbumin occurring in the glands of snails.

hel'i-cop'ter, 1 hel'ı-kop'tər; 2 hĕl'ĭ-cŏp'ter, *n. Aero.* A flying-machine sustained by one or more air-screws turning on vertical axes. [< HELICO-+ Gr. *pteron,* wing.] **hel'i-cop'tre.**

hel'i-co-ru'bin, *n.* An orange-colored dye obtained from the digestive glands of certain invertebrate animals.— **hel'i-co'ry-phyl,** *n.* The green matter of spirals and lichens.— **hel'i-co-tre'ma,** *n.* [MA-TA, *pl.*] *Anat.* The opening at the summit of the cochlea of the internal ear, by which the scympanic and vestibular passages communicate.— **hel'i-co-te'tres,** *n. Bot.* A genus of tropical trees and shrubs of the family *Sterculiaceæ;* the screw-trees. The fruit consists of 5 carpels twisted together in a screwlike manner.

Hel'i-co-ter'i-dæ, 1 hel'ı-ko-ter'ı-dē; 2 hĕl'ĭ-co-tĕr'ĭ-dē, *n. pl. Conch.* A family of terrestrial pulmonate gastropods having the jaw striate or costate, the lingual teeth with expanded denticulate crowns and the genital system peculiar. It is restricted shell: characteristic of the Hawaiian Islands. **He-lic'ter,** *n.* (t. g.)— **he-lic'ter-id,** *n.*— **he-lic'ter-oid,** *a.*

He-lic'ti-la'tæ, 1 hı-lik'tı-lē'tē; 2 he-lĭc'tĭ-la'tē, *n. pl. Mam.* An Asiatic subfamily of musteloid carnivores having the auditory bulæ crowded against the paroccipitals, the hindmost upper molars transverse, and the sectorial cusped with two inner cusps. **He-lic'ti-lin,** *a.* & *n.* (t. g.)

he-lic'tite, 1 hı-lik'tait; 2 he-lĭc'tīt, *n.* A distorted twig-like lateral projection of calcium carbonate, found in caves, etc. Compare STALACTITE, STALAGMITE, etc.

The term '*Helictite*' has been suggested as appropriate to these contorted growths.
H. C. HOVEY *Celebrated Am. Caverns,* p. 186. [n. c. & co. 1882.]

[< Gr. *heliktos,* wreathed, < *heltssō,* twist.]

hel'i-er, 1 hel'ı-ər or hel'jər; 2 hĕl'ĭ-er or hĕl'jer, *n.* [Scot.] A hole into which the water runs at high tide.

He-lig'mi-dæ, He-lig'mus. Same as ELIGMIDÆ, ELIGMUS.

Hel'i-go-land, *n.* Helgoland.

he'lingt, *n.* Same as HEALING².

He'li-os, 1 hī'lı-os; 2 hē'lĭ-ŏs, *n.* From Greek *hēlios,* the sun; a combining form denoting something pertaining to, resembling, or caused by the sun or sunlight.
Words beginning with this prefix will be found in alphabetical place, either singly or in groups.

He'li-o-ca'ri-us, 1 hī'lı-o-kā'rı-əs; 2 hē'lĭ-o-cā'rĭ-ŭs, *n. Bot.* A small genus of tropical American shrubs and trees of the family *Tiliaceæ.* They are distinguished by clustered purple flowers and fringed capsular valves. [< HELIO- + Gr. *karyon,* fruit.]

he'li-o-cen'tric, 1 hī'lı-o-sen'trik; 2 hē'lĭ-o-cĕn'trĭc, *a.* Having reference to the sun as a center. [< HELIO- + CENTRIC.] **he'li-o-cen'tri-cal.**— **heliocentric latitude, h. longitude,** see LATITUDE, etc.— **h. place,** the position of a planet in space as viewed from the sun.— **h. theory or system,** the theory of Copernicus that the earth and other planets revolve around the sun as a center. **he'li-o-cen'tri-cism.**— **he'li-o-cen-tric'i-ty,** *n.* The state of being

he'li-o-chrome, *n.* A photograph in natural colors.— **he"li-o-chro'mic,** *a.* Pertaining to or used in heliochromy.— **he"li-o-chro'mo-scope,** *n.* A photographic instrument for illustrating objects in their natural colors.

A bouquet of English flowers reproduced in the *heliochromoscope.* . . . The *heliochromoscope* will have a better friend than the artists, for whom it will not only reproduce nature, but the very graciousness of art as well.

The Evening Sun [New York] Feb. 18, 1893, p. 4, col. 1.

— he"li-o-chro'mo-type, *n.* A photograph which reproduces the colors of the subject.— **he"li-och'ro-my,** *n.* The act or process of thus producing photographic colors.— **he"li-o-chry'sin,** *n.* A coal-tar dyestuff producing a transient yellow on silk or wool; sun-gold.— **he"li-o-cop'tre,** *n.* [Eng.] Same as HELICOPTER. [Rare.]— **he"li-o-cy'clic,** *a.* The supposed odic force of the sun. [C.]— **he"li-o-don,** *n. Astron.* A mechanical apparatus which demonstrates the apparent motion of the sun. [Obs.] (Sigsbee). *2 Mar. Ill.* 7.

He"li-o-do'rus†, 1 hĭ"li-o-dō'rus; 2 hē"li-o-dō'rŭs, *n. Bib.*

He"li-o-do'rus, *n.* A Greek romancist, bishop of Tricca, who lived about the 4th century; *Æthiopica.* **He-li-o'do-rus†** (Gr.).

he"li-o-ec'tric, *a.* Denoting electric phenomena supposed to be caused by the sun.— **he"li-o-en-grav'ing,** *n.* Photoengraving or photoetching; heliogravure; heliotypy.— **he"li-o'fu-gal,** *a. Astron.* Inclined away from the sun.

He"li-o-gab'a-lus, 1 hĭ"li-o-gab'a-lus; 2 hē"li-o-gāb'a-lŭs, *n.* Same as ELAGABALUS.— **He"li-o-gab'a-lize,** *v.*

he"li-o-gram, 1 hĭ"li-o-gram; 2 hē"li-o-grăm, *n.* A message sent by means of a heliograph.

he"li-o-graph, 1 hĭ"li-o-graf; 2 hē"li-o-grăf, *n.* **1.** An instrument for taking photographs of the sun. **2.** A photograph taken by sunlight. **3.** A heliotrope, or mirror for signaling by flashing rays of light from one point to another, used chiefly in military operations.

The *Heliograph* was used with marked success in signalling in that mountainous country.

T. P. Rousmaniere *Afghanistan* p. 77. (q. v. p. 1885.)

Heliograph.

4. A photoengraving.

5. A device by which the sun's rays follow the course indicated by the telegraphic signal by the arrows. From the mirror of sunlight is next faced the mirror, the light is reflected to the sun's rays follow the course indicated by the telegraphic signal by the arrows. From the mirror of sunlight is next faced the mirror, the light is reflected to the sured. [‹ HELIO- + mirror opposite and thence through the ‹GRAPH.] — **he"li-o-** shutter, which is operated by the key (*a*) **graph,** *v.* **1.** To flash the sun's rays to distant stations.

signal with a heliograph. **2.** To photograph by sunlight. — **he"li-og'ra-pher,** *n.*— **he"li-o-graph'ic,** *a.* **1.** Of or pertaining to the heliograph. **2.** Denoting latitudes and longitudes on the sun's surface referred to the sun's equator. **he"li-o-graph'i-cal†.**

he"li-og'ra-phy, 1 hĭ"li-og'ra-fi; 2 hē"li-ŏg'ra-fy, *n.* **1.** The operation of transmitting signals with a heliograph or heliotrope. **2.** Photography; also, heliographic engraving. **3.** A description of the surface of the sun.

He"li-o-gra-vure', 1 hĭ"li-o-gra-vūr' or -grē'vur; 2 hē"li-o-gra-vūr' or -grē'vur, *n.* Photoengraving, or a print or plate produced by that process. Originally, any process by which engravings were printed either like woodcuts or like copperplates, was denominated heliogravure. Compare PHOTOGRAVING; see PHOTOGRAVURE. [F., ‹ Gr. *hēlios,* sun, + F. *gravure;* see PHOTOGRAVURE.]

he"li-oid, 1 hē"li-oid; 2 hē"lĭ-oid, *a.* Sun-like.

He"li-o-la'try, 1 hĭ"li-ol'o-tri; 2 hē"li-ŏl'a-try, *n.* Sun-worship. [‹ HELIO- + Gr. *latreia,* worship.] — **he"li-o-la'ter,** *n.*— **he"li-o-la'trous,** *a.*

He"li-o-lat'ry, 1 hĭ"li-ol'o-tri; 2 hē"li-ŏl'a-try, *n.* Same as HELIOLATRY.

He"li-o-lit'ĭ-dæ, 1 hĭ"li-o-lit'ĭ-dē; 2 hē"li-o-lĭt'ĭ-dē, *n. pl. Paleon.* A family of tabulate corals of the Paleozoic era, believed to be related to the *Favositidæ.* The corallum is composed of tubes of two kinds, the larger containing 12 radial septa. The type genus, **He"li-o-lī'tes,** is a conspicuous form in strata from the Ordovician to the Devonian, and is not unlike the living Alcyonarian genus *Heliopora.*

he"li-ol'o-gy, 1 hĭ"li-ol'o-ji, 2 hē"li-ŏl'o-gy, *n.* The science of the sun's energy and nature.

he"li-om'e-ter, 1 hĭ"li-om'i-ter; 2 hē"li-ŏm'e-ter, *n.* An instrument for the accurate measurement of small angles in the heavens, consisting of a telescope whose objective is cut into halves that may be slid past each other so as to form two images of any object which is telescope. The distance between two stars is determined by measuring the displacement of the halves of the objective necessary to cause one image of each of which is in one image of the other star. [‹ HELIO- + -METER.] — **he"li-o-met'ric,** *a.* Pertaining to the heliometer or to sun measurement. **he"li-o-met'ri-cal†.** — **he"li-om'e-try,** *n.* The art or practice of using the heliometer.

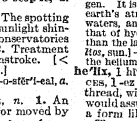
he"li-o-phag, *n. Biol.* Any part of an animal that absorbs sunlight, as a pigment-cell.— **he"li-oph'a-gous,** *a.* Absorbing sunlight or the actinic rays chemically; said of pigment-cells.— **he"li-oph'i-lous,** *a.* Fond of or turning toward the sun, as the sunflower.— **he"li-o-phō'bi-a,** *n. Pathol.* Morbid sensitiveness to sunlight.— **he"li-o-phō'bic,** *a.* **1.** Affected by heliophobia. **2.** Shade-loving, as a plant.

— he"li-o-pho-tog'ra-phy, *n.* Photography by sunlight. — **he"li-o-phō'to-graph-er,** *n.*— **he"li-o-phō'to-graph'ic,** *a.*— **he"li-o-phyl'lite,** *n. Mineral.* Same as ECDEMITE.— **he"li-o-po'lar,** *a.* Pertaining to the poles of the sun's revolution (as fixing the coordinate axis).

He"lĭ-op'o-lis, 1 hē"lĭ-op'o-lis; 2 hē"lĭ-ŏp'o-lĭs, *n.* **1.** An ancient city near the apex of the Nile Delta, Egypt; the Biblical On; once a seat of Egyptian learning, and whence came the "Obelisk of Cleopatra" now in New York. **2.** Same as BAALBEK. *3 Bib.* (Douai).

He"li-o-po'ra, *n. Zoöph.* **1.** A genus typical of *Heliporidæ:* found in a fossil state and represented also by a living East-Indian species called *blue coral.* **2.** [h-] A heliopore.— **he"li-o-pore,** *n.* A sun-coral or heliporid.— **He"li-o-por'i-dæ,** *n. pl. Zoöph.* A family of alcyonarian polyps in which the coral forms a calcareous fibrocrystalline mass with numerous tubes and calyces with irregular parietal lamina; the sun-corals. The tubes, which are of two kinds, comprise *autopores* and *siphonopores,* the latter smaller and more numerous, contain simpler polyps, destitute of tentacles and reproductive organs.— **he"li-op'ti-con,** *n.* A mirror so mounted that it can be turned to throw the sun's rays in any desired direction.— **He"li-or'nis,** *n. Ornith.* **1.** A genus typical of *Heliornithidæ,* consisting of a single species (*H. fulica*), found in Central and South America. **2.** [h-] A bird of this genus; a sun-bird.— **He"li-or-nith'i-dæ,** *n. pl. Ornith.* A family of birds; sun-birds or sun-grebes.— **he"li-or'ni-thid,** *n.*— **he"li-or'ni-thoid,** *a.*

He"li-os, 1 hē"li-ŏs; 2 hē"lĭ-ŏs, *n.* [Gr.] *Gr. Myth.* The sun-god, known to the Romans as *Sol,* confounded later with Apollo. He was the son of Hyperion and Theia, and a brother of Selene and Eos.



he"li-o-scene, 1 hĭ"li-o-sēn; 2 hē"lĭ-o-sēn, *n.* An outside sun-glass for looking at the sun. [‹ HELIO- + -SCENE.]

he"li-o-scope, 1 hĭ"li-o-skōp; 2 hē"lĭ-o-scōp, *n.* A Kind of telescope in which the eyes are protected from pain or injury while observing the sun, either by colored glass or by a system of mirrors from which only a small part of the light is reflected, or by a Nicol prism, which reduces the light. [‹ Gr. *hēlioskopios,* looking to the sun, ‹ *hēlios,* sun, + *skopeō,* look.] — **he"li-o-scop'ic,** *a.*

he"li-o'sis, 1 hĭ"li-ō'sĭs; 2 hē"lĭ-ō'sĭs, *n.* **1.** The spotting of leaves caused by the concentration of sunlight shining through inequalities in the glass of conservatories or through drops of water on the leaves. **2.** Treatment of disease by means of sun-baths. **3.** Sunstroke. [‹ Gr. *hēlioomai,* be sunstruck, ‹ *hēlios,* sun.]

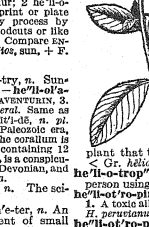
he"li-o-spher'i-cal, 1 hĭ"li-o-sfer'i-kal; 2 hē"lĭ-o-sfĕr'i-cal, *a.* Spherical like the sun.

he"li-o-stat, 1 hĭ"li-o-stat; 2 hē"lĭ-o-stăt, *n.* **1.** An instrument consisting principally of a mirror moved by clockwork so that the rays of the sun shall be reflected from it in a fixed direction.

Silbermann's Heliostat.

a, axis on which instrument turns; *b,* direction in which sun's rays are reflected; during the effect of atmospheric absorp- tion upon solar radiation: generally a thermometer with blackened bulb, placed in a black-lined case with glass lid.

Mr. S. W. Stratton constructed a new *heliostat* of simple mechanism which answers the purpose required in photo-micrography as well as the more elaborate and more expensive *instruments.* T. J. Mitchell in *Proc. A. A. A. S.* vol. xxxiv, p. 355.



2. Improperly, a similar device without clockwork, adjusted by hand. [‹ *helio-* + Gr. *statos,* fixed.]

he"li-o-tax'is, *n. Biol.* Phototaxis resulting from the effect of the sun's rays.

he"li-o-ther'a-py, *n.* Same as SIRIASIS, 2.— **he"li-o-ther-mom'e-ter,** *n.* An instrument for measuring the effect of atmospheric absorp- tion upon solar radiation: generally a thermometer with blackened bulb, placed in a black-lined case with glass lid.

He"li-oth'ĭ-dæ, 1 hĭ"li-oth'ĭ-dē; 2 hē"lĭ-ŏth'ĭ-dē, *n. pl. Entom.* A family of noctuid moths with a stout body, which fly in the daytime. **He"li-o-this,** *n.* [NL.] — **he"li-oth'ĭ-dĭd,** *a. & n.*— **he"li-oth'ĭd,** *a. & n.*— **he"li-oth'oid,** *a.*

he"li-o-trope, 1 hĭ"li-o-trōp; 2 hē"lĭ-o-trōp, *n.* **1.** A herb or shrub of the genus *Heliotropium,* with small white or purplish flowers; turnsole. The common species cultivated in gardens are from the fragrant, shrubby *H. peruvianum.* The summer or false heliotrope is *Phacelia tanacetifolia* heliotropides of the same family. **Winter h.** (*Petasites fragrans*) is a European herb of the aster family.

Heliotrope.

2. The color of the flower of the heliotrope shrub. **3.** The fragrance of the heliotrope flower. **4.** A heliotropism. **5.** *Astron.* An instrument noting the varying declination of the sun. **6.** *Mineral.* The bloodstone. **7.** Any plant that turns toward the sun. [‹ L. *heliotropium,* ‹ Gr. *heliotropion.* sun-dial.]

he"li-o-trop'er, 1 hĭ"li-o-trōp'ẽr; 2 hē"lĭ-o-trōp'ẽr, *n.* A person using a heliotrope or heliotropism.

he"li-o-trop'ic, 1 hĭ"li-o-trop'ĭk; 2 hē"lĭ-o-trŏp'ĭn, *n. Chem.* **1.** A toxic alkaloid occurring in *Heliotropium europæum* and *H. peruvianum.* **2.** Piperonal. **he"li-o-trŏ'pe-plant.**

he"li-o-trop'ism, 1 hĭ"li-o-trop'izm; 2 hē"lĭ-o-trŏ'pizm, *n. Biol.* That property of an organism by virtue of which, when not symmetrically illuminated on all sides, it tends to move either toward or away from the source of light. When it moves, orients itself, or curves so as to place toward the light it is said to possess **positive heliotropism;** when away from it, **negative heliotropism** or **apheliotropism.** — **he"li-o-trop'ous,** *a.* Pertaining to or characterized by or pertaining to heliotropism. **he"li-o-trop'i-cal†.**— **he"li-o-trop'i-cal-ly,** *adv.*

he"li-o-tro'pĭ-um, 1 hĭ"li-o-trō'pĭ-um; 2 hē"lĭ-o-trō'pĭ-ŭm, *n.* A Greek dial or solar quadrant; a gnomon. **2.** [H-] *Bot.* See HELIOTROPE, 1.

he"li-o-type, 1 hĭ"li-o-tīp; 2 hē"lĭ-o-tīp, *n.* [-TYPE; -TYP'ING.] **1.** A process, as a picture, by heliotypy. **II.** *i.* To practise heliotypy; print a heliotype picture.— **he"li-o-type,** *a.* Pertaining to or produced by heliotypy.— **he"li-o-typ'ic,** *a.*— **he"li-o-type,** *n.* The process of heliotyping. **2.** A chemically-surface made by heliotypy. **3.** An impression from such a printing-surface.— **he"li-o-ty-pog'ra-phy,** *n.* **1.** A process by which heliotypes of the sun disc are obtained. **2.** Photography.— **he"li-o-typ'y,** *n.* A process of photoengraving producing in a film of gelatin a printing-surface from which impressions can be taken in ordinary press. This film having been sensitized with chrome alum. See GELATIN PROCESS, under GELATIN, with chrome alum. See GELATIN PROCESS, under GELATIN, with chrome alum.

He"li-ot'pu-lis, *n.* [Gr.] Same as HELIOPOLIS, 1.

he"li-o-xan'thin, 1 hĭ"li-o-zan'thĭn; 2 hē"lĭ-o-xăn'thĭn, *n.* A coal-tar color. Ethenylamin orange. See ORANGE.

he"li-o-zinc-og'ra-phy, 1 hĭ"li-o-zĭnk-og'ra-fi; 2 hē"lĭ-o-zĭnc-ŏg'ra-fy, *n.* The process of printing (a photograph for photoengraving) on a sensitized zinc plate through a reversed negative.

He"li-o-zo'a, 1 hĭ"li-o-zo'ə; 2 hē"lĭ-o-zō'a, *n. pl. Protoz.* A class of gymnozoa symptoms of spherical form with independent thread-like pseudopodia radiating from the surface, and with protoplasm extensively vacuolated, as in *Actinophrys,* etc.; sun-animalcules. [‹ HELIO- + Gr. *zōon,* animal.] — **he"li-o-zo'an,** *a. & n.*— **he"li-o-zo'ic,** *a.*

He-lip'ter-um, 1 hə-lip'ter-um; 2 he-lip'ter-um, *n. Bot.* A large genus of Australian and African herbs, or rarely shrubs, of the aster family. Some are cultivated as immortelles or everlastings, and are nearly allied to *Helichrysum,* but have a feathery pappus: often called *Acroclinium* by florists. [‹ HELIO- + Gr. *pteron,* wing.]

hel"l-spher'ĭc, } 1 hel"l-sfer'ik, -i-kal; 2 hĕl"l-sfĕr'ic,
hel"l-spher'i-cal, } -i-cal, *a.* Turning spirally on a sphere. See HELIX: SPHERE. [‹ Gr. *helix* (see HELIX) + *sphaira,* sphere.] **helispherical line,** a loxodromic line. See under LOXO-.

he"lĭ-um, 1 hĭ"li-um; 2 hē"lĭ-ŭm, *n. Chem.* A colorless, inert, monatomic gaseous element allied to argon, of density 2.13 as compared with hydrogen and atomic mass 4.26. This substance was discovered in the sun by Lockyer in 1868 by means of the spectroscope during an eclipse. Its line is very near the sodium lines D + D_2 and was noted D_3. Discovered on the earth in elevate in 1895 by Ramsay: occurs also in other allied impurities associated with argon and nitrogen. It is also found in the stars, in small quantities in the earth's atmosphere, in gases yielded by certain mineral waters, and in meteoric iron. Its boiling-point is below that of hydrogen, and it is liquefied with greater difficulty than the latter. It does not form compounds. [‹ Gr. *hēlios,* sun.] — **he"lĭ-um-star',** *n. Astron.* A star which shows the helium line in its spectrum.

he"lix, 1 hĭ"liks; 2 hē"lix (XIII), *n.* [HE"LIX-ES or HEL"I-CES, 1 -ez or hĭ"li-sēz; 2 -ĕz or hĭ"lĭ-sēz, *pl.*] **1.** A line, thread, wire, or the like, curved into a shape such as it would assume if wound in a single layer round a cylinder; a form like a screw-thread; loosely, any spiral.

The most economical and effective way of proceeding, therefore, is to coil the conductor into a compact *helix* or spiral. C. F. Brackett in *Electricity in Daily Life, Service of Man* p. 14. (a. 1890.)

2. *Anat.* The recurved border of the external ear. See illus. under EAR. **3.** *Arch.* A small volute, representing a spirally rolled acanthus-stalk, under the abacus in a Corinthian capital. See CAPITAL. *Corich.* (1) [H-] A genus typical of *Helicidæ* and *Helicinæ.* (2) A landsnail of this genus. Under the old classifications, most of the landshells (more than 4,000 species) were assigned to this genus. The common European gardensnail (*H. hortensis*) and the Roman edible snail (*H. pomatia*) are typical species, and the genus is now more or less restricted to forms related to these species. See cut at end of article. **5.** *Elec.* A coil of wire, as that of an electromagnet. [L., kind of ivy, ‹ Gr. *helix* (*helik-*), anything spiral, ‹ *helissō,* turn round.] **he"lyxt.— retrosal helix** (*Rtec.*), a helix wound like the helix of an ordinary woodscrew; a right-handed spiral.— **sinistrosal h.,** the reverse of a dextrosal helix; a left-handed spiral.

he"lix-ĭ-fe'ra-lin, 1 hĭ"liks-ĭ-fe'ra-lin; 2 hē"lix-ĭ-fĕ'ra-lin, *n. Chem.* A crystalline compound ($C_{18}H_{32}O_6$), formed, together with glucose, by the action of mineral acid on helixin. **—inet.**

he"lix-in, 1 hĭ"liks-in; 2 hē"lix-in, *n. Chem.* A colorless crystalline glucoside ($C_{32}H_{36}O_{18} + 2H_2O$) occurring in the leaves and seeds of English ivy. [‹ HELIX.] **he"lix-inet.**

he"lĭ-oid, 1 hĭ"li-oid; 2 hē"lĭ-oid, *a.* Same as HELIOID.

Hel'kal, 1 hel'kă-al or hel'kal; 2 hĕl'ka-l or hĕl'kl, *n. Bib. Heb.* xii, 15. [Heb., Jah is a portion.] [portion.]

he"lĭ-old, 1 hĭ"li-old; 2 hē"lĭ-old, *n. Bib. Josh.* xix, 25. [Heb.,

Hel'kath-haz'ur-rim, 1 hel'kă-thă-haz'u-rim; 2 hĕl'ka-thă-haz'yu-rim, *n. Bib. 2 Sam.* ii, 16. [l, 8.

Hel-lā'as, 1 hel-lē'os; 2 hel-lā'as, *n. Bib.* (Apocrypha). *1 Esd.* ix, *v. & n.* [Prov. Eng.] To puke, as blood a heifer.

hell, } 1 hel; 2 hĕl, *n.* **1.** The abode of evil spirits; the

heir', } infernal regions, especially as a place of eternal punishment for lost spirits (see GEHENNA; NIFLHEIM; TARTARUS); the state of eternal punishment; also, the infernal powers.

Altho now almost universally applied to the state and place of eternal punishment, the word was originally used in the same sense as *Hades,* meaning the underworld, the abode of the departed, and in ancient Norse mythology Hel was the unlovely goddess of darkness to whom fell the souls of those unworthy of Valhalla were relegated.

2. Figuratively, any place of extreme torment, evil, or misery.

And Sin, the which separates from God, . . . which can not in that state correspond with God — this is *hell.*

Drummond *Natural Law, Death* p. 169. [p. v. 1888.]

Poverty is the open-mouthed, insatiable hell which yawns beneath civilized society.

George *Progress and Poverty,* p. 411. [n. d.]

3. The place of departed spirits; called by the Greeks *Hades* and by the Hebrews *Sheol.* **4.** *Chr. Sci.* Mortal belief; error; lust; remorse; hatred; revenge; envy. Mary Baker Eddy *Science and Health, with Key to the Scriptures* p. 588. **5.** A place of evil or of rejected things. (1) A gambling-house. (2) In some printing games, the place where the letters first brought are placed. (3) A place for the collection or destruction of refuse, as in a sawmill or tailors' shop. (4) Same as MELLOWS. Hel'le, 1 hel'ē; 2 hĕl'e, *n. Myth.* A daughter of Nephele and Athamas who fled from Ino and was drowned in the strait henceforth called Hellespont. **Hel'lē** [Gr.].

hel'le-bore, 1 hel'ı-bōr; 2 hĕl'e-bōr, *n.* **1.** Any herb of the genus *Helleborus*. Especially: (1) In the United States, the green hellebore (*H. viridis*), cultivated and sometimes naturalized, (2) In Europe, the black hellebore, or Christmas rose (*H. niger*), common there in gardens and blooming in winter or early spring. (3) The black roots being a powerful cathartic, but violently narcotic and acrid; also, the black hellebore of the ancients (*H. officinalis*), a native of Greece and Asia Minor.

2. Any species of *Veratrum*; especially, the American white hellebore, or swamp-hellebore (*V. viride*), and the European species, white hellebore (*V. album*). **3.** The powdered root of *Veratrum viride*, used for destroying plant-vermin. [< F. *hellébore*, < L. *helleborus*, < Gr. *helleboros*, hellebore.]

— **American hellebore,** *Veratrum viride* See def. 2, above. — **hel'le-bo-ras'ter,** *n.* An English species of hellebore (*Helleborus fœtidus*) with numerous globular flowers, often cultivated for ornament. **stinking or fetid hellebore.** — **hel'le-bo'rate,** *a. Chem.* Containing hellebore.— **hel'le-bo'rein,** *n. Chem.* A white, crystalline, sweetish, poisonous compound ($C_{28}H_{44}O_{10}$) contained in the root of hellebore, especially of the black hellebore.— **hel'le-bo-res'tin,** *n. Chem.* A rushous substance ($C_{34}H_{56}O_4$) of helleborin.— **hel'le-bo-re'tin,** *n. Chem.* A grayish-green, amorphous powder ($C_{11}H_{20}O_3$) resulting from the hydrolysis of a helleborein.— **hel'le-bo'rin,** *n. Chem.* A white crystalline, poisonous compound ($C_{34}H_{58}O_9$) with a tingling taste, forming the active principle and contained in the root of hellebore.— **hel'le-bo'rism,** *n.* Same as *Veratrism*. *Epipactis*; also, one of the allied genus *Cephalanthera*.— **hel'le-bo-rism,** *n.* The extensive medicinal use of hellebore, as among the ancients.— **hel'le-bo-rize,** *vt.* To treat with hellebore, as formerly lunatics were treated.— **hel'le-bo-tism.**

Hel-leb'o-rus, 1 he-leb'o-rus; 2 hĕ-lĕb'o-rus, *n. Bot.* A genus of erect herbs of the crowfoot family with palmately lobed or divided scented leaves and large flowers with 5 petaloid sepals and a number of small petals. There are about 12 species. *H. niger* is the common black hellebore or Christmasrose. [L., < Gr. *helleboros*, hellebore.] **Hel-leb'o-rast.**

Helleborus niger (Christmas Rose).

Hellenaue'lille', 1 hel'ē-nō-vē'lē; 2 ĕl'ē-nō-vē'lĭl', *n.* A town in Nord department, France.

hel'met, 1 hel'mət; 2 hĕl'mĕt, *n.* **1.** A covering of defensive armor for the head; the generic term. See illus. under ARMOR and CREST.

In antiquity helmets were made both of metal and of leather. The Greek helmet was usually provided with nose-guard and cheek-pieces; sometimes, Roman helmets, except those worn by gladiators, had no vizors. In the early middle ages helmets were conical caps of metal, fitted with nasal guards. Later, the helmet and that worn by heavy cavalry after the adoption of plate armor covered the face and neck, with bars in front for breathing, and often both vizor and a light visor that might be worn over the top. Metal helmets are worn by modern infantry and cavalry troops for protection from various modes of attack. They cover only the skull, but have projecting peaks. Firemen wear helmets of leather and brass to protect them from falling objects. A representation of the tilting-helmet of chivalry is employed in modern heraldry, resting upon the chief of the shield and bearing the crest, to indicate rank: gold, with 6 bars, or with vizor raised, and in full face, for royalty; steel, with gold bars, varying in number, and in profile, for a nobleman; steel, without bars and with vizor open, for a knight or a baronet; steel, with vizor closed, for an esquire or gentleman — the last two in profile.

The pointed head to the Assyrian spear-heads from the earliest palace of Nimroud appears to have been the most ancient. . . . Several were discovered in the ruins: they were of iron; and the rings which ornament the lower part, and end in a *semicircle* in front, were inlaid with copper. A. H. LAYARD *Nineveh and its Remains* vol. ii. p. 262. [G. P. P. 1852.]

Hel-ve'ti-us, 1 hel-vī'shɪ-us *or* (*F.*) el"vē"sī"ūs'; 2 hĕl-vē'shi-ŭs *or* (*F.*) ĕl"ve"sī"üs', **Claude Adrien** (1/18 1715–12/26 1771). A French philosopher. [ANTIDICOMARIANITE.

Hel-vid'i-an, 1 hel-vid'ɪ-ən; 2 hĕl-vĭd'i-an, *n.* Same as

Hel-vid'i-us, 1 hel-vid'ɪ-us; 2 hĕl-vĭd'i-ŭs, *n.* A pen-name of James Madison, under which were written his five essays in reply to Hamilton.

hel'vite, 1 hel'vɑit; 2 hĕl'vīt, *n. Mineral.* A vitreous, honey-yellow manganese-glucinum-iron, thio-silicate, $(MnGlFe)_7SSi_3O_{12}$, crystallizing in isometric tetrahedrons. [< L. *helvus*, yellow.] **hel'vin‡.**

Hel"voet-sluis', 1 hel"vut-sleis'; 2 hĕl"vut-slöis', *n.* A seaport in S. Holland, near Rotterdam. **Helle"voet-sluis'‡.**

hel'vo-lous, 1 hel'vo-lus; 2 hĕl'vo-lŭs, *a.* Tawny or dull reddish-yellow. [< L. *helvolus*, dim. of *helvus*, yellow.]

helx'ine, 1 helks'ɪn; 2 hĕlks'in, *n.* [L.] *Anc. Bot.* A plant of uncertain identity mentioned by Pliny and Dioscorides, supposed to be a pellitory or some species of thistle.

hel"yp-som'e-ter, 1 hel"ɪp-som'ɪ-tər; 2 hĕl"yp-sŏm'e-ter, *n. Phot.* An instrument with which latitude is determined at sea by calculating the sun's altitude from a photograph of its path traced on the sensitized interior of a brass cylinder.

hem[1], 1 hem; 2 hĕm, *v.* [HEMMED, HEMD[s]; HEM'MING.] **I.** *t.* **1.** To fold and sew down the edge of, as cloth, to prevent from fraying, or as an ornament; as, to *hem* a dress. **2.** To border as if by a hem; edge.

Tall Lombard trees *hemmed* all the lawn.
T. B. READ *Love's Gallery* picture second, st. 1.

3. To shut in, limit, or environ in any manner; enclose; with *in*, *about*, or *around;* as, *hemmed in* by an army.

The dear old hills that *hemmed* them *round*.
PHŒBE CARY *Dovecote Mill, Sugar-making* st. 17.

II. *i.* To do hemming; sew hems.
— **to hem out,** to bar out.

hem[2], *v.* [HEMMED; HEM'MING.] **I.** *t.* To throw off by or as by coughing.
II. *i.* To make the sound expressed by the word "hem"; hence, to stammer or be embarrassed.

But that functionary had no desire to be questioned; he *hemmed* and hawed and dodged about. J. L. STEPHENS *Egypt and Arabia, Petræa* vol. i, p. 109. [H. 1844.]

hem, *n.* **1.** A fold made in the edge of a textile fabric by twice turning over the raw edge or selvage and sewing down the inner fold, to prevent raveling or as an ornament; hence, the border or hem-like edge of anything, as a garment. **2†.** *Arch.* The projecting spiral marking the volute of an Ionic capital. [< AS. *hem*, < *ham*, a field.] — **French hem** (*Needlework*), a doubly folded hem.

hem, *interj.* An ejaculatory sound made, as in clearing the throat, to attract attention, cover embarrassment, etc.; ahem. [Onomatopœic.]

hem†, *pron.* Them: objective plural of HE.

hem-, } 1 hem-, hem'ə-, hem'a-to-; 2 hĕm-, hĕm'a-,
hem'a-, } hĕm'a-to-. From Gr. *haima*, blood: combin-
hem'a-to-, } ing forms. [Words from this root are also spelled *hæma-*, which see for words not found here. See also HEMO-.] — **hem"a-ba-rom'e-ter,** *n.* An apparatus to ascertain and register the specific gravity of blood.— **hem'a-chate,** *n.* A light-colored agate spotted with red jasper; a *blood-agate*.— **hem"a-chro"ma-to'sis,** *n.* Same as HEMATOCHROMATOSIS.— **hem'a-chrome,** *n.* Same as HEMOCHROME.— **hem"a-chro'sis,** *n.* Same as HEMATOCHROSIS. — **hem'a-cite,** *n.* A preparation of the blood of animals with pulverized mineral and vegetable substances, dried, compressed into molds, and varnished: used for buttons, etc.— **hem'a-cœ"lom,** *n.* Same as HEMOCŒLOM.— **hem'a-cyte,** *n. Anat.* A blood-corpuscle.— **hem"a-cy-tom'e-ter,** *n.* An instrument for determining the number of corpuscles in a given quantity of blood.— **hem"a-cy"to-zo'on,** *n.* See CYTOZOON.

Other words beginning with these prefixes will be found in alphabetical place, either singly or in groups.

he'mad, 1 hī'mad; 2 hē'măd, *n.* A blood-corpuscle. [< Gr. *haima*, blood.]

he'mad, *adv.* Toward the ventral or hemal portion of the body: opposed to *neurad*. [< HEM- + -AD[3].] **hæ'mad‡.**

hem"a-drom'e-ter, *n.* An instrument for measuring the speed of the blood-current. **hem"a-dro-mom'e-ter‡.— hem"a-drom'e-try, hem"a-dro-mom'e-try,** *n.*— **hem"a-drom'o-graph,** *n.* An instrument for recording automatically variations in the velocity of the blood-current. — **hem"a-dy-nam'ic,** *a.*— **hem"a-dy-nam'ics,** *n.* That branch of physiology which treats of the dynamics of the circulation of the blood.— **hem"a-dy"na-mom'e-ter,** *n.* An instrument for measuring the force of circulation or the tension of blood in any vessel.— **hem"a-fi'brite,** *n. Mineral.* A spherical, radiated, vitreous, hydrous manganese arsenate $(H_5Mn_3AsO_8)$, crystallizing in the orthorhombic system.— **hem"ag-glu"ti-na'tion,** *n.* Agglutination of the blood-corpuscles.— **hem"ag-glu'ti-nin,** *n.* A specific body in blood-serum that agglutinates red blood-cells.— **hem'a-gog(ue**[p], *n. Med.* A medicine promotive of menstrual or hemorrhoidal discharges.

he'mal, } 1 hī'məl; 2 hē'mal, *a.* **1.** Of or pertaining to
hæ'mal, } blood or the vascular system; of the nature of blood.

The habitual attitudes of annulose and molluscous creatures is such that the neural centres are below the alimentary canal and the *hæmal* centres above. SPENCER *Biology* vol. i, p. 307.

2. Of, pertaining to, or situated on the side of the body that contains the heart and great blood-vessels, as the ventral side of a vertebrate or the dorsal side of a mollusk or worm: opposed to *neural*. [< Gr. *haima*, blood.] — **hemal arch,** that part of Owen's typical vertebra which encloses the great vessels and the viscera; the visceral or ventral arch. In the thoracic vertebræ the hemal arches are formed by the ribs, the costal cartilages, and the segments of the sternum.— **h. canal, cavity,** or **tube,** that formed by the successive hemal arches.— **h. ridge** (*Embryol.*), the forerunner of the hemal canal.— **h. spine,** in Owen's typical vertebra, the most ventral segment, as the segments of the sternum.

hem-al'bu-men, *n. Pharm.* **1.** An albuminate of iron used in treating anemia. **2.** A medicinal compound of the albuminoids and salts in the blood of the human body.— **hem"a-leu'cin,** *n.* The fibrin of a blood-clot.— **hem"a-lo'pi-a,** *n. Pathol.* Bloodshot eyes; effusion of blood to the eye.

He'mam, 1 hī'mam; 2 hē'măm, *n. Bib. Gen.* xxxvi, 22.

hem"a-me'ba, 1 hem"ə-mī'bə; 2 hĕm"a-mē'ba, *n.* **1** A white blood-corpuscle. **2.** An ameboid parasite inhabiting the blood. **hem"a-mœ'ba‡.— hemameba immaculata,** an uncolored variety of hemameba præcox.— **h. præcox** (*Biol.*), a plasmodium malignum.— **h. relicta,** a blood-parasite of the sparrow.— **h. subimmaculata,** a blood-parasite of the hawk.— **h. subpræcox,** a blood-parasite of the owl, lark, and other birds.

He'man, 1 hī'mən; 2 hē'man, *n.* **1.** A masculine personal name. *Bib.* F. **Hé"man',** 1 ē"mūn', 2 e"mäṅ'; G. **He'man,** 1 hē'mun, 2 he'män; Sp. **E-man',** 1 ē-mūn', 2 e-män'. **2.** *Bib. 1 Kings* iv, 31. [Heb., faithful, reliable.]

hem"an-gi-o'ma, 1 hem"an-jɪ-ō'mə; 2 hĕm"an-ġi-ō'ma, *n. Pathol.* A tumor consisting mainly of blood-vessels.

Hem'ans, 1 hem'ənz; 2 hĕm'anş, *n.* **1.** **Charles Isidore** (1817–10/26 1876), an English archeologist; youngest son of Felicia D. **2.** **Felicia Dorothea** (*née* Browne) (9/25 1793–5/16 1835), an English lyrical poet.

He-man'ta, *n.* See HINDU CALENDAR under CALENDAR.

hem"a-phe'in, *n. Physiol.* A brown coloring-substance, found in blood, probably the product of decomposition.— **hem"a-pho'bi-a,** *n.* Same as HEMATOPHOBIA.— **hem"a-poi'e-sis,** *n.* The formation of blood; blood-making. — **hem"a-poi-et'ic,** *a.* Relating to blood-making.— **hem"a-poph'y-sis,** *n.* [-SES, *pl.*] In Owen's typical vertebra, the element next the hemal spine: represented in the thoracic region by the costal cartilages.— **hem"a-po-phys'e-al,** *a.* **hem"a-po-phys'i-al‡.— hem-ar'thrus,** *n. Pathol.* The effusion of blood into the synovial cavity of a joint. **hem"ar-thro'sis‡.— hem'ase,** *n.* A catalase, or enzym, found

in the blood.— **hem″a-spec′tro-scope,** *n.* *Physiol.* A direct-vision spectroscope used in blood-analysis to examine the absorption spectrum.— **hem″a-stat′ic.** **I.** *a.* *Med.* **1.** Relating to hemastatics. **2.** Same as HEMOSTATIC. **II.** *n.* Same as HEMOSTATIC.— **hem″a-stat′ics,** *n.* The branch of physiological science dealing with the equilibrium of the blood in living bodies.— **hem″a-ta-chom′e-ter,** *n.* An instrument for measuring the velocity of the blood-current.— **hem″a-ta-chom′e-try,** *n.*— **hem″at-a″er-om′e-ter,** *n.* An instrument for calculating the pressure of gases in the blood.— **hem″a-tan″gi-o-no′sus,** *n.* Disease of the blood-vessels. **hem″a-tan″gi-o-no′sos‡.**— **hem′a-tate,** *n.* A compound derived from hematein ($C_{16}H_{11}O_6 + 3ag$).— **ammonia hematate,** an unstable dark violet dye ($C_{16}H_{13}O_2(NH_3)_2$), used in staining microscopical preparations.— **hem″a-te′in,** *n.* *Chem.* A red-brown crystalline coloring-matter ($C_{16}H_{12}O_6$) analogous to the phthaleins, derived from extract of logwood by oxidation. **hem″a-te′ine‡.**— **hem″a-tem′e-sis,** *n.* *Pathol.* Vomiting of blood; gastric hemorrhage.— **hem″a-te-met′ic,** *a.*— **hem″a-ten-ceph′a-lon,** *n.* *Med.* Cerebral hemorrhage.

He′math, 1 hī′math; 2 hē′măth, *n.* *Bib.* *1 Chron.* ii, 55. [Heb., warmth.]

hem″a-ther′a-py, *n.* *Med.* **1.** Treatment of diseases by use of bullocks' blood. **2.** Treatment of diseases of the blood.— **hem′a-therm,** *n.* One of the *Hæmatotherma;* a warm-blooded animal.— **hem″a-ther′mal,** *a.* **hem″a-ther′mous‡.**— **hem″at-hi-dro′sis,** *n.* *Pathol.* Sweating of blood and water mixed; cutaneous perspiration mixed with blood. **hem″at-i-dro′sis‡.**— **hem″a-tho′rax,** *n.* Same as HEMATOTHORAX.

he-mat′ic, 1 hı-mat′ık; 2 he-măt′ic, *a.* **1.** Of, pertaining to, or contained in blood. **2.** *Med.* Effecting change in the blood. [< Gr. *haimatikos,* < *haima,* blood.] **hæ-mat′ic‡.**— **hematic acid,** a hypothetical acid believed to be formed by the oxidation of hemoglobin in the lungs, and having the power of decomposing the sodium carbonate of the serum.— **he-mat′ic,** *n.* A medicine that produces a change in the blood.— **he-mat′ics,** *n.* *Pathol.* **1.** A class or group of diseases or medicines affecting the blood. **2.** The branch of medical science that treats of the blood.

he-mat′i-cum, *n.* *Med.* A transparent dark-red solution containing iron and alcohol.— **hem′a-tid,** *n.* *Anat.* A red blood-corpuscle.— **hem″a-tim′e-ter,** *n.* A kind of hemochromometer or hemoglobinometer.— **hem″a-tim′e-try,** *n.* The art of estimating the number of blood-corpuscles. — **hem′a-tin,** *n.* *Physiol. Chem.* **1.** A brown pigment ($C_{68}H_{70}N_8Fe_2O_{10}$) formed from hemoglobin by decomposition with acids. **2.** Same as HEMATOXYLIN.— **hem″a-tin′ic.** *Med.* **I.** *a.* Efficacious in increasing the coloring-matter of the blood. **II.** *n.* Any medicinal agent which increases the number of red corpuscles in the blood.— **hematinic acids,** acids formed from hematin by oxidation, first discovered by Küster.— **hem″a-ti-nom′e-ter,** *n.* See HEMOGLOBINOMETER.— **hem″a-tin″o-met′ric,** *a.*— **he-mat′i-non,** *n.* A hard, opaque, red glass, colored with oxid of copper, used by the ancients in mosaic, enamels, etc. **he-mat′i-none‡.**— **hem″a-ti-nu′ri-a,** *n.* *Pathol.* The presence of hematin in the urine.

hem′a-tite, 1 hem′a-tait; 2 hĕm′a-tīt, *n.* *Mineral.* A columnar, granular, botryoidal, micaceous or crystallized metallic, earthy, dark steel-gray, iron-black, or red ferric oxid (Fe_2O_3), crystallizing in the hexagonal system. [< L. *hæmatites,* < Gr. *haimatitēs,* blood-like, < *haima(t-),* blood.] **hæm′a-tite‡.**— **brown hematite,** same as LIMONITE.— **hem″a-tit′ic, hæm″a-tit′ic,** *a.*

hem″a-to′bi-ous, *a.* Parasitic in the blood; sanguicolous. **hem″a-to′bic‡.**— **hem″a-to′bi-um,** *n.* A hæmatozoon.— **hem′a-to-blast,** *n.* **1.** One of the minute colorless disks, smaller than either the red or the white corpuscles, found in the blood. **2.** One of the red nucleated cells found in bone-marrow and believed to produce the red corpuscles of the blood; an erythroblast.— **hem″a-to-blas′tic,** *a.*— **hem″a-to-ca-thar′tic,** *a.* Blood-purifying or purging.— **hem′a-to-cele,** *n.* *Pathol.* A tumor containing blood; specif., a tumor formed by blood effused into the cellular tissue of the scrotum, or into the tunica vaginalis; as, arterial or pelvic *hematocele.*— **hem″a-to-che′zi-a,** *n.* Emission of hemorrhagic stools.— **hem″a-to-chlo′rin,** *n.* A green coloring-matter found in the placenta.— **hem″a-to-chro″ma-to′sis,** *n.* The coloring of the tissues by the blood-corpuscles. — **hem′a-to-chrome,** *n.* A blood-colored substance found in some unicellular algæ.— **hem″a-to-chro′sis,** *n.* Any disease in which the color of the blood is changed or the skin discolored by coloring-matter from the blood.— **hem″a-to-chy-lu′ri-a,** *n.* *Pathol.* The presence of blood and chyle in the urine; it is usually an intermittent state.— **hem″a-to-cœ′li-a,** *n.* *Pathol.* Effusion of blood into the abdominal cavity.— **hem″a-to-col′pus,** *n.* *Pathol.* An accumulation of blood or menstrual fluid in the vagina, due to its occlusion or an imperforate hymen.— **hem′a-to-crit,** *n.* An instrument which, by centrifugal action, separates the corpuscles and the serum in blood in order to estimate the relative amounts.— **hem″a-to-crys′tal-lin,** *n.* Same as HEMOGLOBIN.— **hem″a-to-cy′a-nin,** *n.* Same as HEMOCYANIN.— **hem′a-to-cyst,** *n.* A cyst filled with blood.— **hem″a-to-cys′tis,** *n.* *Pathol.* Effusion of blood into the bladder.— **hem′a-to-cyte,** *n.* Same as HEMACYTE.— **hem″a-to-cy″to-zo′on,** *n.* *Med.* A parasite in the blood-corpuscles.— **hem″a-to-cy-tu′ri-a,** *n.* *Pathol.* Blood-corpuscles in urine.— **hem″a-to-di″ar-rhe′a,** *n.* *Pathol.* Bloody diarrhea; hemorrhage of the bowels.— **hem″a-to-dys-cra′si-a,** *n.* *Pathol.* Any blood-disease.— **hem′a-to-gen,** *n.* *Chem. Physiol.* **1.** A decomposition product of vitellin. **2.** *Med.* One of several preparations used for the enrichment of impoverished blood.— **hem″a-to-gen′e-sis,** *n.* *Physiol.* Blood-formation.— **hem″a-to-gen′ic,** *a.* Formative of blood. **hem″a-tog′e-nous‡.** — **hem″a-to-glo′bin,** *n.* Same as HEMOGLOBIN. **hem″a-to-glob′u-lin‡.**— **hem″a-tog′ra-phy,** *n.* A description of the blood.— **hem′a-toid,** *a.* *Pathol.* Bloody, or resembling blood; as, *hematoid* cancer.— **hem″a-toi′din,** *n.* *Physiol. Chem.* A crystalline substance ($C_{32}H_{36}N_4O_6$), similar to or identical with bilirubin, contained in old blood-spots, hemorrhages, etc. **hem″a-toi′dine‡.**— **hem″a-to′lin,** *n.* *Chem.* A compound ($C_{68}H_{78}N_8O_7$) contained in blood and formed when the iron is removed from hematin by sulfuric acid.— **hem′a-to-lite,** *n.* *Mineral.* A vitreous to greasy, brownish-red to black aluminum-manganese arsenate and hydrate ($H_8Mn_4(Al, Mn)AsO_{12}$), crystallizing in the hexagonal system.— **hem″a-tol′o-gist,** *n.* A specialist on blood and its morbid changes.

hem″a-tol′o-gy, 1 hem″ə-tel′o-jı; 2 hĕm″a-tŏl′o-ġy, *n.* The branch of medical science that treats of the blood, its formation, functions, and diseases. [< HEMATO- + -LOGY.] **hæm″a-tol′o-gy‡; hem″a-to-lo′gi-a‡.**

hem″a-to-lym-phan″gi-o′ma, *n.* *Pathol.* A tumor composed of lymphatics and blood-vessels.— **hem″a-tol′y-sis,** *n.* *Physiol.* Dissolution of hematids with reduced coagulability of the blood.— **hem-a-to-lyt′ic,** *a.*— **hem″a-to-lyt′i-cal-ly,** *adv.*— **hem″a-to′ma,** *n.* *Pathol.* A blood-tumor, especially one on the scalp of a new-born child.— **hem″a-to-ma′ni-a,** *n.* An insane morbidly sexual fascination at the sight of blood, or an insane desire to shed blood.— **hem″a-to-man′ti-a,** *n.* *Med.* Diagnosis of disease by examination of the blood.— **hem″a-tom′e-ter,** *n.* Same as HEMACYTOMETER. — **hem″a-tom′e-try,** *n.*— **hem″a-to-me′tra,** *n.* *Pathol.* **1.** Uterine hemorrhage; flooding. **2.** Retention of blood in the womb. **hem″a-to-ma′tra‡.**— **hem″a-tom′pha-lo-cele,** *n.* *Pathol.* An umbilical hernia where the projecting sac contains blood.— **hem″a-to-my-e′li-a,** *n.* *Pathol.* Hemorrhage within the spinal cord.— **hem″a-to-my″e-li′tis,** *n.* *Pathol.* Myelitis combined with hematomyelia.— **hem″a-to-my′e-lo-pore,** *n.* A cavity left in the spinal cord where a blood-clot has been absorbed.— **hem″a-to-ne-phro′sis,** *n.* Effusion of blood into the pelvis of the kidney.— **hem″a-ton′ic.** **I.** *a.* Improving the tone of the blood. **II.** *n.* A medicine that corrects the condition of the blood.— **hem″a-to-pa-thol′o-gy,** *n.* The doctrine of diseases affecting the blood.— **hem″a-to-per″i-car′di-um,** *n.* *Pathol.* Effusion of blood in the pericardium.— **hema″to-pex′is,** *n.* The time needed for clotting the blood.— **hem″a-toph′a-gous,** *a.* Feeding in blood, as a hemoplasmodium. — **hem″a-to-phil′i-a,** *n.* *Med.* A congenital tendency to hemorrhage; defective coagulability of the blood.— **hem″a-to-phil′ic,** *a.* *Pathol.* Same as HEMOPHILIC.— **hem″a-to-pho′bi-a,** *n.* *Med.* An inordinate horror at the sight of blood.— **hem′a-to-phore,** *n.* An apparatus for the transfusion of blood.— **hem′a-to-phyte,** *n.* *Pathol.* A bacterial or vegetable organism introduced into the blood.— **hem″a-to-pla′ni-a,** *n.* *Pathol.* A vicarious hemorrhage, as vicarious menstruation, where the menstrual fluid comes from any organ other than the uterus.— **hem′a-to-plast,** *n.* See HEMATOBLAST.— **hem″a-to-plas′tic,** *a.*— **hem″a-to-poi-e′sis,** *n.*— **hem″a-to-poi-et′ic,** *a.*— **hem″a-to-por′phy-rin,** *n.* A metabolite, or decomposition product of the histohematin, enterohematin, etc., of invertebrates.— **hem″a-to-por″phy-ri-nu′ri-a,** *n.* The presence of hematoporphyrin in the urine.— **hem″a-to-pla′ni-a,** *n.* The emission of blood in an abnormal way, as by vicarious menstruation. — **hem″a-to-por″phy-roi′din,** *n.* A product resulting from the decomposition of hematoporphyrin.— **hem″a-tor-rha′chis,** *n.* *Pathol.* Hemorrhage into the enveloping spinal membranes. **hem″a-to-rha′chis‡.**— **hem″a-tor-rhe′a,** *n.* *Pathol.* A bloody flux; morbid discharge commingled in blood. **hem″a-tor-rhœ′a‡.**— **he-mat′o-sac,** *n.* A vascular sac connected with the infundibulum of the brain in certain fishes.— **hem″a-to-sal′pinx,** *n.* *Pathol.* An accumulation of blood in a Fallopian tube.— **hem′a-tose,** *a.* *Pathol.* Fully or abnormally charged with blood; overcharged with blood.— **hem″a-to-sep′sis,** *n.* *Pathol.* Dissolution of the blood.— **hem″a-to′sin,** *n.* Same as HEMATIN, 1.— **hem″a-to′sis,** *n.* The formation of blood; conversion of chyle or venous blood into arterial blood.— **hem″a-to-spec′tro-scope,** *n.* A hemaspectroscope.— **hem″a-to-stib′i-ite,** *n.* *Mineral.* A black manganese and iron antimonate ($8MnO.Sb_2O_5$) that crystallizes in the orthorhombic system.— **hem″a-to-tho′rax,** *n.* *Pathol.* Effusion of blood into the chest; pleural hemorrhage. **hem″a-tho′rax‡.**— **hem″a-to-tym′pa-num,** *n.* *Pathol.* Hemorrhage into the tympanum of the ear.— **hem′a-tous,** *a.* Pertaining to or similar to blood.— **hem″a-tox′in,** *n.* Same as HEMOLYSIN.— **hem″a-tox′y-lin,** *n.* *Chem.* A colorless crystalline compound ($C_{16}H_{14}O_6$) containing the coloring-matter of logwood (*Hæmatoxylon campechianum*), used extensively in microscopy. **hem′a-tin‡; hem″a-tox′y-line‡.**— **Hem″a-tox′y-lon,** *n.* *Bot.* A genus of Central-American trees of the bean family, of which the logwood (*H. campechianum*) is the only known species.— **hem″a-to-zo′ic,** *a.* Living in the blood, as the parasitic trematode bilharzia.— **hem″a-to-zy-mot′ic,** *a.* *Med.* Pertaining to, caused by, or proceeding from zymosis or morbific fermentation of the blood. — **hem″a-tu-re′sis,** *n.* *Pathol.* The passage of urine and blood.— **hem″a-tu′ri-a,** *n.* *Pathol.* Hemorrhage from the mucous membrane of the urinary passages due to general disorder, local disease or actual injury of the organs.— **hem″a-tu′ric,** *a.* Of or pertaining to hematuria.

hem-au′to-graph, 1 hem-ē′to-graf; 2 hĕm-a̤′to-grăf, *n.* An apparatus for registering the pulse-curve by means of blood spurting from an opened artery; also, a record by this apparatus. [< HEM- + AUTOGRAPH.] **hem-au′to-gram‡.** — **hem-au″to-graph′ic,** *a.*— **hem″au-tog′ra-phy,** *n.* The use or art of using the hemautograph.

Hem′dan, 1 hem′dən; 2 hĕm′dan, *n.* *Bib.* *Gen.* xxxvi, 26.

hem-dur′gan, 1 hem-dūr′gən; 2 hĕm-dûr′ḡan, *n.* A scorpænoid food-fish, the rosefish (*Sebastes marinus*).

hem′el, 1 hem′el; 2 hĕm′ĕl, *n.* [Prov. Eng.] A shed; a hovel; also, a stable. **hem′ble‡; hem′mel‡.**

Hem′el Hemp′stead. A borough and market-town in Hertfordshire, England.

hem-el′y-trum, *n.* Same as HEMIELYTRUM. **hem-el′y-tron‡.**

hem′er-a-, **hem′er-i-,** **hem′er-o-,** 1 hem′ər-ə-, hem′ər-ı-, hem′ər-o-; 2 hĕm′er-a-, hĕm′er-i-, hĕm′er-o-. From Greek *hēmera,* a day: combining forms.— **hem″er-a-lo′pi-a,** *n.* *Pathol.* Day-blindness; a visual defect in which sight is less distinct by daylight than by night or by artificial light: the original meaning of the term. Many modern authors have employed it for the opposite, or night-blindness, but the Royal College of Physicians of London has reverted to the true meaning of the word.— **hem″er-a-lop′ic,** *a.*— **hem″er-an′thous,** *a.* *Bot.* Having flowers opening in the daytime only: said of higher plants.— **Hem″er-is-ti′i-dæ,** *n. pl.* *Entom.* A Carboniferous family of large neuropterous insects having wings broadest beyond the middle, and with numerous cross-veins but no reticulations. **Hem″er-is′ti-a,** *n.* (t.g.)— **hem″er-is′ti-id,** *a.* & *n.*— **hem″er-is′ti-oid,** *a.*— **Hem″er-o-bap′tist,** *n.* A member of an ancient Jewish sect practising daily ceremonial ablution; also, one of an early Christian sect holding to daily baptism. — **Hem″er-o-bi′i-dæ,** *n. pl.* *Entom.* A family of planipennate neuropterous insects. **Hem″er-o′bi-us,** *n.* (t. g.)— **hem″er-o′bi-an, hem′er-o-bid, hem″er-o′bi-id,** *a.* & *n.* — **hem″er-o′bi-oid,** *a.*— **Hem″er-o-cal′lis,** *n.* *Bot.* A small genus of Old World herbs of the lily family, with short rootstock, narrow radical leaves, and large, somewhat funnel-shaped yellow flowers. Several species are common in cultivation under the name of *day-lily.*— **hem″er-o-lo′gi-um,** *n.* [-GI-A, *pl.*] A table or list of days obtained from or given in calendars. **hem″er-ol′o-gy‡.**

[< L. *hemicyclium,* < Gr. *hēmikyklion,* < *hēmi-,* half, + *kyklos,* circle.] — **hem″i-cyc′lic,** *a.* *Bot.* Half-cyclic: said of a flower in which part of the whorls are spiral and part cyclic.

hem″i-cy′clone, *n.* [Rare.] *Meteor.* Half of a cyclone, regarded as divided either horizontally or vertically. In the latter case the other half may be undeveloped.— **hem″i-cy-lin′dri-cal,** *a.* Same as SEMICYLINDRICAL.— **hem″i-dac′tyl,** *n.* An Old World gecconoid lizard (genus *Hemidactylus*) having dilated toes with two rows of transverse imbricated scales. **hem″i-dac′tyle‡.**— **hem″i-dac′ty-lous,** *a.*— **hem″i-dem″i-sem′i-qua″ver,** *n.* *Mus.* A sixty-fourth note. See illus. under NOTE¹, *n.*, 11.— **Hem″i-des′mus,** *n.* *Bot.* A genus of asclepiadaceous twining plants, natives of southeastern Asia. They have opposite leaves and small cymose flowers, the corolla rotate, with 5 fleshy roundish scales in the throat below the stamens. The roots of *H. indicus* are used in medicine.— **hem″i-di″a-pen′te,** *n.* *Gr. Mus.* An imperfect or diminished fifth.— **hem″i-di″a-pho-re′sis,** *n.* *Pathol.* Sweating or perspiration on only one-half of the body. — **hem″i-dip″lo-id′i-on,** *n.* [-ID′I-A, *pl.*] *Gr. Antiq.* A woman's robe with a fold doubling over at the top and not reaching down as far as the waist, or, possibly, covering only the front of the figure.— **hem″i-di′tone,** *n.* *Gr. Mus.* A dissonant interval slightly less than a minor third.— **hem′i-dome,** *n.* *Crystal.* That form in a crystal composed of two parallel domatic planes in the triclinic, or of two parallel orthodo-

matic planes in the monoclinic system of crystallization.—**hem″i-do-ma′ic**, *a.*—**hem″i-dro′sis**, *n.* Same as HEMATHIDROSIS.—**hem″i-dy″os-the′si-a**, *n.* *Pathol.* Dyesthesia on one side of the body.—**hem″i-dys″es-the′si-a**.—**hem″i-dys-tro′phi-a**, *n.* *Bot.* Imperfect nourishment of trees due to interference with their roots by the encroaching roots of other trees, or other circumstances.—**hem″i-e′dric**, *a.* Same as HEMIHEDRAL.—**hem″i-el′y-trum**, *n.* [-TRA, *pl.*] 1. *Entom.* One of the partially thickened and hardened fore wings of bugs or certain other insects. 2. *Helminth.* One of the large imbricated dorsal scales of certain tapeworms and nebelids, as the sea-mice. **hem″i-el′y-tron**.—**hem″i-el′y-tral**, *a.*—**hem″i-en′ce-lon**, *n.* [-LA, *pl.*] A lateral half of the brain or encephalon.—**hem″i-en″ce-pha′lic**, *a.*—**hem″i-en-ceph′a-lus**, *n.* [-LI, *pl.*] *Terat.* A monster having but half a brain, or having a brain nearly natural but without the organs of the senses.—**hem″i-ep′i-lep″sy**, *n.* *Pathol.* Epilepsy characterized by convulsions on one side only.—**hem″i-ep′i-phyte**, *n.* An epiphyte which sends roots down to the soil.—**hem″i-e′pha**, *n.* Pertaining to one side of the face.—**Hem″i-ga-il′ne**, *n. pl.* *Mam.* A subfamily of viverroid carnivores having sectorial teeth with large tuberculate ledges, hairy soles, and a prominent ringed tail, including one species from Borneo and Malakka.—**hem″i-ga′le**, *n.* (t. g.) **Hem″i-ga′le-i′næ**.—**he-mig′a-lin**(es), *a.* & *n.*—**hem″i-ge′nous**, *a.* *Bot.* Having one of the two floets in the same spikelet neuter and the other unisexual, whether male or female, as some grasses.—**He-mig′a-nus**, *n.* *Paleon.* A genus of mammals of the most primitive type of the order *Ganodonta*, found in the Eocene, the size of a medium-sized dog, with powerful jaws, and feet similar to the sloth's, found in the Lower Eocene of America.—**hem″i-geom′e-ter**, *n.* A noctuid moth which resembles a hopworm or geometer; from the partial looping of its body.—**hem″i-glos-si′tis**, *n.* *Pathol.* Inflammation of one-half of the tongue.—**Hem″i-glos′si-na**, *n. pl.* *Zoöl.* A division of birds comprising the spoonbills and ibises or spoonbills of.—**hem″i-glot-tid′e-an**, *a.*—**hem″i-glyph**, *n.* *Arch.* A half-grooved member, as the Doric triglyph.—**he-mig′na-thous**, *a.* Having one mandible shorter than the other.—**hem″i-group**, *n.* *Chem.* One of the two divisions, according to Kühne, into which the albumins are resolved by the processes of digestion: the protoalbumose and heteroalbumose and opposed to *antigroup*.—**hem″i-gy′rus**, *n.* *Bot.* A follicle.—**hem″i-he′dral**, *a.* *Crystal.* Of, pertaining to, or containing a hemihedron.—**hem″i-hed′ral**, *a.* Same as HEMIHEDRAL.—**hem″i-he′dric**, *a.* *Crystal.* The state of being hemihedral.—**hem″i-he′dry**†.—**hem″i-he′dron**, *n.* *Crystal.* A form having half the number of planes usually arranged planes occurring on a holohedron.—**hem″i-het′ero-cer″cy**, *n.* In fishes, a condition intermediate to some extent between heterocercy and homocercy.—**hem″i-het″ero-cer′cal**, *a.*—**hem″i-hol′ow-he′dral**, *a.* *Crystal.* Of, pertaining to or denoting those hemihedrons in which all the octants contain half the whole number of similar planes.—**hem″i-hy′draz**, *n.* *Chem.* A compound of half a molecule of water with another substance.—**hem″i-hy″per-es-the′si-a**, *n.* *Pathol.* Hyperesthesia of one-half of the body.—**hem″i-hy-per′tro-phy**, *n.* *Pathol.* Hypertrophy of one half of the body or of a part.—**hem″i-hyp′no-tism**, *n.* The development of the hypnotic condition in only one-half of the body.—**hem″i-hy-pæ′sis**, *n.* [-SES, *pl.*] *Pathol.* A state of half or partial lethargy.—**hem″i-le-thar′gic**, *a.*—**he-mil′o-gous**, *a.* *Chem.* Denoting the characteristics of a series of compounds which have a difference of composition of nCH2.—**hem″i-ly′tic**, *a.* *Pathol.* Characterized by lithecolysis.—**hem″i-mal′lic**, *a.* *Chem.* Containing half the carboxyl radicles of mellitic acid; as, *hemimallitic acid* (C6H3(COH)3).—**hem″i-mer′id-ic**, *n. pl.* *Entom.* A family of diploglossate insects of cricket-like aspect, but with 2 superposed palpigerous labia.—**hem″i-mer′o-hed′ral**, *a.* (t. g.) = **hemi-hedral**, *a.* & *n.*—**hem″i-me′roid**, *a.*—**Hem″i-me-tab′o-la**, *n. pl.* *Entom.* A section of insects manifesting an incomplete metamorphosis, especially including the *Hemiptera*.—**hem″i-me″ta-bol′ic**, *a.*—**hem″i-me-tab′o-ly**, *n.* Same as HEMIMETAMORPHOSIS.—**hem″i-me-tab′o-le**†.—**hem″i-me″ta-mor′pho-sis**, *n.* Incomplete metamorphosis.—**hem″i-me″ta-mor′phic**, *a.*—**hem″i-mor′ph**, *n.* *Crystal.* A combination form in which the two ends terminate in dissimilar faces.—**hem″i-mor′phic**, *a.* *Crystal.* Having the two ends bounded by dissimilar planes: said of a crystal.—**hem″i-mor′phous**†.—**hem″i-mor′phism**, *n.* *Crystal.* The state of being hemimorphic.—**hem″i-mor′phite**, *n.* *Mineral.* Same as CALAMINE.—**Hem″i-my-a′ri-a**, *n. pl.* *Ascid.* A suborder or order of thaliacean tunicates having the musculature of the mantle in the form of a series of transversely running muscular bands, the bands not forming complete independent rings, as in salpa.—**hem″i-my-a′ri-an**, *a.* & *n.*

he′min, 1 h'min; 2 hē′min, *n.* *Chem.* A brownished crystalline compound ($C_{68}H_{70}N_8Fe_2O_{12}2HCl$) formed by the action of acetic acid and salt on hemoglobin; hematin hydrochlorid. [< Gr. *haima*, blood.] **he′mine**†.

Hem′ing-ford, 1 hem′ing-ford; 2 hem′ing-ford, **Walter de** —1347). An historian. **Hem′ing-ford′ian-burgh**.—**hem″i-o-bo′il-on**, *n.* [Gr.] An ancient Greek coin, in value half an obolus.—**hem″i-oc″ta-he′dron**, *n.* [-DRA, *pl.*] Octahedron.—**hem″i-o-he′dral**, *a.*—**hem″i-o′lic**, *a.* In medieval music: 1. A perfect fifth. 2. A triplet of notes.—**hem″i-o-let′**.—**hem″i-ol′ic**, *a.* *Gr. Pros.* Denoting a rhythm (as the Pæonic) in which the relation of thesis to arsis is as 3 to 2 (⅗ time).—**hem″i-o-pi′a**, *n.* The same as the Cretic (— ⏑ —), bacchius (⏑ — —), and antibacchius (— — ⏑).—**hem″i-o-leg′a-mous**, *a.* Referring to the spikelets of certain grasses (*Panicum*) which have only one fertile flower.—**he-mi′o-ne**, *n.* A wild ass, the dziggetai (*Equus hemionus*).—**hem″i-o-nus**†.

Hem″i-o-ni′tis, 1 hem″i-o-nai′tis; 2 hēm″i-o-ni′tis, *n.* *Bot.* A genus of tropical polypodiaceous dwarf ferns, having netted veins and naked sori continuing along them. Several species are in cultivation. [< Gr. *hēmionitis*, *mule*.]

hem′i-ope, *n.* An ancient tubular wind-instrument with three holes.—**hem″i-o′pi-a**, *n.* *Pathol.* Same as HEMIANOPSIA.—**hem″i-op′si-a**†.—**hem″i-op-sy′**.—**hem″i-op′ic**, *a.*—**hem″i-or′thic-type**.—**hem″i-os′te-ous**.—**he-mip′a-gus**, *n.* [-GI, *pl.*] *Terat.* A double monster united at the thorax.—**hem″i-pal′mate**, *a.* Semipalmate; half-webbed.—**hem″i-pa-rab′o-la**, *n.* That part of a parabola situated on one side of the axis.—**hem″i-pa-ral′y-sis**, *n.* Same as HEMIPLEGIA.—**hem″i-par″an-es-the′si-a**, *n.* *Pathol.* Anesthesia of the lower half of the body on one side.—**hem″i-par′a-ple″gi-a**, *n.* *Pathol.* Paralysis of one leg.—**hem″i-par′a-site**, *n.* A plant partly parasitic.—**hem″i-par′e-sis**, *n.* *Pathol.* Partial paralysis of one side.—**hem″i-pa-ret′ic**, *a.*—**hem″i-par″es-the′si-a**, *n.* Abnormal sensation or formication of one side of the body.—**hem″i-pel′ic**, *a.* Of the consistency of fine-grained clay.—**hem″i-pe′nis**, *n.* *Zoöl.* One of the paired copulatory organs in snakes and typical saurians.—**hem″i-pep′tone**, *n.* *Physiol.* A substance formed by the intestinal digestion of albumin. It differs from antipeptone in that pancreatic juice changes it into tyrosin and leucin. See PEPTONE; HEMIALBUMOSE.—**he-mip′i-o-na**, *n. pl.* *Phon.* Semi-vowels.—**Hem″i-phar′ynx**, *n.* [NL. *pl.* *Herp.* A Neotropical family of toad-like arciferous batrachians with sacral diapophyses not dilated, and mandibular as well as maxillary teeth. **Hem″i-phrac′tus**, *n.* (t. g.).—**hem″i-phrac′tid**, *a.* & *n.*—**hem″i-phrac′toid**, *a.* & *n.*—**hem″i-phrase**, *n.* *Mus.* Half a phrase.—**hem″i-pi′ic**, *a.* *Chem.* Noting a dibasic crystalline acid ($C_5H_8O_4$) derivable by decomposition of opianic acid. It has an astringent taste and melts at 150° C.—**he-mip′ic**†.—**hem″i-plane**, *n.* *Geom.* The part of a plane on one side of a straight line therein.—**hem″i-plank′ton**, *n.* [Rare.] *Biol.* Marine animal and plant life found in shallow waters.—**hem″i-plank-ton′ic**, *a.*

hem″i-ple-gi′a, 1 hem′i-pli′ji-a; 2 hēm″i-plē′gi-a, *n.* *Pathol.* Paralysis of one side of the body.

In the *hemiplegia*, when the limbs on one side have lost their power of voluntary motion, the patient is for many days perpetually employed in moving those of the other.

DARWIN *Zoönomia* vol. I, p. 370. [*c. 1801.*]

[< Gr. *hēmiplēx*, stricken on one side, < *hēmi-*, half, + *plēssō*, strike.] **hem″i-ple-gy**†; **hem″i-plex′i-a**†; **hem″i-plex-y**†.—**alternate hemiplegia** (*Pathol.*), paralysis of one side of the face and of the limbs on the other side of the body, or of the arm on one side and the leg on the other, crossed h.†.—**hem″i-ple′gi-a-ap′pa-ra′tus**, *n.* A device for supporting a person who is paralyzed on one side.—**hephæstic h.**, the hammer-palsy, a form of paralysis occurring among workmen who habitually wield a single-handed hammer.—**progressive ascending h.**, ascending paralysis of one side of the body.—**spinal h.**, same as HEMIPARAPLEGIA.—**hem″i-ple′gic**, *a.* & *n.* **hem″i-ple′gi-ac**†.

hem″i-plex′us, *n.* A proposed vessel having its hull entirely submerged and the living and fighting portions supported upon posts or pillars, and above the water: the precursor of the whaleback of 1891.—**hem″i-plin′thi-on**, *n.* A device resembling a person who is paralyzed on one side.—**hephæstic h.**, the hammer-palsy, a form of paralysis occurring among workmen who habitually wield a single-handed hammer.—**progressive ascending h.**, ascending paralysis of one side of the body.—**spinal h.**, same as HEMIPARAPLEGIA.—**hem″i-ple′gic**, *a.* & *n.* **hem″i-ple′gi-ac**†.

hem″i-pte′ra, *n. pl.* Same as HEMIPTERA.—**hem″i-pter′al**, *a.*—**hem″i-pter′an**, *n.* One of the *Hemiptera*.—**hem″i-pter′ic**, *a.*—**hem″i-pter′id**, *n.* One of the *Hemipterida*.—**hem″i-pter′i-da**, *n. pl.* *Entom.* An order of insects, especially those with the metamorphosis incomplete or irregular, mouth-organs generally modified and adapted for piercing, with lateral channels (mandibles), styliform maxillæ without palpi, applied laterally to mandibles, and diversiform wings usually four: including *Heteroptera* and *Homoptera* or ordinary bugs.—**hem″i-pter′id**, *n.* One of the *Hemipterida*.—**hem″i-pter′ist**, *n.* A student or collector of *Hemiptera*.—**hem″i-pter′ous**, *a.* Of, pertaining to, or denoting the *Hemiptera*.—**hem″i-pter′on**, *n.* Same as PALÆODICTYOPTERA.—**hem″i-pter′oid**, *n.* *Entom.* Same as *Hemipteroidea*.—**hem″i-pter′y-goid**, *n.* *Anat.* A bone which becomes ankylosed with the basisphenoid of the palate.—**hem″i-pter′y-a-mid**, *n.* *Crystal.* A form consisting of two pairs of similar parallel planes cutting all three axes in the monoclinic system of crystallization.—**hem″i-pter′y-phyte**.—**hem″i-rham-phi′ne**, *n. pl.* *Ich.* A subfamily of exocetoid fishes; halfbeaks. **Hem″i-rham′phus**, *n.* (t. g.).—**hem″i-rhamph**, *n.*—**hem″i-rham′phid**, *n.* & *a.*—**hem″i-rham′phine**, *a.* A plant partly saprophytic.—**Hem″i-seyl-il′i-da**, *n. pl.* *Ich.* A family of sharks with the anal behind the second dorsal and ovoviviparous gestation. **Hem″i-scyl′lium**, *n.* (t. g.).—**hem″i-scyl′lid**, *n.* & *a.*—**hem″i-scyl′li-oid**, *a.* & *n.*—**hem″i-sect**, *vt.* To divide along the mesial plane, or into right and left halves: bisect.—**hem″i-sec′tion**, *n.* Division of the body at the mesial plane; hemitomy.—**hem″i-sep′tum**, *n.* The resulting from such division.—**hem″i-sep′tum**, *n.* [-TA, *pl.*] *Anat.* A lateral half of a partition.—**hem″i-sep′ta**, *a.*—**hem″i-sine**, *n.* (t. g.).—**hem″i-soid**, *a.* & *n.*—**hem″i-some**, *n.* A half of an animal's body.—**hem″i-som-nan′bu-lism**, *n.* *Pathol.* A condition in which the patient, the physically unaffected side, manifests somnambulistic tendencies.—**hem″i-spasm**, *n.* *Pathol.* Spasm confined to one side of the body.

hem″i-spere, 1 hem′i-sfir; 2 hēm″i-sfēr, *n.* 1. A half-sphere, formed by a diameter and lying through the center of the sphere. 2. A half of the terrestrial or of the celestial globe, or a map or projection of the half of either on a plane surface. The world is usually considered as divided into the eastern and the western, and *southern* hemispheres, or at some meridian between Europe and America into the *eastern* and *western*, usually at the twentieth meridian west of Greenwich.

3. The inhabitants of a hemisphere of the earth. 4. A realm; sphere. 5. *Anat.* One of two large convoluted, semiovoid masses forming the bulk of the cerebrum. See illus. under CORPUS CALLOSUM.

The eleven hats affected the left *hemisphere* of the brain more than the right. *New-York Tribune* Dec. 14, 1891, p. 1, col. 5.

[< L. *hemisphærium*, < Gr. *hēmisphairion*, < *hēmi-*, half, + *sphaira*, sphere.]—**cerebral hemisphere**.—**animal hemisphere** (*Embryol.*), the germinative part of the egg, as distinguished from the food-yolk.—**Blot's h.**, a device to illustrate the spread of attractive polarity, consisting of two hemispheres of brass enclosing a brass globe, electrically charged. On removing the hemispheres by means of insulated handles the charge is found to be upon their outer surface.—**cerebral h.** See *cerebral hemisphere*, n., 5.—**h. of illumination**, the half of a planet's contour on which the sun shines.—**h. of vision**, the hemisphere that is visible to an onlooker.—**land h.** (*Phys. Geog.*), that half of the earth's surface which includes the greatest amount of land.—**Magdeburg hemispheres**, hemispherical cups made from brass accurately fitting each other to form a hollow sphere from the interior of which the air may be exhausted: invented by Otto von Guericke, of Magdeburg, to illustrate the pressure of the atmosphere.—**vegetative h.** (*Embryol.*), that part of an egg which contains the food-yolk.—**water h.**, that half of the earth's surface which includes the greatest amount of water.—**hem″i-sphered**, *a.* [Rare.] Having the form of half a sphere.

hem″i-spher′ic, **hem″i-spher′i-cal**, *a.* Of, pertaining to, or having the form of a hemisphere.—**hemispheric anomaly** (*Meteor.*), the difference between the mean value of an element (usually temperature) at any place on the earth's surface and the mean pertaining to the whole parallel of latitude on which the place is situated. If the comparison is made with the mean pertaining to the corresponding latitude of both hemispheres, the anomaly is said to be *holospheric*.

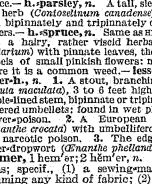
hem″i-sphe′roid, *n.* The half of a spheroid.—**hem″i-spher-oi′dal**, *a.*—**hem″i-spher′ule**, *n.* A half-spherule.—**hem″i-ster′num**, *n.* [-NA, *pl.*] One of the two constituinous bars from which the primitive sternum is formed.

hem″i-stich, 1 hem′i-stik; 2 hēm′i-stik (XIII), *n.* *Pros.* 1. One of the two parts of a line of poetry into which it is divided by the cesura. 2. Half a line, more or less, metrically complete and standing by itself; an incomplete line.

The necessary mental pause after every *hemistich* or imperfect line is always equal to the time that would have been taken in reading the complete verse.

COLERIDGE *Table Talk* May 12, 1830.

3. One of the sections, of irregular length, into which Anglo-Saxon and Old German alliterative verse is divided. [< L. *hemistichium*, < Gr. *hēmistichion*, < *hēmi-*, half, + *stichos*, line.]—**hem″i-stich′al**, *a.* Pertaining to or composed of hemistichs; as, a *hemistichal* form.



hem″i-sym′me-try, *n.* 1. *Crystal.* Same as HEMIHEDRISM. 2. *Biol.* Bilateral symmetry.—**hem″i-syn-me′tric**, **hem″i-syn-met′ric-al**, *a.*—**hem″i-sys′tem**, *n.* Hemisymmetric.—**hem″i-sys′to-le**, *n.* Contraction of only one of the heart's ventricles.—**hem″i-tax-y**, *n.* Same as HEMATAXIS.—**hem″i-te′ra**, *n. pl.* *Entom.* Those who are born deformed, but not sufficiently so to be considered monsters.—**hem″i-ter′pene**, *n.* *Chem.* One of a series of compounds having the formula C_5H_8, of which isoprene is the most important.—**hem″i-ter-y**, *n.* [-IES, *pl.*] *Pathol.* A malformation not amounting to monstrosity.

hem″i-tis, 1 hi-mai′tis *or* -mi′tis; 2 hē-mī′tis *or* -mī′tis, **he-mī′tis**, *n.* *Pathol.* A condition of the blood due to inflammation. [< Gr. *haima*, blood.]—**hem″a-ti′tis**†.

hem″i-tone, *n.* *Gr. Mus.* A half step.—**hem″i-ri-chous**†, *a.* *Bot.* Half covered: said of the leaves of mosses.—**hem″i-tri-a**, *n.* A half-triglyph.—**Hem″i-trip-ter′i-dæ**, *n. pl.* *Ich.* A family of cottoidean fishes with the spinous dorsal fin larger than the soft one and the ventrals thoracic.—**hem″i-trip′ter**, *n.* One of the *Hemiptera*.—**hem″i-trip′ter-ous**, *a.* (t. g.)—**hem″i-trip′ter-id**, *n.*—**hem″i-trip′ter-oid**, *a.* & *n.*—**Hem″i-trip-te′ra**, *n.* The *Hemiptera* as a family or subclass.—**hem″i-trope**, *n.* *Crystal.* A form in which one part of a crystal is in reverse position with reference to the other part; a twin crystal.—**hem″i-tro′pic**, *a.*—**hem″i-tro′pous**, *a.* 1. Turned half-way around; half inverted; specif., in botany, half anatropous: amphitropous: said of a half-inverted ovule. 2. *Entomol.* Partially adapted for piercing flowers: said of certain bees.—**hem″i-zo′a**, *n. pl.* *Bot.* A genus of annual, rarely perennial, herbs of the aster family, with yellow flower-heads, allied to *Helianthus*. Several species are known in California as tarweeds.

Hem″ling, n. Same as MEMLING. Hans is an erroneous form.

hem′lock, 1 hem′lok; 2 hēm′lŏk, *n.* 1. The hemlock-spruce (*Tsuga canadensis*), a well-known evergreen of the pine family. 2. The lumber or timber of the hemlock-spruce. 3. A large poisonous biennial herb (*Conium maculatum*) of the parsley family, naturalized from Europe, with spotted stem, large decompound leaves, and small white flowers. It is a powerful narcotic, and exhales a disagreeable odor when bruised. Tannic acid and atropin are employed as antidotes. [< AS. *hemlic*.]

Hemlock.
a, branch showing cones.

A drowsy numbness pains my sense,
As though of *hemlock* I had drunk.

KEATS *Ode to a Nightingale* st. 1.

—**alpine hemlock**, a large umbelliferous plant (*Ligusticum mutellina*), found in the Sierras west of the Rocky Mountains. The bark is used in tanning. **black h.**, **Canadian h.**, same as HEMLOCK-SPRUCE.—**creeping h.**, same as GROUND-HEMLOCK.—**herb h.**, **hemlock-tree**†-**vil**, *n.* An Old World herb (*Tortilis anthriscus*) of the parsley family.—**h.-dropwort**, *n.* A European herb (*Œnanthe fistulosa*) of the parsley family.—**h.-fir**, same as HEMLOCK-spruce.—**h.-parsley**, *n.* A tall, slender, and smooth perennial herb (*Conioselinum canadense*) of the parsley family, with bipinnately and tripinnately divided leaves and white flowers.—**h.-spruce**, *n.* Same as HEMLOCK, 1.—**h. stork's-bill**, a hairy, rather viscid herbaceous annual (*Erodium cicutarium*) with pinnate leaves, ladies pinnatifid, and umbels of small pinkish flowers: naturalized from Europe, where it is a common weed.—**lesser h.**, fool's parsley.—**water h.** 1. A stout, poisonous umbelliferous plant (*Cicuta maculata*), 3 to 6 feet high, with tuberiform roots, purple-tinted stem, bipinnate or tripinnate leaves, and many-flowered umbellets: found in wet places; spotted cowbane; beaver-poison. 2. A European subumbelliferous plant (*Œnanthe crocata*) with umbelliferous flowers. The juice is a narcotic poison. 3. The edgeweed, water-fennel, or marestail (*Hippuris vulgaris*).—**yellow h.**, the prickly lettuce.

hem′mer, 1 hem′er; 2 hēm′er, *n.* One who or that which hems; specif., (1) a sewing-machine attachment for hemming any kind of fabric; (2) a tool for turning the edge of sheet metal in hemming-machine.

hem′ming, 1 hem′iŋ; 2 hēm′iŋ, *n.* A hem, or hems collectively, as of a garment; also, the stitching by which a hem is fastened down.—**German hemming** (*Vesetework*), a felt-like style of hemming in which the stitches do not show on the right side: used to join the raw edges of material.—**hem′ming-ma-chine″**, *n.* In sheet-metal work, a machine that forms the handles of cans and other utensils by doubling over the edges of the metal.

hem′o-, 1 hem′o-; 2 hēm′o-. From Greek *haima*, blood: a combining form. [All words with this form are properly

spelled also *hæmo-*. See HÆMO-; HEMA-.] — **hem″o-ag-glu″ti-nin,** *n.* An agglutinin which makes the red corpuscles in the blood coalesce.— **hem″o-chro″ma-to″sis,** *n.* A pathological state evidenced by a general deterioration of the blood, the liver usually depositing an iron pigment known as hemosiderine, etc. Same as HEMOCHROMATOSIS.— **hem″o-chro″mo-gen,** *n. Physiol. Chem.* A purple compound ($C_{68}H_{37}N_8FeO_5$) contained in the blood and formed by reducing hemoglobin in the absence of oxygen. — **hem″o-chro″mom-e-ter,** *n. Physiol. Chem.* An apparatus used for estimating hemoglobin in fluids by a comparison with standard solutions.— **hem″o-chro-mom″e-try,** *n.* The use of hæmochromometer.— **hem″o-cyte,** *n.* The part of the primitive body-cavity in mammalia that becomes separated to form the heart. **hem″o-ce″lom‡;** **hem″o-co-lo″ma,** *n. Pathol.* Same as **—hem″o-cœ-lo″ni-on,** *n.* One of the small granules found in the blood, thought to be detritus of white corpuscles. The dust-particles of Müller.— **hem″o-cry″ti-cal,** *a.* Cr. The pressure in fresh blood of a large quantity of hemocynia.— **hem″o-crys″tal-lin,** *n.* Same as HEMOGLOBIN.— **hem″o-cy″a-nin,** *n.* The blue pigment found in the blood of many invertebrates. It contains copper, and is blue only when it contains oxygen, when it is called *cayhemocyanin.* When deprived of its oxygen it becomes colorless.— **hem″o-cyte,** *n.* Same as HEMATOCYTE.— **hem″o-cy-to″sis,** *n. Pathol.* Dissolution of the red corpuscles of the blood within the blood-vessels.— **hem″o-cy-tom″e-ter,** *n.* Same as HEMACYTOMETER.— **hem″o-cy-to″zoa,** *n. pl. Pathol.* The breaking up of the red corpuscles of the blood into minute fragments, by pressure.— **hem″o-drom″e-ter,** **hem″o-dy-nam″e-graph,** **hem″o-dy-nam″ic,** **hem″o-dy-nam″ics,** **hem″o-dy-nam″ics,** same as HEMADROMETER, etc.— **hem″o-e-ryth″rin,** *n. Physiol. Chem.* The normal coloring-matter of the red blood-corpuscles of certain invertebrates, notably worms. It is the hæmoglobin. *n.* A dry substance, mostly oxyhemoglobin, prepared from the blood of oxen.— **hem″o-fus″in,** *n.* A brownish coloring-matter obtained from hemoglobin, that has no iron in its composition.— **hem″o-gal″ol,** *n. Chem.* A reddish-brown insoluble compound obtained by oxidizing the hemoglobin of the blood with potassium ferricyanide in the presence as a hematinic.— **hem″o-gas″tric,** *a.* Pertaining to or involving the blood and the stomach; having blood in the stomach. — **hem″o-gen″e-sis,** *n.* Same as HEMATOGENESIS.

Other words beginning with this prefix will be found in alphabetical place, either singly or in groups.

hem″o-glo″bin, } I hem″o-glō″bin; 2 hĕm″o-glō″bin, *n.* A **hæm″o-glo″bin,** } pigment found in the blood ($C_{68}H_{70}N_8FeO_{14}$), amorphous in structure, forming the solid coloring-matter of red blood-corpuscles. It carries oxygen from the lungs, and is a mixture of hematin and globulin. Arterial blood contains oxyhemoglobin, while venous blood contains hemoglobin. The hemoglobin of some vertebrata crystallizes, when it is called *hemocrystallin.* **hem″o-glob″u-lin,** [< HEMO- + GLOBULIN.] The globin of the blood.— **hem″o-glo″bi-nat″ed,** *a.* Containing a slight quantity of hemoglobin.— **hem″o-glo″bi-ne″mi-a,** *n.* The presence of hemoglobin in a free state in the corpuscles of the blood. **hem″o-glo-bi-ne″mi-a‡.— hem″o-glo″bi-nif″er-ous,** *a.* Yielding or containing hemoglobin.— **hem″o-glo″bi-no-che″ta,** *n. Med.* The presence of hemoglobin in bile. — **hem″o-glo″bi-nom″e-ter,** *n.* An instrument for measuring the amount of hemoglobin in the blood: hemochrometer.— **hem″o-glo″bi-nom″e-try,** *n.* Analysis by hemoglobin.— **hem″o-glo″bi-nu″ri-a,** *n. 1. Pathol.* Passage of free hemoglobin in the urine; bloody urination. 2. *Veter.* Azoturia.— **hem″o-glo″bi-nu″ric,** *a.*

he″moid, *a.* Hematoid.— **hem″o-ko″ni-a,** *n. pl.* Colorless, highly refractive, spheroid or dumb-bell-shaped bodies constantly present in normal or pathologic blood: so called by Mihalkovics.

he″mol, 1 hĭ″mol *or* -mōl; 2 hē″mōl *or* -mōl, *n. Chem.* A dark-brown insoluble compound obtained from hemoglobin, by reduction with zinc dust, and used in medicine as a hematinic. Compounds are made of hemol with copper, zinc, mercuric iodid, etc. [< HEMO- + -OL.]

hem″o-lin, *n.* A dye for leather derived from logwood.— **hem″o-ly-e-lin,** *n. Chem.* Hemolymph.— **hem″o-lymph,** *n.* The watery blood-like or lymph-like nutritive fluid of the lower invertebrates.— **hem″o-lym-phat″ic,** *a.*— **hem″o-lym″phe-my,** *n.* Same as HEMOLYSIS, but that takes effect upon the corpuscles of the blood and lymph.

hem″o-ly″sin, 1 hem″o-lī″sin; 2 hĕm″o-lȳ″sin, *n.* The substance in the blood-serum of an animal that has the power of dissolving the red corpuscles of the blood of an animal of another species; the globulicidal substance of blood-serum. [< HEMO- + Gr. *lysis,* loosing.]— **hem″o-ly″sis,** *n. Chem.* Any chemical change in the blood, involving a solution of the hemoglobin.— **hem″o-lyt″ic,** *a.* Destructive of blood or blood-corpuscles.— **hem″o-lyze,** *vt.* To produce hemolysis.— **hem″o-lyz″a-bil″i-ty,** *n.* Sensitiveness to hemolysis.

hem″o-ma-nom″e-ter, *n.* A hemadynamometer.— **hem″o-me″di-as-ti″num,** *n.* A flow of blood into the mediastinum or middle chest.— **he-mom″e-ter,** *n.* Same as HEMADYNAMOMETER. — **hem″o-me″tra,** *n.* Hematometra.— **hem″o-pa-thol″o-gy,** *n.* The pathology of the blood.— **hem″o-per″i-car″di-um,** *n.* Hemopericardium.— **hem″o-per″i-to-ne″um,** *n.* An effusion of blood into the peritoneal cavity.— **hem″o-phile,** I. *a.* Relating to an unusual susceptibility to hemorrhage. II. *n.* One who is liable to hemophilia. **hem″o-phil″ac,** *n.* **hem″o-phil″a-ic,** *n.* A hereditary morbid condition characterized by tendency to excessive bleeding from the slightest wounds; spontaneous bleeding.— **hem″o-phil″ism,** *n.* Same as HEMOPHILIA.— **hem″o-pho″bi-a,** *n.* Hematophobia.— **hem″o-pha-thal″ma,** *n. Med.* A hemorrhage into the eye.— **hem″o-plas-mo″di-al,** *a.* Pertaining to hæmoprotozoa) specif., the plasmodium of malaria.— **hem″o-plas″tic,** *a.* Hematoplastic.— **hem″o-pneu″mo-tho″rax,** *n. Med.* An accumulation of blood and air in the pleural cavity.— **hem″o-poi-e″sis,** *n.* Hematopoiesis.— **hem″o-poi-et″ic,** *a.*— **hem-op″ty-sis,** *n. Pathol.* Spitting of blood; hemorrhage of the lungs. **hem-op″ty-sis‡,** **hem″op-tys″i-cal,** *a.*— **hem″o-pyr″rol,** *n.* A decomposition product obtained from hematoporphyrin or from pullopsorphyrin on reduction with phosphonium iodid. — **hem″o-ro″din,** *n. a.* A rose-colored albuminoid found in the blood of a sea-hare, as *Aplysia depilans.*

hem″or-rhage, 1 hem″a-rij; 2 hĕm″o-rag, *n.* Discharge of blood from a ruptured blood-vessel; bleeding.

Blood escapes also from a wounded vein more slowly than from a divided artery, and venous *hemorrhage* is therefore less likely to prove fatal than arterial, as well as because the blood which is lost is not so essential to life. F. WHARTON AND M. STILLÉ *Medical Jurisprudence* p. 564. [L. & ENG. 1855.]

[< L. *hæmorrhagia,* < Gr. *haimorrhagia,* < *haima,* blood, + *rhēgnymi,* break.] **hem″or-rha-gen″ic,** **hem″or-rha″gi-a‡;** **hem″or-rha-gy†.— primary hemorrhage,** hemorrhage occurring at the moment of an injury or surgical operation.— **punctate h.,** hemorrhage in small, scattered areas from the capillary vessels.— **secondary h.,** hemorrhage that occurs several days after the infliction of surgical operation.— **unavoidable h.** (*Anat.*), hemorrhage following the detachment of the placenta in parturition.

hem″or-rha″gic, *a.* Same as HEMA-RAJ-IK; [< HEMO- + -RHAGIC.]

hem″or-rha″gin, *n. Toxicol.* The toxin in snake venom and some other poisons that destroys endothelial cells and produces extravasation of blood. **hem″or-rha″gent,** — **hem″or-rha-gi″na,** *n. Pathol.* Hemophilia.— **hem″or-rhe″a,** *n.* Same as HEMATORRHEA.— **hem″or-rheu″ma-scope,** *n.* An instrument for observing the flow of blood in a single vessel.— **hem″or-rhod″in,** *n.* A blood-colored pigment extracted from meat by boiling with alcohol.

hem″or-rhoids, } I. hem″o-roidz; 2 hĕm″o-rȯidz, *n. pl.* **hem″or-rhoids,** } *Pathol.* Tumors composed of enlarged and thickened blood-vessels, at the lower end of the rectum, either within or without the anus; piles. [< L. *hæmorrhoida* (sing.), < Gr. *haimorrhois,* < *haima,* blood, + *rhein,* flow.]— **hem″or-rhoi″dal,** **hem″or-rhoi″dic,** *a.*— **hem″or-rhoi″dal,** *a.*— **hemorrhoidal venous plexus,** a network about the lower extremity of the rectum having a tendency to become varicose and produce hemorrhoids.

hem″o-scope, *n. Med.* An instrument for studying the spectroscopic qualities of blood. **hem″a-to-scope†.— he-mos″co-py,** *n.* The use of the hematospectroscope to determine the condition of the blood.— **hem″o-sid″er-in,** *n. Physiol. Chem.* A coloring-matter having iron and obtained from hemoglobin in process of decomposition.— **hem″o-sid″er-ols,** *n. Pathol.* The presence of hemosiderin in the liver, due to the destruction of red blood-corpuscles.— **hem″o-spa″si-a,** *n. Med.* The attracting or drawing of blood to a part of the body by exhausting the air over the surface.— **hem″o-spas″tic.** I. *a.* Efficacious in drawing the blood to a particular part, as a cupping-glass. II. *n.* An agent which draws the blood to a particular part.— **hem″o-sta″si-a,** *n. Med.* 1. Congestion of blood in a part. 2. The stopping of the flow of blood, as by constriction or compression in hemorrhage.— **hem″o-stat,** *n.* An apparatus that stops hemorrhage by compression of the blood-vessels.— **hem″o-stat″ic.** I. *a.* Relating to the stagnation of blood, or diminishing the flow of blood. II. *n.* Anything that stops bleeding; a styptic.— **hem″o-stat″ics,** *n.* The branch of physiology which deals with the equilibrium of blood in blood-vessels.— **hem″o-ta-thom″e-ter,** *n.* Hæmatachometer.— **hem″o-ther″a-py,** *n. Pathol.* Dissolution of the blood.— **hem″o-tox″in,** *n.* Hematothorax.— **hem″o-tox″is,** *n. Pathol.* Blood-poisoning.— **hem″o-ty-phus,** *n.*

he-mot″ro-phy, } I hi-mot″ro-fi; 2 he-mōt″ro-fy, *n. Pathol.* **he-mot″ro-phy,** } An excessive formation of blood in the system; hæmatrophy. [< HEMO-, HEMAO-, + Gr. *trophē,* nourishment, < *trephō,* nourish.]

hem″o-trop″ic, 1 hem″o-trop″ik; 2 hĕm″o-trŏp″ic, *a. Med. & Chem.* Acting upon or affecting blood.

hemp, *n.* Cf. Ger. *hanf.* [AS.] An annual herb (*Cannabis sativa*) of the family *Moraceæ,* from 4 to 8 feet high, with digitate leaves of 5 to 7 linear-lanceolate coarsely serrate leaflets, small and dicecious green flowers, and a tough fibrous inner bark.

Hemp.

On all sides were fields of corn, rice, and *hemp.* The latter requires rich soil; a Missouri proverb asserts that land which will grow *hemp* will produce any other crop. A. D. HEMPSTEAD *Beyond the Mississippi* p. 144. & co. 1867.]

2. The tough and strong fiber obtained from the plant, used in making many kinds of cloth and cordage.

3. Any one of various other fibers, resembling real hemp, usually flexible, tough, and of some descriptive prefix. 4. An opiate prepared from the plant; hempdresin. 5. [Colloq.] Hangman's rope (usually made of hemp). [< AS. *hænep,* hemp.]

—African or bowstring hemp, the fiber of a tropical African plant (*Sansevieria zeylanensis*) of the bloodwort family.— **Bahama h.,** the fiber of the plant of *Agave rigida sisalana,* a Central-American form of the genus introduced into the Bahamas, the Antilles, and Florida; the Sisal hemp of Florida and the Bahamas.— **bastard h.,** a western Asian annual (*Datisca cannabina*) of the family *Datiscaceæ.*— **Bimlipatam hemp,** the fiber of *Crotalaria juncea* (*Hibiscus cannabinus* (*Linn.*) of the family *Sterculiaceæ.*— **black Indian h.,** same as CANADA HEMP.— **Bologna h.,** an Italian variety of hemp with a white luster.— **Bombay or Bengal h.,** an East Indian hemp (*Hibiscus cannabinus*), of which the fiber is used for making cordage, bagging, and other coarse textiles; ambary. **brown h.†.— bowstring h.,** See African hemp. **— Canada h.,** same as *Apocynum cannabinum.* **— Canada h.,** species of dogbane (*Apocynum cannabinum*). Its fiber was used by the American Indians.— **Cebú h.,** Manila hemp.— **Chinese h.,** the long-podded sesbania (*Sesbania macrocarpa*). **Colorado-river h.†.— female h.,** the pistillate plant of the hemp.— **hemp′sag″ri-mo-ny,** *n.* A coarse herb (*Eupatorium cannabinum*) resembling the boneset (*E. perfoliatum*) of the United States.— **h.-beater,** *n.* One who separates the bast into fiber by beating it.— **h.-brake,** *n.* A tool or a machine for breaking the fiber of hemp.— **h.-bract,** *n.* Australasian shrub, the genus *Plagianthus,* of the mallow family, so called from their yielding a fine tough fiber, known as New Zealand cotton.— **h.-herds,** same as HARDS.— **h.-hulled,** *a.*— **h.-nettle,** *n.* Same as AMBARY.— **h.-nettle,** *n.* A common weed (*Galeopsis tetrahit*) of the mint family, naturalized in the northern United States from Europe, with stems covered with prickly defexed bristles, and leaves hairy on both sides. **hemp dead-nettle;†.— h.-palm,** *n.* The tall chamærops (*Chamærops excelsa*), a palm of Nepal and China, yielding a fiber used instead of hemp.— **h.-resin,** *n.* The substance variously known as *hashish, bhang, churrus,* etc., extracted from the hemp of India.— **h.-seed,** *n.* The seed of hemp: used as food for eagle-birds, and valued for the oil expressed from it.— **h.-string‡,** *n.* One deserving or likely to be hanged.— **hemp′wort″,** *n.* In Lindley's system of botany, any plant of the tribe *Cannabineæ.*— **Indian brown h.,** same as BOMBAY HEMP.— **Indian h.** 1. See CANADA HEMP. 2. *Cannabis sativa indica.*— **Italian h.,** the common hemp.— **Jubbulpore h.,** a plant (*Crotalaria tenuifolia*) nearly allied to that which produces the Bengal hemp.— **Kentucky h.,** the wood-nettle.— **ko h.,** the fiber of a Chinese twining plant (*Pueraria thunbergiana*). See PUERARIA.— **Madras h.,** same as BOMBAY HEMP.— **male h.,** the staminate plant of the common hemp: popularly confused with the female hemp, because of its profuse panicles.— **Manila h.,** the fiber of *Musa textilis,* of the banana family. The finer quality is made into shawls, the coarser into ropes.— **Mauritius h.,** a fiber obtained from the leaves of the *Furcræa gigantea,* an agave-like plant found in the tropics.— **New Zealand h.,** same as NEW ZEALAND FLAX. **— Pondicherry h.,** same as TAMPICO FIBER. — **sann h.,** fiber obtained from the plant *Maoutia puya,* a species of nettlewort.— **Queensland h.,** a tropical weed (*Sida rhombifolia*).— **Rajmahal h.,** the fiber of the Rajmahal creeper (*Marsdenia tenacissima*). Inferior to the common hemp in strength, but superior in elasticity, resisting injury from water and much used in making nets. Compare RAJMAHAL CREEPER, under CREEPER.— **Sisal h.,** the fiber of several plants of Yucatan and Mexico, especially the Mexican *Chelemhemeguen* and *Sacci.*— **sunn h.,** same as BENGAL HEMP.— **Tampico h.,** same as TAMPICO FIBER. — **to sow h.,** to follow a course of life likely to lead to the gallows. See def. 5.— **Virginian h.** or **water-h.,** a stout weed (*Acnida cannabina*) of the amaranth family, which grows in salt or brackish water along the Atlantic coast of the United States.— **water h.-agrimony,** either of two species of burr-marigold (*Bidens cernua* and *B. tripartita*), of the aster family.— **wild h.,** the hop-vine.

Hemp′fel, 1 hem′pl; 2 hĕm′pl. **I. Charles Julius** (9/ā 1811–9/ā 1876). A German-American physician and medical writer. **2. Frieda** (9/ā 1885–). An American operatic soprano: born in Leipzig.

hemp′en, 1 hemp′n; 2 hĕmp′n, *a.* **1.** Of or pertaining to hemp.

2. [Rare.] Fibrous, like hemp. **hemp′ten†.— hempen collar,** a hangman's noose.— **h. widow** [Prov. Eng.], the widow of one who has been hanged.

Hemp′hill, 1 hemp′hil; 2 hĕmp′hil. A county in N. Texas; 860 sq. m.; county-seat, Canadian.

hemp′le, 1 hemp′i; 2 hĕmp′i, *a.* [Scot.] Riotous; roguish; waggish: generally said in humorous banter. **hemp′y‡.**

hemp′le, *n.* A roguish person, one fit for nothing but to be hanged; one likely to be hanged; humorously, a giddy young person of either sex.

Hemp′hl, 1 hem′pl; 2 hĕm′pl. **George** (6/ā 1859–1921). An American philologist, educator, and author; professor of Germanic philology in Leland Stanford University, 1906.

Hemp′stead, 1 hemp′sted; 2 hĕmp′sted. A county in W. Arkansas: 722 sq. m.; county-seat, Washington. **2.** A village and township in Nassau county, N. Y.

hemp′weed″, 1 hemp′wēd″; 2 hĕmp′wēd″, *n.* **1.** A British weed, the hemp-agrimony. **2.** [Scot.] Kelp, a kind of seaweed.— **climbing hempweed,** a twining perennial (*Mikania scandens*) of the aster family, of the United States, nearly related to the boneset.

hemp′y, 1 hemp′i; 2 hĕmp′y, *n.* **1.** [Local, Brit.] The hedge-sparrow. **2.** Same as HEMPIE.

hem-self″†, pron. Himself.— **hem-selve′†; hem-selv′en†.** Himself.— **hem-selves′†.** Themselves.— **hem-sel″f.** Himself.

hem′stitch, 1 hem′stich; 2 hĕm′stich, *vt.* To work with a hemstitch; as, to *hemstitch* handkerchiefs.

her., *abbr.* Heraldic; heraldry; *heres* (heir).

He'ra, 1 hĭ'rə, hī'rə; 2 hē'rə, hē'rē, *n. Gr. Myth.* The daughter of Kronos, sister and wife of Zeus: the Roman Juno was identified with her.

The marriage of Zeus and Hera was viewed as a pattern for mankind and hence the goddess was held to preside over the nuptial bond, and the names **Gamelia, Pronuba, Teleia** (the Consummator), and **Zugia** (the Yoker) were given to her. She presided over the whole custom of married life, and, under various names, was invoked as a protectress in childbirth **(Lucina, Eileithyia),** in suckling children **(Kourotrophos),** and in widowhood **(Chera).** She was also invoked by maidens as **Parthenos.** Greek artists have always represented her as of noble bearing, clad in a long sunic and wearing a cap on her head. The pomegranate and the cow, both emblems of fertility and fecundity, were sacred to her. As Zeus typified the regions of the upper air, as the allegory, Hera represented the lower atmosphere, and its variations were thought to result from the domestic quarrels of the spouses; hence the peacock, a bird of Hera, by its gay plumage indicative of changes in the weather, was sacred to Hera. See JUNO. [LL., < Gr. *Hērā*, Hera.] — **He-ra'a,** *n. pl. Gr. Myth.* Festivals celebrated in honor of Hera.—**He-ra'um,** *n.* Any temple dedicated to Hera, particularly the sanctuary between Mycenæ and Argos. **He-ra'on;** **He-ra'on‡.**

Her"a-cli-te'an, 1 her'a-kli-ti'an; 2 hĕr'ă-clĭ-tē'an, *a.* Pertaining to Heraclitus of Ephesus (about 535 to 475 B. C.), his disciples, and his doctrines. The paucity of fragments and the sententious character of his style, which gained for him the title of "the Obscure," make his system difficult to define. But he seems to have regarded all things as resulting from the ceaseless transmutation, or flux, of a single primitive essence to which he gave the name of "fire." From fire all comes; to fire all will return; but the processes of change are presided over by divine law or universal reason. Hence the harmony of the world which "rests upon the opposite tension, like that of the lyre and the bow." **Her"a-cli'tian;** **Her"a-clit'ic;** **Her"a-clit'i-cal‡.**

—Her"a-cli-te'an, *n.* An adherent of Heraclitus.—**Her"a-cli-te'an-ism,** *n.* The philosophical system of Heraclitus.

her'ald, *n.* 1. (1) In ancient and medieval times, an officer whose business it was to denounce or proscribe, challenge to battle, proclaim war or peace, and bear messages from the sovereign or from the commander of an army. (2) In more recent times, in Great Britain, an official whose duty and profession it is to grant arms, trace and draw up genealogies, record arms and genealogies in the registers of the Heralds' College, record the creation and accession of princes and others, and direct royal pageants and ceremonials.

British Herald, wearing Tabard.

These officials were originally themselves the representatives of the royal messengers and ambassadors of antiquity. In England they were constituted a corporate body by Richard III. Edward III. first bestowed upon them the exclusive privilege of deciding officially on rights of arms and claims of descent.

The King [Henry VIII.] . . . sent a *herald* to the King of France, to say he must not make war upon that holy personage [the Pope]. DICKENS *Child's Hist. Eng.* p. 237. (c. a. co. 1850.)

At the Olympic and Isthmian games, *heralds* were persons of the utmost consequence and importance. ADAM CLARKE *Commentary, Matt.* iii, 17.

2. One who had official authority to proclaim or announce important tidings; hence, any messenger or bearer of news; as, the *heralds* of the cross. 3. One who or that which foreruns, foreshows, or ushers in; a precursor; harbinger; as, the robin is a *herald* of the spring. 4. A noctuid moth (*Gonoptera libatrix*). 5. —Heralds' College or College of Arms (GE. Brit.), a corporate body established in 1484 to examine and inquire concerning rights and titles in heraldry of all claiming or using the privileges, to regulate the use of heraldic devices, to inquire into claims and violations and to systematize the whole heraldic practise. It is chartering, etc. It consists of three kings-of-arms, entitled *Garter* (the chief), *Clarenceux*, and *Norroy* (having jurisdiction respectively south and north of the Trent), six heralds, called *Windsor*, *Chester*, *Lancaster*, *Somerset*, *York*, *Richmond*; two heralds extraordinary; four pursuivants, called *Rouge Croix*, *Rouge Dragon*, *Blue Mantle*, and *Portcullis*; and a secretary to the Earl Marshal. Supplementally, there is a king-of-arms, *Lord Lyon* for Scotland, having three heralds, *Ross*, *Rothesay*, and *Albany*, with three pursuivants, *Bute*, *Carrick*, and *Kintyre*, and *Ulster* for Ireland, with two heralds, *Dublin* and *Cork*, and one pursuivant, *Athlone*. All wear as official habit a tabard, or sleeveless coat, embladzoned in front, back, and sleeves with the royal arms. The head of the body is the Earl Marshal of England. The college had once a legal jurisdiction, exercised so late as the 18th century, but it has now no compulsory authority. **her'aldry;** *n.* A crab (*Ilvenia heraldica*) the carapace of which suggests a shield and mantle.—**her'ald-ist,** *n.* One versed in or a student of heraldry.—**her'ald-ize,** *v.* [RARE.] To blazon.—**her'aldship,** *n.* The office or rank of a herald.

Myth.* The son of Zeus and by Alcmena: a national hero of Greece, regarded as the incarnation of manly strength and excellent endurance, the founder of the Olympic games, and a doer of superhuman deeds.

Hercules Fighting the Hydra.
After the painting by Guido, in the Louvre, Paris.

According to legend, when he was eight months old Hera sent two snakes to destroy him, but he seized them in both hands and killed them. When 18 years old he slew the Nemean lion, the first of twelve great labors accredited to him. The others were: the destruction of the Lernean hydra; the capture alive of the Arcadian stag; the destruction of the Erymanthian boar; the cleansing of the Augean stables; the destruction of the cannibal birds of Lake Stymphalus; the capture of the Cretan bull; the capture of the mares of Diomedes which fed on human flesh; obtaining possession of the girdle of Hippolyte, queen of the Amazons; the capture of the oxen of the monster Geryon; obtaining the apples from the Garden of the Hesperides; and, finally, the bringing of the three-headed dog Cerberus to earth from the infernal regions. Hercules was apotheosized after death, married Hebe. He was worshiped in many countries under various names. His characteristic feature was his gigantic strength, which was most strikingly manifested when he, according to the legend, temporarily relieved Atlas of the task of supporting the world. The legend of Hercules probably represents a solar myth. See HERBERT, *n.* **2.** (2) Hence, any large, strong man.

3. *Astron.* A large northern constellation. See CONSTELLATION.

These stars in the neighborhood of *Hercules* are mostly found to be approaching the earth.

LONGFELLOW *Hiawatha* intro., st. 1.

2. *Psychol.* The central point of consciousness in space: opposed to *there,* which indicates a greater or less degree of remoteness.

To *here* seems to be the spot which the mind has chosen for its own post of observation . . . not a rigorously fixed spot, but a region from any portion of which it may send forth its various acts of attention. — JAMES *Principles of Psychology* vol. ii, ch. 20, p. 196. [H. N. & CO. '10.]

her'e2, *n.* An army; a hostile host, whether invaders or a native body serving against them.

here†, *pron.* **1.** Her. **2.** Their.

here, 1 hĭr; 2 hėr, *adv.* **1.** In or at the place occupied by the speaker; in or at this place: opposed to *there;* as, remain *here* with me: often used elliptically; as, *Here!* in answer to a roll-call.

Hitherto shalt thou come, but no further: and *here* shall thy proud waves be stayed. *Job* xxxviii. 11.

2. To the place occupied by the speaker; to this place; hither; as, come *here; here* he comes. **3.** At this point of time or stage of proceedings; now; as, *here* I pause. **4.** At a place of which mention is made or which is indicated or supposed to be indicated; as, in this book, the city has a fine museum, and *here* are gathered many curiosities; the crowd was mixed, *here* a group of Germans, *here* a knot of Italians.

Neither shall they say, Lo *here!* or, lo there! *Luke* xvii, 21.

5. In the present life; as, goodness will be rewarded *here* or hereafter. [< AS. *hēr,* here, < *ʏ* of HE, *pron.*] — **here'a-gainst'†,** *adv.* Over against, in one place and another; so as to be irregularly scattered.

Teaching the gloomy waves *here and there* with streaks of pale light. — **h.-about',** *adv.* Round about here. — **h.-after,** *n.* The life to come. — **h.-before,** *adv.* Formerly. — **h.-below,** *n.* Present existence. — **h. below,** in this life, as opposed to a future state: on earth. — **here-for',** *adv.* [RARE.] For this. — **h. goes** [Colloq.], I am about to start: an announcement of the beginning of an action: often followed by *for.* — **here-hence'†,** *adv.* From this; from hence. — **h. is** (often accented on *here*), an announcement of the coming, happening, or discovery of something or some one: as, *here is* Peter; *here's* another. — **here's to** [Colloq.], a dedicatory phrase used in toast-drinking; as, *here's to* your health. — **h. you are** [Colloq.], here is what you are looking for. — **neither h. nor there,** foreign to the subject under discussion; unimportant; irrelevant. — **this h.** [Vulgar], this: a redundancy, for emphasis; as, *this here* building.

here'a-bout', 1 hĭr'e-bout'; 2 hėr'a-bout', *adv.* **1.** About this place; in this vicinity. **2†.** As regards this. — **here'a-bouts'†.**

here-af'ter, 1, 2 hĭr-af'tėr, *a.* [Rare.] That is to come or be; future; as, *hereafter* generations; *hereafter* ages.

here-af'ter, *n.* A future state; specif., the future life.

here-af'ter, *adv.* **1.** At some future time; also, from this time forth; as, *hereafter* you must be more punctual. **2.** After the present life.

What I do thou knowest not now; but thou shalt know *hereafter.* *John* xiii, 7.

3. *Law.* Subsequent to the time at which a statute takes effect: so construed in all statutes and so defined by law in some parts of the United States. [< AS. *hēræfter* < *hēr,* here, + *æfter,* after.] **here-af'er-ward;** **here-af'ter-wardst.**

here-at', 1 hĭr-at'; 2 hėr-ăt', *adv.* **1.** At this; because of this; as, he was astonished *hereat.* **2.** At this place.

here's-a-way', 1 hĭr'e-wā'; 2 hėr'a-wā', *adv.* [PROV. Eng. & Scot.] **1.** In this neighborhood; hereabouts. **2.** To this quarter; hither. **here'a-ways"†.** — **hereawa',** **thereawa'** [Scot.], hither and thither.

Hereawa', thereawa', haud awa' hame! BURNS *Wandering Willie.*

here"be-fore'†, *adv.* **1.** Same as HEREINBEFORE. **2.** Before now; in time past. **here"be-fore'†;** **here"be-forne'†.**

here-by', 1 hĭr-bai'; 2 hėr-bȳ', *adv.* **1.** By means, warrant, or virtue of this: often in official announcements; as, *hereby* take notice; I *hereby* authorize. **2.** Near this.

her"-dip'-le-ty, 1 her'i-dip'i-ti; 2 hĕr'e-dip'e-ty, *n.* [RARE.] Legacy-hunting. [< L. *heredipeta,* legacy-hunter, < *heres* (*hered-*), heir, + *peto,* seek.] — **her"e-dip'e-tous,** *a.*

he-red'i-ta-bil'i-ty, etc. Same as HEIRITABILITY, etc.

her'e-dit'a-ment, *1* her'i-dit'a-ment *or* -ment; 2 hĕr'e-dit'a-ment, *n. Law.* Anything capable of being inherited; any property that may be transmitted by the law of descent.

To treat the old *hereditaments* with fitting respect and toleration. WALT WHITMAN in *North Am. Review* Mar., 1891, p. 337. [< LL. *hereditamentum,* < *heredito,* inherit, < L. *here(d-)s,* heir.] — **corporeal hereditament,** property of such a nature as to be cognizable by the senses and in any way connected with land. — **incorporeal h.,** an inheritable right issuing out of and annexed to some corporeal inheritance, in itself neither tangible nor visible, but existing in contemplation of law, as the right of way over another's land, or the right to the use of running water.

he-red'i-ta-ri-ly, *1* he-red'i-tā-ri-li; 2 he-rĕd'i-tā-ri-ly, *adv.* By way of inheritance; in a heritable manner; so as to be hereditary.

If . . . the government should have been placed in my family *hereditarily.*

CROMWELL in Carlyle's *Oliver Cromwell* vol. ii, p. 151. [R.]

he-red'i-ta-ry, *1* he-red'i-tē-ri; 2 he-rĕd'i-tā-ry, *a.* 1. *Law.* (*1*) Passing, capable of passing, or that must necessarily pass by inheritance or from an ancestor, lineal or collateral, to an heir or heirs; as, a *hereditary* estate. (2) Holding or deriving by inheritance.

It used to be thought that *hereditary* monarchies were strong because they reigned by a right of their own, not derived from the people. BRYCE *Am. Commonwealth* vol. i, p. 62. [MACM. 1889.]

2. Passing naturally from parent to child by heredity; as, *hereditary* features, characteristics, or weaknesses. 3. Receiving or endowed with certain traits by inheritance; as, Pitt was a *hereditary* parliamentarian; a *hereditary* drunkard. 4. Of or pertaining to heredity or inheritance. [< L. *hereditarius,* < *hereditas(-s),* see HEREDITY.] **he-red'i-tait;** **he-red'i-ta'ri-ous†,** — **hereditary substance,** see SUBSTANCE OF HEREDITY, under HEREDITY. — **he-red'i-ta'ri-an,** *n.* one who believes in some doctrine of heredity.— **he-red'i-ta'ri-ness,** *n.*— **he-red'i-ta'tion,** *n.* The state of being hereditary.— **he-red'i-ty** (-e), *n.* [Rare.]

he-red'i-tās, *1* he-rĕd'i-tās; 2 he-rĕd'i-tās, *n.* [L.] *Civ. Law.* Literally, heritage: specif., inheritance, with its rights and liabilities.— **hereditas jacens** [L.] (*Scots Law*), literally, an inheritance lying unclaimed: an inheritance not assumed by its heir: made obsolete by the Conveyancing Act of 1874.

he-red'i-ty, *1* he-red'i-ti; 2 he-rĕd'i-ty, *n.* 1. Transmission of physical peculiarities, qualities, qualities, diseases, etc., from parent to offspring.

There is as much *heredity* in crime as in consumption, cancer, or insanity. C. S. SHERARD in *The Arena* Oct., 1890, p. 519. 2. *Biol.* The tendency manifested by an organism to develop in the likeness of a progenitor.

In general the tendency of offspring is to be of the same species and variety as their parents, but always with certain minute differences constituting individual variations, which is known as *variation.* Broadly speaking this sums up all that is certainly known on this subject, despite the immense amount of attention it has received. Heredity, in the case of two parents and their offspring, is usually divided into four classes: (1) **Blending heritage,** in which the qualities of the parents blend in the offspring, as in the color of the mulatto; (2) **alternative heritage,** in which the qualities of one parent are present in the offspring, to the exclusion of those of the other, as in the eyesolor of the children of one dark-eyed and one light-eyed parent, where blending is very rarely seen; (3) **particulate inheritance,** in which the qualities of one parent are exhibited in one part of the offspring and that of the other in a different part, another, as in a piebald horse; (4) **reversion,** in which the offspring differs from both parents and reverts to the type of a more remote ancestor, as exhibited in the crossing of breeds of animals. The law of blending heritage has been reduced by Galton to a mathematical formula. See GALTON'S LAW. There are several causes in which this law is not effective, as **prepotence,** where one ancestor stamps a character more strongly than usual upon the offspring, as in deaf-mutism or syndactylism; **telegony,** where the inheritance of acquired characteristics has long been a subject of dispute among investigators, Haeckel and the Neo-Lamarckians maintaining that this alone accounts for the phenomena of variation and heredity, while Weismann and the Neo-Darwinians deny the possibility in toto. The physical basis of heredity is believed to be contained in the nucleus of the germinal cells of both plants and animals not parthenogenetic, in the combined nuclei of the male and female cells, in what Weismann calls the *idioplasm,* a quality of the chromatin bodies of the nucleus. See also MENDEL'S LAW, PANGENESIS, and GERM-PLASM.

What Biography describes as *parents' influences,* Biology would speak of as *heredity.* HAVELOCK ELLIS *Nat. Laws* p. 255. [L. n. 1884.]

[< L. *hereditat(-)s,* heirship, < *heres (hered-),* heir.] — **amphigonic heredity,** inheritance from both parents in organisms caused by sexual reproduction.— **ancestral h.,** inheritance of characteristics derived from remote ancestors. — **coefficient of h.** (*Biol.*), a biometrical expression showing the degree of perfection of the transmission of characters from parents to offspring in a given generation.— **cross-h.,** n. Reciprocal similarity between descendants and ancestors.— **homochronic h.,** the formation of the tissues and principal organs in the child at the same time as in the parent, regarded as a feature of inheritance.— **homotopic h.,** the recurrence of the formation of the tissues and principal organs of the parent in the child in the same arrangement, viewed as a feature of inheritance.— **social h.,** the ability of social animals to rapidly acquire the habits, customs, and mode of life of their kind; a determining factor in the development of social substances. — **h. of h.** The material foundation on which inheritance rests, or the physical substance that is passed from the parent to the offspring in reproduction. 2. Figuratively, the substance or basis of inheritance: the cause of the child resembling its parent or ancestor.— **unisexual h.,** the transmission to the offspring of characters reduced in size in the hybrid offspring of parents, only one of which possesses the characters in question.

— **he-red'i-tism,** *n.* The theory or doctrine of heredity.— **he-red'i-tist,** *n.* An adherent of the theory that individuality is predetermined by heredity. **he-red'i-ta'ri-an†.**— **he-red'i-tiv'i-ty,** *n.* The quality or capability of hereditary transmission.

Her'e-ford, *1* her'i-ford; 2 hĕr'e-ford, *n.* One of a breed of cattle, commonly red with white points, especially white face, throat, feet, tail, and belly. See plate of CATTLE.

her'es, *1* hir'iz; 2 hĕr'ĕz, *n.* [HE-RE'DES, 1 hir-i'diz; 2 hĕ-rē'dēz, *pl.*] *Roman and Civil Law.* An heir; one appointed by the will of the precedent to succeed to all his rights, and occupy his position, his duties corresponding practically to those of an executor under the common law. The institution of a person as heir did not oblige him to accept the appointment except in the case of the testator's slave, known as **heres necessarius,** or **heres suus et necessarius,** a descendant under the testator's authority at his death. In the event of the decedent dying intestate, the order of precedence of heirs was: (1) **heres suus,** the natural heir, who became **sui juris** at the testator's death, and was entitled to three-fourths of the estate unless he became an heir without his choosing, the afterward the heir was given the privilege, known as the *beneficium abstinendi,* of refusing the trust; (2) **agnates,** the members of a family descended from a common deceased ancestor through the male line; (3) **heres extraneus,** an heir who was neither a child nor a relative by civil descent, who became capable of inheritance at the time of making the will, as well as at the death of the testator, could hold his office. When the *heres* was legally cleared of debt, and the creditors and legatees of the testator were in danger of losing their claims, they were allowed the *beneficium separationis,* which permitted a separation of the assets from the private estate of the *heres.* **heres ex testamento** [L.], **heres factus** [L.] (*Scots Law, and Civ. Law*), see UNIVERSAL SUCCESSION.

A doctrinal view or belief at variance with the recognized standards or tenets of any established religious, philosophical, political, or other system, school, or party; an opinion or doctrine subversive of settled beliefs or accepted principles.

You may, by establishing a single truth, put to flight a hundred *heresies.*

DEAN STANLEY *Thoughts that Breathe* cov. p. 244. [D. n. c.]

2. *Theol.* An opinion or doctrine, especially when entertained by a professed adherent of a church, by a former member of it, or by one whose allegiance it claims, that is contrary to certain fundamental or distinguishing tenets of that church.

Heresy was formerly a crime in most European countries, and as such punishable by law. In continental generality of a reversal to such a persecuted article of faith, about 250 different heresy was common in mediæval times on the part of all dominant religious societies, and was carried to the New World in America. The writ "*de heretico comburendo,*" by which heretics could be burnt, was passed originally against the Lollards by 2 Henry IV, and was repealed under Charles II, 29 Car. c. 9, in England, and several toleration acts have since stopped civil punishment for heresy. Ecclesiastical penalties are still enforced against heretical members both in the Protestant and Catholic churches.

3. *Old Eng. Law.* A public and persistent denial of some fundamental doctrine of Christianity.

Though several statutes against *heresy* had been repealed in the first year of the king's reign, still the profession of erroneous *doctrine* was held to be an offense punishable by the common law of the realm. *Encyclopædia England* vol. vii, p. 1827. 4. *Hist.* An opinion or doctrine characterizing a particular person or party; a school or sect. 5. [Archaic.] Any course of conduct or instruction tending to produce dissension and schism in the church; a schismatic course.

His faith in goodness by no creed confessed.
WHITTIER *By Their Works* I. 1.

2. *Theol.* An actual or former member of a church, or one whose allegiance is claimed by it, who holds religious opinions contrary to the fundamental doctrines and tenets of that church. 3. *Eng. Law.* One who publicly and persistently denies some fundamental doctrine of Christianity. 4. [Archaic.] One who fosters dissension and division in the church; a schismatic. [< F. *héritique,* < LL. *haereticus,* < Gr. *hairetikos,* able to choose, < *haireō,* take.]

Syn.: dissenter, hæresiarch, non-conformist, schismatic. Etymologically, a *heretic* is one who takes or chooses his own belief, instead of the belief of his church; a *schismatic* is one who produces a split or rent in the church. A *heretic* differs in doctrine from the religious body with which he is connected; a *schismatic* differs in doctrine or practice, or in both. A *heretic* may be retained, or even silently tolerated; *schismatic* introduces divisions. A *heretarch* is the author of a heresy or the leader of a heretical party, and is thus at once a *heretic* and a *schismatic.* With advancing ideas of religious liberty, the odious sense once attached to these words is largely modified, and *heretic* is often used playfully. *Dissenter* and *non-conformists* are terms applied to English subjects who hold themselves aloof from the Church of England; the former term is extended to non-adherents of the *established* church in some other countries, as Russia.

— **he-ret'i-cide,** *n.* [Rare.] The killing of a heretic.

Purple Heron. 1/12

Herons are abundant in tropical and subtropical regions, where they inhabit the swamps and marshes. They are gregarious birds and build large bulky nests in tall, slender trees; they generally lay from 3 or 4 to 6 unspotted eggs of a bluish-green or whitish color. Among their characteristics are tireless watchfulness and insatiable voracity; these birds do not appear to possess fat-elaborating power, and their craving for food is perpetual. het'er-o-clite, 1 het'ar-o-klait; 2 hĕt'ĕr-o-clīt, *a.* 1. *Gram.* Inflected irregularly. 2. [Rare.] Not according to rule; irregular; abnormal.

Heteroclite mixtures have . . . been customary in Oriental symbolism. CORNELIUS DECHARME. Heteroclites are combined and exchanged with the disorder of a dream.

G. D'ALVIELLA in *Popular Science Monthly* Oct., 1890, p. 783.

[< LL. *heteroclitus*, < Gr. *heteroklitos*, irregularly inflected, < *heteros*, other, + *klinō*, bend.] **het'er-o-cli'tal; het"er-o-cli'tic** or **-i-cal; het'er-o-cli'tous‡.**

het'er-o-cli'te, *n. Gram.* A word that varies or is irregular in inflection, particularly a noun inflected in more than one stem. 2. [Rare.] A person or thing deviating from the ordinary or correct form.

Het"er-oc'e-la, *n. pl.* [-LÆ, *pl.*] An order of calcareous sponges, especially those with an endothermal epithelium differentiated into collar-cells in the chamber-walls and pavement-cells in efferent canals and cortical region. — **het"er-o-ce'lous,** *a.* — **het"er-o-com'ple-ment,** *n. Physiol. Chem.* An alexin or complement produced by a creature of another species from the one which produces the amboceptor. — **het'er-o-cone,** *n.* — **het"er-o-con'ic,** *a.* Relating to a preference for heterocomplements. — **Het"er-o-cot'y-le'a,** *n. Zoöl.* An order of trematode worms with a posterior adhesive organ and a mouth-sucker. — **het"er-o-cot'y-le-an,** *a. & n.* — **het"er-o-cre'sol,** *n. Chem.* The non-toxic, crystalline, cinnamic acid, ester of metacresol, used as a remedy for lupus. — **het'er-o-cy'clic,** *a. Chem.* A heterocyclic compound, esp. one containing carbon. — **het'er-o-cy'cle,** *n. Chem.* Relating to or containing a circle or ring made up of various kinds of atoms. — **Het"er-o-cy-em'i-da,** *n. pl. An* order of parasitic *Protozoa* in which the adult epithiat has no cilia nor polar cap, but the proximal cells may terminate in flagellate pulpa. — **het'er-o-cyst,** *n. Bot.* A cell uniformly larger than its neighbors, but of doubtful function, developed in algæ of the family *Nostocaceæ*. — **het'er-o-cy'to-tax'in,** *n.* A cytotoxin that is destructive of the cells obtained from an animal of another species. — **Het"er-o-dac'ty-læ,** *n. pl. Ornith.* A division of piciarian birds with the second toe turned backward, as in the trogons. **Het"er-o-dac'ty-li‡.— het'er-o-dac'tyl, het"er-o-dac'ty-lic,** *a. & n.* — **het"er-o-dac'ty-lous,** *a.* — **het'er-o-der'ma-tous,** *a.* Having different kinds of skin in different parts of the body. — **het"er-o-des-mot'ic,** *a.* Uniting two dissimilar points in the gray matter of the central nervous system, or uniting a central point with an end-organ: said of nerve-fibers. — **het"er-o-diph'y-cer'cal,** *a. Ich.* Same as HETEROCERCAL. — **het'er-o-don,** *n.*

Foot of a Heteradactyl (*Tropodactylus*).

A colubrine snake (genus *Heterodon*); a hognose snake.—**het'er-o-dont.** *i. a.* Having teeth diversified as molars, canines, and incisors, as most mammals. **II.** *n.* 1. A heterodont mammal. 2. A heterodon.—**Het'er-o-don'ta,** *n. pl. Conch.* An order of bivalves with hinge-teeth, diversified as cardinal and lateral, fitting into corresponding cavities of the opposite valve; see HETERODONT, 2.—**het'er-o-don'ti-dæ,** *n. pl. Ich.* A family of sharks with a subquadrate head, subterminal mouth, lateral molar and anterior trenchant teeth, and simiiform dorsals: including the Port Jackson shark.—**het'er-o-don'toid,** *a.* & *n.*—**het'er-o-don'tid,** *n.*—**het'er-o-don'toid,** *a.* & *n.*—**Het'er-o-do-rid'i-dæ,** *n. pl. Conch.* A family of nudibranchiate gastropods without distinct gills and with simple rhinophores and numerous similar acute lingual teeth. **Het'er-o-do'ris,** *n.* (*t. g.*) —**het'er-o-dor'i-did,** *n.*—**het'er-o-dor'i-doid,** *a.* **het'er-o-dox,** 1 het'er-o-doks; 2 hĕt'-e-o-dŏks, *a.* 1. *Theol.* At variance with an established standard in respect to doctrine; partaking of heresy: opposed to *orthodox*: said of persons or of things.

It might be that an Arminian, a Quaker, or other *heterodox* religionist was to be scourged out of the town.

HAWTHORNE *Scarlet Letter* p. 69. IN. M. & CO. 1880.]

2. In general, at variance with any commonly accepted doctrine or opinion.

[< Gr. *heterodoxos*, of a different opinion, < *heteros*, other, + *doxa*, opinion, < *dokeō*, think.] **het'er-o-dox'al-ist.**—**het'er-o-dox'ly,** *a. a.* According with the then accepted standards; heretical opinion.—**het'er-o-dox'ly,** *adv.*—**het'er-o-dox'ness,** *n.*

het'er-o-dox'y, 1 het'er-o-doks'i; 2 hĕt'-e-o-dŏks'y, *n.* [-ries, 1 -iz; 2 -iz, *pl.*] 1. The state or character of being heterodox. 2. A doctrine, belief, or opinion at variance with accepted standards. [< Gr. *heterodoxia*, false opinion, < *heterodoxos*: see HETERODOX.]

het'er-o-drome, *n. Physiol.* A negative induced current.—**het'er-od'ro-mous,** *a. Bot.* Having spirals running in different directions.—**het'er-o-dy'na-my,** *n.* Same as ANTIDYNAMY.—**het'er-o-dyn'a-mous,** *a.* Relating to the manner in which certain characteristics of ancestors prevail in inheritance.

het'er-o-dyn, 1 het'er-o-din; 2 hĕt'er-o-dĭn, *a. Radio.* Describing the manner by which oscillations are developed in a separate tube of a receiving set, that are of a frequency almost equal to that of the transmitting station, the two oscillations forming beats.—**het'er-o-dyn'ing,** *v.*

het'er-oe'cious, 1 het'er-ē'shus; 2 hĕt'er-ē'shŭs, *a.* Of, pertaining to, or marked by heteroecism. [< HETER- + Gr. *oikos*, house.] **het'er-oe-cism'al;**

het'er-oe'cism, 1 het'or-ē'sizm; 2 hĕt'er-ē'sĭzm, *n. Biol.* The development of different stages of existence on different hosts: said of certain species of the wheat-rust (*Puccinia graminis*), which lives in its first stage on the barberry as *Æcidium berberidis*, and in its second on the wheat or some other grain, as *Uredo graminis*.

het'er-o'e-py, *n.* Variation from standard pronunciation.—**het'er-o-cp'ic,** *a.*—**het'er-o-form,** *a.* Relating to the heteroprotease as distinguished from the protoproteose molecules.

het'er-o-gam'ete, 1 het'ar-o-gam'ĭt; 2 hĕt'er-o-găm'ĕt, *n. Biol.* A gamete differing in size or character from that of the opposite sex: contrasted with *isogamete*.—**het'er-o-ga-met'ic,** *a.*

het'er-og'a-mous, 1 het'ar-og'a-mus; 2 hĕt'er-ŏg'a-mŭs, *a.* Bearing flowers that are sexually of two kinds, as in many composite flowers, in which the ray-florets may be neutral while disk-florets are fertile. [< HETERO- + Gr. *gamos*, marriage.] **het'er-og'a-my,** *n.* 1. *Bot.* The condition of being heterogamous. (2) Indirect fertilization. 2. *Biol.* Alternation of two sexual generations or a sexual and a parthenogenetic generation.—**het'er-ge-nal.**

het'er-o-gan'gli-ate, 1 het'ar-o-gan'gli-ĕt; 2 hĕt'er-o-găn'gli-ăt, *a.* Having the ganglia of the nervous system unsymmetrically arranged, as in mollusks.

het'er-oge-ne'i-ty, *n.* [-ties, 1 -iz; 2 -ĭz, *pl.*] 1. The state or character of being heterogeneous; dissimilarity of quality or kind; unlikeness of constituent parts.

We English are a mixture of many races, and our characteristic is *Heterogeneity*.

BARNO WEISS *German, Present and Past* p. 131. [N. Y. & CO.]

—**biological heterogeneity** (*Geol.*), the mixture, as in glacial drift, of débris derived from various sorts of rocks.—**physical h.** (*Geol.*), the mixture, as in glacial drift, of rock débris by various stages of commmution, from boulders to clay and mud.

het'er-o-ge'ne-ous, 1 het'ar-o-j'i'nı-us; 2 hĕt'er-o-gē'ne-ŭs, *a.* Unlike in character or quality, structure or composition; consisting of unlike ingredients or ingredients of different kinds; not homogeneous: foreign; anomalous; incongruous. [< LL. *heterogenus*, < Gr. *heterogenēs*, < *heteros*, other, + *genos*, kind.] **het'er-o-gene;**

het'er-o-ge'ne-al; [Rare]; **het'er-o-ge'ne-an†.**

Syn.: confused, conglomerate, discordant, dissimilar, mingled, miscellaneous, mixed, non-homogeneous, unhomogeneous, unlike, various, various. Substances quite unlike are *heterogeneous* as regards each other. A *heterogeneous* mixture is one whose constituents are not only *unlike* in kind, but unevenly distributed; a compound is composed of substances such as lime, sand, and clay, which are *heterogeneous* as regards each other, but the cement is said to be homogeneous if the different ingredients are evenly mixed throughout, so that any one portion of the mixture is exactly like any other. A substance may fail of being homogeneous and yet not be heterogeneous, in which case it is said to be *non-homogeneous* or *unhomogeneous;* a bar of iron that contains flaws, air-bubbles, etc., or for any other reason is not of uniform structure and density throughout, the no foreign substance is mixed with the iron, is said to be *non-homogeneous*. A *miscellaneous* mixture may or may not be *heterogeneous;* if the objects are alike in kind, but different in color, quality, use, etc., and without special order or relation, the collection is *miscellaneous;* if the objects differ in kind, such a mixture is also, and simply *heterogeneous*. A pile of unassorted lumber is *miscellaneous;* the contents of a schoolboy's pocket are commonly *miscellaneous* and might usually be termed *heterogeneous* as well. *Non-homogeneous*: alike, homogeneous, identical, like, pure, same, similar, uniform.

—**heterogeneous noun** (*Gram.*), a noun having one gender for the singular form and another for the plural, as certain Latin words.—**h. number** (*Math.*), a mixed number.—**h. quantities** (*Physics*), quantities of different dimensions. See DIMENSION.—**h. surds** (*Math.*), surds with different indices.—**het'er-o-ge'ne-ous-ly,** *adv.*—**het'er-o-ge'ne-ous-ness,** *n.*—**het'er-o-ge'ne-al-ness†.**

het'er-o-gen'e-sis, 1 het'ar-o-jen'i-sis; 2 hĕt'er-o-jĕn'e-sĭs, *n. Biol.* (1) Spontaneous generation. See ABIOGENESIS. (2) A mode of reproduction in which the parent produces offspring that differ from itself in structure and habits, but after one or more generations revert to the parent form.

Where propagation is carried on by *heterogenesis*, or is characterized by unlikeness of the successive generations, there is always asexual genesis with occasionally-recurring sexual genesis; in other words — agamogenesis interrupted more or less frequently by gamogenesis. SPENCER *Biology* vol. i. p. 84. p. 211. [A. 1872.]

(3) Hybridism in which there may be intercourse without impregnation: opposed to *homogenesis*. 2. Heterogeny. [< HETERO- + GENESIS.] —**het'er-o-ge-net'ic,** *a. Biol.* (1) Relating to or characterized by heterogenesis. 2. *Philos.* Relating to external origination. **het'er-o-gen'ic;** **het'er-og'e-nous†.**—**het'er-o-ge-nic'i-ty,** *n.* The quality of being heterogeneous. **het'er-o-gen'ist,** *n.* A believer in the theory of spontaneous generation.

het'er-og'e-nite, *n. Mineral.* A dark-brown or black decomposition product of smaltite.—**het'er-og'e-ny,** *n.* Production by a cause different from the effect.—**het'er-oglob'u-lose,** *n.* A member of the heteroprotease group, derived from globulin.—**Het'er-og'na-thi,** *n. pl. Ich.* A suborder of pectognathous fishes with brush-like teeth not produced between orbits and with jaw and pharyngeals diversiform, including the *Characinidæ*, etc.—**het'er-ognath,** *a.* & *n.*—**het'er-og'na-thous,** *a.*—**het'er-ogomph,** *a.* Having differently formed spikes, as in the bristles of certain *Chætopoda*.

het'er-og'o-nous, 1 het'er-og'o-nus; 2 hĕt'er-ŏg'o-nŭs, *a.* 1. *Bot.* Having flowers that are dimorphous or trimorphous as to the relative lengths of stamens and styles, an adaptation for cross-fertilization. 2. *Biol.* Marked by indirect development through salutary generations.—**het'er-og'o-ny,** *n.* Heterogenesis: now not in use.—**het'er-og'o-nous-ly,** *adv.*

het'er-og'o-ny, 1 het'ar-og'o-ni; 2 hĕt'er-ŏg'o-ny, *n. Bot.* The state or quality of being heterogonous. **het'er-ogo'nism,** *n.*

het'er-og'ra-phy, 1 het'ar-og'ra-fi; 2 hĕt'er-ŏg'ra-fy, *n.* 1. Orthography in which the same letter represents different sounds in different words, as *wild* and *child*, *camp* and *cent*. 2. Spelling varying from the standard. 3. Heterophony. [< HETERO- + -GRAPHY.] —**het'er-ograph'ic,** *a.* Relating to or characterized by heterography. **het'er-ograph'i-cal†.**

het'er-og'y-na, *n. pl. Entom.* A tribe or other group of hymenopterous insects having the hindmost tarsi subcylindrical at the base and the hypopygium not concealed, with scales or nodes, and differentiated into males, females, and neuters: ants.—**het'er-og'y-nous,** *a. Entom.* 1. Of or pertaining to *Heterogyna*. 2. Having the females differentiated into sexual and neuter forms, as a bee or an ant. 3. Having the females differing structurally from the males.

het'er-og'y-ny, 1 het'ar-oj'i-ni; 2 hĕt'er-ŏj'ĭ-ny, *n.* Same as HETEROECISM.—**het'er-ol'de-one,** *n.* Diverticulum.—**het'er-o-lin-mune',** *a.* Immune to cell-products taken from an animal of another species than that from which the immune serum was taken.—**het'er-o-lize'** [Rare]; **het'er-olyze,** *v.* Infection of foreign origin or from without. 2. Infection transmitted by a person who is not himself affected.—**het'er-o-lo-ca'tion,** *n.* Impulse to movement obtained from another individual.—**het'er-o-ki-ne'sis,** *n. Biol.* Karyokinesis in which the material of the germ-plasm is unequally distributed.—**het'er-o-ma'li-a,** *n. Pathol.* Same as HETEROPLASIA.—**het'er-o-lat'er-al,** *a.* Relating to opposite sides.—**het'er-o-lec'i-thal,** *a. Biol.* Having the yolk unequally distributed: said of ova.—**het'er-o-lith,** *n.* A meteorite differing in its chemical composition from terrestrial vegetable matter, found chiefly in the stomachs of ruminants.—**het'er-ol'o-bous,** *a.* Having lobes of different size.

het'er-o-log'ic, 1 het'ar-o-loj'ik; 2 hĕt'er-ŏ-lŏj'ĭk, *a.* 1. Consisting of different elements, or containing the same elements in varying proportions; not homologous. 2. *Med.* Consisting of abnormal tissue; abnormal in structure, as a tumor. [< HETERO- + Gr. *logos*, proportion, < *legō*, speak.]

het'er-ol'o-gy, 1 het'ar-ol'o-ji; 2 hĕt'er-ŏl'o-gy, *n.* 1. Difference of structure as compared with a type; lack of homology; abnormality. 2. Analogy between unrelated organisms: contrasted with *homology* between related organisms.

het'er-o-ly'sin, *n. Toxicol.* A hemolytic poison in the blood of one species of animal for the blood of another species.—**het'er-o-ly'sis,** *n.* The action of a heterolysin.—**het'er-o-ly'tic,** *a.*—**het'er-o-mal'lous,** *a. Bot.* Disposed like the leaves in a box-wood, as the leaves or stems of certain mosses.—**het'er-o-mas'ti-gate,** *a. Biol.* Having flagella diversified as tractellum and gubernaculum, as some infusorians.—**Het'er-o-mas'ti-go'da,** *n. pl. Protoz.* An order of flagellate infusorians with the flagella unlike, some flagella, a mouth, and animal nutrition.—**het'er-o-mas'tigo'dan,** *a.* & *n.*—**het'er-om'a-ton,** *n.* [Rare.] Something extracted from foreign matter to *automaton*.

Is not man the only automaton on earth? The things usually called so are in fact *heteromatons*. A. W. AND J. C. HARE *Guesses at Truth* 2nd Ser. p. 108. [MACM. 1850.]

—**het'er-o-me'clc,** *a.* Of different length or value.

Het'er-om'er-a, 1 het'er-om'ar-a; 2 hĕt'er-ŏm'er-a, *n. pl. Entom.* A division of beetles with the tarsi of the first and second legs four-jointed and those of the hinder pair five-jointed. [< Gr. *heteromerēs*, unequal, < *heteros*, different, + *meros*, part.] —**het'er-om'er-an,** *n.*

het'er-o-mer'ic, 1 het'ar-o-mer'ik; 2 hĕt'er-o-mĕr'ĭk, *a. pl. Ornith.* A section of mesomyodan passerines with the femoral artery aberrantly developed, as in the pipirids. [< HETERO- + Gr. *meros*, thigh.]—**het'er-om'er-ism,** *n.*

het'er-om'er-ous, 1 het'ar-om'ar-us; 2 hĕt'er-ŏm'er-ŭs, *a.* 1. *Biol.* (1) Possessing parts that differ in number, form, or composition, as the whorls of a flower. (2) Exhibiting stratification, as a stratified epithelium made up of two or more distinct layers of cells. 2. Having dissimilar chemical composition, the similar in other properties. 3. *Zool.* Of or pertaining to the *Heteromera* or the *Heteromeri*.

Het'er-o-me-tab'o-la, *n. pl. Entom.* A division of insects differing among themselves in metamorphosis, but not manifesting abrupt stages, including *Hemiptera*, *Orthoptera*, *Pseudoneuroptera*, *Physopoda*, and *Thysanura*.—**het'er-ome'ta-bol'ic,** **het'er-o-me-tab'o-lous,** *a.*—**Het'er-o'mi,** *n. pl. Zool.* An order of teleost fishes variously limited: (1) Those with the shoulder-girdle not directly connected with the cranium and with the hypocoracoid and hypercoracoid coalesced into an imperforate plate, including the notacanthids and lipogenyids; (2) the true *Heteromi*; also, the *Lyopomi*.—**het'er-om'e,** *n.*—**he-ter'o-mor'a,** *n.*—**Het'er-om'i-ta,** *n. Zool.* A large genus of flagellate infusorians with anterior and ventral flagella.—**het'er-o-morph,** *n.* 1. One of the *Heteromorphæ*. 2. A decorative design composed by the amalgamation of two or more objects.

Het'er-o-mor'pha, 1 het'ar-o-mōr'fa; 2 hĕt'er-o-môr'fa, *n. pl. Entom.* A division of insects with complete metamorphosis in abrupt stages, including *Coleoptera*, *Lepidoptera*, etc.—**Het'er-o-mor'phæ,** *n. pl. Ornith.* The *Opisthocomidæ* as a superfamily.

het'er-o-mor'phic, 1 het'ar-o-mōr'fik; 2 hĕt'er-o-môr'fĭc, *a.* 1. Deviating from the normal form or standard type; irregular in structure or proportions. 2. *Entom.* Varying in form at different stages of life, as insects undergoing complete metamorphosis; of or pertaining to the *Heteromorpha*. [< Gr. *heteromorphos*, of another form, < *heteros*, other, + *morphē*, form.] **het'er-o-morphous†.**—**heteromorphic joints,** joints in which the apposed surfaces are unequal and dissimilar.

het'er-o-mor'phism, 1 het'ar-o-mōr'fizm; 2 hĕt'er-o-môr'fĭsm, *n.* 1. The quality of being heteromorphic. 2. *Zoöph.* Diversity of form among the compound zoöids of a colony. 3. *Chem.* Diversity of form in the crystals of like compounds: opposed to *isomorphism*.

het'er-o-mor'phite, *n. Mineral.* Same as JAMESONITE.

het'er-o-mor'pho-sis, *n.* 1. Abnormal shape, size, or structure; any disease characterized by deformity. 2. The assumption of the function of one organ by another. 3. The replacement of a lost part by another, but in an abnormal position.

His curious investigations into *heteromorphosis*—substitution of one organ by another, transformation of one organ into another—was really an outgrowth of these studies.

Pop. Science Monthly Oct., 1897, p. 797.

het'er-o-mor'phy, *n. Bot.* Heteromorphism; but applied only in the specific sense of abnormality or deformity in plants.—**Het'er-o-my-a'ri-a,** *n. pl. Conch.* An order of bivalves having unequally developed adductor muscles, as *Mya* and *Mytilus*. **Het'er-om'y-ar,** *n.*—**het'er-om'y-ar-i-an,** *a.* & *n.*—**Het'er-o-my'i-dæ,** *n. pl. Mam.* The *Saccomyidæ*.—**het'er-om'y-id,** *a.* & *n.*—**het'er-om'y-oid,** *a.*—**Het'er-o-my'o-pæ,** *n. pl. Mam.* A subfamily of saccomyid rodents having the temporal regions but little inflated, rooted molars, and spinigerous pelage; spiny pocket-mice. **Het'er-o-my'os,** *n.* (*t. g.*).—**het'er-om'y-ine,** *a.* & *n.*—**Het'er-o-ne'me-a,** *n. pl. Bot.* A former group of plants embracing the higher cryptogams.—**het'er-o-ne'mous,** *a.*—**Het'er-o-ner'te-ti'ni,** *n. pl. Zool.* An order of *Nemertini*, characterized by the enclosure of the proboscis sheath in the interior or dermal muscles.—**het'er-o-ne-phrol'y-sin,** *n.* A nephrolysin antagonistic to the renal cells of animals of other species.—**het'er-o-ne'phro-tox'in,** *n.* A nephrotoxin sexual form of certain worms of the genus *Nereis*, formerly regarded as a distinct genus.

Of the *Heteronereis* sexual forms, both are dicecious; one is small, and swims on the surface, the other is larger and lives at the bottom.

F. M. BALFOUR *Comp. Embryol.* vol. i. p. 343. [MACM. 1885.]

—**het'er-o-ne're-id,** *a.* & *n.*—**het'er-o-neu'ral,** *a.* Denoting muscles with nerves to more than one body-segment.

het'er-o-nom'ic, 1 het'ar-o-nom'ik; 2 hĕt'er-o-nŏm'ĭc, *a.* Having different or opposite polarity or direction of the contact of bodily parts in experiments in animal magnetism: opposed to *isonomic*.

het'er-on'o-mous, 1 het'ar-on'o-mus; 2 hĕt'er-ŏn'o-mŭs, *a.* 1. *Biol.* Divergent, or differing from the common type: said of one of a series of related things, as the somites of an arthropod. 2. Subject to the law or rule of another. 3. Characterizing the double images of a nearer point, when a farther point is fixated, because the image which appears to the right is that of the left eye. [< HETERO- + Gr. *nomos*, law.] —**het'er-on'o-mous-ly,** *adv.*

het'er-on'o-my, 1 het'ar-on'o-mi; 2 hĕt'er-ŏn'o-my, *n.* 1. Subjection to the authority of another, or to law from without the subject: opposed to *autonomy*. 2. *Metaph.* Subjection to another or different law: Kant's term for any single action or mode of life that does not conform to the autonomy, or absolute and unconditioned character, of the moral law: opposed to the *autonomy* of practical reason, or pure moral principle. The Christian principle of moral life is not heteronomy, but the *heteronomy*, but the autonomy of pure practical reason: for Christianity does not make the knowledge of God or of his will the ground of the law. CAIRD *Philos. of Relig.* lib. ii. p. 297. [MACM. 1880.]

het'er-o-nym, 1 het'ar-o-nim; 2 hĕt'er-o-nĭm, *n.* 1. A word spelled like another of different sound and meaning; as, wind, a current of air, and wind, to coil, are *heteronyms*: distinguished from *homonym*. 2. [Rare.] Another name for the same thing; especially, one of two precisely equivalent terms in different languages.

—*Cr. heteronymos*, < *heteros*, other, + *onyma*, name.]

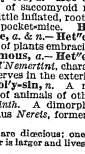
Het'er-on'y-mous, 1 het'ar-on'i-mus; 2 hĕt'er-ŏn'y-mŭs, *a.* 1. Relating to, having the nature of, or containing a heteronym. 2. Having different names. 3. *Optics.* Appearing on the side opposite to that of the eye that produced it: said of double images of an object produced when the point of sight is beyond the object, when the image seen by the right eye is on the left side, and vice versa: opposed to *homonymous*. **het'er-o-nym'ic;** —**het'er-on'y-mous-ly,** *adv.*

het'er-on'y-my, 1 het'ar-on'i-mi; 2 hĕt'er-ŏn'y-my, *n.* The use or existence of different names for the same thing; the relation of heteronyms.

Het'er-o-ou'si-an, *a.* & *n.* [Rare.] HETEROUSIAN.

het'er-o-par'the-no-gen'e-sis, 1 het'ar-o-pär'thi-no-jen'i-sis; 2 hĕt'er-o-pär'thē-no-jĕn'e-sĭs, *n.* 1. The production of males and females from unfertilized eggs: opposed to *homoparthenogenesis*, in which only one sex is obtained from the same egg. 2. Alternation of parthenogenetic and sexual generations.

het'er-op'a-thy, 1 het'ar-op'a-thi; 2 hĕt'er-ŏp'a-thy, *n. Med.* 1. Allopathy. 2. A state of morbid or abnormal susceptibility to stimuli. [< HETERO- + -PATHY.]



—**het'er-o-pathic,** *a.*

het'er-o-pel'mous, *a. Ornith.* Having the flexor tendons disposed so that the flexor perforans supplies the two anterior toes and the flexor hallucis the two posterior, as in trogons.—**het'er-opet'a-lous,** *a. Bot.* Possessing petals of more than one form.—**het'er-oph'a-ri,** *n. Ornith.* The *Atrichornithidæ*.—**het'er-oph'a-gous,** *a.*

het'er-o-phas'i-a, 1 het'ar-o-fā'zi-a; 2 hĕt'er-o-fā'zhĭ-a, *n. Pathol.* A form of aphasia in which the patient habitually uses words foreign to his meaning. [< HETERO- + Gr. *phasis*, speech.] —**het'er-o-pha'si-ac,** *n.* One afflicted with heterophasia.

het'er-o-phe'my, 1 het'ar-o-fi'mi or -ef'-; 2 hĕt'er-o-fē'my or -ĕf'e-my (XIII), *n.* A form of partial aphasia in which vocal utterance is normal, but the patient habitually says or writes one *III IV*, 1st to thing when he means another. 4th tos.

Heterophemy . . . means merely the speaking otherwise. . . . I go unwillingly to Greek for a compound name descriptive of this

Heteropelmous Foot of Trogon.
Ad. flexor perforans; *Md.* flexor perforatus; *Hy.* hypopygium; *Mx.* maxilla; *Lm.* lamina.

mental phenomenon, and would gladly see my word displaced by a good English word. . . . *Heterophemy* of course gives us *heterophemize* and *heterophemist*.
R. G. WHITE in *The Galaxy* Nov., 1875, p. 693.

[< HETERO- + Gr. *phēmi*, say.] — **het″er-o-phe′mism,** *n.* **1.** A misuse of words in speech, due to heterophemy. **2.** Same as HETEROPHEMY.— **het″er-o-phe′mist,** *n.* A person troubled with heterophemy.— **het″er-o-phe-mis′tic,** *a.* Relating to or exhibiting heterophemy.— **het″er-o-phe′mize,** *vi.* To say or write unconsciously one thing for another.

het″er-o-pho′ni-a, *n.* *Pathol.* Utterance in an unnatural or broken voice. **het″er-oph′o-ny‡.**— **het″er-o-pho′ri-a,** *n.* *Pathol.* A tendency on the part of the two visual lines to take, with passive adjustment, some other relation than parallelism, but permitting of habitual binocular vision.— **het″er-oph-thal′mi-a,** *n.* *Pathol.* Dissimilarity of the eyes, whether as respects color or muscular action.— **Het″er-o-phy-ad′ic,** *a.* *Bot.* Having two kinds of stems, one bearing the fructificative and the other the vegetative branches, as in some species of *Equisetum*.— **het″er-o-phy-let′ic,** *a.* **1.** Relating to different classes. **2.** *Biol.* Of different descent, but similar in appearance; isomorphic; convergent.— **Het″er-o-phyl′li,** *n. pl.* *Conch.* A group of ammonites having the septal margins diversely foliated.— **het″er-o-phyl′lous** (XIII), *a.* **1.** *Bot.* Having more than one form of leaves. **2.** *Conch.* Of or pertaining to the *Heterophylli*.— **het′er-o-phyl″ly,** *n.* *Bot.* The condition of having leaves that differ, as in size or form, from the normal neighboring leaves.-**Het″er-op′i-dæ,** *n. pl.* A family of heterocœlous sponges with a continuous dermal cortex and subdermal sagittal triradiate spicules. **Het″er-o′pi-a,** *n.* (t. g.) — **het″er-o-pla′si-a,** *n.* *Pathol.* The development of abnormal tissue by diseased action.

het′er-o-plasm, 1 het′ər-o-plazm; 2 hĕt′er-o-plăsm, *n.* *Pathol.* A morbid formation composed of tissues foreign to the locality where they are found. [< HETERO- + Gr. *plasma*, anything formed, < *plassō*, form.] — **het″er-o-plas′tic,** *a.* Relating to or resembling a heteroplasm.

het″er-o-plas′tid, 1 het″ər-o-plas′tid; 2 hĕt″er-o-plăs′tid, *n.* An invertebrate form made up of a series of cells of different construction: distinguished from *homoplastid*.

het′er-o-plas″ty, 1 het′ər-o-plas″tı; 2 hĕt′er-o-plăs″ty, *n.* **1.** *Surg.* A plastic operation in which the portion grafted is taken from another person or organism than the patient. **2.** *Pathol.* Any unclassified abnormal development by formative action in an organ or tissue. [< HETERO- + Gr. *plastos*, formed, < *plassō*, form.]

Het″er-op′o-da, *n. pl.* *Conch.* A division of gastropods, especially an order of *Diœcia* or *Azygobranchia* with the foot compressed and adapted for swimming: including *Pterotracheidæ*, *Carinariidæ*, etc. They are pelagic in habits, are gelatinous in structure, are transparent in body and shell (if the latter is present), and are carnivorous in habits. The ventral side is turned upward when they swim, and the foot or a part of it serves as a fin and also to fasten the body to floating objects or to the prey.— **het′er-o-pod, het″er-op′o-dan,** *a.* & *n.*— **het″er-op′o-dous,** *a.*— **het″er-op′o-dal,** *a.* Applied to nerve-cells having different kinds of processes: distinguished from *homoiopodal*.— **het″er-o-po′lar,** *a.* **1.** Having polar correspondence to something other than itself. [C.] **2.** *Biol.* Having dissimilar poles, as certain *Stauraxonia*. — **het″er-o-pro′ral,** *a.* *Spong.* Having dissimilar proræ.— **het″er-o-pros′o-pus,** *n.* *Terat.* A monster having two faces.— **het″er-o-pro′te-ose,** *n.* *Physiol. Chem.* One of the proteoses; an intermediary product formed in the hydration of proteids. It is the least diffusible of the proteoses. Tho insoluble in cold water, and only slightly so in hot water, it is easily soluble in salt solution. Each member of the class to which it belongs derives its name from the kind of proteid from which it is derived, as **het″er-o-ca′se-ose, het″er-o-glob′u-lose.**

het″er-o-psy″cho-log′i-cal, 1 het″ər-o-sai″ko-lej′ı-kəl; 2 hĕt″er-o-sȳ″co-lŏğ′i-cal, *a.* Pertaining to the method of developing or explaining moral laws from experiences not strictly lying within moral consciousness: opposed to *idiopsychological*.

The chief *heteropsychological* theories of ethics . . . are all founded on an attempted identification of the moral sentiments with some other function of our nature. MARTINEAU *Types of Ethical Theory* vol. ii, bk. i, ch. 2, p. 70. [MACM. 1891.]

[< HETERO- + PSYCHOLOGICAL.]

Het″er-op′ter-a, 1 het″ər-ep′tər-ə; 2 hĕt″er-ŏp′ter-a, *n. pl.* *Entom.* A suborder of hemipterous insects with the coxæ of the fore legs generally remote from the cheeks, and the wings generally differentiated into three regions; bugs. The anterior wings are thickened or horny in the basal portion, the distal portion being more membranous; in repose the wings lie close to the back, giving the insect a flattened appearance. Some feed on the juices of plants, others on animal juices, all being provided with a proboscis. Many of the species, as the bedbug, are repulsive in appearance and have disgusting odors. [< HETERO- + Gr. *pteron*, wing, < *petomai*, fly.] — **het″er-op′ter, het″er-op′ter-an,** *n.*— **-op′ter-ous,** *a.*

het″er-op′tics, *n.* Erroneous optics; a wrong way of seeing or looking: a humorous word.— **het″er-op-to′ton,** *n.* *Gram.* & *Rhet.* Enallage of case; antiptosis. [C.] — **het″er-o-rex′i-a,** *n.* A perverted appetite.— **het″er-o-rhab′dic,** *a.* Characterized by gill-filaments of unequal length, as in certain bivalve mollusks.— **het″er-o-rhi′zal,** *a.* [Rare.] *Bot.* Rooting from no fixed point: applied to the rootlets proceeding from various points of a spore during germination.

het″er-os′ci-an, 1 het″ər-esh′ı-ən; 2 hĕt″er-ŏsh′i-an (XIII), *a.* Literally, having different shadows; hence, of or pertaining to any part of the earth's surface, either north or south of the equator, as contrasted with the opposite side: from the different direction in which the noonday shadows fall in northern and southern zones other than the tropics. [< Gr. *heteroskios*, throwing a shadow only one way, < *heteros*, other, + *skia*, shadow.]

het″er-os′ci-an, *n.* One of two persons or races living on opposite sides of the equator; as, the Japanese and the Australians are *heteroscians*.

het′er-o-scope, *n.* An apparatus for testing heteroscopy.— **het″er-os′co-py,** *n.* Dissimilarity of vision in the two eyes. — **het″er-o-sex′u-al,** *a.* Pertaining to the other sex.— **het″er-o-sex″u-al′i-ty,** *n.* Depraved feeling toward the opposite sex.— **het″er-o′sis,** *n.* *Gram.* & *Rhet.* Enallage. — **het′er-o-site,** *n.* *Mineral.* An alteration product of lithiophilite.

Het″er-o-so′ma-ta, 1 het″ər-o-sō′mə-tə; 2 hĕt″er-o-sō′ma-ta, *n. pl.* *Ich.* An order of teleost fishes, the flatfishes, which when adult have both eyes on one side and the body correspondingly distorted.

Heterosomata. This group seems to be an offshoot from the Gadidæ. Its essential feature is in the unsymmetrical character of the bones of the head. The head is twisted about, so that both eyes are on the same side. The body is compressed, and the side without the eyes is habitually kept lowermost. The blind side is usually colorless. The very young are symmetrical, one eye on each side, the body is translucent and the fish is vertical in the water. The processes by which the eye of the lower side becomes transferred through or over the head to the other side are very curious and interesting. There is but one family. DAVID STARR JORDAN *Manual of the Vertebrates* p. 163. [MCC. & CO. '04.]

— **het″er-o-so′ma-tous, het″er-o-so′mous,** *a.*— **het′er-o-some,** *n.*

het″er-o-so-ter′ic, *a.* *Theol.* Pertaining to salvation through another person.— **Het″er-o-spo′re-æ,** *n. pl.* *Bot.* **1.** A group or suborder of ferns with two kinds of spores. **2.** A similar group of *Equisetaceæ*. **3.** A similar group of *Lycopodiaceæ*.— **Het″er-o-spo′ri-um,** *n.* A genus of fungi with conidia having a warty coat. *H. echinulatum* produces the fairy ring-spot disease on carnations. Other species are destructive to the leaves of spinach, lilies, and larches.— **het″er-os′po-rous,** *a.* *Bot.* Having both macrospores and microspores. **het″er-o-spor′ic‡.**— **het″er-o-stach′y-ous,** *a.* Having bisexual flowers and the sexes in separate spikes on the same plant, as in certain species of *Carex*.— **het″er-os′ta-sis,** *n.* *Biol.* Suppression of characters in Mendelian inheritance.— **het″er-o-stat′ic,** *a.* *Elec.* Measuring by the aid of a charge other than the one to be measured: applied to an electrometer, as distinguished from *idiostatic*.— **het″er-o-stau′ral,** *a.* *Biol.* Having an irregular polygon as the base of a pyramid: said of certain heteropolar *Stauraxonia*. — **het″er-o-stem′o-nous,** *a.* Possessing unlike stamens.— **het″er-os′te-o-plas″ty,** *n.* Transplantation of bone either from another person or from an animal of a different species.

Het″er-os′tra-ca, 1 het″ər-os′trə-kə; 2 hĕt″er-ŏs′tra-ca, *n. pl.* *Ich.* A Paleozoic order of ostracophorous fishes with exoskeletal plates composed of 3 layers, no bone-corpuscles, and no limbs, including the *Pteraspididæ*. [< HETER- + Gr. *ostrakon*, hard shell.] **Het″er-os′tra-ci‡.**— **het″er-os′tra-can,** *a.* & *n.*— **het″er-os′tra-cous,** *a.*

het″er-o-stroph′ic, 1 het″ər-o-strof′ık; 2 hĕt″er-o-strŏf′ic, *a.* **1.** Turned the other way, or in a direction other than the usual one: specif., said of certain univalve shells. **2.** *Anc. Pros.* Composed of strophes of different verse-forms. [< Gr. *heterostrophos*, < *heteros*, other, + *strophē*; see STROPHE.] **het″er-os′tro-phous‡.**

het″er-os′tro-phy, 1 het″ər-os′tro-fı; 2 hĕt″er-ŏs′tro-fy, *n.* A turning in a contrary direction; the state of being heterostrophic. [< HETERO- + Gr. *strophē*; see STROPHE.] **het″er-os′tro-phe‡.**

het′er-o-styled, *a.* *Bot.* Same as HETEROGONOUS.— **het′er-o-styl″ism,** *n.* The mode in which certain plants insure cross-pollination, some long-styled flowers having short stamens and short-styled flowers having long stamens, as in various species of *Primula* and *Myosotis*. **het′er-o-sty″ly‡.**— **het″er-o-syl-lab′ic,** *a.* *Phon.* Describing a sound-group in which the utterance of one or more of the last elements necessitates a new act of breathing out.— **het″er-o-syl′lis,** *n.* An asexual stage in certain worms: the reproductive organs are contained in the caudal segments of the body, which undergo a marked change, the creature's body being divided into two dissimilar parts. Compare HETERONEREIS.— **het″er-o-tac′tous,** *a.* Relating to or exhibiting heterotaxy. (1) *Geol.* Irregular; lacking uniformity in stratification or arrangement of parts; heterogeneously arranged. (2) *Bot.* Having organs in unusual situations.

het′er-o-tax″y, 1 het′ər-o-taks″ı; 2 hĕt′er-o-tăks″y, *n.* **1.** *Bot.* The production of plant-organs in unusual situations. **2.** *Pathol.* A malformation due to displacement or lateral transposition of organs. [< HETERO- + Gr. *taxis*, order, < *tassō*, arrange.] **het″er-o-tax′i-a‡; het″er-o-tax′is‡.**— **het″er-o-tax′ic,** *a.* *Pathol.* Manifesting malformation by misplacement of organs.

het″er-o-te′lic, *a.* Directed toward a foreign or extraneous end: opposed to *autotelic*.— **het″er-o-thal′lic,** *a.* Having zygospores developed from branches belonging to thalli or mycelia of different character.— **het″er-o-ther′a-py,** *n.* *Med.* Same as ALLOPATHY.— **het″er-o-ther′mal,** *a.* Having blood that varies in temperature with that of the surrounding medium, as in the case of toads: opposed to *homœothermal*.— **het′er-o-therm,** *n.*— **het″er-o-ther′mic.** **1.** *Meteor.* Indicating a state of temperature in which dry and warm air, tho mixed, have not been amalgamated. **2.** Relating to heterotherms; cold-blooded.— **Het″er-o′tis,** *n.* *Ich.* A genus of African osteoglossid fresh-water fish characterized by having an accessory breathing organ on the fourth branchial arch. The single species (*Heterotis niloticus*) builds great nests for its spawn and guards for a time the young, which have temporarily long, external, red gill-filaments.— **Het″er-o-to′ma,** *n.* *Bot.* A genus of Mexican campanulaceous herbs bearing large bluish or yellow flowers in terminal racemes. There are only 4 species. *H. lobelioides*, the bird-plant, is in cultivation.— **het″er-ot′o-mous,** *a.* **1.** *Mineral.* Having a cleavage unlike that which is characteristic of the mineral in its ordinary form, as a variety of feldspar. **2.** *Bot.* Differing in the divisions of calyx and corolla. **het″er-o-tom′ic‡.**— **het″er-ot′o-nous,** *a.* *Mus.* Having different tones: said of scales or chords.

het″er-ot′o-py, 1 het″ər-et′o-pı; 2 hĕt″er-ŏt′o-py, *n.* **1.** *Pathol.* A misplacement of an organ, or a growth abnormally situated. **2.** *Biol.* A divergence in ontogenetic sequence affecting the position of parts or organs, as in the origin of the human sexual organs from the mesoderm. [< HETERO- + Gr. *topos*, place.] **het″er-o-to′pi-a‡; het″er-ot′o-pism‡.**— **het″er-o-top′ic, het″er-ot′o-pous,** *a.* Misplaced; of, pertaining to, or exhibiting heterotopy.

Het″er-ot′ri-cha, *n. pl.* *Protoz.* An order of ciliate infusorians with a band of long cilia differentiated corresponding to the adoral circlet of *Peritricha*. The genus *Stentor* is a well-known example.— **het″er-ot′ri-chous,** *a.* Having unlike cilia; of or pertaining to the *Heterotricha*. **het″er-ot′ri-chal‡.**— **heterotrichous band,** the band of long cilia in *Heterotricha*.— **het″er-o-tri′sty-ly,** *n.* That form of heterostylism in which there are three types of flowers differing in the relative lengths of pistils and stamens.— **het′er-o-troph,** *n.* A plant unprovided with chlorophyl enough to assimilate all the carbon dioxid necessary and hence deriving nutriment from other sources; a heterotrophic plant.

het″er-ot′ro-phy, *n.* **1.** Any disorder of nutrition. **2.** *Biol.* & *Bot.* An abnormal manner of obtaining nourishment: applied to certain plants having no true root-hairs, and obtaining all nourishment by a fungus, the hyphæ of which closely invest the roots and take the place of the root-hairs. Compare AUTOTROPHY. [< HETERO- + Gr. *trephō*, feed.] — **het″er-o-troph′ic,** *a.*

het″er-o-tro′pi-a, *n.* *Ophthalm.* Adjustments of the eyes in which the two visual lines so diverge that binocular vision is habitually absent; strabismus.— **het″er-o-trop′ic,** *a.* Anisotropic; eolotropic.— **het″er-ot′ro-pous,** *a.* *Bot.* Same as AMPHITROPOUS. **het″er-ot′ro-pal‡.**— **het″er-o-typ′ic,** *a.* *Biol.* Denoting a form of mitosis in which the chromosomes split at an early period, but the halves remain united by the ends and open out into rings, each of which represents two chromosomes. **het′er-o-type‡; het″er-o-typ′i-cal‡.**

Het″er-ou′si-an, 1 het″ər-ū′sı-ən; 2 hĕt″er-u′si-an. **I.** *a.* **1.** Pertaining to the Heterousians or their belief. **2.** [h-] Same as HETEROUSIOUS. **II.** *n.* *Ch. Hist.* One of a theological party in the early church that affirmed that the substance of the Son is essentially different from that of the Father; an Arian. See HOMOOUSIAN. [< Gr. *heterousios*, < *heteros*, other, + *ousia*, essence, < *ousa*, f. ppr. of *eimi*, be.] **Het″er-o-ou′si-an‡; Het″er-o-ou′si-ast‡; Het″er-ou′si-ast‡.**— **het″er-ou′si-a,** *n.* *Theol.* Difference in substance or difference in essence. **het″er-o-ou′si-a‡.**— **het″er-ou′si-ous,** *a.* *Theol.* Different in substance or essence; not homoousious. **het″er-o-ou′si-ous‡.**

het″er-o-xan′thin, *n.* *Chem.* A methylxanthin ($C_6H_6N_4O_2$) occurring in urine, after ingestion with tea, coffee, or cocoa. — **het″er-ox′e-nous,** *n.* *Biol.* Infesting a number of kinds of hosts, as certain varieties of parasites.— **het″er-o-ze-te′sis,** *n.* *Logic.* Same as IGNORATION OF THE ELENCH. See IGNORATION; FALLACY.— **het″er-o-zo′nal,** *a.* Having different zones, as in the facets of a crystal. Compare TAUTOZONAL.— **het″er-o-zy-gos′ity,** *n.* *Biol.* In Mendelian inheritance, the state or condition due to an organism having developed from a heterozygote.— **het″er-o-zy′gote,** *n.* *Biol.* A Mendelian hybrid resulting from the fusion of two gametes that bear different allelomorphs of the same character and which in consequence does not breed true: contrasted with *homozygote*.— **het″er-o-zy′gous,** *a.*

Heth, 1 heth; 2 hĕth, *n.* *Bib.* Son of Canaan. *Gen.* x, 15. [Heb., terrible.]

Heth′a-lon, 1 heth′ə-lon; 2 hĕth′a-lŏn, *n.* *Bib.* (Douai).

heth′e-rig, *n.* [Scot.] Same as HEADLAND, 2.

Heth′er-ing-ton, 1 heth′ər-ıŋ-tən; 2 hĕth′er-ing-ton, **William Maxwell** ($^{6}/_{4}$1803–$^{5}/_{23}$1865). A Scottish divine and ecclesiastical historian.

Heth′lon, 1 heth′lon; 2 hĕth′lŏn, *n.* *Bib.* *Ezek.* xlvii, 15. [Heb., stronghold.]

het′man, 1 het′mən; 2 hĕt′man, *n.* [-MANS, *pl.*] **1.** *Rus. Hist.* The title of the head or general of the Cossacks, who was elected annually; an ataman. The office of hetman was abolished by the emperor Nicholas except as hereditary in the imperial family. See COSSACK. **2.** *Pol. Hist.* The leader of an army; hence, the great hetman, or commander-in-chief.

All Europe hailed their *hetman*, Platoff, as the hero of the war.
J. S. MOSBY *War Reminiscences* p. 146. [D. M. & CO.]

[Pol., < G. *hauptmann*, chief man.] — **het′man-ate,** *n.* The rule or jurisdiction of a hetman.— **het′man-ship,** *n.* The office or dignity of a hetman.

het′o-form, 1 het′o-fērm; 2 hĕt′o-fôrm, *n.* *Chem.* A white powder, $Bi(C_9H_7O_2)_3Bi_2O_3$, employed as an antiseptic.

he′tol, 1 hī′tōl *or* -tel; 2 hē′tōl *or* -tŏl, *n.* *Chem.* Synthetic sodium cinnamate ($C_6H_5CHCHCOONa$), a white crystalline powder used as an antitubercular remedy.

het′ra-lin, 1 het′rə-lin; 2 hĕt′ra-lin, *n.* *Chem.* A molecular compound, $(CH_2)_6N_4.C_6H_6O_2$, of resorcin and hexamethylenetetramin employed in uric-acid diathesis.

het′ter, 1 het′ər; 2 hĕt′er, *a.* **1.** [Prov. Eng.] Eager; bitter. **2†.** Hotter: compar. of HOT.

Het′tin-ger, 1 het′ın-jər; 2 hĕt′in-ğer, *n.* A county in North Dakota.

Het′ton, 1 het′ən; 2 hĕt′on, *n.* A town in Durham county, England.

het volk. [S.-Afr. D.] The common people.

Het″zel′, 1 et″sel′; 2 ĕt″sĕl′, **Pierre Jules** ($^{1}/_{15}$1814–$^{3}/_{16}$1886). A French publisher and author; pseudonym, "P. J. Stahl."

heu, 1 hiū; 2 hū, *interj.* [L.] Alas!

heu′bach-ite, 1 hiū′baн-ait; 2 hū′bäн-īt, *n.* *Mineral.* A submetallic black hydrated cobalt and nickel oxid ($(CO.Ni)_4O_3(OH)_6$), that is found as an incrustation on barite. [< *Heubachthal*, in Baden.]

Heub′ner's dis-ease′. A disease characterized by inflammation of the inner coat of the cerebral arteries, caused by syphilis; syphilitic endarteritis.

heuch[1], 1 hiuн; 2 hūн, *n.* [Scot.] **1.** A glen with rugged sides; a crag. **2.** A coal-pit; a shaft in a coal-mine. **heugh†.**

heuch[2], *n.* & *interj.* [Scot.] A dancer's cry of excitement; a joyful ejaculation.

Heu′che-ra, 1 hiū′kı-rə; 2 hū′ee-ra, *n.* *Bot.* A genus of perennial herbs of the saxifrage family (*Saxifragaceæ*), with usually radical leaves and naked scapes bearing clusters of white, greenish, red, or purple flowers. *H. americana* is known as alum-root. *H. sanguinea*, from Mexico, with deep-red flowers, is cultivated for ornament. [< Prof. *Heucher*, German botanist.]

heu gase, 1 hiū gēz; 2 hū ğāş. [Eng.] The otter-hunter's cry to hounds at a find.

heuk, 1 hūk; 2 hŭk, *n.* [Scot.] A reaping-hook; a sickle.

heu′land-ite, 1 hiū′lənd-ait; 2 hū′land-īt, *n.* *Mineral.* A pearly, vitreous, variously colored, transparent, brittle, hydrous calcium-aluminum silicate ($H_{10}CaAl_2Si_6O_{21}$), belonging to the group of zeolites and crystallizing in the monoclinic system. [< H. *Heuland*, English mineralogist.]

heu′mite, 1 hiū′mait; 2 hū′mīt, *n.* *Petrol.* An aphanitic igneous rock intermediate between tinguaite and nephelinite, containing sodic feldspar, barkevikite, nephelite, etc. [< *Heum*, in Norway.]

Heu′reaux, 1 ū″rō′; 2 û″rō′, **Ulisses** (1846–$^{7}/_{26}$1899). A President of Santo Domingo; was assassinated.

heu-re′ka, *n.* & *interj.* Eureka.

heu-ret′ic, 1 hiu-ret′ık; 2 hū-rĕt′ic, *n.* The branch of logic that treats of invention or discovery. [< Gr. *heuretikos*, ingenious, < *heuriskō*, invent.] **heu-ret′ics‡.**

heu-ris′tic, 1 hiu-ris′tık; 2 hū-rĭs′tic, *a.* Aiding or guiding in discovery; inciting to find out or invent. [< Gr. *heuriskō*, find out.]

heurts, 1 hūrts; 2 hûrts, *n. pl.* *Her.* Roundels azure; hurts.

Heus′ka-ra, *n.* Same as EUSKARA.— **Heus-ka′ri-an,** *a.*

Heus′ser, 1 hois′ər; 2 hŏis′er, **Meta** (*née* Schweizer) ($^{4}/_{6}$1797–$^{7}/_{19}$1901). A Swiss religious poet and writer; *Alpine Lyrics*.

heu′vel, 1 hū′vl; 2 hû′vl, *n.* [S.-Afr. D.] A hillock; height.

He′ve-a, 1 hī′vı-ə; 2 hē′ve-a, *n.* *Bot.* A tropical American genus of tall trees of the family *Euphorbiaceæ*. They have trifoliolate leaves, small monœcious flowers, without petals, and stamens united in a column. *H. brasiliensis* furnishes the Para rubber.

he′ve-ene, 1 hī′vı-īn; 2 hē′ve-ēn, *n.* *Chem.* An oily amber-yellow compound ($C_{15}H_{24}$) obtained when caoutchouc or gutta-percha is distilled. [< *Hevea*, a genus of South-American trees yielding caoutchouc.]

He-ve′li-us, 1 hı-vī′lı-us *or* (*G.*) hē-vē′lī-us; 2 he-vē′li-ŭs *or* (*G.*) he-ve′lī-us, **Joannes** ($^{1}/_{28}$1611–$^{1}/_{28}$1687). A Polish astronomer.

He-ves′, 1 hē-vesh′; 2 he-vĕsh′, *n.* **1.** A county in N. central Hungary; 1,497 sq. m.; capital, Erlan. **2.** A town in that county.

Hev′i-la, 1 hev′ı-lə; 2 hĕv′i-la, *n.* *Bib.* (Douai).

Hev′i-lath, 1 hev′ı-lath; 2 hĕv′i-lăth, *n.* *Bib.* (Douai).

hew, 1 hiū; 2 hū, *v.* [HEWED; HEWN OR HEWED, HEWD[s]; HEW′ING.] **I.** *t.* **1.** To dress with an edged tool; cut into shape with blows, as of an ax or adz: frequently with *out*; as, to *hew* logs; to *hew* a chamber *out* of the rock. **2.** To cut down or cut to pieces, as with an ax or sword; fell by blows with an edged tool or weapon; cut up; hack; chop: followed by *down* or some qualifying phrase; as, to *hew down* a tree; to *hew* an enemy to pieces. **3.** Figuratively, to make or fashion with labor; work out with effort or exertion: often with *out* or *through*; as, to *hew out* one's fortune.

hewn, 1 hiūn; 2 hūn, *pp.* of HEW, *v.* [*C. T.* l. 13,614.

Hew of Lincoln. Same as HUGH OF LINCOLN. CHAUCER

Hew'son, 1 hiū'sn; 2 hū'sn, **William** (11/14 1733–3/4 1774). An english surgeon.

hex- [l hĕks-, hekś-; 2 hĕks-, hekś-. From Gr. *hex*, **hex'a-**, *y sic*: combining forms.—**hex'a-ba'sic**, *a. Chem.* Having a basicity of six atoms; as, *hexabasic* acids.—**Hex'abblyes**, *n.* A synopsis (in the form of the ordinal titles) of the *Basilica* of Justinian, published about the middle of the 14th century by Harmenopulus, a judge of Thessalonica. It was modified as recently as 1345, and remained a code of law for the kingdom of Greece until the 19th century. See BASILICAS.—**hex'a-can'thus**. **I.** *a. Zool.* Having six hooks. **hex'a-can'thous**. **II.** *n.* An embryo of a tapeworm.—**hex'a-cap'su-lar**, *a. Bot.* Six-capsuled.—**hex'a-car'bon**, *a.* Containing six atoms of carbon.—**hex'a-ce**, *n.* A summit of a polyhedron formed by the meeting of six faces.—**Hex'a-cer'a-ti'na**, *n. pl. Spong.* An order of triaxonian silicious sponges, with a skeleton of pithed horny fibers, or without a skeleton.—**hex'a-ce'ra-tose**, *a.*—**hex'a-che'te**, *n. pl. Entom.* A division of dipterous insects with a proboscis of six bristle-like pieces, as in *Tabanidæ*.– **hex'a-chæ'tous**, *a.*—**hex'a-chlo'rid**, *n.* Any compound containing six atoms of chlorin; as, benzene *hexachloride*, $C_6H_6Cl_6$.—**hex'a-chord**, *n.* **1.** A series of six tones with a half step between the third and fourth tones, and whole steps between the others. **2.** *Gr. Mus.* (1) A diatonic series of six tones. (2) The tuning of a major sixth. (3) A musical instrument with six strings.—**hex'a-chor'dal**, *a.*—**hex-ach'ro-nous**, *a. Pros.* Having six mono or metrical units of time.—**hex'a-cid**, *n.* Any six monad atoms capable of being replaced by six acid radicals: said of a base.—**hex'a-co'lic**, *a. Anc. Pros.* Composed of six cola or series.—**hex'a-com'pound**, *n.* Any compound of six atoms of the same kind.—**hex'a-con'ta-he'dron**, *n.* A solid body bounded by sixty sides or faces.—**deltoidal hexacontahedron**, a hexacontahedron formed by combining the icosahedron and the great rhombicosidodecahedron.—**Hex'a-co-ral'la**, *n. pl. Zoöph.* A group of coralligenous polyps.— **hex'a-co-ral'lan**, *a.* Belonging or pertaining to the Hexacorallia.—**hex'a-cor'al-lia**, *n. pl.* —**Hex'a-cri'nus**, *n. Paleon.* A genus of crinoids of the family *Hexacrinitæ*, found in the Devonian rocks.—**hex'act**, **I.** *a.* Having six rays. **hex-ac'ti-nal**; **hex-ac'tine**. **II.** *n.* A spongespicule with six rays.—**hex-ac'ti-nel'lid**, *a.* and *n.*—**Hex-ac'ti-nel'lina**, *n. pl. Spong.* An order of triaxonian silicious sponges with a skeleton of silicious spicules, including glass sponges.—**hex-ac'ti-nel'lid**, **hex-ac'ti-nel'lin-an**, *a.* & *n.* —**hex-ac'ti-nel'line**, *a.* Of or pertaining to the *Hexactinellida*.—**Hex'ac-tin'i-a**, *n. pl. Zoöph.* The *Anthozoa*.—**Hex'ac-tin'oid**, *n. pl. Zoöph.* A group of actiniarians.—**hex'actin'i-an**, *a.* & *n.*

Other words beginning with these prefixes will be found in alphabetical place, either singly or in groups.

hex'ad, 1 hĕks'ad; 2 hĕks'ăd, *n. Chem.* Having a combining power of six; sexivalent.

hex'ad, *n.* **1.** The number six; also, a group of six, or a series of six numbers. **2.** *Chem.* An atom, radical, or element that has a combining power of six. See VALENCE. [< LL. *hexas* (*hexad-*), < Gr. *hexas* (*hexad-*), number six, < *hex*, six.] **hex'ade**†.– **hex-ad'ic**, *a.* Of the nature of a hexad; arranged in groups of six; based on the number six.

hex'a-dac'ty-lism, *n.* The condition of having six fingers or toes.—**hex'a-dac'ty-lous**, *a.* Having six fingers or toes.—**hex'a-dec'ane**, *n. Chem.* A white semisolid ($C_{16}H_{34}$) of the paraffin series of hydrocarbons, found in American petroleum.— **hex'a-de-co'ic**, *a.* Containing sixteen atoms of carbon.—**hexadecoic acid**, one of PALMITIC ACID.– **hex'a-dec'yl**, *n. Org. Chem.* The univalent radical ($C_{16}H_{33}$) of hexadecane.– **hex'a-de-cyl'ic**, *a.* Relating to hexadecyl or hexadecane.—**hex'a-dra'chon**, *n.* An old Greek coin, equal to six drachmas.—**hex'a-em'er-on**, *n.* **1.** A period of six days, usually applied specifically to those of the creation.

> We are apt to pass over this great incident [appearance of dry land at creation] of the *hexaemeron* more lightly . . . than its relative importance deserves. *Dana Bible Illust., First Week, Wednesday* in vol. i, p. 25. [c. a bros. 1872.]

2. An account of the six days of creation; as, the Mosaic *hexaemeron*.– **hex'a-foil**, *n.* Having six foils; sixlobed.– **hex'a-gfol.** **I.** *a.* Expressed in six languages; as a *hexaglot* Bible. **II.** *n.* A book giving versions of the same text or subject-matter in six different languages, generally arranged in parallel columns.

hex'a-gon, 1 hĕks'a-gon; 2 hĕks'a-gŏn, *n. Geom.* A figure, especially a plane figure, with six sides and six angles. [< L. *hexagonum*, < Gr. *hexagōnon*, neut. of *hexagōnos*, six-cornered, < *hex*, six, + *gōnia*, corner, angle.]—**Lemoine hexagon**, a hexagon formed by joining the six points where the sides of a triangle intersect the parallels to the sides drawn through the Lemoine point.— **Pascal's h.** or **hexagram**, a hexagon about which a conic is circumscribed.– **hex'a-go'ni-an-chy-ma**†, *n. Bot.* Tissue composed of cells that are hexagonal in section.– **hex'a-gonize**, *v.* To form into a hexagon.

hex-ag'o-nal, 1 hĕks-ag'o-nal; 2 hĕks-ăg'o-nal, *a.* **1.** Having the form of a hexagon; having its section a hexagon; six-sided.

> A crystal of silica dissolved and re-dissolved a thousand times will never assume any other form than the *hexagonal*. DRUMMOND *Natural Law, Conformity to Type* p. 301. [c. r. 1884.]

2. Formed of or divided into hexagons; as, *hexagonal* structures. **hex-ag'o-nous**†.—**hexagonal numbers**, the series of polygonal numbers formed from the arithmetical series whose difference is 4. See POLYGONAL. **n. system of crystallization**, see CRYSTALLIZATION.– **-ly**, *adv.*

hex'a-gon-ite, 1 hĕks'a-gon-ait; 2 hĕks'a-gŏn-īt *n.* A pink tremolite, containing a small quantity of manganese: found in St. Lawrence county, N. Y. [< HEXAGON.]

hex'a-gram, 1 hĕks'a-gram; 2 hĕks'a-grăm, *n.* **1.** *Occult.* A combination of two equilateral triangles like that shown in the figure, the symbol of the Pythagorean school. **2.** *Geom.* One of the three lines or lines possessing some special properties. **3.** One of the 64 figures, each composed of six parallel lines, on which the Chinese Book of Changes is based. [< Gr. *hexagrammatos*, of six letters, < *hex*, six, + *graphō*, write.]– **Brianchon's** HEXAGRAM. **hexagram or hexagon**, a hexagon, circumscribed about a conic, the three lines joining whose opposite angles intersect in the same point.

Hex'a-gram'mi-dæ, *n. pl.* A North Pacific family of mailcheeked fishes with a long body, long spinous dorsal and anal and complete ventral fins: including rock-trout. **Hex'a-gran'noes**, *n.* (t. g.) = **hex'a-gram'mid**, *n.*— **hex'agram'moid**, *a.* & *n.*— **hex-a-gyn**, *n. Bot.* A plant of the order *Hexagynia*.— **Hex'a-gyn'i-a**, *n. pl. Bot.* The 6th order in the first 13 classes of the Linnean artificial system of plants, embracing those with six styles.— **hex-ag'o-nous**, *a.* Having six styles; of or pertaining to the order *Hexagynia*. **hex'a-gyn'i-an**†.– **hex'a-he'dral**, *a.* Having the form of a hexahedron; having six bounding planes.— **hex'ahe'dric**, *n.* A meteoric iron ore which has a cubic or hexahedral form and cleavage: far rarer than an octahedrite. See METEORITE.

hex'a-he'dron, 1 hĕks'a-hi'dron; 2 hĕks'a-hĕ'dron, *n.* [=DRONS or -DRA, *pl.*] A solid bounded by six plane faces. [< HEXA- + Gr. *hedra*, seat, < *hezomai*, sit.]— **regular h.**, a cube.

hex'a-hem'er-on, *n.* Same as HEXAEMERON.— **hex'a-hy'drate**, *n. Chem.* A mixture containing six molecules of water, or its hydrogen groups.— **hex'a-hy'dric**, *a. Chem.* Composed of six hydrogen atoms.— **hex'a-hy'dro-cel**, *n.* — **hex'a-hy'drid**, *n. Chem.* A hydrid in which each molecule holds six atoms of hydrogen. **hex'a-hy'drid**†.

hex'a-hy'dro-ben'zene, *n. Chem.* Cyclohexane, C_6H_{12}. From Gr. *hex*, six, + *hydor*, water: a combining form implying six hydrogen atoms added to the molecule.— **hex'a-hy'dro-ben'zine**, *n.*— **Hex'a-hy'dro-ter'pene**, *n. Chem.* A liquid of complex structure, having the empirical formula $C_{10}H_{16}$, isomeric with methylene. It is found in some forms of petroleum.— **hex'a-hy'dro-cat'a-col**, *n. Chem.* A colorless oil (CH_2 $H_4(OH)_2$) obtained by reducing pyrocatechin.— **hex'a-hy'dro-thy'mol**, *n. Chem.* A colorless oil ($CH_3C_6H_9(OH)$ C_3H_7) obtained by reducing thymol with hydrogen.— **hex'a-hy'dro-tol'u-ene**, *n. Chem.* A liquid compound of a grayish color, obtained by reducing triquinoyl.

hex'a-l'ro-sane, *n.* A soft pliable paraffin-like substance, having the composition C_6H_{14}.— **hex'a-kis-oc'ta-he'dron**, *n. Crystal.* A hexoctahedron.— **hex'a-kis-te'tra-he'dron**, *n. Crystal.* A hexatetrahedron.— **hex'a-kis-tet'ra-he'dral**, *a.*— **hex-al'de-hyde**, *n. Chem.* A colorless liquid ($C_6H_{12}O$) produced by the slow distillation of calcium formate and caproate.— **hex'a-mere**, *n. Spong.* In sponges, an opening or mesh of the sixth degree in a reticulation.— **hex'a-mer'ic**, *a.* **1.** *Bot.* Having a 6-parted floral whorl: generally written *6-merous*. **2.** *Zool.* Having six parts or divisions; arranged in sixes or multiples of sixes, as in corals. **hex-am'er-al**;– **hex-am'er-ism**, *n.*

hex-am'e-ter, 1 hĕks-am'i-ter; 2 hĕks-ăm'e-ter, *a.* **1.** Having six metrical feet or measures in a verse, especially dactylic and anapestic. **2.** Having six dipodies, as in classic verse so measured.

hex-am'e-ter, *n. Pros.* A verse of six feet or measures; especially, the dactylic hexameter of the Greek and Latin epics, consisting of five dactyls (or spondees) and a spondee may be substituted), a fifth dactyl (rarely replaced by a spondee), and a sixth foot, which is commonly a spondee, but sometimes a trochee (especially in Greek poetry).

An **lambic hexameter** is called an *Alexandrine*. In English and German verse a six-stress line, with mingled measures of two or three syllables accented on the first syllable, is loosely called a *hexameter*. Sometimes a hexameter is made to observe rules of quantity also. See FOOT, *n.*, 7.

Slowly she went by the ledges; and the maid was alone in the darkness.
Watching the pulse of the oars die down, as her own died with them. CHARLES KINGSLEY *Andromeda*.

This is the forest primeval. The murmuring pines and the hemlocks. LONGFELLOW *Evangeline*, I., < Gr. *hexametros*, of six measures, < *hex*, six, + *metron*, measure.]— **hex'ameter'ic**, *a.* Hexametrical.— **hex'a-mi'ter**, *n.* A stichos of six metrical feet.— **hex-am'e-tral**†; **hex-am'et'ri-cal**†.

The pathway of English poetry is strewn with bones of *hexameters*. HOLMES *Old Stubber Men and Letters, Longfellow* p. 46. [D. M. & CO. 1887.]

— **hex-am'e-trist**, *n.* A writer of hexameters. **hex'ametrize**, *v.* To compose hexameters.— **hex-am'e-tro-graph**, *n.* To describe in hexameters; compose hexameters.

hex'a-meth'y-lat'ed, *pa.* Containing six methyl groups.— **hex'a-meth'y-lene**, *n. Org. Chem.* Same as HEXAMETHYLENAMINE.

Hex'a-mil'i-on, 1 hĕks'a-mil'i-on; 2 hĕks'a-mil'i-on, *n.* Same as LYSIMACHIA.

Hex-an'ta-dæ, *n. pl. Ich.* A family of sharks with one dorsal fin and only seven branchial apertures; *Notidanidæ*.

Hex-an'chus, *n.* (t. g.)— **hex-an'chid**, *n.*— **hex-an'choid**, *a.* & *n.*— **hex-an'der**, *n.* A plant of the class *Hexandria*.— **hex-an'dri-a**, *n. pl. Bot.* The 6th class in the Linnean artificial system of plants, embracing those whose flowers have six free stamens.— **hex-an'drous**, *a. Bot.* Having six stamens; pertaining to *Hexandria*. **hex-an'dry**.— **hexane**, *n. Chem.* One of five isomers (C_6H_{14}) of the paraffin series; especially, a volatile colorless oil contained in petroleum.— **hex'a-ne'mic**, *a.* Possessing a Mosaic phlan vessels, as the *Insecta*.— **hex-an'gu-lar**, *a.* Having six angles.— **hex'a-ni'trate**, *n. Chem.* Any compound containing six nitric radicals (NO_3) to the molecule, as hexanitrocellulose, $C_6H_4(ONO_2)_6O_5$.— **hex'a-nit'ric**, *a. Arch.* Having six parts or divisions, as a vault.— **hex'a-par'tite**, *a. Arch.* A system of vaulting in which every bay has six compartments: occurring in some naves of the latest Romanesque and earliest Pointed types, as in that of Notre Dame, Paris.– **hex'a-ped**, *a.* Same as HEXAPOD.— **hex'apet'a-lous**, *a. Bot.* Having six petaline organs.— **hex'apet'a-lous**, *a. Bot.* Six-petaled.— **hex'a-phase**, *a. Elec.* Exhibiting six phases, as in certain kinds of alternating-current circuits.— **hex'a-phyl'lous**, *a. Bot.* Six-leaved.

Hex'a-pla, 1 hĕks'a-pla; 2 hĕks'a-plă, *n.* An edition of the Holy Scriptures containing six versions in parallel columns; especially, a collection of Hebrew and Greek versions of the Old Testament thus arranged, published by Origen in the 3d century. [< Gr. (*ta*) *hexapla*, neut. pl. of *hexaploos*, sixfold, < *hex*, six, + *-ploos*, -fold.]

hex'a-plane, *n.* An aeroplane seventy feet long, having three propellers and designed to carry six persons. *The Sun*, New York, Aug. 18, 1910, p. 1, col. 6.— **hex'a-plar**, *a.* **1.** Containing six versions in parallel columns; sixfold. **2.** [H-] Of or pertaining to the Hexapla. **hex'a-plar'ic**†.

Since Origen's time, biblical critics have distinguished two editions . . . of the Septuagint, . . . the common text . . . and the *Hexaplar* text, or that corrected by Origen himself. T. H. HORNE *Intro. to Study of Bible* vol. ii, pt. i, p. 71. [t. & o. 1872.]

hex'a-plex, *a.* Sixfold; sexivalent. **hex'aploid**.— **hex'aploid**, *a.* Having six feet; of or pertaining to the *Hexapoda*: in early use applied mainly to insect-larvæ. **hex-ap'o-dal**†; **hex-ap'o-dous**†. **II.** *n.* One of the *Hexapoda*.— **hex-ap'o-ds**, *n. pl.* The true or six-legged insects.— **hex-ap'o-dan**, **hex'a-pode**, *a.* & *n.*— **hex-ap'o-dy**, *n. Anc. Pros.* Six feet taken together, or a verse or line consisting of six feet.— **hex'a-pro'style**, *a. Arch.* Having a six-columned portico in front, as a temple.— **hex'a-pro'to-dont**, *a.* Having six lower incisors: a characteristic of an extinct genus of hippopotamuses, the *Hexaprotodon*.— **hex'ap-sal'mus**, *n. Gr. Ch.* A collection of six psalms said daily at lauds. **hex'apsal'most**.— **hex-ap'ter-ous**, *a.* Six-winged.— **hex'a-ra'di-al**, *a. Zool.* Sixrayed, as a hexactinellid sponge.— **hex'arch**, **I.** *a. Bot.* Having six strands: said of a stele. **II.** *n.* primary plant-core with six vascular strands.— **hex'ar-chy**, *n.* A government by six persons; an aggregation of six states.– **hex'a-se'mic**, *a. Anc. Pros.* Having a time length of six semeia or mora; hexachronous. **2.** Composed of feet of six semeia.– **hex'a-seme**†.— **hex'a-sep'alous**, *a. Bot.* Having six sepals.– **hex'a-sistem'o-nous**, *a. Bot.* Having six stamens.— **hex'as-ter**, *n. Spong.* A sponge-spicule with six equal rays along three axes which intersect at right angles.– **Hex-as'ter-op'o-ra**, *n. pl. Spong.* A tribe of hexactinellidans with thimble-shaped chambers and hexaster spicules in the mesoglœa.— **hex-as'ter-oph'e-rous**, *a.*— **hex'as-ti'chous**, *a.* Having six ranks in section or stanza of six lines. **hex-as'ti-chon**†.— **hex'a-stich'ic**, *a.*— **hex-as'ti-chous**, *a. Bot.* Having organs disposed in six vertical rows.— **hex'a-stigm**, *n. Arch.* The correlate of a hexagram: a figure determined by six points.— **hex'astyle**, *a. Arch.* Having a front with six columns: said of a portico or a temple. **hex'a-sty'lar**†.— **hex'a-style**, *hex'a-sty'los*, *n.*— **hex'a-sty'lic**, *a.*— **hex'a-sul'fid**, *n. Chem.* A compound in which there are six atoms of sulfur.— **hex'a-syl-lab'ic**, *a.* Composed of six syllables. —**hex'a-te'tra-he'dral**, *a.* —**hex'a-te'tra-he'dron**, *n.* same as HEXTETRAHEDRON, etc.

Hexastyle.
The temple of Zeus at Olympia (restored).

Hex'a-teuch, 1 hĕks'a-tūk; 2 hĕks'a-tūk, *n.* The first six books of the Bible considered as constituting one literary whole or specially connected historical series. [< HEXA- + Gr. *teuchos*, tool, book; < *teuchein*, make.]— **Hex'ateu'chal**, *a.*

hex-a-tom'ic, *a. Chem.* **1.** Having six replaceable monad atoms: said of alcohols, etc.; as, mannite is a *hexatomic* alcohol. **2.** Composed of six atoms: said of a molecule. **3.** Same as HEXAD.— **hex'a-tri'ose**, *n. Org. Chem.* A sugar yielding three hexose molecules on hydrolysis.— **hex'a-tyn-cy**, *n. Chem.* A valence that is equal to six monad atoms. W. RAMSAY in *The Sun*, New York, Dec. 30, 1900.— **hex'a-va'lent**, *a.* Same as HEXAD.— **hex'a-zo'ic**, *a.* Having six axes of growth: said of the spicules of sponges.— **hex'azane**, *n.* Same as PIPERIDIN.— **hex'a-zene**, *n. Chem.* A partially reduced pyridin, C_5H_7N.— **hex'a-zotropyridin**, *n.* pl. pyridin.— **hex'de-cyl**, *n. Chem.* The hypothetical radical ($C_{16}H_{33}$) of hexadecane and its derivatives.— **hex'de-cyl'ic**, *a. Chem.* Of or derived from hexadecane or hexyl.— **hexdecylic alcohol** (*Chem.*), $C_{16}H_{33}OH$.— **hex'e-con'tane**, *n. Chem.* A solid paraffin ($C_{61}H_{124}$) obtained by fusing myricyl iodid with sodium.— **hex-cl'ko-sane**, *n. Chem.* A solid WAXY hydrocarbon ($C_{61}H_{124}$) resembling paraffin.— **hex'ene**, *n. Chem.* Same as HEXYLENE.

— **hex'e-nyl**, *a. Chem.* Of, pertaining to, or containing six atoms (or carbon); as, *hexenyl* chlorid ($C_6H_{11}Cl$) or *hexenyl* chlorid ($C_6H_{11}Cl$).— **hex'e'ris**, *n.* A galley having six banks of oars.

Hex'ham, 1 hĕks'am; 2 hĕks'am, *n.* A market-town in Northumberland, England; scene of the defeat of the Lancastrians, May 15, 1464.

hex'hue, *n. Chem.* A colorless pungent liquid compound (C_6) of the acetylene series produced artificially; benzylene; normal-butylacetylene.— **hex-i'o-did**, *n. Chem.* A compound in which there are six atoms of iodin. **hex-i'o-didet**.

hex'i-al'o-gy, 1 hĕks'i-al'o-ji; 2 hĕks'i-ăl'o-jy, *n.* The science of habits; specif., the science of the relations of organisms to their environment. [< Gr. *hexis*, habit (< *echō*, hold), + *-ology*.] **hex'i-col'o-gy**†.– **hex'i-cology**†–**sal**, **hex'i-o-log'ic**†–**cal**†.

hex'i-ra'di-ate, *a.* Same as HEXACTINAL.

hex'it, 1 hĕks'it; 2 hĕks'ĭt, *n. Chem.* One of certain hexatomic alcohols ($C_6H_{14}(OH)_6$) related to the glucoses and including dulcite, mannite, and sorbite. **hex'ite**. *Org. Chem.* A compound closely related to and resembling hexose. Hexites, as mannite, dulcite, and sorbite, are not affected by yeast.— **hex'o-bi'ose**, *n. Chem.* A disaccharid which on decomposition yields two hexose molecules.— **hex-oc'ta-he'dral**, *a.* Relating to a hexoctahedron or to the group of crystals of which it is the type.—**hex-oc'ta-he'dron**, *n.* [-DRA, *pl.*] *Crystal.* A hexakis-octahedron contained under 48 similar and equal triangular faces.— **hex-o'ic**, *a. Chem.* Of or derived from hexane.— **hexoic acid**, one of certain fatty acids ($C_6H_{12}O_2$) obtained by an oily liquid compound with a sweat-like odor and penetrating acid taste, occurring in butter, cocoanut-oil, the perspiration, among the oxidation products of wool, etc.— **hex'one**, *n. Chem.* A fluid compound (C_6H_{12}) of the valylene series of hydrocarbons distilled from certain gums and fats.— **hex-on'ic**, *a. Chem.* **1.** Pertaining to or descriptive of any of various melasseric acids having the formula $C_5H_7(OH)_4CO_2H$, as gluconic acid. **2.** Containing six atoms of carbon in the molecule.— **hex-os'a-zone**, *n. Chem.* The osazone obtained by treating a hexose sugar with phenylhydrazin.— **hex'ose**, *n. Chem.* Any simple sugar containing six carbon atoms to the molecule; a monosaccharid. — **hex'o-sid**, *n.* A hexose that produces a glucosid. **hex'oside**†.— **hex-o'tri'ose**, *n.* One of a class of sugars whose constitution is eighteen atoms of carbon in the molecule and which may be decomposed into three molecules of a hexose. — **hex'o-yl**, *n.* Same as CAPROYL.— **hex'o-yl'ene**, *n.* Same as HEXINE.— **hex-par'tite**, *a.* Same as HEXAPARTITE.

hext†, *a.* Highest. CHAUCER *C. D.* l. 345.

hex-tet'ra-he'dron, *n.* [-DRA, *pl.*] *Crystal.* An isometric hemihedron contained under 24 similar and equal triangu-

iar faces.— **hex-tet'ra-he'dral**, *a.* Relating to a hexter-tahedron or the group of crystals of which it is the type.— **hex'yl**, *n. [< AS. *hȳdan*, hide.]

Syn.: bury, cloak, conceal, cover, disguise, dissemble, mask, screen, secrete, suppress, veil. *Hide* is the general term, including all that is meant to be put out of sight, or beyond ready observation or approach, is said to be *hidden*; a thing may be *hidden* by intention, by accident, or by the imperfection of the medium or the eye from whom it is *hidden*; in their games, children *hide* the slipper, or *hide* themselves from each other; a man unconsciously *hides* a picture from another by standing before it, or *hides* a thing from himself by laying something else over it. As an act of persons, to *conceal* is always intentional: one may *hide* his face in anger, grief, or abstraction; he *conceals* his face when he fears recognition. A house is *hidden* by foliage; the bird's nest is artfully *concealed*. *Secrete* is a stronger word than *conceal*, and is used chiefly of such material objects as may be carried about the person, or from their ordinary surroundings, and put in unlooked-for places: a man *conceals* a scar on his face, but does not *secrete* it; a thief *secretes* stolen goods; an officer *secretes* himself to watch the thief. A thing is *covered* by putting something over or around it, whether by accident or design; it is *screened* by putting something before it, always with some purpose of protection from observation, inconvenience, attack, censure, etc. In the figurative use, a person may *hide* honorable feelings; he *conceals* an evil or hostile intent. See MIST; MASK; ENIGMA. *Syn. ant.*: admit, avow, betray, confess, disclose, discover, divulge, exhibit, expose, lay bare, lay open, make known, manifest, reveal, show, tell, uncover, unmask, unveil. — **hide and seek,** *n.* A game played by children in which one or more hide and the rest seek them: figuratively applied to evading an open answer; as, you play *hide-and-seek* with my question. **h.-and-go-seek.**

Cartouche from the Rosetta stone containing hieroglyphics representing the name of Ptolemy.

The Egyptian hieroglyphs are either (1) *ideographic*, representative of ideas, or (2) *phonetic*, representative of sounds. Ideographic hieroglyphs are either (*a*) *representative*, where the figure of an object represents the object itself, or (*b*) *symbolic*, where the meaning is conveyed metaphorically, as the figure of a beetle, typical, representative of, creation. The phonetic hieroglyph represents either (*a*) a complete word, which occurs as part of other words, or (*b*) part of a word, especially an initial or final syllable. Hieroglyphics are written either in vertical columns or horizontal lines, and are generally read from the right, tho the heads of birds or animals point out the direction from which the reading should begin.

The decipherment of the names Ptolemy and Cleopatra on the inscription of the famous Rosetta stone, as set down distinctly in state phonetic signs, was the first important step on the key to the *hieroglyphs*. W. D. WHITNEY *Lang. and the Study of Lang.* lect. xi, p. 454. [a. 1874.]

[< AS. *hēah*, *hīeh*.]

Syn.: elevated, eminent, exalted, lofty, noble, proud, steep, tall, towering, uplifted. *Deep*, while an antonym of *high* in usage, may apply to the very same surface simply measured in an opposite direction; *high*, applying to vertical distance measured from below upward, and *deep* to vertical distance measured from above downward; as, a *deep* mine; a *high* mountain. *High* mountains. *High* is a relative term: a table is *high* if it exceeds thirty inches; a hill is not *high* at a hundred feet. That is *tall* whose height is great in excess of its width or diameter, and whose actual height is great for an object of its kind; as, a *tall* tree; a *tall* man; *tall* grass. That is *lofty* which is imposing or majestic in form; we usually so style it with reference to its altitude, or *lofty* with reference to its majestic appearance. That is *elevated* which is raised somewhat above its surroundings; that is *eminent* which rises above them; as, an *elevated* platform; an *eminent* promontory. In the figurative sense, *elevated* is less than *eminent* station, and this less than *exalted*; we speak of *high* or *elevated* thoughts, aims, etc., in the good sense, but, sometimes of *high* feelings, looks, words, etc., in the invidious sense of haughty or arrogant. A *high* ambition may be merely selfish; a *lofty* ambition is noble. *Towering*, as in the literal sense, compares with *lofty* and majestic, but in the figurative sense, its use is almost always invidious; as, a *towering* passion; *towering* hopes and projects, and so crushes all opposing considerations, however rational, lovely, or holy. See HAUGHTY; STEEP.— ANT.: base, deep, degraded, depressed, beneath, humble, low, mean, prostrate, stooping. In English law, the civil jurisdiction of the Admiralty extends to torts committed on the high seas; criminal jurisdiction, which extended to crimes committed on the *high seas* or within the ebb and flow of the tide and not within the body of a county, has been transferred to the Central Criminal Court. The criminal jurisdiction of the U. S. Admiralty extends to all crimes committed on the *high seas*, including the Great Lakes (26 Stat. L., 824), which are held to come within the legislation affecting extraterritorial waters.

high'way", 1 hıı'wē"; 2 hī'wa', *n.* **1.** A specified line of travel, by land or by water, over which a right of easement is enjoyed by the public of freely passing; a public thoroughfare, as distinguished from a private way.

Such thoroughfare is termed a *highway* as distinguished from a passway, a turnpike, a railroad, because of its being dedicated by grant of record or appropriated by legislative act to the free and absolute use of the public forever, in which the government has no title or property interest. *Highway* designated the main public road, which was the subject of special royal enactments controlling the policing thereof; [Rare] as, the King's Highway from Boston to Plymouth.

In general every state establishes, regulates, and improves the *highway* within its own limits at discretion, and this is as true of the waterway as it is of any other.
T. M. COOLEY *Constitutional Law* p. 74. [L. B. & CO. 1880.]

2. In law, a generic name for all public ways, whether roads, railroads, canals, rivers, or ferries, created by legislative dedication, or necessity.

In England highways are regulated by act of Parliament, and in the United States by general statutes differing in each State. In both countries an authority must be paid to those whose land is used. The fact that a road has been in use uninterruptedly for a number of years (20 if the owner was aware, but made no objection, and a shorter period if circumstances dictate the time implied dedication) supports a presumption of dedication. If a highway be out of repair, the public have a right to pass on adjoining land even the enclosed with a fence; unnecessary damage must not be done. In England the repairs fall on the several parishes; in the United States on the towns or local municipalities, the cases may arise where an individual is liable. Obstructing the highway is a common-law nuisance, but a reasonable necessity will justify a temporary obstruction. The customs of most countries is that teams must keep to the right of the center of the highway; in England they keep to the left. In the United States it has been held that robbery on a railroad could not be punished as robbery on the highway. As a rule a railroad acquires its right of way by eminent domain.

An Officer of the Gordon Highlanders.

3. A main road as distinguished from branches and byways of minor usefulness. **4.** A common or open way or course.

hill, *n.* **1.** A natural elevation of earth or rock rising conspicuously above the ground at its foot. Specif.: (1) One of the lower peaks or ridges forming a foot-hill or spur of a mountain; an isolated peak or ridge of moderate elevation. The distinction between *hills* and *mountains* depends on local usage, which is largely determined by the configuration of the country. An elevation under 2,000 feet is usually called a hill, yet in regions of gently undulating land, as in some localities of the eastern United States, a small hummock is sometimes called a mountain. As an example of the other extreme, in the region of the Himalaya mountains, which are 16,000 to 20,000 feet high, a peak of 10,000 feet is frequently called a hill.

hin'der[1], 1 hĭn'dər; 2 hĭn'dĕr, *v.* **I.** *t.* To keep from or delay in action, progress, motion, or growth; obstruct; retard; impede; check; as, *he hindered me from doing it*; the difficulties of the work *hindered* its early completion; adverse winds *hindered* the ship.

II. *i.* To be or act as obstruction, impediment, or check. [< AS. *hindrian,* < *hinder,* behind.]

SYN.: bar, block, check, clog, counteract, delay, embarrass, encumber, impede, interrupt, obstruct, oppose, prevent, resist, retard, stay, stop, thwart. *Hinder* is to keep from action, progress, motion, or growth, or to make such action, progress, motion, or growth later in beginning or completion than it would otherwise have been. *Prevent* is to keep *secured* by anything that comes in before it to make it impossible; it is *hindered* by anything that keeps it from either beginning or ending so soon as it otherwise would, or as expected or intended. It is more frequently used to say that a thing which is *delayed*, the progress *hindered*. An action that is *hindered* does not take place at the appointed or appropriate time, that which is *prevented* does not take place at all; to *hinder* a thing long enough may amount to *preventing* it. A railroad-train may be *hindered* by a snow-storm from arriving on time; it may be *prevented* by special order from starting. To *retard* is simply to make slow by any means whatever. To *obstruct* is to *hinder*, or possibly to *prevent*, by adhesion or passage by something in the way; to *oppose* or *resist* is to *hinder*, or possibly to *prevent*, by directly contrary or hostile action, *resist* being the stronger term and having more suggestion of physical force; *obstruct* rends *hinder* more than *oppose* in any way. There may be no force strong enough to *oppose* it: one *opposes* a measure, a motion, an amendment, or the like; it is a criminal offense to *resist* an officer in the execution of his duty; the physical system may *resist* the attack of disease or the action of a remedy. See CHECK; OBSTRUCT.—ANT.: see synonyms for ACCELERATE, ASSIST, and further under *aid* in its progress; *from* acting promptly; *by* opposition.—**hin'der-ance,** *n.* Same as HINDRANCE.—**hin'der-er,** *n.* One who hinders.—**hin'der-ing-ly,** *adv.* [Prov. —Hin'du-ish, *a.* Resembling or characteristic of a Hindu; as, *Hinduish* ideas.—**Hin'du-ism,** *n.* To conform to Hindu customs and speech, as a race or nation.

Hin'du-ism, 1 hĭn'du-ĭzm; 2 hĭn'dụ-ĭsm, *n.* Brahmanism modified by admixture with Buddhism and other Indian beliefs and philosophies, and in various forms embraced by the mass of the Hindu population.

Hinduism represents the popular religion of India as contrasted with orthodox Brahmanism. Its pantheon, headed by the supreme triad of Brahma, Vishnu, and Siva, contains innumerable deities, but the principal devotion is that given to Vishnu in his various incarnations and as Krishna. Hinduism is a most comprehensive religion, embracing the loftiest moral and spiritual conceptions and, at the same time, the most degrading superstitions. Over 200,000,000 people are adherents of Hinduism. See AVATAR; JUGGERNAUT; KRISHNA; SIVA.

Side by side with orthodox *Hinduism* and with such heretical sects as Jainism and the Sikhs, there exists the religion of the people, both Aryan and non-Aryan. Here is found in richest profusion the worship of trees, serpents, animals, ghosts, both malevolent and beneficent, witchcraft, magic, and all the phenomena of nature, while totemism, fetishism, and animism each finds countless adherents.

5. A historical drama; as, the fifteen *histories* of Shakespeare. **6†.** A historical picture. [< L. *historia*, < Gr. *historia*, < *histōr*, learned, < base *id-* in *oida*, know.]

Syn.: account, annals, archives, biography, chronicle, memoirs, narration, narrative, recital, record, story. *History* is a systematic record of past events. *Annals, archives,* and *chronicles* relate events with little regard to their relative importance, and with complete subserviency to their succession in time. *Annals* are yearly records; *chronicles* follow the order of time. *Memoirs* necessarily lack emphasis, selection, and perspective. A *biography* is distinctively a written *account* of one person's life and actions; an *autobiography* is a *biography* written by the person whose life it records. *Annals, archives, chronicles, biographies,* and *memoirs* and other *records* furnish the materials of *history*. *History* recounts events with careful attention to their importance, their mutual relations, their causes and consequences; *history* is usually applied to such an *account* of events affecting communities and nations. We sometimes we speak of the *history* of a single eminent life. See also CHIVES; RECORD.— Ant: fable, fiction, forgetfulness, legend, myth, oblivion, tradition.

Authorities are divided as to the stock from which this people, or rather people's, sprang; it seems to have been of combined Turanian and Semitic elements. The Hittites are known to have founded a powerful monarchy along the Orontes early as 1600 B. C., to have been formidable enemies of the Egyptians and to have checked the westward progress of the Babylonians and Assyrians for centuries. They have left a large number of monuments and inscriptions in Asia Minor and western Asia Minor, a country which no great progress has as yet been made. Their language is thought by some to have been Aryan in character; others think it to the belief that it was more Semitic. Probable, while there is a possible connection between the Hittite characters and Egyptian hieroglyphics. [< Ll. *Hetheus*, < Gk. *Khittaios*.] — **Hit'tite**, *a.* — **Hittite art**, the art of the ancient Hittites, consisting of peculiar rock-sculptures and ruins of sanctuaries in Cappadocia, in Cilicia, near Smyrna, and elsewhere in Asia Minor and in Assyria. — **legal holiday,** a day appointed by law to be kept as a holiday, especially with regard to the closing of public offices and the suspension of judicial proceedings and general business. Such appointments usually change the time for presentment or protest of negotiable paper maturing on such a day to the preceding secular day. Sundays are common=law holidays generally in Christian countries throughout the world. In Canada, Good Friday, Dominion day, and Christmas day are universally observed, but other holidays vary among the different provinces. In the United States, legal holidays are usually fixed by State statute, and their number and purposes vary. Every Saturday after twelve o'clock noon is a legal holiday in California (in public offices), Colorado (during June, July, and August), the District of Columbia (for banking purposes), Illinois (in cities of 200,000 or more inhabitants), Indiana (from the first Saturday in June to the last Saturday in October inclusive for all public offices in counties having a county=seat of 100,000 population or more), Louisiana (in all cities of more than 15,000 inhabitants), Maryland, Michigan, Missouri (in cities of 100,000 or more inhabitants), New Jersey, New York, Ohio, Pennsylvania, Rhode Island, South Carolina (in Charleston only), Tennessee (for State and county officers), and Virginia.

In the following lists, the sign * denotes the recognition of holidays. The official abbreviations are used for the names of States.

E. central Ohio; 430 sq. m.; county-seat, Millersburg. **10.** A peak in the Yellowstone National Park, Wyo., 10,528 ft. high.

Holmes, Augusta Mary Anne (²/₁1847–¹/₂1903). ' A French composer.

Holm'firth, ‡ hōm'fŭrth; ? hōm'fŭrth, *n.* An urban district and town in western Yorkshire, England.

holm'gang", ‡ hōm'gaŋ'; ? hōm'găŋ', *n.* *Ice. Sagas.* duel: from the fact that islands were frequently used as dueling grounds. [< Ice. *holmr*, island + *gangr*, walk.]

holˈmi-um, ‡ hōl'mi-um; ? hōl'mi-ŭm, *n.* A mixture found in gadolinite, believed to be a chemical element—. **holˈmi-a,** *n.* The oxid of holmium.— **holˈmic,** *a.* Of or pertaining to chemical salts containing holmium as a base.

Holˈmö, ‡ hōl'mö; ? hōl'mŭ, *n.* A Swedish island in the Gulf of Bothnia.

holˈmos, ‡ hōl'mes; ? hōl'mŏs, *n.* *Class. Archeol.* **1.** An almost spherical long-stemmed closed vessel. **2.** A drinking-goblet. [Gr., round, smooth stone.]

holˈo-, holˈo-, holˈo-, hol'-; ? hŏl'o-, hŏl'-. From Gr. *holos*, whole: combining forms.— **holˈo-ac"id,** *n.* *Chem.* A supposed combination of an acid oxid not only with water, but with hydrogen peroxid.— **holˈo-a"cral,** *a.* *Math.* Having summits all of which are opposite to similar summits. **— holˈo-ac"yl,** *a.* *Crystal.* Having all the possible axes of symmetry but none of the planes.— **holˈo-bapˈtist,** *n.* *Eccles.* A believer in baptism by immersion.— **holˈo-benˈthic,** *a.* *Zool.* Existing throughout life in the deep sea.

Other words beginning with these prefixes will be found in alphabetical place, either singly or in groups.

holˈo-blasˈtic, ‡ hol'o-blas'tik; ? hŏl'o-blăs'tĭc, *a.* *Embryol.* I. Undergoing segmentation throughout the entire mass; wholly germinal, as the ova of all mammals except the monotremes. 2. Of or pertaining to such ova. < HOLO- + Gr. *blastos*, germ.] **— holˈo-blast,** *n.* A holoblastic ovum.— **holˈo-bodˈies,** *n. pl.* Holozoa.

holˈo-branch, *n.* **1.** A fish with complete gills. **2.** A complete gill.— **holˈo-branˈchi-a,** *n. pl. Zool.* In old classifications, a group: (1) of fishes; (2) of cephalans; (3) of polyzoans.— **holˈo-branˈchi-ate,** *a.* **holˈo-branˈchous,** *a.* *Zool.* Having complete gills. **holˈo-branˈchi-ata:.— holoc'a-in,** *n.* *Chem.* A crystalline derivative of para-acetphenetidin, obtained by condensing the latter with phenetidin: recommended as a substitute for cocain.

holˈo-caust, ‡ hol'o-kŏst; ? hŏl'o-cŏst, *n.* **1.** A sacrificial offering burnt whole or wholly consumed: a form of oblation practised by the Jews as well as by pagan nations; hence, the complete sacrifice or surrender of anything as an act of atonement or consecration to God.

Offer not only sacrifices, but *holocausts* unto God.

T. BROWNE *Christian Morals* p. 202. [w. s. 1836.]

2. Wholesale slaughter and destruction by fire and sword, as in war. [< L. *holocaustum*, < Gr. *holokauston*, < *holos*, whole, + *kaustos*, burnt, < *kaiō*, burn.]

— holˈo-caus'tic, *a.* **holˈo-caus'tal†.**

holˈo-cene, ‡ hol'o-sēn; ? hŏl'o-sēn, *n.* *Geol.* The Holocene or Recent epoch, following the Pleistocene epoch, and extending to and including the present time. [< Gr. *holos*, whole, + *kainos*, recent.] **— holˈo-cene,** *a.*

holˈo-cephˈa-lan, *n.* One of the Holocephali fishes.

holˈo-cephˈa-li, ‡ hol'o-sef'a-lī; ? hŏl'o-cĕf'a-lī, *n. pl. Ich.* An order of elasmobranchs including the chimeras and their relatives of the genus *Callorhynchus* (see CALLORHYNCH). The group is very ancient, many species occurring as fossils from the European Jurassic to recent times, when they are fewer than at any previous epoch, and represents an extreme primitive stock whence sprang both the elasmobranchs and the teleostomes. In skeletal characters, brain, oronasal grooves, and certain integumentary features of reproduction, an intestinal spiral valve, etc., the *Holocephali* agree with the elasmobranchs. On the other hand, a specializing tendency toward the *Teleostomi* is manifested in the forward position of the gills and their structure; the existence of opercula and the absence of spiracles, and of a cloaca. "Among the more notable features which mark this limits of the group, mention may be made of the autostylic condition of the skull, probably an adaptive modification induced by the large size of the cranium; the pectoral fins have taken the place of ordinary teeth, and the singular development of anterior and 'frontal' claspers." (BOULANGER.) The surviving holocephalans are nearly all inhabitants of deep water, and little is known of their ecology or habits. **Holˈo-cephˈa-laˈ.— holˈo-cephˈal,** *n.* **— holˈo-cephˈa-lous,** *a.*

Holˈo-chilˈus, *n. pl. Conch.* The *Holostomata*.— **holˈo-chlamˈy-date,** *a.* **holˈo-chlamˈyd-ic,** *a.*— **Holˈo-choˈa-notˈda,** *n. pl. Conch.* A section of nautiloidean cephalopods with a continuous funnel.— **holˈo-choˈanoid,** *a. & n.*— **holˈo-choˈa-nolˈdal,** *a.* **holˈo-choˈa-nitˈlic;.— holˈochorˈdate,** *a.* With a notochord the full length of the body. **— ho-loch'ro-al,** *n.* *Crystal.* Having a complete cover the whole (compound) eye: opposed to *schizochroal*.— **holˈochroneˈ,** *n.* *Math.* Any curve on which a sliding heavy particle will descend to the lowest point in the same time. **— holˈo-clasˈtic,** *a.* *Geol.* Wholly clastic and of aqueous origin: opposed to *hemiclastic*.— **holˈo-crine,** *a.* Wholly used for secretion: applied to those gland-cells whose entire substance is given up as secretory product.— **holˈo-crˈyp-tic.** Hiding or concealing completely; undecipherable: said of a cipher that is unintelligible without a key.— **holˈocrystalˈline,** *a.* *Petrog.* Completely crystallized, the admixture of amorphous material.— **holˈo-dac-tylˈic,** *a.* In prosody, composed altogether of dactyls except the last foot, which is spondaic.— **holˈo-dactˈyl-ic,** *a.* Of dactylic hexameter.— **holˈo-eˈdric,** *a.* *Crystal.* Denoting isomorphism in which two groups are simply isomorphic.

Holˈo-fernes, ‡ hol'o-fĕr'nēz; ? hŏl'o-fĕr'nēz. An Assyrian general; killed by Judith. *Judith* ii, 4. **2.** In Shakespeare's *Love's Labour's Lost*, a pedantic schoolmaster, supposed by some critics to be intended for Florio. **3.** In Rabelais's *Gargantua*, the hero's pedantic instructor in Paris, who teaches him the alphabet backward.

holˈo-gas'tru-la, *n.* The gastrula of a holoblastic ovum.— **holˈo-gaˈstric,** *a.* **holˈo-gasˈtrous,** *a.* *Zool.* Having a division of land-pulmonates with an entire jaw, as in *Helicidæ*, etc.— **ho-log'na-thous,** *a.*— **holˈo-gonˈic,** *a.* Holoacral. **holˈo-gonˈidˈi-al,** *a.* *Bot.* Wholly gonidial.— **holˈo-graph,** *n.* Writing entirely in the known handwriting of the person in whose name it is issued. [< LL. *holographus*, < Gr. *holographos*, < *holos*, whole, and see -GRAPH.] **holˈo-graphˈic†; holˈo-graphˈi-cal†,** *a.*

The will was *holograph*, for Mr. Utterson . . . had refused to lend the least assistance in the making of it.

R. L. STEVENSON *Dr. Jekyll* p. 14. [n. 1886.]

holˈo-graph, *n.* A document wholly in the handwriting of the person in whose name it appears. At common law a holograph is treated as an ordinary document, as a will inv, or systems derived from it, a holographic document is valid without a notary's seal, the signatures of witnesses, etc.

holˈo-hedˈral, *a.* [< hol'o-hē'dron; ? hŏl'o-hē'dron, *n. Crystal.* A form having the full number of symmetrically arranged planes crystallographically possible.— **holˈo-hedˈral,** *a.* Having all the planes required for complete symmetry.— **holˈo-heˈdric,** *a.* 1. *Math.* Having holohedral isomorphism. 2. Holohedral.— **holˈo-heˈdrism,** *n.* *Crystal.* The state of being holohedrous.

holˈo-hemˈi-heˈdral, *a.* *Crystal.* Denoting hemihedrons in which all the sectants have half instead of the whole number of similar planes.— **holˈo-hexˈa-gonˈal,** *a.* Holozoic.— **holˈo-hexˈa-hedˈral,** *n. pl.* *Crystal.* A division of crystals with a complete tetramorphosis, as in bees, etc. **— holˈo-metˈa-bolˈan, holˈo-metˈa-bolˈic, holˈometabˈo-lous,** *a.*— **holˈo-meˈtab'o-lism,** *n.* Complete metamorphosis: applied to insects, in which all the stages, as in holometabolous insects. **holˈo-meˈtab'o-let";** **holˈo-meˈtab'o-lyˈ.— ho-lom'e-ter,** *n.* A universal measuring instrument.— **Holˈo-metˈo-pa,** *n. pl.* *Entom.* In Brauer's classification, a group of dipterous insects containing the families *Conopidæ* and *Muscidæ*.— **holˈo-morph,** *n.* 1. *Math.* An expression having or imitating, in a specified region, the properties of an integral expression for which these properties hold throughout the entire plane. 2. A holomorphic crystal.— **holˈo-morˈphic,** *a.* 1. *Math.* Of or pertaining to a holomorph. 2. Denoting likeness of form at the ends: a form of holosymmetric crystals.— **holˈo-morˈphism,** *n.* The holomorphic condition. **holˈo-mesˈo-phyl,** *n.* **— holˈo-morˈphonˈtic** *Syst.* The reproduction of a lost member: distinguished from *meromorphistic*.— **Holˈo-myˈa-riˈa,** *n. pl.* *Helminth.* A division of nematode worms.— **Holˈo-myˈa-riˈan,** *n.* **holˈo-myˈa-riˈan,** *a. & n.* With the muscles of the body-wall undivided.

Ho'lon, ‡ hō'lŏn; ? hō'lŏn, *n.* *Bib. Josh.* xv, 51. [Heb., strong place.]

holˈo-nar-coˈsis, *n.* Profound narcosis.— **holˈo-nomˈic,** *a.* In theoretical mechanics, characterizing a dynamic system in which the constraints are expressed by integral or integrable equations. In a non-holonomic system there are non-integrable differential relations among the coordinates and parameters.— **holˈo-parˈa-site,** *n.* A plant living wholly in a parasitic manner.— **holˈo-parˈa-sitˈic,** *a.*— **ho-lop'athy,** *n.* 1. A disease that affects the entire system. 2. The theory that all disease is due to constitutional causes.— **holˈophane,** *n.* A lamp-reflector or lens-globe having prismatic configurations so arranged on its interior and exterior surfaces that the transmitted light is refracted, reflected, and diffused so as to produce illumination in the desired direction: a trade name.— **holˈo-phanˈic,** *a.*— **holˈo-phanˈous,** *a. Zool.* Fully visible; holometabolic.— **holˈo-phote,** *n.* A lamp for a lighthouse or for submarine exploration, so arranged that all light is utilized and thrown in the desired direction, in the catoptric holophote by reflectors, in the dioptric by refracting lenses, in the catadioptric by both combined.— **holˈo-phoˈtal,** *a.* **holˈo-phoˈtic,** *a.* **holˈophoˈter,** *n.* An apparatus for measuring the total light from any source.— **holˈo-phrase,** *n.* A word used instead of a phrase or to express a phrase; a holophrastic word.

Holophrasms are common in all its [the Algonquin] dialects.

D. WILSON *Prehistoric Man* ch. 24, p. 502. [MACM. 1885.]

— ho-lophˈra-sis, *n.* The expression of a sentence in a single idea in a single word, as in some primitive languages.— **holˈo-phraˈtic,** *a.*

holˈo-phyˈte, *n.* **holˈo-tal.** 2 hōl'o-fīt, *n.* A plant possessing chlorophyl, and therefore capable of manufacturing its own food.— **holˈo-phytˈic,** *a.*

holˈo-plˈa-cus, *n. pl.* *Ich.* A family of necerinoids with the calyx unsymmetrical, basals and radials fused, and stalk short. **Holˈo-pusˈ,** (*n. g.*) **Holˈo-pidˈi-dæ:.— holˈopod, n.**— **holˈo-podˈa.**— **holˈo-pharˈynx,** *n.* *Biol.* The plants, animals, and other forms of life that, regarded as a class, are wholly aquatic.— **holˈo-plankˈton'ic, holˈo-planc-tonˈic,** *a.*— **holˈo-plexˈi-a.** Complete or general paralysis.— **holˈo-plˈeu-ra.** *n.* Having many pairs of open stigmata, as the tracheal system of most adult insects.— **Ho-lopˈo-da,** *n. pl. Conch.* A section of cephalogasteate gastropods, the foot not including the most families: opposed to *Schizopoda*.— **ho-lop'o-dous,** *a.*— **Holˈops,** *n. Falcon.* An extinct genus of crocodiles, belonging to the family *Teleosauridæ*.— **holˈo-pterˈous,** *a.* Of the Holoptera of North America.— **ho-lop'tic,** *a.* Having the eyes contiguous, as in certain *Diptera*.— **holˈop-tychˈi-an,** *a.* Of, pertaining to, or consisting of holoptychius, as a geological stratum.— **Holˈop-tychˈi-us,** *n. pl.* An extinct ganoid family of rhipidistian fishes, especially those with sculptured cycloidal scales, pectoral fins acutely lobate, and dendrodont teeth.— **Holˈop-tychˈus,** *n.* = **holˈop-tychˈi-us.— holˈopus,** *n.* = **holˈop-tychˈi-old,** *a. & n.*— **holˈo-ra-chisˈchi-sis,** *n.* Complete fissation of the spinal canal. **holˈor-rha-chisˈchi-sis;.— holˈo-rhizˈal,** *a.* *Ornith.* Having the basal bones together or only slightly forking, as in the domestic fowl, giving a narrow, oval form to the nostrils.— **holˈorhizˈy,** *n.* = **holˈo-sapˈro-phyte.** *Bot.* A true saprophyte, one that is not a facultative parasite. See under FACULTATIVE.— **holˈo-sapˈro-phyˈtic,** *a.*— **holˈo-seˈrious,** *a.* Covered with a uniform silky or shiny hairs; having a sericeous or silky appearance.— **holˈo-sesˈsile,** *a.* A meteorite composed entirely of metallic iron.— **holˈo-sid-phoˈna,** *n. pl. Conch.* The *Dibranchiata*.— **holˈosˈi-phoˈnate,** *a.*— **holˈo-spaˈtic,** *n. pl. Zool.* A group of compound ascidians in which the body of the ascidiozoid is short, compact, and not divided into regions; also, those above mentioned, whether simple or compound.

— **holˈo-somˈa-tous,** *a.*— **holˈo-spherˈic,** *a.* Relating to the whole earth or globe, or to two parallels of latitude of the same name in different hemispheres.— **holˈo-stasˈis** normal, (*of temperature*).— **holˈo-spon-daˈic,** *a. Anc. Pros.* Composed entirely of spondees: said of a form of dactylic hexameter: opposed to *hemispondaic*.— **holˈo-stelˈ,** *pl. Ich.* An order of ganoid fishes with the skeleton more or less ossified, as in lepidosteids, amiids, and polypterids.— **holˈo-stelˈous,** *a.*— **holˈo-stoˈsis,** *n.*— **ho-los'teous,** *a.* **1.** Having a bony skeleton; composed wholly of bone. **2.** Of or pertaining to the *Holostei*.— **holˈo-sterˈic,** *a.* Entirely solid; containing no liquid; as, a *holosteric* barometer.— **Holˈo-stomˈa-ta,** *n. pl. Conch.* The heterbaceous annuls of the family *Siliacaceæ*. They have gymose-umbeliate white flowers, 3 to 5 hypogynous stamens, and the ovary 1-celled and 1-ovuled. **holˈo-stomˈate,** *a.* Having simple, entire mouths, as the cestode worms, feeding on plants.

This classification [*Siphonostomata* and *Holostomata*] is of no particular value. COOKE *Mollusks* in *Cambridge Nat. Hist.* vol. iii, p. 156. [MACM. 1895.]

2. *Protoz.* The *Panistomata*.— **holˈo-stomˈa-tous,** *a.* **1.** Having the mouth entire. **2.** Of or pertaining to the *Holostomata*. **holˈo-los'tomate;.— holˈo-stomˈid,** *n.* A holostomous fish. **2.** A holostomatous gastropod.— **Holos'to-mi,** *n. pl. Ich.* A division of fishes, especially a border of symbranchs, in which the mouth is free from the skull, as in amphipnoids.— **Holˈo-stomˈi-dæ,** *n. Helminth.* A family of trematode worms parasitic in birds, reptiles, and mammals, characterized by having the body flat in front and cylindrical posteriorly, and a peculiar armament of suckers. **Ho-los'te-mum,** *n.* (*n. g.*) — **holos'to-mous,** *a.* = **holˈo-stomˈa-tous.** Of or pertaining to the *Holostomi*.— **Ho-los'tra-ca,** *n. pl. Crust.* A division of phyllopods with a complete bivalve shell.— **ho-los'tracan,** *a. & n.*— **holˈo-strˈi-ous,** *a.* Having a full tassle. **2.** A young male or bachelor fur-seal, before acquiring a "harem": Aleutian term.— **ho-los'ty-ly,** *n. Ich.* A fusion of the quadrate with the skull, leaving the second visceral arch disconnected.— **holˈo-stylˈic,** *a.*— **holˈo-stylˈic,** *a.*— **holˈo-symˈmet-ric,** *a.* Wholly symmetrical; holohedral. **holˈo-symˈmet-riˈcal;.— holˈo-symˈmetry,** *n.* Holohedrism.— **holˈo-syˈnac-riˈte,** *n.* Holohedral.— **holˈo-sysˈtol-ic,** *a. Physiol.* Relating to an entire systole.— **holˈo-tarˈsi-a,** *n. pl. Entom.* A section of antliopods, especially a subordinate with membranulate tarsi and moderate antennæ, as in *Scolopendridæ*.— **holˈo-tarˈsian,** *a. & n.*— **holˈo-tesˈser-al,** *a.* Holosymmetric.— **holˈo-tetˈa-nus,** ‡ *Pathol.* A permanent contraction of all the muscles, with rigidity of the whole body.— **holˈotheˈtra-gonˈal,** *a. Ornith.* Having the tarsal envelop entire; booted.

Holˈo-thuˈri-deˈa, ‡ hol'o-thū-rid'ē-a; ? hŏl'o-thū-rĭd'e-a, *n. pl. Echin.* A division of echinoderms, espe-

cially a class with generally worm-like shape, skin-like integument, and circumoral tentacles: including trepangs, sea-cucumbers, sea-slugs, etc. There are two types, represented by the *Holothuria* and the *Synapta*. [< L. *holothurium*, < Gr. *holothourion*, a kind of zoophyte, < *holos*, whole, + *thourios*, *thouros*, rushing, < *thrōskō*, rush.] **Hol'o-thu'ri-a** or **-thū'ri-ə**; **Hol'o-thu'ri-an** or **-thū'ri-ən**; **Hol'o-thu'ri-de** or **-thū'ri-dē**, *n. pl.* **Hol'o-thu'roid**, *a.* and *n.* **Hol'o-thu'ri-oid**, *a.* and *n.* **Hol'o-thu'ri-um**, *n.* [NL.] A holothurian.

1. One of the Holothuria (*Cucumaria frondosa*). 2. One of the Synapta (*S. inhærens*).

ho-lot'o-my, *n.* The complete removal of an organ or part.—**ho-lot'o-ny**, *n. Pathol.* Same as HOLOTOMY.—**hol'o-to'ti-al**, *a.*—**hol'o-tox'ic**, *a.*—**ho-lo'to-py**, *n.* The relation of an organ to the entire body.—**Ho-lo'tri-cha**, *n. pl. Protoz.* An order of ciliate infusorians with cilia nearly uniformly disposed over the surface of the body.—**ho-lot'ri-chal**, **ho-lot'ri-chous**, *a.*—**Ho-lot'ro-cha**, *n. pl. Helminth.* A division of rotifers with an entire trochal disk and an anus.—**ho-lot'ro-chal**, *a.* Completely ciliated.—**ho-lot'ro-chous**, *a.* Pertaining to the *Holotrocha*.—**hol'o-trop'i-cal**, *a.* Designating the tropics as a whole; common to all the tropics: tropicopolitan.—**hol'o-type**, *n.* A complete special individual or specimen from which a species is described.

hol'our, *n.* A whoremonger.

hol-ox'id, *n. Chem.* Any substance supposed to contain oxygen in the molecular form of HOLOXYL, *a.* Wholly like an animal; as, *holozoic* nutrition: opposed to *holophytic*.

holp, **holp'en**, † a hŏlp, hōlp'n; 2 hōlp, hōlp'n [Archaic], *imp.* of HELP, *v.*

He hath *holpen* his servant Israel. *Luke* i, 54.

hol'som', **hol'sum'**, *a.* Wholesome.

Holst, † hōlst; 2 hōlst, Hans Peter (10/11 1811–3/4 1893). A Danish poet and novelist.

Hol'stein', † hōl'stīn, *n.* A former Danish duchy; at one time in the Germanic Confederation and in the old German Empire; now part of Schleswig-Holstein as a province of Prussia; 3,237 sq. m.

Hol'stein', *n.* One of a breed of large, usually black-and-white, short-horned cattle, originally from Schleswig-Holstein, valued for their beef and their milk; furnishing a larger quantity of the latter than any other breed. See plate of CATTLE, fig. 10.

Hol'stein-Got'tor-slan, † hōl'stīn-frē'sən; 2 hōl'stīn-frē'zhən, *a.* Pertaining to or coming from the Prussian province of Holstein and the Dutch province of Friesland.

Holste'nius, † hōl-stē'nĭ-us, *n.* A German scholar (1596–1661); librarian of the Vatican.

Hol'ster, † hōl'stər; 2 hōl'stər, *n.* **1.** A leather pistol-case, worn on the holster, or carried at the saddle-bow. **2.** In rolling-mills, the framework in which the rolls are secured.

Another girdle or belt . . . contained a pair of the smallest sized pistols, in *holsters* nicely made to fit.

Cooper, *Prairie* p. 121. [N. M. & CO.]

[< D. *holster*.] —**hols'ter-pipe''**, *n.*

And shrines within.
WHITTIER *My Soul and I* st. 21.

[< AS. *hālig*, < *hāl*, whole.]

Syn.: blessed, consecrated, devoted, hallowed, sacred, set apart. *Sacred* is applied to that which is to be regarded as inviolable on any account, and so is not restricted to divine things; therefore in its lower applications it is less than *holy*. That which is *sacred* may be made so by institution, decree, or association; that which is *holy* has in its own nature, possessing intrinsic moral purity, and, in the highest sense, absolute moral perfection. God is *holy*; his commands are *sacred*. *Holy* may be applied also to that which is *hallowed*-as, "the place whereon thou standest is *holy* ground," *Ex.* iii, 5. In such use *holy* is more than *sacred*, as if the very qualities of a spiritual or divine presence were imparted to the place in fact. *Divine* has been used with great looseness, as applying to anything eminent or admirable, in the line either of goodness or of mere power, as to eloquence, music, etc., but there is a commendable tendency to restrict the word to its higher sense, as designating that which belongs to or is worthy of the Divine Being. See DEVOUT; PERFECT; PURE.—Ant.: abominable, common, cursed, impure, polluted, secular, unconsecrated, unhallowed, unholy, unsanctified, worldly.

II. *i.* To have or occupy a home; dwell; also, to go or fly home, as a carrier-pigeon. See HOMING.

home, *a.* **1.** Of or pertaining to one's home or country; domestic as opposed to foreign; as, *home* life; *home* productions. **2.** Going straight to the point or mark; personal; effective; as, a *home* blow or thrust.

The *home* truths of the navy, young, vigorous faith. E. E. HALE *Man Without a Country, Old and New* p. 111. [N. BROS. 1888.]

3. In games, races, etc., of or pertaining to the home or goal; reaching the goal; as, a *home* run. See HOME, *n.*

home[1], *n.* **1.** One's fixed place of abode; the dwelling-place of a person and his family; a family residence; also, the *place* in which one was brought up; *as*, he does business in town, but his *home* is in the country; one's old *home*. **2.** Hence, a place or abode of affection, peace, and rest; a congenial abiding-place.

Where we love is *home*,
Home that our feet may leave, but not our hearts.
HOLMES *Homesick in Heaven* st. 5.

3. The locality or country in which a person or his ancestors were born, or in which one dwells or has dwelt. Specif.: (1) One's native country; fatherland; also, the country of one's ancestors; as, New England, the *home* of the Puritan; England, the usual *home* of many Americans. (2) Among British colonists, the mother country; as, we live in India and send our children *home* to be educated. **4.** The region or locality where anything is commonly or habitually found; the place where a thing is indigenous; a seat; habitat.

Freedom has its favorite *home* on the mountains or by the sea.
BANCROFT *Hist. United States* vol. v, p. 93, 1st ed., N. Y. & co., 1876.

5. Any place of rest or shelter. Especially: (1) An establishment where needy or afflicted persons are sheltered or cared for; as, a soldiers' *home*; an orphans' *home*. (2) One's final resting-place; especially in the phrase *one's long home*. (3) The eternal abode of the soul; the future state.

Thou thy worldly task hast done,
Home art gone, and ta'en thy wages.
SHAKESPEARE *Cymbeline* act iv, sc. 2.

6. In games: (1) The point that must be reached in order to win or to score in various games, as in baseball, the *home* base; in lacrosse, the position of a player who stands just in front of his opponent's goal; in athletics, the finishing-point of a contest, especially a cross-country run; in many varieties of tag, the goal or bye; in many games with counters, the section of the board toward or into which the counters are played. (2) Hence, in some games, as in lacrosse, the player who stands at such a point. [< AS. *hām*, home.] **hom**, *n.*

Syn.: abode, domicil, dwelling, fireside, habitation, hearth, hearthstone, house, ingleside, residence. *Abode*, *dwelling*, and *habitation* are used with little difference of meaning to denote the place where one habitually lives; *abode* and *habitation* belong to the poetic or elevated style. Even *dwelling* is not used in familiar speech; a person says "my *house*," "my *home*," or more frequently "my *residence*." *House*, from the Anglo-Saxon, denoting originally a *dwelling*, came to mean an endeared *dwelling* as the scene of domestic love and happy cheerful activity; by a sense to which there is an increasing tendency to restrict the word — desirably so, since we have other words to denote the mere dwelling-place; we say "The wretched tenement could not be called *home*," or "The humble cabin was dear to him as the *home* of his childhood."

Home's not merely four square walls,
Tho with pictures hung and gilded;
Home is where affection calls —
Where the heart has built.

Thus the word comes to signify any place of rest and peace, and especially heaven, as the soul's peaceful and eternal dwelling-place. See synonyms for *colony* and *domicile*.

— at home. **1.** At one's own abode or lodgings. **2.** In one's own country. **3.** Unconstrained or unreserved, as in one's own house; at ease; as, to feel or to make oneself *at home*. **4.** Having a thorough familiarity or knowledge; conversant; as, *at home* on a subject. **5.** Prepared to receive callers; as, to be *at home* to one's friends: often used substantively, in the sense of a reception; as, to give an *at home*.

hom'i-cide,] hom'i-said; 2 hŏm'i-cīd, *n.* *Law.* **1.** The killing of any human being by another.

Homicide includes both **criminal** and **unintentional** killing. It is (1) **justifiable,** when committed by an officer in the discharge of duty, or by some one aiding him, or to prevent atrocious crime; (2) **excusable,** when committed accidentally, or in self-defense; (3) **felonious,** when committed maliciously, as in murder, or in heat of blood or negligently, as in manslaughter. In modern law the distinction between *justifiable* and *excusable* homicide is nearly a verbal one, neither involving any legal penalty, but in the earlier common law the man who committed *excusable* homicide was subject to imprisonment, from which he was usually exempted by a pardon, and to suits on the part of the family of the deceased. The various degrees of *felonious* homicide have been defined by statute in the United States and certain British colonies, as part of the criminal code.

In 1342 their [the nobles'] ungovernable passions broke out again in *homicides* and general tumult. JOHN ADAMS *Defence of the Constitutions* vol. ii, p. 245. [n. ᵹ. ♣ co. 1851.]

Biol.* The doctrine of the derivation of organs and tissues from the same germ-layer.—**ho'mo-des-mot'ic**, *a.* Uniting two homologous areas of the gray matter of the central nervous system, as the two anterior cornua of the spinal cord or two spots in the cerebral cortex: said of nerve-fibers.—**ho'mo-dont**, *a. Zoöl.* Having all the teeth nearly alike, as a dolphin or other denticete.—**ho'mo-dont-ism**, *n.* **ho'mo-don-ty†**.—**ho-mod'ro-mous**, *a. Bot.* Having the same direction of growth: leaf-spirals in certain branches. **2.** [Rare.] *Mech.* Having the power and weight on the same side of the fulcrum: said of a lever.—**ho'mo-dro'mous**, *a.*—**ho-mod'ro-my**, *n.* The state of being homodromous.—**ho'mo-dy'na-mous**, *a. Biol.* Serially homologous; of or pertaining to homodynamy.—**ho'mo-dy'na-my**, *n. Biol.* Serial homology.—**ho'mo-ge'ny**, *n.* The homology of metameres; serial homology.

Other words beginning with these prefixes will be found in its alphabetical place, either singly or in groups.

ho'mo-gen'ic, 1 ho'mō-o- 2 hō'mo-ǰen'ik. *Chemistry* (< *homos*, same), like, similar: a combining form. In anglicized words like *homeopathy*, *homeo* is the preferred spelling.—**ho'mo-ge'ne-ȳ**, *n. Rhet.* Resemblance in the beginnings of two words that occur near together.—**ho'mo-GEOGETELEUTON.**—**ho'mo-ce-ce-phal'ic**, *a.* Denoting a similarity in skulls.—**ho'mo-ce-chro'ma-tism**, *n.* Same as HOMOCHROMATISM.—**ho'mo-ce-ra'ta**, *n. pl. Zoöl.* Same as HOMOCHRONOUS.—**ho'mo-e-don't**, *a.* Having the form of a simple cone: said of a tooth.—**ho'mo-e-ge'ne-al**, *a.* Same as HOMOGENEOUS.—**ho'mo-e-ne'sis**, *n. Embryol.* Combination of similar chromosomes in a daughter-nucleus. See KARYOKINESIS.—**ho'mo-om'-e-ra**, *n. pl. Zoöl.* Same as HOMEOMERA.—**ho'mo-ge'ne-al**, *a.* Composed of metrical groups each containing two systems or strophes alike.—**ho'mo-e-o-me'ri, n.** *pl. Ornith.* A section of mesomyodian passerines with the sciatic artery well developed.—**ho'mo-e-o-me'ral**, *a.* Same as HOMOMERIC.—**ho'mo-o-me'ri-an**, *n.* & *a.*—**ho'mo-e-o-me'ri-an-ism**, *n.*—**ho'mo-e-o-mer'ic**, *a.* Or of pertaining to homoeomery.—**ho'mo-e-o-mer'i-cal**.—**ho'mo-e-o-mer'ic**, *a. Ornith.* Having the sciatic artery well developed; of or pertaining to the *Homœomeri*.—**ho'mo-e-o-mer'y**, *n. Biol.* Same as HOMOMERY.—**ho'mo-ga'mi-a**, *n.* A lichen-thallus in which the hyphæ and gonidia are uniformly distributed.—**ho'mo-em'er-ous**; **ho'mi-om'er-ous**; **ho'mo-e-o-mer'ous**.—**ho'mo-em'er-y**.—**ho'mo-em'er-y**, *n.* The doctrine that elementary substances are composed of parts each similar to the whole; also, an elementary substance.—**ho'mo-em'er-y†**.—**ho'mo-e-morph**, *n.* Same as HOMOMORPH.—**ho'mo-e-mor'phism**, *n.* Similarity of crystalline forms between chemical compounds more or less dissimilar; isomorphism.—**ho'mo-e-mor'phous**, *a.* (n. g.) Same as HOMOMORPHOUS.—**ho'mo-e-mor'phism**, *n.* Similarity of crystalline forms between chemical compounds more or less dissimilar; isomorphism.—**ho'mo-e-mor'phist**, *n.* (n. g.) Same as HOMOMORPHIST.—**ho'mo-e-mor'phous**, *a.* Same as HOMOMORPHOUS.—**ho'mo-e-mor'phy**, *n.* Sameness of sound.—**ho'mo-e-o-pla'si-a**, *n.*—**ho'mœ-o-plas'tic**, **ho'mœ-op-pla-sy**, *etc.* Same as HOMOPLASIA, etc.—**ho'mo-op'o-dal**, *a. Neurol.* Having processes or branches of one kind only: said of nerve-cells.—**ho'mœ-o-proph'o-ron**, *n. Anc. Rhet.* Alliteration. See PARHOMŒON.—**ho'mœ-op-to'ton**, *n.* [-TA, *pl.*] *Anc. Rhet.* A figure by which several cases of verbs are used successively with the same inflections.—**Ho'mœ-o-sau'ri-a**, *n. pl. Herp.* An extinct suborder of rhynchocephalian reptiles with premaxillaries not united, and with unciniate processes.—**ho'mœ-o-sau'ri-an**, *a.* & *n.*—**Ho'mœ-o-sau'ri-dæ**, *n. pl. Herp.* A Mesozoic family of homœosaurians with distinct posterior nasal bars and no sacra.—**Ho'mœ-o-sau'rus**, *n.* (n. g.) —**ho'mœ-o-sau'rid**, *n.*—**ho'mœ-o-sau'roid**, *a.* & *n.*—**ho'mœ-o-se'mant**, *n.* [NEW.] A word nearly synonymous with another word or other words.—**ho'mœ-o'sis**, *n. Biol.* The assumption by some of the serial parts of an organism of the form typically belonging to others in the series.—**ho'mœ-ot'ic**, *a.*—**ho'mœ-o-te-leu'ton**, *n.* [-TA, *pl.*] *Rhet.* The use of several words or clauses successively ending with the same sounds.—**ho'mœ-o-te-leu'tic**, *a.*—**ho'mœ-o-**

therm, *n.* A warm-blooded animal.—**ho''mœ-o-ther'mal**, *a.* Preserving a uniform temperature, as warm-blooded animals; homothermic: opposed to *poikilothermal*.—**ho''mœ-o-ther'mic**; **ho''moi-o-ther'mal**.—**ho''mœ-o-ther'mism**, *n.*—**ho''mœ-o't'ic**, *a.* Of or pertaining to homœosis.—**ho'mo-e-o'sis**, *n.* **variation**, the modification of a serial part of an organism so that it resembles another part; *e. g.*, the change of an antenna into a foot or of a petal into a stamen.—**ho''mœ-o't'o-py**, *n.* Same as HOMŒOTELEUTON.—**ho''mœ-o-type**, *n. Biol.* A specimen identical with the type.—**ho''mœ-o-typ'i-cal**, *a. Embryol.* Characterized by a karyokinesis in which the chromosomes are short and their segmentation in the daughter-nuclei is irregular.—**ho''mœ-o-typ'ic**;—**Ho''mœ-o-ou'si-an**, *a.* & *n.* Same as HOMOUSIAN.—**ho''mœ-o-zo'le**, *a.* Containing similar forms of life; as, *homœozoic* belts on the earth's surface.

ho'mo-fo'cal, *a.* Confocal.—**ho-mog'a-mous**, *a. Bot.* Having but one kind of flowers.—**ho'mo-gam'ic**, *a.*—**ho'mog'a-my**, *n.* **1.** *Bot.* (1) The simultaneous maturity of stamens and pistils in a flower; synacmy; synanthesis: opposed to *dichogamy*. (2) The state or condition of being homogamous. **2.** *Evolution.* Interbreeding among an isolated group of individuals having similar characters, or having different characters from those from which they are isolated.—**ho'mo-gan'gli-ate**, *a.* Having the ganglia of the nervous system symmetrically arranged on right and left sides, as an articulate.

ho'mo-gen, 1 hō'mo-ǰen; 2 hō'mo-ǰen, *n.* **1.** A homogeneous structure or part. **2.** *Zoöl.* An organ or part derived from the same primitive elements as another, as the fore limb of a mammal compared with the pectoral fin and its appendages in a fish. **3.** The offspring of homogeneous parents.

ho''mo-ge-ne'i-ty, 1 hō''mo-ji-ni'i-ti; 2 hō''mo-ǰe-nē'i-ty, *n.* The state or quality of being homogeneous; identity or similarity of kind, composition, or structure; also, congruity of the parts or elements of a whole.

Despite their many differences, there is a remarkable degree of *homogeneity* among the early conditions of the several branches of the Aryans. CHAS. MORRIS *Aryan Race* p. 83. [n. ♣ s. 1888.]

ho''mo-ge'ne-ous, 1 hō''mo-ji'nı-us; 2 hō''mo-ǰē'ne-ūs (XIII), *a.* **1.** Made up of similar parts or elements; of the same composition or structure throughout; uniform: opposed to *heterogeneous*.

A *homogeneous* and vigorous people may manage their own affairs under a popular constitution, so long as their personal characters remain undegenerate. EMERSON *Essays* ser. ii, p. 58. [1881.] **2.** Similar in material, form, and arrangement: said of parts making up a whole. **3.** *Alg.* (1) Having all its terms of the same degree: said of an expression or equation. (2) Of the same kind, so as to admit of comparison one with another. **4.** *Biol.* Homogenous. [< F. *homogène*, < Gr. *homogenēs*, of the same race, < *homos*, same, + *genos*, race.]—**ho''mo-ge'ne-ous-ly**, *adv.* Syn.: see ALIKE.—Ant.: see synonyms for HETEROGENEOUS.—**homogeneous linear group** (*Alg.*), the group associated with the transformation of one set of n variables into another.—**ho''mo-ge'ne-ous-ness**, *n.*—**ho''mo-ge'ne-ous-ness**, *n.*—**ness**, *n.*—**ho''mo-ge'ne-ate**, *a.* [Rare.] To render homogeneous.—**ho''mo-ge'ne-um**, *n.* [-NE-A, *pl.*] Any homogeneous thing.—**ho''mo-ge'ne-ize**, *vt.* To render homogeneous or essentially alike.—**ho''mo-ge'ni-ze**, *n.*

ho''mo-gen'e-sis, 1 hō''mo-ǰen'i-sis; 2 hō''mo-ǰēn'e-sis, *n. Biol.* **1.** A mode of reproduction in which the offspring are like the parent and have the same cycle of existence: opposed to *heterogenesis*.

By the one method [of biogenesis] . . . the living parent gives rise to offspring which passes through the same cycle of changes as itself — like gives rise to like; and this has been termed *Homogenesis*. HUXLEY *Lay Sermons, Spon. Gen.* p. 353. [s. 1871.] **2.** Hybridism in which the progeny resembles the parent without offspring. [< HOMO- + GR. *genesis*; see GENESIS.]

ho''mo-ge-net'ic, 1 hō''mo-ji-net'ik; 2 hō''mo-ǰe-nēt'ic, *a.* **1.** Of, pertaining to, or characterized by homogenesis. **2.** *Geol.* Similarity of geological formations supposed to be due to community of genesis. **3.** Characterized by homogeny; homogenous.

ho''mo-gen'ic, 1 hō''mo-ǰen'ik; 2 hō''mo-ǰēn'ic, *a.* Of, pertaining to, or exhibiting homogeny: also **ho''mog'e-nous**.

ho-mog'e-nist, 1 ho-moj'i-nist; 2 ho-mōǰ'e-nist, *n.* One who holds that the different races of the world originated in a common ancestor.

ho''mog-e-ne'sa-tion, 1 ho''moj'i-ni-zē'shon; 2 ho-mōǰ'e-ni-zā'shon, *n.* The state of being homogenous; the act of homogenizing.

ho''mog'e-nize, 1 ho-moj'i-naiz; 2 ho-mōǰ'e-niz, *vt.* [-NIZED; -NIZ'ING.] To trace to a common stock or origin.

ho-mog'e-nous, 1 ho-moj'i-nus; 2 ho-mōǰ'e-nūs, *a.* **1.** Of the same origin. Syn.: same as HOMOGENETIC, 2: to be distinguished from *homogeneous*.

ho''mo-gen-tis'ic, 1 hō''mo-ǰen-tis'ik; 2 hō''mo-[or hōm'o-]ǰēn-tī'ic, *a. Phys. Chem.* Relating to an acid nominally found in the urine after normal quantities, increased in amount in certain pathological conditions.

ho''mo-ge''ti-sin'ic, *a.* An erroneous form of HOMOGENETIC (acid).

ho-mog'e-ny, 1 ho-moj'i-ni; 2 hō-mōǰ'e-ny, *n.* **1.** *Biol.* Homology of structures genetically related in so far as that they have a single representative in a common ancestral form: opposed to *homoplasy*. **2.** *Geol.* Community of genesis, or of structural relation: used with reference to geological formations. **3.** Identity or similarity of kind or character. [< GR. *homogeneia*, community of origin, < *homogenēs*: see HOMOGENEOUS.]

ho'mo-glot, *a.* [Rare.] Speaking the same language.

ho'mo-gom'phi, 1 hō'mo-gom'fai, *n. pl. Bot.* Having sides or bristles of a similar kind. [< HOMO- + Gr. *gomphas*, bolt.]

ho'mo-ǰo'nous, 1 ho-mog'o-nus; 2 hō-mōǰ'o-nūs, *a. Bot.* Having stamens and pistils of uniform height in all flowers of the same species: the opposite of *heterogonous*. [< HOMO- + Gr. *gonos*, offspring.] **ho'mo-gonet**, *n.*—**ho-mog'o-nous-ly**, *adv.*

ho-mog'o-ny, 1 ho-mog'o-ni; 2 ho-mōǰ'o-ny, *n.* **1.** *Bot.* The state of being homogonous. **2.** *Biol.* Same as HOMOGENESIS.

ho'mo-graph, 1 hō'mo-graf; 2 hō'mo-ǰráf, *n. Philol.* A word spelled like another but with a different meaning and derivation; as, "base" meaning "foundation" is the *homograph* of "base" meaning "wicked." [< Gr. *homographos*, < *homos*, same, + *graphō*, write.]

Homographs (multivocals), identical to the eye; as, base, bore, dun, etc. FITZEDWARD HALL *Modern English* p. 170. [s. 1873.]

ho''mo-graph'ic, 1 hō''mo-graf'ik; 2 hō''mo-ǰráf'ic, *a.* **1.** *Geom.* Designating two figures or systems of points so related that to any four collinear points of the one corresponds four collinear points of the other, and to

four concurrent lines of the one four concurrent lines of the other having the same anharmonic ratio. 2. *Orthography.* Characterized by or relating to homography.—**homographic division,** the division of a line or of two lines by two systems of projective points.—**homographic transformation,** the transformation of a figure into another homographic with it.

ho-mog'ra-phy, *n.* ho-mog'ra-fi; 2 ho-mŏg'ra-fy, *n.* 1. *Geom.* The relation between two homographic figures. 2. *Orthography.* The representation of each sound by a distinctive sign used always for the same sound.

ho'mo-he'dral, *a. Crystal.* Same as HOLOHEDRAL.—**Ho-mo'an,** *a.* & *n.* Same as HOMOIOUSIAN.—**Ho-me'an‡.**

ho'mol-om'er-ous, ho'mol-o-ther'mal, ho'mol-o-zo'ic. Same as HOMOGEROUS, etc.

Ho'mol-ou'sian, 1 hō'mol-ō'shan; 2 hō'mŏl-ŭ'shan *I. a.* 1. *Ch. Hist.* Pertaining to the Homoiousians or their beliefs. 2. [*h-*] Alike in nature or characteristics. **ho'mol-ou'sious‡.** *II. n. Ch. Hist.* One of the Semi-Arians of the 4th century who held that Christ was of a similar nature but not of the same nature with the Father: opposed to *Homoousian.* [< Gr. *homoiousios,* of like nature, < *homoios* (see HOMO-) + *ousia,* being, < *ousa,* f. ppr. of *eimi,* be.] —**ho'mol-ou'sia,** *n.*

ho'mo-lat'er-al, *a.* 1. On the same side. 2. Having equal sides.—**ho'mo-lec'i-thal,** *a. Biol.* Having the lecithin equally distributed: said of ova.

Ho-mol'i-dæ, 1 ho-mol'i-dē; 2 hō-mŏl'i-dē, *n. pl. Crust.* A family of dromiacean brachyurous crabs without propods and with long eyestalks. [< NL. < *Homola* + *-idæ.*]—**Ho'mo-lid'e-a,** *n.* A subtribe of dromiacean brachyurous crabs with the female sternum without lunidigital grooves and eyes not completely retractile into orbits, including the *Homolidæ* and *Latreillidæ.*—**ho'mo-lid'e-an,** *a.* & *n.*

ho'mo-il-no'le-in, 1 hō'mo-il-nō'li-in; 2 hō'mo-il-nŏ'le-in, *n. Chem.* A glyceryl, $C_3H_5(C_{18}H_{33}O_2)_3$, forming the chief constituent of linseed oil. [< *homo-* + *linolein,* < *linum* flax, + *oleum,* oil.]

hom'o-log,)] 1 hom'o-log; 2 hŏm'o-lŏg (xiii), *n.* **hom'o-logue,**) Something that has a similar position, proportion, or type to, or has structural affinity with, something else; that which is homologous. The corresponding angles of similar polygons are homologs. So also are the fore legs of a horse and the wings of a bird.

Such series are called homologous series (having the same proportion), and the members of the series are *homologues* of each other. EDDY AND STRAUB *Chemistry* 1883, p. 103, *b.* n. *a.* (2).

Prof. Owen (who first clearly defined this term, . . .) would understand of *homologue* the same organ in different animals, under every variety of form and function. HUXLEY in *Annals and Magazine of Nat. Hist.* fourth series, July, 1870, p. 35. [F., < Gr. *homologos;* see HOMOLOGOUS.]

ho-mol'o-gate, 1 ho-mol'o-gāt; 2 hō-mŏl'o-gāt, *v.* [-GAT'ED; -GAT'ING.] *I. t.* 1. To acknowledge; assent to; express approval of. 2. *Scots Law.* To make valid; ratify. 3. [Rare.] To identify with. *II. i.* To assent; express assent. [< LL. *homologatus,* pp. of *homologo,* < Gr. *homologeō,* agree, < *homologos;* see HOMOLOGOUS.]

ho-mol'o-ga'tion, 1 ho-mol'o-gā'shon; 2 ho-mŏl'o-gā'shon, *n.* Approval; sanction; confirmation; specif., in Scots law, the legalization of a defective deed, so far as the one homologating or approving it is concerned.

ho-mol'o-gen, 1 ho-mol'o-jen; 2 hō-mŏl'o-ĝen, *n. Chem.* The aggregate of atoms differentiating each member of a homologous series from the one preceding it, as the group CH_2 in hydrocarbons of the methyl series, etc. [< HOMOLOGOUS + *-GEN.*]—**ho-mol'o-gen'ic,** *a. Chem.* Denoting the molecule with which the homologen is combined.

ho-mol'o-gize, 1 ho-mol'o-jiz; 2 hō-mŏl'o-ĝīz, *v.* [-GIZED; -GIZ'ING.] *t.* & *i. Chem.* To determine the correspondence of in a homologous manner; demonstrate the homologies of. **II.** *i.* To be homologous; have structural affinity.—**ho-mol'o-giz'er,** *n.*

ho-mol'o-gon, *n.* Same as HOMOLOG.

ho-mol'o-gous, 1 ho-mol'o-gus; 2 ho-mŏl'o-ĝŭs, *a.* Having a similar structure, proportion, value, or position; identical in nature, relation, or relative function. Specif.: (1) *Biol.* Of, pertaining to, or characterized by homology. Compare ANALOGOUS.

The wing of an insect, the wing of a bird, and the wing of a bat are called analogous, but not homologous, because their anatomical structure is different. LEWES *Problems of Life and Mind* second series, vol. I, p. 114. (o. *a.* & co. 1877.]

(2) *Math.* Designating like or corresponding parts of two similar or related figures or expressions, as the two antecedents or the two consequents, in a proportion.

(3) *Geom.* Having one-to-one correspondence; homologic. (4) *Chem.* Characterized by correspondence or homology; having the same type; correspondent in properties and proportional composition. See HOMOLOGY. (5) *Physiol. Chem.* Belonging to the same chemical type or series: distinguishing the relation between an immune serum and the special kind of bacterial preparation with which it has been prepared. (6) *Pathol.* Identical in formation with the normal tissue of the parts: said of a tumor or other growth. Opposed to *heterologous.* [< Gr. *homologos,* < *homos,* same, + *legō,* speak.] **ho-mol'o-gal‡.**

hom'o-lo-graph'ic, *a.* hom'o-lo-graf'ik; 2 hom'o-lo-ĝrăf'ic. = Pressing the correspondence of parts; describing so as to be relatively proportional. [< HOMO- + Gr. *holos,* whole, + *graphō,* write.] —**homolographic projection,** any method by which the relative areas of different countries are accurately indicated in the maps or charts thereof.

hom'o-lo-gu'me-na, 1 hom'o-lo-gū'mi-nə; 2 hŏm'o-lo-ĝy'me-nə, *n. pl. Ch. Hist.* The generally accepted books of the New Testament; the protocanonical books: opposed to *antilegomena:* a name originated by Eusebius the historian. [< Gr. *homologoumena,* neut. pl. ppr. of *homologeō,* agree, < *homologos;* see HOMOLOGOUS.] **hom'o-lo-gou'me-nal‡.**

ho-mol'o-gy, 1 ho-mol'o-ji; 2 hō-mŏl'o-ĝy, *n.* 1. The state or quality of being homologous; correspondence. Specif.: *Biol.* The correspondence of a part or organ of one animal with a similar part or organ of another, determined by agreement in situation and development from a like primitive origin, as the fore leg of a quadruped, the wing of a bird, and the pectoral fin of a fish: distinguished from *analogy,* which indicates the resemblance in function between organs whose origin is unlike. Compare HOMOLOGOUS. 2. Serial homology; homotypy.

Although there is the closest *homology* of parts between the Sea-fish and the Sea-urchin, the arrangement of these parts, and the external appearance of the animals, as a whole, are entirely different. AGASSIZ *Seaside Studies* p. 108. [r. *a* r. 1895.]

3. *Geom.* The relation between two corresponding coplanar figures, which are of such a nature that corresponding points are collinear with a fixed point, known as the **center of homology,** and that corresponding lines intersect on a fixed line, known as the **axis of homology.** 4. *Chem.* Similarity of structure and properties in compounds of the same type or chemical series, in which each of the several members usually differs from the preceding by the addition of the same group of atoms: opposed to *heterology.* Thus, in the case of the paraffin series, CH_4, C_2H_6, C_3H_8, etc., there is *homology,* the common difference being CH_2. [< Gr. *homologia,* < *homologos;* see HOMOLOGOUS, and *-logy.*]—**homology** (*Biol.*), the higher relation in which a part or series of parts stands to the general type.—**genetic h.,** homology considered as due to descent from a common ancestor.—**meristic h.** (*Biol.*), the structural resemblance existing between the repeated parts of an organism, as that of the rays of a starfish. Compare SERIAL HOMOLOGY.—**serial h.** (*Biol.*), the relation of corresponding parts forming a series in the same individual or organism, as that of the leaves on a stem, of the vertebræ in a spinal column, etc.—**special h.** (*Biol.*), the correspondence of a part or organ determined by its relative position and connections with a part or organ in a different animal.—**hom'o-log'ic,** *a.* 1. *Geom.* Designating two figures so related that either may be the projection of the other upon a plane. 2. Relating to or governed by homology; corresponding in structure; homologous.—**hom'o-log'i-cal‡.**—**hom'o-log'i-cal-ly,** *adv.*—**ho-mol'o-gist,** *n.*

ho-mol'y-sin, *n.* See HEMOLYSIN.

ho-mom'a-lous, *a. Bot.* Having all the leaves or branches turned to one side. **ho-mom'al-lous‡.**—**ho-mom'er-al,** *a.* Alike in all respects: said of two or more things.—**ho'mo-met'ral,** *a.* Having the same meter.—**ho'mo-met'ri-cal-ly,** *adv.*

ho'mo-morph, 1 hō'mo-môrf; 2 hō'mo-môrf, *n.* A mark, sign, or character closely resembling another.

Characters substantially the same . . . *homorphs,* made by one set of people, have a different signification among others. *Fourth An. Rep. Bureau of Ethnol.* p. 239. [GOV. PRT. OFF. 1886.]

[< HOMO- + Gr. *morphē,* form.]

Ho'mo-mor'pha, 1 hō'mo-môr'fa; 2 hō'mo-môr'ĝa, *n. pl. Entom.* The *Hemimetabola.* [< HOMO- + Gr. *morphē,* form.]

ho'mo-mor'phic, 1 hō'mo-môr'fik; 2 hō'mo-môr'fic, *a.* 1. Homomorphous. 2. Hemimetabolic.—**homomorphic solids,** joints in which the opposed surfaces are equal and similar.

ho'mo-mor'phism, 1 hō'mo-môr'fizm; 2 hō'mo-môr'fişm, *n.* 1. *Biol.* Homomorphy. 2. *Zoöph.* Similarity of form among the component zooids of a zoophytic colony. 3. *Entom.* The exhibition of an imperfect metamorphosis.—**ho'mo-mor'phism-al,** *a.* Pertaining to fusion of perfect flowers of only one form or kind: opposed to *heterogony* or *heteromorphism.*

ho'mo-mor'pho-sis, 1 hō'mo-môr'fo-sis; 2 hō'mo-môr'fo-şis, *n. Biol.* Regeneration of a lost member, as the growth of a new tail in a newt.

ho'mo-mor'phous, 1 hō'mo-môr'fus; 2 hō'mo-môr'fŭs, *a. Biol.* Characterized by homomorphy.

ho'mo-mor'phy, 1 hō'mo-môr'fi; 2 hō'mo-môr'fy, *n.* 1. *Biol.* Representation by imitation or by mimotypes of different organisms, as of the dog by the marsupial thylacine. 2. *Bot.* The state of having the styles and stamens of the same length in the flowers, as in certain higher plants; homostyly: compare *heteromorphy.*

ho'mo-na-tal'o-in, 1 hō'mo-nə-tal'o-in; 2 hō'mo-nə-tăl'o-in, *n. Chem.* A colorless substance ($C_{11}H_{12}O_7$) occurring in aloin. [< HOMO- + *natal* + *-IN*, < ALOE.]

Ho'mo-ne'me-æ, *n. pl. Bot.* A former group of cryptogamous plants composed of filaments, as algæ and certain fungi.—**ho'mo-ne'mal,** *a.* Supplied by a nerve that belongs to but a single segment of the body: said of muscles.

Ho'mon-hon', 1 hō'mon-hon'; 2 hō'mŏn-hŏn', *n.* Same as MAHDI.

ho'mo-nol'a, 1 hō'mo-nol'ə; 2 hō'mo-nŏl'a, *n.* 1. The sharing of thoughts and sentiments. 2. A sentiment shared with another. 3. [E-] A Greek divinity, the analog of the Roman goddess Concordia, often represented on coins. [Gr., concord.]

ho-mon'o-mous, 1 ho-mon'o-mus; 2 ho-mŏn'o-mŭs, *a.* 1. Governed by the same laws: specif., in biology, having the same laws of growth: opposed to *heteronomous.* 2. Having equal taxonomic rank: said of the subspecies or varieties which make up certain species of mammals.—**ho-mon'o-my,** *n.* The state of being homonomous. 2. *Biol.* The relation to one another of those parts which are arranged along a transverse axis of the body.

hom'o-ny†, *n.* Same as HOMINY.

hom'o-nym, 1 hem'o-nim; 2 hŏm'o-nym (xiii), *n.* 1. A word agreeing in sound with but different in meaning from another; a homophone. 2. Homonymy. [< Gr. *homos* and *fare, read* and *reed.* Sometimes extended to words of like spelling but different pronunciation. See EQUIVOCAL.

That Chinese finds its nearest parallel, among inflected tongues, in the numerous *homonyms* . . . of our own English; for example, in our three different words tweet, meet, and meat). WHITNEY *Lang. and Study of Lang.* p. 385. [r. 1874.]

2. A term expressing distinct meanings, or designating different things; an ambiguous or equivocal term. 3. A namesake; one bearing the same name. 4. *Bot.* A name previously applied to another species of a group and consequently by the law of priority not capable of application to another member of the same group; thus, among butterflies, *Papilio daesdalus* is the name given to the Alaskan swallowtail. Were this name given inadvertently to another representative of the genus *Papilio,* it would be a *homonym* and would have to be changed. [< L. *homonymus,* < Gr. *homonymos,* < *homos,* same, + *onyma,* name.] **hom'o-nym'ic.**—**hom'o-nym'ic,** *a.* 1. Relating to or of the nature of a homonym. 2. *Mus.* Having the same distinguishing name, but differing in mode, as the major and minor keys of C, of G, etc. **hom'o-nym'i-cal‡.**—**ho-mon'y-mous,** *a.* 1. Of the nature of a homonym; of the same sound but a different sense; equivocal or ambiguous. 2. Indicated by the same name because occupying the same relation: opposed to *heteronymous.* 3. *Psychol.* Designating the disparate images of a farther point, when a nearer point is fixated, because the image which appears to the right is that of the right eye.—**homon'y-mous-ly,** *adv.*—**ho-mon'y-my,** *n.* The state or quality of being homonymous; identity of sound or name with diversity of sense; ambiguity.

ho'mo-om'er-ous, *a.* Same as HOMŒOMEROUS.—**ho'mo-or'gan,** *n. Biol.* A homoplast. **ho-mor'gani.**

ho'mo-ou'sia, 1 hō'mo-ū'sia; 2 hō'mo-ŭ'şi-ə, *n.* [Gr.] *Ch. Hist.* Identity of being or essence; consubstantiality.

Ho'mo-ou'sian, 1 hō'mo-ū'shan; 2 hō'mo-ŭ'shan (xiii), *n. Ch. Hist.* One of the Christians who, in the great controversy of the 4th century about the nature of Christ, maintained that it was identical with that of the Father, instead of similar, or different, as maintained by the Semi-Arians and rigid Arians respectively: distinguished from *Homoiousian* and *Heterousian.* [< Gr. *homoousios,* < *homos,* same, + *ousia;* see HOMOIOUSIAN.]

Ho'mo-ou'sian-ism,) **Ho'mo-ou'si-an-ism,** *n.* —**Ho'mo-ou'sian,** *a.* 1. Pertaining to the Homoousians or their belief. 2. [*h-*] Identical in nature. **ho'mo-ou'si-ous‡.**—**Ho'mo-ou'sian-ism,** *n.* The tenets and teachings of the Homoousians.—**ho'mo-ou'sic,** *n.* [Rare.] Homoousia.

ho'mo-par'the-no-gen'e-sis, *n.* The parthenogenetic production of one sex only: opposed to *heteroparthenogenesis.*—**ho-mop'a-thy,** *n.* [Rare.] Fellow-feeling; sympathy.—**ho'mo-pe'ri-od'ic,** *a.* Alike in their periods.—**ho'mo-pet'a-lous,** *a. Bot.* Having all the petals or florets alike.—**hom'o-phene,** *n.* Any one of a group of words in the pronunciation of which the visible vocal organs take the same position; any one of several words that can not be discriminated by a deaf person in speech-reading. See *bam, pam, man.*—**ho-moph'e-nous,** *a.* In speech-reading, having the same visible movement of the vocal organs: said of words like *bat, mat, pat.*

hom'o-phone, 1 hom'o-fōn; 2 hŏm'o-fōn, *n.* 1. A homonym.

Homophones, (multivocals) identical to the ear only; as ail and ale, air and heir, all and awl, etc. FITZEDWARD HALL *Modern English* p. 170. [s. 1873.]

2. *Philol.* A letter or character of the same sound with another.

There are . . . in Chinese a large number of *homophones;* that is, the same character has to do duty for several wholly different words. *I. Taylor The Alphabet* vol. II, p. 39. [r. *a* r. 1883.]

3. Homophony. [< Gr. *homophōnos,* < *homos,* same, + *phōnē,* sound.]

homoph'o-nous, 1 ho-mof'o-nus; 2 hō-mŏf'o-nŭs, *a.* 1. *Philol.* (1) Identical in sound, but unlike in sense. (2) Representing the same sound or word with another letter, character, or symbol. 2. *Mus.* (1) *Anc. Mus.* Being in unison: opposed to *antiphonal.* (2) *Mod. Mus.* Having one principal part or melody, the other parts remaining subordinate and serving as accompaniment: opposed to *polyphonic.*—**hom'o-phon'ic‡.**

homoph'o-ny, 1 ho-mof'o-ni; 2 hō-mŏf'o-ny, *n.* 1. Identity of sound, with difference of meaning. 2. *Mus.* (1) *Anc. Mus.* Sameness of sound; unison: opposed to *antiphony.* (2) *Mod. Mus.* The condition or quality of being single-voiced or homophonous: opposed to *polyphony.*

ho'mo-phy-ad'ic, *a. Bot.* Having only one kind of stem, as certain species of horsetail (*Equisetum*).—**ho-moph'y-ly,** *n. Biol.* Homology determined by phylogeny or a common ancestry: opposed to *homomorphy.*—**ho-moph'y-lic,** *a.*

ho'mo-phyl'lous, *a.* Having the leaves all of one kind.

ho'mo-plas'my, 1 hō'mo-plaz'mi; 2 hō'mo-plăş'my, *n. Biol.* Homomorphy also, homoplasy. [< HOMO- + Gr. *plasma,* thing formed.]

ho'mo-plast, 1 hō'mo-plast; 2 hō'mo-plăst, *n. Biol.* An organ or part characterized by homoplasy. [< HOMO- + Gr. *plastos,* formed, < *plassō,* form.]

ho'mo-plas'tic, 1 hō'mo-plas'tik; 2 hō'mo-plăs'tic, *a.* Of, pertaining to, or characterized by homoplasy. **ho'mo-plas'mic‡.**

ho'mo-plas'tid, 1 hō'mo-plas'tid; 2 hō'mo-plăs'tid, *a. & n.* Composed of many cells identical in structure: opposed to *heteroplastid* and *monoplastid.*

homo-plas'ty, 1 hō'mo-plas'ti; 2 hō'mo-plăs'ty, *n. Biol.* The formation of tissues of the same general type.

ho-mop'la-sy, 1 ho-mop'la-si; 2 hō-mŏp'la-sy, *n. Biol.* A resemblance, not traceable to homogeny, in the forms of parts, as the fore legs compared with the hind legs, or the right ventricle of a bird's heart and that of a mammal. LANKESTER in *Annals and Magazine of Nat. Hist.* fourth series, July, 1870, p. 30. [< HOMO- + Gr. *plasis,* forming.] **ho-mop'la-sis‡.**

hom'o-plat', n. Same as OMOPLATE.—**ho'mo-pol'ar,** *a. Biol.* Having equal polarity.—**ho'mo-pol'a-ri-ty,** *n.* Unipolar. **ho'mo-pol'ic.**—**ho-mop'ro-tal,** *a. Spong.* Having equal prore, as a spicule.

ho-mop'ter-a, 1 ho-mop'ter-ə; 2 hō-mŏp'ter-a, *n. pl. Entom.* A suborder of hemipterous insects with the cheeks generally hollowed out to receive the *coxæ* of the fore legs and the wings, when present, not differentiated into regions and of uniform thickness throughout: including some of the most destructive as well as some of the most beneficial of insects, among which are the cicadas, leaf-hoppers and tree-hoppers, lantern-flies, spittle-insects, plant-lice, scale-insects, etc. A few of the latter furnish wax and other useful materials, as cochineal, lac, etc. See LOCUST. [< Gr. *homopteros,* with same plumage, < *homos,* same, + *pteron,* wing.]—**ho-mop'ter,** *n.*—**ho-mop'ter-an,** *n.*—**ho-mop'ter-on,** *n.*—**homop'ter-ous,** *a.*

ho'mo-pyr'rol, *n. Chem.* A basic substance ($CH_2C_4H_4NH$) formed in the distillation of bones.—**ho'mo-quin'in(es,** *n. Chem.* A white crystalline alkaloid ($C_8H_{13}N_2O$) contained in cinchonamin.—**ho'mo-rhab'dic,** *a.* Relating to a homorgan. 2. *Phon.* Articulated by the same vocal organs.—**ho'mo-rhab'dic,** *a.* Having the filaments of equal size: said of gills of mollusks.

Ho'mo-ro'ka, 1 hō'mo-rō'ka; 2 hō'mo-rō'ka, *n. Babylon. Myth.* Same as MARDUK.

ho'mo-ros-an'i-lin, *n. Chem.* A homolog of ROSANILIN.—**ho'mo-sal'i-cyl'ic,** *a. Chem.* Pertaining or relating to **ho'mo-sels'mal.** *I. a.* Pertaining to the coseismal line. **ho'mo-sels'mic.** **II.** *n.* The coseismal line. See under SEISMAL.—**ho'mo-sex'u-al,** *a.* Having the sexes represented by members of the same sex; or pertaining to such attraction.—**ho'mo-sex'u-al'i-ty,** *n.*—**ho'mos'po-rous,** *a. Bot.* Having or producing asexual spores of one kind only: isosporous: opposed to *heterosporous.*—**ho-mos'po-ry,** *n.*—**ho'mo-stat'ral,** *a. Biol.* Having a regular polygon as the base of a pyramidal figure, as in certain *Staurozoa:* opposed to *heterostatral.*—**ho-mos'ter-al,** *a. Biol.* Having a series of very large, broad, heavily armored Devonian fishes of the arthrodiran family *Coccosteidæ,* with covered orbits and narrow, toothless jaws.—**ho'mo-style'd,** *a. Bot.* Same as HOMOGONOUS.—**ho'mo-sty'lic‡; ho'mo-sty'lous‡.**—**ho-mos'ty-ly,** *n.* Same as HOMOGONY.—**ho'mo-sty'lism‡.**—**ho'mo-sys-tem'ic,** *a. Biol.* Derived from the embryonic layers and systems into which the secondary unit (gastrula or plant-embryo) differentiates, as a multicellular organism.—**ho'mo-tac'tic,** *a. Mech.* Pertaining or belonging to a homogeneous stress. [Cr.]

ho'mo-tax'is, 1 hō'mo-taks'is; 2 hō'mo-tăks'is, *n.* Classification in the same category; specif., in geology, the assignment to the same period in the life-history of the world of those groups of strata exhibiting the same general faunal characteristics, however widely separated from one another.

The term *homotaxis* was proposed by Huxley to express the idea that the general sequence of life had been the same in each region, without implying that the same stage of development was everywhere synchronous.

Amer. Geologist *Parish's Geology* bk. v, p. 338. [Macm. '03.]

[< Homo- + Gr. *taxis*, arrangement, < *tassō*, draw up.] **ho-mo-tax'a-ne?** **ho'mo-tax'y-l.** **-tax'ic-tous,** **ho'mo-tax'e-ous,** **ho'mo-tax'al** or **ho'mo-tax-ic,** *a.* —**ho'mo-tax'al-al-ly,** *adv.*

ho-mot'e-nous, *a. Entom.* Incomplete in metamorphosis.

—**ho'mo-ther'a-py,** *n. Med.* Same as Homeopathy.—**ho'mo-ther'mous,** *a.* Having the same amount of animal heat. **ho'mo-ther'mic,** —**ho'mo-ther'ic,** *a. Geom.* Designating two similar plane figures so located that all lines through homologous points pass through the same point. See Similitude.—**ho-moth'e-ty,** *n.*—**ho-mot'o-nous,** *a.* Having the same sound or tone; having uniform in degree; equable; of the same tenor.—**ho-mot'o-nus,** *n. Med.* A continuous or equable fever; fever without exacerbations. **ho'mo-ton'ic?.**—**ho-mot'o-ny,** *n.* [Rare.] Sameness of tone; monotony.

ho-mot'o-py, 1 ho-mot'o-pi; 2 ho-mŏt'o-py, *n. Biol.* Repetition in ontogenetic sequence of changes in an organism at the same place in the offspring as they appeared in the parent.

Homotopy or repetition is the usual and normal mode of acceleration. E. D. Cope in *American Naturalist* Jan., 1878, p. 43.

[< Homo- + Gr. *topos*, place.]—**ho'mo-top'ic,** *a.*

ho-mot'ro-phy, *n. Biol.* Correlation of growth or serial homology due to internal modifying influences, as in the case of the eyes and ears.—**ho-mo-trop'ic,** *a.*—**ho'mo-trop'ic,** **ho-mot'ro-pous,** *a.* Turned or directed in the same way as something else. Specif.: *Bot.* (1) Having the radicle of a seed turned toward the hilum. (2) Having the embryo of a seed curved in the same general direction as the seed. **ho-mot'ro-pal?.**

ho'mo-type, 1 hō'mo-tip; 2 hō'mo-typ, *n. Biol.* **1.** A part or organ similar in structure, position, relationship, or opposite one in the same animal as one of the legs.

The corresponding or serially homologous parts in the same animal are called *homotypes*.

McCost *Typical Forms* bk. i, p. 25. [con. & co. 1856.]

2. A homœotype. [< Homo- + Gr. *typos*; see type.]

ho'mo-typ'ic, *a.* 1. Homotypical. 2. *Cytol.* Relating to the second nuclear division in which chromosomes so called because closely resembling ordinary mitosis.—**ho'mo-typ'i-cal,** *a. Of*, pertaining to, or characterized by homotypy. **ho'mo-ty'pal?.**—**ho'mo-ty-po'sis,** *n. Biol.* Correlation in homosexual reproduction, as the union of homologous undifferentiated physiologically independent parts.

ho'mo-ty'py, 1 hō'mo-ti'pi; 2 hō'mo-ty'py, *n. Biol.* The correspondence of a part or organ in one person with that of another region in the same animal, as the successive vertebræ, fore and hind limbs, etc.; serial homology. Isian, etc.

ho'mo-zy'gos, 1 hō'mo-zi'gŏs; 2 hō'mo-zy'gŏs, *n.* Same as homozygote.—**ho'mo-zy-go'sis,** 1 hō'mo-zai-gō'sis; 2 hō'mo-zy-gō'sis, *n. Bot.* Development from a zygote originating from a union of two gametes of the same kind.

ho'mo-zy'gote, 1 hō'mo-zi-gōt'-zai'gōt; 2 hō'mo-zy'gōt'or -zy'gŏt, *n. Biol.* A zygote formed by the conjugation of two gametes of the same stock; any animal or plant that receives and remains the dominant or recessive characteristics of both its parents, and is therefore said to be true to type, and breeds true to type. [< Homo- + zygote.]—**ho'mo-zy'gous,** *a.*

hon'ral, 1 hŏn'ral; 2 hŏn'r‡l, *n.* A horrible (*Dichoceros bicornis*) native to India and the Malay archipelago, having a large hollowed casque double-pointed in front. See illus. under Hornbill. [Anglo-Ind.]

Hons, *h.* hōns; *p.* hōnz, *n.* A manufacturing town in Syria, scene of the defeat of Zenobia by Aurelian, A. D. 272.

ho-mun'cu-lus, 1 hō-mun'kiu-lus; 2 ho-mŭn'cŭ-lus, *n.* [*pl.* -li, 1 -lai; 2 -lī, pl.] A little man; a homunculus, a tiny man produced artificially, and hence endowed with magic power.

A poor *homunculus*, in a glass bottle.

Longfellow *Hyperion* bk. i, p. 26. [h. m. & co. 1882.]

2. An undersized man; dwarf; mannikin. [L., dim. of *homo* (*homin-*), man.] **ho-mun'cu-ŏ;** **ho'mun-cle** or **ho'mun-cule.**—**ho'mun-cu-lar,** *a.* Like a homunculus.

hom'y, 1 hōm'i; 2 hōm'y, *a.* [Rare.] Homelike.

Hon., *abbr.* Honorable: honorary.

Ho'nan, 1 hō'nân'; 2 hō' nân', *n.* **1.** A province in N. China, 65,104 sq. m.; capital, Kaifoo. **2.** A famous temple of Buddha, on an island near Canton, China.

Ho'na-war', 1 hō'na-wār'; 2 hō'na-wär', *n.* A seaport in N. Canara, India.

honble., *abbr.* Honorable.

hon'd, *abbr.* Honored.

Hon'do-koe'ter, 1 hon'da-kū'ter; 2 hŏn'de-kū'ter, **Melchior** (1636–41695). A Flemish painter of animal life.

Hon'dī-us, 1 hon'di-us; 2 hŏn'dĭ-us, **Abraham** (1638–1691?). A Dutch painter and engraver, **Jodocus'** son.

hon'do', 1 hon'do; 2 hŏn'do, *n.* [Sp. Am.] The slip-knot of a lasso. **hon'doat.**

Hon'do, The largest island of Japan; length 900 m.; 87,486 sq. m.: chief city, Tokyo. **Hon-shu'?.**

Hon'do Creek. A stream in Bandera and Frio counties, **Tex.**; 100 m. to the Rio Medina.

Hon-du'ras, 1 hon-dū'ras; 2 hŏn-dų'ras, *n.* **1. Bay of,** an inlet of Guatemala and Honduras, Central America. **2. Cape,** the most northern point of Honduras, Central America. **3.** A republic in Central America; 46,250 sq. m.; capital, Tegucigalpa. **4.** See British Honduras.

hone, 1 hōn; 2 hŏn, *vt.* (honed; hon'ing.) To rub and sharpen on a hone; whet.

hone, *pt. & vt.* (honed; hon'ing.) [Prov. Eng. & So. U. S.] To pine: long for. [< F. *hoper*, mutter.]

hone'-. Dedp. [< AS. *hān*, stone.]—**German hone,** a soft, smooth, yellow slate specially adapted for razor-setting. **hone'-slate',** *n.*—**hone'-sharpening,** *adj.* and *n.* Honing.

hone?, *n.* **1.** A plane true block of fine compact stone for sharpening edged tools; oilstone. **2.** An artificial razor-sharpening implement having the functions of a hone.

3. An implement, in shape like a flat float, used for smoothing and leveling rounds. [Prov. Eng.] A piece of stale bread. [< AS. *hān*, stone.]—**German hone,** a soft, smooth, yellow slate specially adapted for razor-setting. **hone'-slate',** *n.*—**hone'-sharpening,** *adj.* and *n.* Honing.

Hon'e-oye Falls, 1 hun'i-oi; 2 hŏn'ē-ŏy. A village in Monroe county, N. Y. [county, Pop.: a coal-mining center.

Hones'dale, 1 hōnz'dēl; 2 hōnz'dāl, *n.* A borough of Wayne

hon'est, 1 on'est; 2 ŏn'ĕst, *a.* **1.** Acting or disposed to act justly and honorably, especially in business transactions or in relation to the rights of property; fair and candid in dealing with others; willing to commit or countenance fraud; upright; also, specifically of women, having a chaste reputation; virtuous.

But, sir, is it not possible that we may differ in sentiment and yet be *honest*? Randolph in *Am. Orators, Federal Constitution* p. 38. [c. n. & h. 1868.]

2. Characterized by or indicative of honesty and fair dealing; free from fraud; equitable; fair; honest, real; true; as an *honest* sale; *honest* toil. **3.** Of respectable quality or appearance; honorable in aspect or effect; creditable; becoming; unstained or unimpeached; as, a man of *honest* report. **4.** Characterized by openness, genuineness, or sincerity; frank; unaffected; sincere; as, an *honest* confession; an *honest* opponent. **5†.** [F.] Becoming to persons of rank. [< OF. *honeste*, F. *honnête*, < L. *honestus*, full of honor, < *honor*, honor.] **hon'este?.**

Syn.: candid, equitable, fair, faithful, frank, genuine, good, honorable, ingenuous, sincere, straightforward, true, trustworthy, trusty, upright. One who is *honest* in the ordinary sense acts or is always disposed to act with careful regard for the rights of others, especially in matters of business or property; one who is *honorable* scrupulously observes the dictates of a personal honor that is higher than any demands of mercantile law or public opinion, and will do nothing unworthy of his own inherent nobility of soul. The *honest* man does not attempt to deceive or defraud; the *honorable* man does not take an unfair advantage that would be allowed him, or will make a sacrifice which no one could require of him, when his own sense of honor dictates it. One who is *honest* in the highest and fullest sense is scrupulously careful to adhere to all known truth and right even in thought. In this sense *honest* differs from *honorable* in regard rather to objective truth and right than to even the highest personal honor. See candid; just; honor.—Ant.: deceitful, dishonest, disingenuous, faithless, false, hypocritical, lying, mendacious, perfidious, treacherous, unfaithful, untrue, dishonest.

hon-es'tate?, *vt.* To honor.—**hon'es-ta'tion?,** *n.* Grace; **hon'est-ly,** 1 on'est-li; 2 ŏn'ĕst-ly, *adv.* **1.** In an honest manner.

Truth . . . is always found where it is *honestly* sought.

Johnson *Rasselas* p. 38. [s. m. 1880.]

2†. Properly,—to come honestly by, to inherit from one's ancestors, as a feature or characteristic.

hon'es-ty, 1 on'es-ti; 2 ŏn'ĕs-ty, *n.* **1.** The character or quality of being honest. (1) A disposition to conform to justice and honorable dealing, especially in regard to the rights of property.

It is true that *honesty* is the best policy; but if this be the motive of honest dealing, there is no real *honesty*.

Hamerton *Round My Country* p. 206. [s. & t. co.]

(2) Uprightness of conduct in general; justice; fairness.

The basis of high thinking is perfect *honesty*.

Hamerton *Round My Country* p. 206. [s. rs. bros. 1875.]

(3) Openness; candor. (4) Specif. of women, chastity; virtue.

2. An ornamental garden plant (*Lunaria biennis*) of the mustard family, prized mainly for the broad, silvery partitions of its flat pods. Called also **satin flower** (*L. rediviva*) is called **perennial honesty.** **3†.** Propriety; reputation. **4†.** Generosity. [< OF. *honeste*, < L. *honestā(s)*-s, *honestus*; see honest, *a.*] Syn.: see fidelity.

hone'wort', 1 hōn'wŭrt; 2 hŏn'wŭrt', *n.* A plant reputed to be efficacious in curing the swelling called a hone. (1) A smooth perennial herb (*Cryptotænia canadensis*) of the parsley family, found in moist woods in the United States. (2) Either of two Old World species of plants of the parsley family, *Sison amomum* and *Trinia vulgaris*.

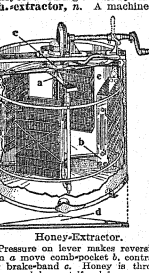
honey, 1 hun'i; 2 hŭn'y, *n.* **1.** *t.* To talk to in an endearing manner; to flatter; to coax; treat with address as a darling or precious one. **II.** *i.* [Rare.] **1.** To talk fondly. **2.** To become sweet or bland.

Discard his tutor, rough to common men,
But *honeying* at the ear of a lord.

Tennyson *Princess* prol., st. 6.

hon'ey, *a.* Honey-like; sweet.

hon'ey, *n.* **1.** A sweet, sirupy secretion derived principally from the nectaries of flowers, from which it is extracted by bees in the form of nectar and deposited in their honey-sacs, where it undergoes a certain change prior to storage in the cells of the comb. With nutriment it provides the support of bees and their young. See royal jelly. Honey is used in medicine and in the arts, and is sometimes as article of food in the form of comb, animals, as bears. It consists of various sugars, as grape-sugar, glucose, fructose, etc., together with a little water, about 18 per cent., and a specially digested and assimilated than cane-sugar. Honey is flavored by the flowers from which the nectar is gathered; white honey, derived from clover, is considered the choicest; other grades are bass-wood, light amber, goldenrod, dark amber, and buckwheat honey, the latter very dark and strongly flavored. Cane-sugar stored in the comb is unchanged by the process. The meaning of the word is often extended, as in *flower-nectar*, *honeydew*, and *ant-honey*. See honey-ant, etc.



The following are kinds of honey distinguished in trade use: **bean-,** (a mixture of honey and sugar); **grape-,** (glycerin, and 480 grains clarified honey: used in medicine), **box-h.** (stored in boxes), **candied h.** (solidified honey), **capped h.** (sealed in the cells), **extract-,** (extract of scum, and strained), **comb-h.** (in a natural state), **green or unripe,** (in unsealed cells, and but little changed by evaporation), **ripe h.** (that has become sufficiently thick by evaporation).

The value of the annual product of honey and wax is not generally realized. . . . It almost equals the value of the rice or the hop crop, falls but little short of the buckwheat crop, exceeds the value of raw molasses, and of both the maple sirup and sugar.

J. R. Dodge in *Rep. Sec. Agric., 1889* p. 240. [gov. prc. off.]

2. Sweetness or lusciousness in general. **3.** Sweet one; dearest person; darling. **4.** *pl.* Honey-dew. **5.** *pl.* Honey-sacs.—**date'-hon'ey,** *n.* The sugary juice of the Khar and other dates, which the Arabs drain off by hanging up the fruit in baskets and allowing it to drip.—**honey-bag,** *n.* The honey thrown from the comb by centrifugal force or by gravity.—**hon'ey-ant',** *n.* A small ant (genus *Myrmecocystus*), as *Myrmecocystus melliger* of the United States and Mexico, having one form of worker with repletives and stores in its abdomen the honey gathered by the other workers. This honey is afterward disgorged to feed the rest.—**h.-bag,** *n.* The receptacle or dilatation of the esophagus in which the bee carries honey. **h.-sac.**—**h.-balls,** *n. pl.* The spherical flower-heads of the button-bush (*Cephalanthus occidentalis*).—**h.-balm,** *n.* A European plant (*Melittis melissophyllum*) of the mint family (*Labiatæ*), with showy flowers.—**h.-basket,** *n.* The corbiculum of a bee. [Cf. **h.-bear,** *n.* **1.** The sloth-bear or aswail. **2.** The kinkajou.—**h.-bearer,** *n.* The honey-storing honey-ant. See honey-ant. **h.-holder?.**—**h.-bee,** *n.* A bee that collects honey; specif., the common hive-bee (*Apis mellifica*). hor"i-zon'tal, 1 hor'i-zon'tel; 2 hŏr'i-zŏn'tal, *a.* **1.** In the direction of or parallel to the horizon; on a level.

The parallel lines in Greek architecture were *horizontal* and not vertical. J. B. DE FORREST *Short Hist. Art* p. 61. [D. M. & CO.]

2. Included or measured in a plane of the horizon; as, *horizontal* distance. **3.** Of, pertaining to, on, or close to the horizon. **4.** *Bot.* Extending at right angles to the primary axis, as leaves.

SYN.: flat, level, plain, plane. For practical purposes *level* and *horizontal* are identical, the *level* being more popular and generally used, in naturally more loosely used of that which has no especially noticeable elevations or inequalities; as, a *level* road. *Flat*, according to its derivation from the Anglo-Saxon *flet*, a floor, applies to a surface only, and, in the first and most usual sense, to a surface that is *horizontal* or *level* in all directions; a line may be *level*, a floor is *flat*; *flat* is also applied in a derived sense to any *plane* surface without irregularities or elevations, as a picture may be painted on the *flat* surface of a perpendicular wall. *Plane* applies only to a surface, and is used with more mathematical exactness than *flat*. The adjective *plain*, originally the same word as *plane*, is now rarely used except in the derived senses, but the original sense appears in the noun, as we speak of a wide *plain*. See FLAT; LEVEL.

— **horizontal bar,** a smooth cross-bar, usually round, supported a few feet from the ground or floor between upright posts and used for gymnastic purposes.— **h. line, h. plane,** see PERSPECTIVE.— **h. range,** the distance, measured horizontally, to which a gun is pointed at any elevation, will send a projectile.— **hor"i-zon-tal'i-ty,** *n.* The character, quality, or state of being horizontal.— **hor"i-zon'tal-i-za'tion,** *n. Cranium.* The act of placing a skull in an exactly *horizontal* position.— **hor"i-zon'tal-ize,** *v.* [-IZED; -IZING.] To place in a horizontal position.— **hor"i-zon'tal-ly,** *adv.* In a horizontal manner or direction.

hor"i-zon'tal, *n.* **1.** *Cranium.* A line or plane assumed, for the purposes of setting a skull or for reference in drawing it, to be parallel with the *horizon*. Several are used. See CRANIOMETRY. **2.** A tall shrub or tree (*Anodopetalum biglandulosum*) of the family *Saxifragaceæ*, occurring in the western forests of Tasmania. The main stem after reaching a certain height assumes a horizontal or drooping position, from which the branches ascend, become *horizontal*, and the secondary branches likewise, thus forming an impenetrable thicket known as **horizontal scrub.**

hor"i-zon'tal-ism, 1 hor'i-zon'tel-izm; 2 hŏr'i-zŏn'tel-ĭzm, *n.* The character of being horizontal; horizontal extension.

It was evident that the accumulations [of fuel had less variety of configuration as they neared the coast, that their slopes became less sudden, their *horizontalism* more diffused.

horse†, *a.* Hoarse. CHAUCER *Dr.* l. 347.

horse, *n.* [In the plural, commonly, HORSES; but sometimes, collectively, HORSE. See def. 4, and quot. below.] **1.** A solid-hoofed and odd-toed quadruped (*Equus caballus*), varying much in size, color, speed, etc., and having horny patches on the fore legs, on the inside of both pairs of legs (above the knee and below the hock), a mane and tail of long coarse hair (which distinguish it from other species of the *Equidæ,* as the asses and zebras), and relatively small ears and head. The speed of the horse is provided for by the angles formed by the different segments of the limbs and the length of the latter, and the lightness and agility of the movements by the slender (the third digit), which is encased in a greatly developed nail or hoof. The excessive elongation of the metacarpus and metatarsus causes the wrist and heel to be at the knee and hock respectively. See *fetlock* and *hoof.* The adult dentition both above and below is 6 incisors, 2 canines (commonly absent in the mare), 6 premolars, and 6 molars. A fold in the enamel of the incisors of the lower jaw produces a deep cavity, which, becoming filled with particles of food, acquires a dark color. The change in the form and the eventual disappearance (in advance of the teeth proper) of these marks are used to determine the age of a horse. The wild horses of America and Australia are descendants of domesticated horses run wild. The true wild horse has been described by Prof. H. F. Osborn as small and coated with thick dull-brown hair and a woolly under covering for winter protection.

The northern Pacific Railroad *horse* was only ten hands high, probably a result of the dwarfing effects of the severe climate. It was too small as animal to be ridden. It was certainly not very different in appearances from the only true wild *horse* which now survives in the world, and was possibly the same stock. This is Przewalsky's *horse,* of the desert of Dsungaria, which was discovered by Polakoff in 1881, and demonstrated beyond a doubt to be distinct from the wild ass of northern Asia and the Mongolian pony. H. F. OSBORN in Ernest Ingersoll's *The Life of Mammals* p. 360. [Macm. '07.]

The horse is sometimes designated (1) as a **colt,** in distinguishing the young male horse from the young female or

filly; (2) as a **foal,** which may be either colt or filly, and (3) also as a **gelding, mare,** or **stallion.** See these words. For the movements of the horse, see plate at MOVEMENT.

Fossil remains of the horse have been found in the Eocene, Pliocene, and Miocene periods of Europe and America, but the most remarkable were discovered in the Quaternary and Tertiary of North America. These demonstrate the changes from the four-toed to the present single-toed foot. **2.** One of the *Equidæ*, or a mammal related to or supposed to be of the ancestral line of the *Equidæ*. **3.** The male of the horse, especially when castrated. **4.** Cavalry.

GREEN *Short Hist. Eng. People* p. 93. [S. 1875.]

horse'-pow'er, 1 hôrs'-pou'er; 2 hôrs'-pŏw'ẽr, *n.* 1. A standard theoretical unit of the rate of work, equal to 33,000 pounds lifted one foot high in one minute: obtained by Boulton and Watt from observation of the strong dray-horses working eight hours a day at the breweries of Cornwall used by them to illustrate the power of their steam-engines. They found that the average horse was able to work continuously on a whim-gin at the rate of 32,000 foot-pounds per minute. They arbitrarily increased this amount by one-half, and this has been the standard ever since.
2. The power of a motor, steam-engine, or other source of energy, expressed in such units. 3. [U. S.] An arbitrary unit of comparison for steam-boilers, as adopted by the Centennial Commission in 1873, equivalent to the evaporation of 30 pounds of water per hour, when the temperature of the feed-water is 100° F. and the steam-pressure, as registered by the gage, is 70 pounds to the square inch. In general, the horse-power of a boiler is an expression for the volume and pressure of steam required to efficiently supply an engine of the same indicated horse-power. It is determined by the grate area and the heating surface, which supply the evaporative capacity to produce the steam required. 4. A mechanical arrangement for converting the weight or pull of a horse into power that may be used in running machinery.— **actual horse-power**, the horse-power really developed, as proved by trial.— **brake h.-p.**, the net horse-power shown by a friction-brake. It is calculated from (1) the force exerted on such brake or on an absorption dynamometer acting on the rim of the fly-wheel or brake-wheel, and (2) the distance or radius of the rim, and (3) the number of revolutions per minute of the fly-wheel or brake-wheel.— **effective h.-p.** (*Naval Arch.*), the horse-power available to propel a vessel through the water after the power sustained by the friction of the engines, etc., have been deducted.— **electric h.-p.** 1. The horse-power (see def. 1) as unit of rate of electrical energy. 2. Specifically, 746 watts. The rate of doing any electric work expressed in such units.— **French h.-p., or metric h.-p.**, 4,500 kilogrammeters a minute: equivalent to 32,549 foot-pounds a minute, or about .985 of an ordinary horse-power.— **gross h.-p.**, the theoretical horse-power of a motor, including that required to overcome its own friction, as distinguished from *net horse-power*.— **h. equivalent**, the amount of electricity that will do work at the rate of one horse-power during an hour.— **h.-p. of water**, the Indian government term for horse-power developed by falling water. It often calculates it as 8 cubic feet per second with a head of one foot gives one horse-power of water.— **indicated h.-p.**, that horse-power developed in the cylinder or cylinders of a steam-, gas, or petroleum-engine, as calculated from indicator-diagrams, as distinguished both from that which is measured by a dynamometer and from nominal horse-power. It is calculated from (1) the average pressure of the working fluid, as shown by the indicator-diagrams: (2) the area of the piston; (3) the stroke; (4) the number of working strokes per minute.— **net h.-p.**, that horse-power which a motor develops less the power required to overcome its own friction.— **nominal h.-p.**, the horse-power calculated by a conventional and usually incorrect method of rating, as that based on the area of the piston or other measurements of the cylinder.

horse'rad'ish, 1 hôrs'rad'ish; 2 hôrs'răd'ĭsh, *n.* A common garden herb (*Koripa armoracia*) of the family *Brassicaceæ*, with large, oblong root-leaves introduced into the United States from Europe and cultivated for the root, which is used as a condiment and also medicinally.— **horse'rad'ish-tree'**, *n.* 1. An East-Indian tree (*Moringa pterygosperma*) whose root has a flavor of horseradish, and is used in medicine. From the fruit, which is marketed as an article of food, is obtained the oil of ben. 2. Any tree of the genus *Codonocarpus*, found in Australia, especially *C. cotinifolius*. Its leaves have a pungent taste.

horse'rough', **h.-scurge**, et. See under HORSE, *n.*

horse'shoe', 1 hôrs'shō'; 2 hôrs'shōō', *v.* To furnish with horseshoes. 2. To make in the form of a horseshoe, as a balcony.

horse'shoe', *n.* 1. A metal shoe for a horse, U-shaped like the edge of a hoof, to which it is nailed. 2. *Naut.* According to an old superstition, horseshoes have the power of protecting against witches; hence the shape is often used in decorations, etc. 2. Something rough. Ludwigton's bend in a river or curve in a railroad, especially if the opening is narrower than the sweep of the curve.
The golden *horseshoe* of the moon . . . Waned in the west.
EDGAR ALLAN POE *Pæans of the Pacific* poem xcii, st. 3.

3. A king-crab or limulus; horse-crab.
Here we seized a live *horseshoe* by the tail, and counted the many changes of color which passed over it.
H. WARNER *Tweed-Vale Tales, Footprints on the Seashore* in vol. ii, p. 121. [C. & P. 1865.]

4. *Naut.* (1) An iron plate by means of which the keel is inverted to the stern of the vessel. (2) An iron plate closing the rudder-port. (3) An iron strap used to secure the gripe to the stem.

— horse'-shoe'a'n'vil, *n.* An anvil corresponding in shape and size to a horse's hoof, with shanks facilitating the adjustment of the hoof in a socket-hole.— **h. bat**, an Old World rhinolophoid bat having the nose-leaf horseshoe-shaped.— **h. crab**, the king-crab.— **h. fern**, same as POLYPODIUM.— **h. finch**, same as SHOEBURY.— **h. kidney**, an infantile skull in which the coronal suture, widely open, has somewhat the form of a horseshoe.— **h.-kidney**, *n.* Same as horseshoe-kidney.— **h. lizard**, the iguana.— **h. nail**, a wrought-iron nail for fastening a shoe to a horse's hoof.— **h. snake**, a colubrine snake (*Zamenis hippocrepis*) of Spain and Morocco, with a dark pale-edged horseshoe-shaped patch.— **h. splice**, a splice in which the rope is formed by the joining of the ends of one rope to the body of another.— **h. vetch**, a European plant (*Hippocrepis comosa*) of the family, taking its name from the form of its pod, cultivated in Great Britain for its yellow flowers.— **horse'-shoe'ing**, *n.* The act or art of shoeing horses.— **horse'-shoe'er**, *n.* One who shoes horses.

Horse'shoe Falls. See NIAGARA. [13,912 ft. high.

Horse'shoe Moun'tain. A peak in Park Range, Colorado; 13,912 ft. high.

horse'tail', 1 hôrs'tel'; 2 hôrs'tāl', *n.* 1. The tail of a horse, especially when severed from the body and used as a distinction of rank or as a standard. In Turkey the Sultan is preceded by seven horsetails and the Grand Vizier by five.
The tall sedge plumes that the horsetails have spread,

hum'ming, *n.* A murmuring or buzzing sound.

hum'ming-bird", 1 hum'iŋ-bȯrd"; 2 hŭm'ing-bŭrd', *n.*

1. An American trochiloid bird, related to the swifts, small, having long, slender bill, extensile tongue, weak legs, and narrow pointed wings with very short secondaries. The plumage of the various species exhibits a wonderful variety of form and color, in crests, neck- and leg-tufts, etc., and in remarkable tail development. That of the males is, as a rule, far more varied and metallically lustrous than that of the females, thus furnishing a marked instance in support of the theory of sexual selection. The brilliance exhibited by their throat-gorgets, crowns, and leveled tufts, etc., is due to the interference of light caused by the infinitesimal scales on the surface of the feathers, an effect noted in the wing of the butterfly. Humming-birds are noted for the humming sound made by the rapid vibration of their wings when hovering over flowers. They feed mostly on insects and the sweets of flowers. Their nests are formed of shreds of grass and other soft substances, and are protected and made practically invisible by a coating of lichen or other material harmonizing with the surroundings. The eggs are always two in number and pure white; the tiny parents are fearless and very pugnacious in protecting them. They have no song, their only vocal utterances being squeaks of rage or fear. The family consists of about 390 species, all American, and for the most part tropical. The common humming-bird of the eastern United States is the ruby throat (*Trochilus colubris*).

2. Improperly, an Old World sunbird or nectariniid.

—broad-tailed humming-bird, a humming-bird (*Selasphorus platycercus*) common in the Rocky Mountain region of the United States. **—Cuvier's humming-bird** (*Thaumastura cora*), the male of which is marked by extremely long tail-feathers. **—hermit h.,** any species of the genus *Phathornis*, with bifurcated tail and somber plumage. **—h. bush,** a South-American shrub, *Leonurus nepetæfolius* (*L. virdensis*) of the bean family, much frequented by hummingbirds for the nectar of the flowers. **—h. hawk-moth,** a hawk-moth (*Hemaris thysbe*) of the species *Macroglossa stellarum*, common in Europe, and resembling a humming-bird in flight and method of feeding. **—humming-bird's trumpet,** a bell-barely ornamental plant (*Zauschneria californica*), with sessile leaves and large, bright-crimson flowers in terminal spikes. See ZAUSCHNERIA. **—king h.,** a topaz (*Topaza pella*) whose male has a crimson abov, and has a lustrous golden throat. **—ruby-and-topaz h.,** a hummingbird (*Chrysolampis mosquitus*) of northern South America and Trinidad, whose head is ruby-red and throat and breast topaz-orange. **—rufous h.** a hummingbird (*Selasphorus rufus*) common in summer on the Pacific coast of North America northward to Alaska. **—star-throated h.,** the calliope. **—tufted h.,** a sword-bill (*Loddigesia mirabilis*) of the genus *Docimastes*, having a very long bill. **—vervain h.,** a Jamaican humming-bird (*Mellisuga minima*), one of the smallest of the family. **—white-eared h.,** a species of the genus *Microhera*, having a white-topped head. **—white-eared h.,** a humming-bird with a streak of white about the region of the ear, especially *Basilinna leucotis*.

Hun', 1 hun; 2 hŭn, *n.* **1.** One of an obscure Asiatic (Turanian) nomadic and warlike race living between the Ural and the Volga about the beginning of the Christian era.

Some authorities consider that they were of Turki stock, while others hold them to be identical with the Hiong-Nu, a powerful Tatar tribe which overran China in the year 200 B. C., defeated the Chinese, and compelled the Emperor Kaosti to make a treaty with them. During the reign of Wiwei (141–87 B. C.) they met with numerous reverses. Early in the Christian era they seem to have separated into two distinct bodies, one of which, the Northern Huns, was practically destroyed by the Chinese, while the other, the Southern Huns, migrated westward in search of new territory. These established themselves for a time on the banks of the Volga, and early in the 4th century advanced into the territory of the Alani, between the Volga and the Don, which they conquered. From this base they pushed their invasion into the territory of the Goths, whom they everywhere defeated. In succeeding years the Goths were the more prominent of the two nations, but early in the 5th century the Huns increased in power and forced Theodosius the Younger to pay them tribute. Under their great king Attila they carried their conquests as far west as Gaul, ravaged Italy, and threatened the capture of Rome. From Attila's death (453) their decline, which was rapid, may be said to date; it resulted in almost complete loss of their conquered territory and in their degeneration to a mere marauding tribe. They are described by contemporary writers as a barbarous and cruel people, of repulsive appearance, fine horsemen, and possessed of great physical strength.

2. A vandal; one of a destructive nature. **3.** A German soldier: from an allusion by Kaiser Wilhelm II to the Huns of Attila in a speech delivered to the German troops at Bremerhaven, July 26, 1900, on the eve of their departure for China. **4.** [Colloq., U. The verb is used figuratively in certain games where pursuit is involved; as, *to hunt the slipper*.

In the United States the word is largely used of the pursuit of any kind of game, large or small; in England it is restricted to the chase or to the pursuit of large game, and specifically to foxhunting.

Oh, touch their stony hearts who *hunt* thy sons.
BRYANT *Hymn of the Waldenses* st. 3.

2. To manage or use in the chase; as, he *hunts* a pack of hounds. **3.** To traverse (a region) in the chase; as, he *hunted* the county. **4.** To search for diligently; seek earnestly; follow closely; as, to *hunt* up proofs. **5.** In bell-ringing, to change the place of (a bell) in its set, according to certain rules.

II. *i.* **1.** To pursue game or other wild animals; follow the chase; ride to hounds. **2.** To make a close search or quest. **3.** *Bell-ringing.* To change its relative position in a set; said of a bell. When the place of the bell is moving from first to last, the process is called *hunting up*; the reverse process is *hunting down*.

4. To run alternately fast and slow, owing to unsteady action in the governor: said of a stationary engine or a pair of alternators working in parallel. To vary in position, as the clutch of an arc-lamp. [< AS. *huntian*, hunt.]—**hunt the fox,** same as HARE AND HOUNDS.—**to h. at the view,** to follow game while in sight, as the greyhound does.—**to h. counter,** to trace the scent backward; hunt the wrong way.—**to h. riot** (*Fox-hunting*), to lose the scent of the animal chased and to follow the scent of another: said of hounds. Syn.: compare DRIVE; FOLLOW; HUNT, *n.*

hunt', *n.* **1.** The act of hunting game; chase. **2.** The act of seeking for something; a search; inquisition.

All things have an end, and so did our *hunt* for lodgings.
C. D. WARNER *Saunterings* p. 146. [n. n. & co. 1887.]

3. An association of huntsmen; as, the Pytchley or Meadow Brook *Hunt*. **4.** A district hunted over with hounds. **5†.** The game secured in the hunt. **6†.** A pack of hounds. Syn.: search, quest, inquisition, search. A *hunt* may be either the act of pursuing or the act of seeking, or a combination of the two. A *chase* or *pursuit* is after that which is fleeing or desiring; a *search* is after that which is hidden; a *hunt* may be for that which is either hidden or fleeing; a *search* is a minute and careful seeking, and is especially applied to a localized search or search of or through a house, for an object, in which connection it would be colloquial to say a *hunt*. *Hunt* never quite loses its association with field-sports, whereas *search* is more and more; and the *search* till the game is hunted out, and the *chase* till it is hunted down. *Figuratively*, we speak of literary *pursuits*, or of the *pursuit* of knowledge; a *search* for reasons; a *hunt* for heresy; the *chase* of fame or honor.

1. An American trochiloid bird, related to the swifts, small, having long, slender bill, extensile tongue, weak legs, and narrow pointed wings with very short secondaries. The plumage of the various species exhibits a wonderful variety of form and color, in crests, neck- and leg-tufts, etc., and in remarkable tail development. That of the males is, as a rule, far more varied and metallically lustrous than that of the females, thus furnishing a marked instance in support of the theory of sexual selection. The brilliance exhibited by their iridescent, jeweled gorgets, tufts, etc., is due to the interference of light caused by the infinitesimal scales on the surface of the feathers, an effect noted in the wing of the butterfly. Humming-birds are noted for the humming sound made by the rapid vibration of their wings when hovering over flowers. They feed mostly on insects and the sweets of flowers. Their nests are formed of shreds of grass and other soft substances, and are protected and made practically invisible by a coating of lichen or other material harmonizing with the surroundings. The eggs are always two in number and pure white; the tiny parents are fearless and very pugnacious in protecting them. They have no song, their only vocal utterances being squeaks of rage or fear. The family consists of about 600 species, all American, and for the most part tropical. The common humming-bird of the eastern United States is the ruby throat (*Trochilus colubris*).

2. Improperly, an Old World sunbird or nectarinid.

— **broad-tailed humming-bird,** a humming-bird (*Selasphorus platycercus*) common in the Rocky Mountain region of the United States. — **Costa's humming-bird** (*Trochilus costæ*) (*Thaumnastura anna*), the male of which is marked by extremely long tail-feathers. — **hermit h.,** any species of the genus *Phethornis*, with bifurcated tail and somber plumage. — **h. bush,** a South-American shrub (*Mesoxylon mouirideusis*) of the bean family, much frequented by humming-birds for the nectar of the flowers. — **h. hawk-moth,** a hawk-moth (*Sesia trochilus*) of the genus *Macroglossa stellarum*, common in Europe, and resembling a humming-bird in flight and method of feeding. — **humming-bird's trumpet,** a half-hardy cremaceous plant (*Epidendrum calcaratum*), with sessile leaves and large, bright-crimson flowers in terminal spikes. See ZAUSCHNERIA. — **king h.,** a topaz (*Topaza pella*) whose male has the throat above, and has a lustrous golden throat. — **ruby-and-topaz h.,** a humming-bird (*Chrysolampis mosquitus*) of northern South America and Trinidad, whose head is ruby-red and throat and breast topaz-orange. — **rufous h.,** a humming-bird (*Selasphorus rufus*) common in summer on the Pacific coast of North America northward to Alaska. — **star-throated h.,** the calliope. See CALLIOPE, 3. — **sword-bill,** a species of the genus *Docimastes*, having a very long bill. — **vervain h.,** a Jamaican humming-bird (*Mellisuga minima*), one of the smallest of the family. — **white-eared h.,** one of the genus *Microkera*, having a white tufted spot above the region of the ear, especially *Basilinna leucotis*.

Hun, 1 hun; 2 hŭn, *n.* **1.** One of an obscure Asiatic (Turanian) nomadic and warlike race living between the Ural and the Volga about the dawn of the Christian era.

Some authorities consider that they were of Turki stock, while others hold them to be identical with the Hiong-Nu, a powerful Tatar tribe which overran China about 200 B. C., defeated the Chinese, and compelled the Emperor Kaoti to make a treaty with them. During the reign of Wuti (141–87 B. C.) they met with numerous reverses. Early in the Christian era they seem to have separated into two distinct bodies, one of which, the Northern Huns, was practically destroyed by the Chinese, while the other, the Southern Huns, migrated westward in search of a settlement. These established themselves for a time on the banks of the Volga, and early in the 4th century advanced into the territory of the Alani, between the Volga and the Don, which they conquered. From this base they pushed their invasion into the territory of the Goths, whom they everywhere defeated. In succeeding years the Goths were the more prominent of the two nations, but early in the 5th century the Huns increased in power and forced Theodosius the Younger to pay them tribute. Under their great king Attila they carried their conquests as far west as Gaul, ravaged Italy, and threatened the capture of Rome. From Attila's death (453) their decline, which was rapid, may be said to date; it resulted in almost complete loss of their conquered territory and in their degeneration to a mere marauding tribe. They are described by contemporary writers as a barbarous and cruel people, of repulsive appearance, fine horsemen, and possessed of great physical strength.

hunt, 1 hunt; 2 hŭnt, *v.* **I.** *t.* To pursue for the purpose of killing or catching as, to *hunt* the lion; to take part in the chase for sport or exercise; as, to *hunt* the fox; to go in pursuit of wild animals for food, fur, or feather; as, to *hunt* the buffalo and seal: sometimes used elliptically in this sense; as, to *hunt* skins when the meaning is to hunt animals for their skins; or to *hunt* scalps, as among the Red Indians formerly, and heads as among the Dyaks of Borneo, where the heads of human enemies are collected as trophies of valor; to run down as prey, whether in packs, as wolves *hunt* their food, or individually, as lions; to drive away by pursuing; as, to *hunt* one from the country. The verb is used figuratively in certain games where pursuit is involved; as, to *hunt the slipper*.

In the United States the word is largely used of the pursuit of any kind of game, large or small; in England it is restricted to the chase or to the pursuit of large game, and specifically to fox-hunting.

Oh, touch their stony hearts who *hunt* thy sons.

BRYANT *Hymn of the Waldenses* st. 3.

3. An association of huntsmen; as, the Pytchley or Meadow Brook *Hunt*. **4.** A district hunted over with hounds. **5†.** The game secured in the hunt. **6†.** A pack of hounds. SYN.: see chase, hunting, pursuit, search. A *hunt* may be either the act of pursuing or the act of seeking, or a combination of the two. A *chase* or *pursuit* is after that which is fleeing or desiring flight; a *search* is for that which is hidden; a *hunt* may be for that which is either hidden or fleeing; a *search* is a minute and careful seeking, and is especially applied to a thorough search; we make a *search* of or through a house, for an object, in which connection it would be colloquial to say a *hunt*. *Hunt* never quite loses its association with field-sports, where it first took its rise; we may *search* the *search* till the game is hunted out, and the *chase* till it is hunted down. Figuratively, we speak of literary *pursuits*, or of the *pursuit* of knowledge; a *search* for reasons; a *hunt* for heresy; the *chase* after wealth or fame.

hut'tonite, 1 hut'n-īt; 2 hŭt'n-īt, *n.* A system of treating dislocated joints or the like, practised by Richard and Robert Hutton, English bonesetters of the 19th century. It consisted of forcible manipulation.

hut'ton-weed", 1 hut'n-wēd'; 2 hŭt'n-wēd', *n.* The wild teazel.

hu'tu, 1 hü'tü; 2 hu'tu, *n. Ornith.* [Brit. Guiana.] A manakin.

hut'ter, 1 hut'er; 2 hŭt'er, *n.* [Dutch Law.] A lessee.

Hux'ley, 1 huks'li; 2 hŭks'ly, **Thomas Henry** (?/1825–?/1895). An English scientist, physiologist, physician, professor, writer, and lecturer; *Man's Place in Nature*, etc.— **Huxley's layer**, a layer of polygonal cells with markedly defined nuclei within Henle's layer of the inner root-sheath of the mammalian hair. **Huxley's membrane**; **Huxley's sheath**.— **Hux'lei-an**, *a.* Relating or pertaining to Thomas Huxley.

hux'ter, 1 huks'ter; 2 hŭks'ter, *n.* Same as HUCKSTER.

Hu'y†, 1 hī'; 2 yī', *n.* A fortified manufacturing town in Liége province, Belgium.

Huy'de-co'per, 1 hoi'de-kō'per; 2 hŏy'de-cō'per, **Balthasar** (1625–?/1706). A Dutch poet and philologist.

Huy-ge'ni-an, 1 hoi-gī'ni-on; 2 hŏy-gē'ni-an, *a.* Of or pertaining to the Dutch mathematician and astronomer, Christian Huygens, or his discoveries. **Huy-ghe'ni-an.**

Huy'gens, 1 hoi'gens *or* (D.) hoi'ĕns; 2 hŏy'gĕns *or* (D.) hŏy'gĕns, *n.* **1. Christian** (?/1629–?/1695), a Dutch mathematician and astronomer; invented the pendulum clock; discovered the rings of Saturn; proposed the undulatory theory. **Huy'ghens†.** 2. **Constantijn** (?/1596–?/1687), a Dutch poet; father of Christian H.; *Cornflowers*, etc.

Huygens eye-piece, a method devised by Huygens for graphically indicating the front of a light-wave by means of a series of equal semicircles whose centers are equidistant points on a straight line.

Huys'man, 1 hois'man; 2 hŏys'măn, *n.* **1. Cornelis** (1648–?/1727), a Flemish landscape-painter. **2. Roelof**, see AGRICOLA, RUDOLPHUS.

Huy'sums, 1 hī'sumz; 2 tis'măn', *n.* **1. Jacob** (1656?–1696), a Flemish portrait-painter who practised in England. 2. **Joris Karl** (?/1848–?/1907), a French novelist of the naturalistic school, who in his later years changed to mysticism.

Huy'sum, 1 hoi'sum; 2 hŏy'sum, **Jan van** (?/1682–?/1749). A Dutch painter of flowers, fruit, etc.

huzz'a, 1 hŭz-ā'; 2 hŭ-zā' *or* hŭ-zä' (GER.), *n. & ct.*

huz-za', *n. & interj.* Hurrah: a shout of joy. [< G. *hussa*, huzza.] **huz-zah'†**; **huz-zay'†**.

Huz'zah, 1 huz'ah; 2 hŭz'ăh, *n. Bib. Nah.* ii. 7. [Heb., establishment.] [by anders.

huz'zard†, *n.* A fly with yellow body and wings, used as bait

huz'zy, *n.* Same as HUSSY.

Hvi'dö'ya, 1 hvi'dö'yȧ; 2 hvĭ'dö'yȧ. A group of islands S. of Norway. **Hva'foerne†.**

Hven, 1 hvēn; 2 hven, *n.* An island belonging to Sweden, near Elsinore, famous for Tycho Brahe's observatory, † Uranienborg," was erected there in 1576. **Hveen†.**

Hver'gel-mer, 1 hwer'gel-mer; 2 hwĕr'gĕl-mer, *n. Norse Myth.* The spring in Niflheim, source of all rivers. The venomous wyrm Hivagar: the Northern Tartarus. [Ice., the ancient Kettle.] **Hver'gel-mir†.**

Hvi'feld, 1 hvit'feld; 2 hvĭt'fĕld, **Arild** (?/1546–?/1609). A Danish lyric poet; chancellor of Denmark.

Hwai, 1 hwoi; 2 hwi, *n.* Same as HUAI HO.

Hwel'chow', *n.* Same as WATCHOW.

hwen, 1 hwĕn; 2 hwĕn, *n.* [Manx.] Same as FUNG-HWANG.

Hwang, *n.* A river in China; length, 2,400 m. to the Gulf of Chihli.

Hwang'tun', 1 hwan'tūn'; 2 hwäng'tün', *n.* A city in Chekiang province, China. [HIOUEN-THSANG.

Hwen'Thsang", 1 hwen'-tsäng'; 2 hwĕn'-tsäng', *n.* Same as HIUEN-THSANG.

hy†, *a.* High. **hyet.**

hy-, *abbr.* Hyperbolic: used in mathematical formulas, etc.

hy'a-cinth, 1 hai'a-sinth; 2 hy'a-cĭnth, *n.* **1.** A bulbous plant of the genus *Hyacinthus*, and of the commonest species (*H. orientalis*) from western Asia, now cultivated everywhere in numberless varieties for its spike-like cluster of flowers, single and double, white, pink, red, etc. **2.** Any one of various other genera, as the wild hyacinth (*Scilla fraseri*), quamash or eastern camass, the grape-hyacinth (*Muscari racemosum*), and musk-hyacinth (*Muscari moschatum*) See also WATER-HYACINTH. **3.** *Gr. Myth.* A plant frequently alluded to by the Greek poets, believed to have sprung from the blood of Hyacinthus, beloved of Apollo, and to have borne on its petals the words of grief, Ai, Ai. Some have supposed it to be the martagon lily, some the gladiolus, iris, or larkspur. **4.** *Her.* The tincture tenné, when a field is blazoned by the colors of precious stones. **5.** A purplish gallinule, as *Ionornis martinica*. **6.** *Mineral.* (1) Formerly, a bluish-violet gem, probably the sapphire. (2) Now, a generally brownish, red, reddish, or orange zircon, but sometimes cinnamon-colored garnet; essonite; also, occasionally applied to honey-yellow pyrope garnets. [< OF. *hyacinthe*, < L. *hyacinthus*, < Gr. *hyakinthos*, the hyacinth.] **hya-cinet.**— **California hyacinth**, any species of the genus *Hookera*.— **hy'a-cinth-bean"**, *n.* A tropical climber (*Dolichos lablab*) of the bean family, with violet flowers. Its pods and seeds are eaten.— **h.-stone**, *n.* Same as HYACINTH, 6.— **native h.**, a Tasmanian terrestrial orchid (*Thelymitra longifolia*), with a nearly regular perianth.— **Oriental h.**, a variety of sapphire, or corundum.— **Peruvian h.**, a perennial bulbous plant (*Scilla peruviana*), a native of the Mediterranean region, bearing a strong scape, terminated by a dense raceme of beautiful purple, white, or red flowers: never blossoms two years in succession: propagated by offsets; the Cuban lily.— **water-h.**, *n.* A tropical aquatic plant (*Pistiopsis crassipes*) of the family *Pontederiaceæ*, with ovate leaves and blue spicate flowers. In certain Florida rivers it has multiplied so rapidly as to impede navigation.

Hy'a-cinth', *n.* A masculine personal name. [Gr., purple.] — **Hy'a-cin'tha. Hy'a-cinthe**, *n. fem.*

Hy'a-cinth', 1 Fä'sant'; 2 Fä'zant', **Father** (?/1827–?/1912), Charles Jean Marie Loyson, a Carmelite, Catholic orator who advocated reforms in the Roman Catholic Church; he was excommunicated, and founded a Gallican church in Paris. **Hy'a'cinthe'†.**

Hy'a-cin'thi-a, 1 hai'a-sin'thi-a; 2 hy'a-cĭn'thi-a, *n. pl. Gr. Antiq.* A festival lasting for three days at the height of summer, in honor of Hyacinthus and Apollo. The first ceremonies were mournful, commemorating the death of Hyacinthus: the last were joyful, celebrating his rebirth. The festival was celebrated throughout the Peloponnesus, and with special enthusiasm at Amyclæ. It lasted seven days, and took place in the month of May, soon after the Isthmian games.

Hy'a-cin'thic, } 1 hai'a-sin'thun; 2 hy'a-cĭn'thin, *a.* **1. Hy'a-cin'thin**, } Pertaining to the hyacinth, either the flower or the gem; like or characteristic of the hyacinth, especially in point of color.

Of hyacinthine isle O purple Zante! From *To Zante* I. 13.

2. Like or relating to Hyacinthus, the fabled favorite of Apollo; hence, lovely; beautiful.

The muse of Novalis was a pale and slender maid, with earnest blue eyes, golden, *hyacinthine* locks, smiling lips, and a little red mole on the left side of her chin. Hayes in J. S. Hosmer's *Short Hist. German Lit.* ch. 15, p. 487. [s. 1891.]

[< L. *hyacinthinus*, < Gr. *hyakinthinos*, < *hyakinthos*, hyacinth.] **hy'a-cin'thoid.**

Hy'a-cin'thus, 1 hai'a-sin'thus; 2 hy'a-cĭn'thŭs, *n. Gr.Myth.* **1.** A beautiful youth of Amyclæ, beloved of Apollo, and accidentally killed by the god when they were playing at discus-throwing. Apollo, unable to save him, changed him into the flower called hyacinth. Hyacinthus is supposed to typify the early vegetation of spring. Other versions of the legend say that Zephyrus, out of jealousy, blew the discus, cast by Apollo, against the head of Hyacinthus, thus causing his death. See HYACINTH, 3, and HYACINTHIA. **Hy-a'-cin-thos.** 2. *Zoöl.* A notable genus of Old World shrikes of the lily family (*Liliaceæ*), with coated bulbs, narrow radical leaves, and a simple leafless scape bearing a raceme of often handsome bell-shaped flowers. The numerous species and forms are mostly derived from *H. orientalis*. [L., see HYACINTH.]

Hy'a-des, 1 hai'a-dīz; 2 hy'a-dēz, *n. pl.* **1.** *Gr. Myth.* The muses or guardians (3, 5, or 7 in number) of Dionysus, converted by Zeus into stars, whose rising with the sun betokened the rainy season. According to another tradition they were the sisters of Hyas, son of Atlas, who perished in the chase; the mourned their brother's death, and Zeus, out of compassion, changed them into stars. **2.** *Astron.* The cluster of stars in Taurus, including Aldebaran, shaped like the letter V. [L., < Gr. *Hyades*, < *hyō*, pig.] **Hy'ads†.**

Hy'a-des², 1 hai'a-dīz; 2 hy'a-dēs, *n. Bib.* (Douai).

hy-æ'na, *n.* 1. Same as HYENA. 2. [H-.] *Mam.* A genus typical of *Hyænidæ*. [< L. *hyæna*; see HYENA.]— **hy-æ'nan-the**, *n. Bot.* A genus of plants of the family *Euphorbiaceæ*. The only species, *H. capiensis*, native in South Africa, is a tree-like shrub, with leathery leaves and small flowers of separate sexes on the same plant. Its fruits, which are very poisonous, are scattered on bait for wild animals; hyena-plant.— **Hy'æ-nare-th'ne**, *n. pl. Mam.* A Tertiary subfamily of ursoid carnivores, having the dental formula of bears with three lobes to the blade, and lower like a dog's. **Hy'æ-nare'tes**, *n.* (t. g.)— **hy'æ-nare'tin** (-ēs, *n.*— **hy-æ'nic**, *a.* Same as HYENINE.— **Hy'æ-nic'idæ**, *n. pl. Mam.* Same as **Hy'æ-nic'thne**, *a.*— **Hy-æ'ni-dæ**, *n. pl. Mam.* A family of carnivores, esp. those having the bulbe not septate, and the upper carnassial tooth trilobed, with the inner lobe large, blade and small talon; hyenas.— **hy-æ'nid**, *n.*— **hy-æ'noid**, *a. & n.*— **hy-æ'ni-form**, *a.* Same as HYENIFORM.— **Hy-æ'ni-for'nes**, *n. pl. Mam.* A group of silicidean carnivores, including the *Hyænidæ* and *Procyonidæ*.— **Hy-æ'nine**, *n. pl. Mam.* The typical *Hyænidæ* as a subfamily.— **hy-æ'nine**, *n.*— **Hy-æ'no-don'ti-dæ**, *n. pl. Mam.* A Tertiary family of creodont carnivorous mammals, having four premolars and two or three molars in each ramus, and the fourth upper premolar and all molars above and below carnassial and enlarged. Remains of it were presented in the Eocene and Miocene of Europe and America and the Pliocene of India. *H. crucntæ*, from the White River formation of Nebraska and South Dakota, was about the size of a leopard and had a sagittal crest.— **Hy-æ'no-don**, *n.* (t. g.)— **hy-æ'no-don'tid**, *n.*— **hy-æ'no-don'toid**, *a. & n.*

hy'a-ı, 1 hai'a-hoi'; 2 hy'a-hŏy'a, *n.* [Central. Am.] See COW-TREE.

hy'al- } 1 hai'al-, hai'a-lo-; 2 hy'al-, hy'a-lo-. From Gr. **hy'a-lo-** } *hyalos*, glass: combining forms, denoting glassiness.— **hy-a'lu-a**, *n. Conch.* Same as CAVOLINIA. See CAVOLINIDÆ.— **hy'a-les'cence**, *n.* The state of being in process of becoming glassy or transparent; glassiness.— **hy'a-les'cent**, *a.* Becoming hyaline or glassy: displaying hyalescence.— **hy'a-lin**, *n. Chem.* A nitrogenous compound, related to chitin, the chief constituent of hydatid cysts, which on decomposition yields a reducing sugar. **2.** One of a class of similar substances which give carbohydrates as cleavage products.

Other words beginning with these prefixes will be found in alphabetical place, either singly or in groups.

hy'a-line, 1 hai'a-lin; 2 hy'a-lin, *a.* Consisting of or hy'a-lin², } resembling glass; transparent; crystalline; as, the *hyaline* layer of a hair-follicle. [< LL. *hyalinus*, < Gr. *hyalinos*, of glass, < *hyalos*, glass.]— **hyaline cartilage**, that form of cartilage in which the cells are embedded in a homogeneous translucent matrix.

hy'a-line, } *n.* **1.** A glassy surface; something trans-**hy'a-lin²**, } parent.

Through the clear *hyaline*, the Ship of Heaven
Came sailing from eternity.

Longfellow *Poems*, *Belfort Pleasant Island* can. 1, st. 11.

2. (1) Hyaloplasm. (2) The hyaloid membrane. (3) The hyaline cartilage.— **hy'a-line-quartz"**, *n.* Quartz with a bluish opalescent cast due to presence of chalcedony used as a gem.— **hy'a-li-no'sis**, *n. Pathol.* A degeneration of fibrous tissue resulting in a jelly-like transparent composition.

hy'a-lite, 1 hai'a-lait; 2 hy'a-lit, *n.* A pellucid glassy variety of opal, of no commercial value.

Hy'a-lite Peak. A mountain in Montana; 10,110 ft. high.

hy'a-lithe, *n.* An opaque variety of glass, frequently black, green, brown, red, etc., resembling porcelain, and valuable owing to its strength.— **hy"a-li'tis,** *n.* *Pathol.* Inflammation of the vitreous humor of the eye or of the membrane enclosing it.— **hy-al'o-gen,** *n.* *Physiol. Chem.* One of several albuminoids present in cartilaginous tissues, easily reducible to hyalin.— **hy-al'o-graph,** *n.* **1.** An engraving made by heliogravure from a drawing on glass. **2.** An instrument for producing etched figures on glass.— **hy"a-log'ra-pher,** *n.* One who etches or engraves on glass.— **hy"a-log'ra-phy,** *n.* **1.** The art of engraving on glass, either with a diamond, emery, or hydrofluoric acid. **2.** A mechanical method of drawing on a transparent substance by means of which objects are reproduced as they are seen in perspective.

hy'a-loid, 1 hai'ə-leid; 2 hȳ'a-lŏid, *a.* Similar to glass; pellucid. [< LL. *hyaloides*, glass-green, < Gr. *hyaloeidēs*, < *hyalos*, glass; and see -OID.]— **hyaloid body,** the vitreous or glassy humor of the eye.— **h. membrane,** the structureless transparent membrane that encloses the vitreous humor of the eye.— **hy"a-loi'da,** *n.* The hyaloid membrane. **hy"a-loi'de-a‡.**— **hy"a-loi-di'tis,** *n.* *Pathol.* Inflammation of the hyaloid membrane of the eye.

hy'a-loid, *n.* **1.** The hyaloid membrane. **2.** [Rare.] Same as HYALINE, 1.

hy'a-lom'e-lan, *n.* *Petrol.* A variety of tachylyte.— **hy"a-lo-mic'te,** *n.* *Geol.* A variety of granite; greisen.— **hy"a-lo-mu'coid,** *n.* *Chem.* A mucoid occurring in the vitreous humor.— **Hy"a-lo-nem'i-dæ,** *n. pl.* *Spong.* A family of amphidiscophorous hexactinellidans with long silicious threads and numerous pentact-pinnula spicules in the dermal and gastral surfaces; glass-sponges. **Hy"a-lo-ne'ma,** *n.* (t. g.) **Hy"a-lo-ne-mat'i-dæ‡.**— **hy"a-lo-ne'mid,** *a.* & *n.*— **hy"a-lo-ne'moid,** *a.*— **hy"a-lo-pha'gi-a,** *n.* A mania for eating glass.— **hy-al'o-phane,** *n.* *Mineral.* A vitreous white aluminum-barium-potassium feldspar, $(K_2Ba)Al_2Si_4O_{12}$, crystallizing in the monoclinic system.— **hy"a-lo-pi-lit'ic,** *a.* *Petrol.* Consisting of felspathic microlites in a glassy base: characteristic of the structure of most andesites. — **hy'a-lo-plasm,** *n.* *Biol.* The fluid or semifluid clear substance that occupies the meshes of the reticulum of a cell; the enchylema. **hy-a-lo-plas'ma‡.**— **hy"a-lo-plas'mic,** *a.*— **hy"a-lop'ter-ous,** *a.* Having transparent wings, a characteristic of many insects.— **hy'a-lose,** *n.* A sugar almost similar to, perhaps identical with, glucose, which is obtained from hyalin by hydrolysis.— **hy"a-lo-se"ro-si'tis,** *n.* *Pathol.* A form of chronic inflammation of a serous membrane characterized by a fibrinous exudation that undergoes hyaline degeneration.— **hy"a-lo-sid'er-ite,** *n.* *Mineral.* A ferruginous variety of chrysolite.— **hy'a-lo-some,** *n.* *Biol.* One of the nucleolar-like bodies of a cell-nucleus that stains but slightly with nuclear or plasma stains.— **hy"a-lo-sper'mous,** *a.* [Rare.] Having hyaloid or transparent seeds.— **Hy"a-lo-spon'gi-æ,** *n. pl.* *Spong.* The *Hexactinellidæ*. **Hy"a-lo-spon'gi-a‡.**— **Hy"a-lo-te'kite,** *n.* *Mineral.* A vitreous white silicate $H(PbBaCa)_4BSi_6O_{18}$), found either massive or coarsely crystalline.— **hy-al'o-type,** *n.* A positive photograph on glass copied from the negative; a photographic transparency: no longer in use.

hy'a-qua, *n.* Same as HIAQUA.

Hy'att, 1 hai'ət; 2 hȳ'at, **Alpheus** (4/5 1838–1/15 1902). An American naturalist, professor, and author; *Genera of Fossil Cephalopods*, etc.

Hy'atts-ville, 1 hai'əts-vil; 2 hȳ'ats-vil, *n.* A town in Prince George county, Md.

hy-ber'nal, *a.* Same as HIBERNAL.

Hy'bla, 1 hai'blə; 2 hȳ'bla, *n.* A name of several ancient towns in Sicily: (1) In S. E. Sicily, S. of modern Palazzolo; (2) probably modern Paterno on the S. slope of Mt. Etna; (3) on the E. coast about 12 miles N. of Syracuse; presumably the site of modern Augusta. It was famed for the honey produced in the vicinity.— **Hy-blæ'an,** *a.* Of or relating to Hybla; hence, smoothly flowing. **Hy-ble'an‡.**

Hy"bo-co-don'i-dæ, 1 hai"bo-ko-don'ɪ-dī; 2 hȳ"bo-co-dŏn'i-dē, *n. pl.* *Zooph.* A family of hydromedusans generally united with the *Codoniidæ* or *Sarsiidæ*. **Hy-boc'o-don,** *n.* (t. g.) [< Gr. *hybos*, hump, + *kōdōn*, bell.]

Hy"bo-crin'i-dæ, 1 hai"bo-krin'ɪ-dī; 2 hȳ"bo-crĭn'i-dē, *n. pl.* A Lower Silurian family of inadunate monocyclic crinoids, with 3 to 5 arms, unbranched, uniserial, not pinnulate, and narrower than radials. **Hy-boc'ri-nus,** *n.* (t. g.) — **hy-boc'ri-noid,** *a.* & *n.*

hyb'o-dont, 1 hib'o-dent; 2 hўb'o-dŏnt. **I.** *a.* **1.** Having crowns surmounted by a principal median prominence and one or more lateral ones, as the teeth of hybodontoid sharks. **2.** Having such teeth; of or pertaining to the *Hybodontidæ*. **II.** *n.* One of the *Hybodontidæ*.

Hyb"o-don'ti-dæ, 1 hib"o-don'tɪ-dī; 2 hўb"o-dŏn'ti-dē, *n. pl.* *Ich.* A Mesozoic family of prosarthral sharks often united with *Heterodontidæ*, but typically differing by having hybodont teeth. **Hyb'o-dus,** *n.* (t. g.) [< Gr. *hybos*, hump, + *odous* (*odont-*), tooth.] **Hyb"o-don'tes‡; Hyb"o-don-toi'de-i‡.**— **hyb"o-don'tid,** *n.*— **hyb"o-don'toid,** *a.* & *n.*

Hy-Bra'sil, *n.* [Ir.] Same as HI-BRASIL.

hy'brid, 1 hai'brɪd *or* hib'rɪd; 2 hȳ'brid *or* hўb'rid (XIII), *a.* **1.** Produced by the interbreeding of different varieties, species, or genera of animals, or the cross-fertilization of plants; mongrel; crossed; cross-bred. **hy'bra‡.**

The Mongolian and the Negro, with their sub-types and *hybrid* races, divided the major part of the earth between them.
CHARLES MORRIS *Aryan Race* ch. 1, p. 9. [S. C. G. 1888.]

2. Derived from incongruous sources; composed of mixed elements; as, a *hybrid* word. **3.** *Bee-keeping.* Cross-mated: said of a queen. **hy'brid-ous‡.**— **hy'brid-al,** *a.* [Rare.]— **hybrid committee** [Gt. Brit.], a body selected from opposed sections of the House of Commons to report on important, but not government, measures.

hy'brid, *n.* **1.** An animal or plant produced from the mixture of different breeds, species, or genera; half-breed; mongrel. The mule, bred between the horse and the ass, is the most familiar example among animals. In bee-culture *hybrid* generally denotes a cross between blacks and Italians. Hybrids are usually infertile among themselves, and also with members of either parent species. There are three classes of hybrids: (1) Those resulting from the spontaneous interbreeding of animals in the wild state; (2) the offspring of domesticated animals crossed under the influence of man; (3) the artificial mingling of the male and female generative elements, as in the vegetable kingdom, and in some fishes, as the *Salmonidæ*. While many closely allied species will not unite or at least only with extreme difficulty, other species, far removed from each other, can be crossed with ease. Hybrids are more easily produced in the case of animals than in that of plants, but the former are, as a rule, the more sterile; when a hybrid possesses generative power, however, it appears to breed more readily with an individual of one of its parent stocks than with another hybrid like itself. See MENDEL'S FORMULA.

The current physiological test of distinct species is the production of non-prolific *hybrid*.
SPENCER *Essays, Personal Beauty* p. 160. [A. 1866.]

2. Anything of heterogeneous origin or incongruous parts; specif., in grammar, a form or word of mixed origin, as *talkative* (Anglo-Saxon, Latin), *interloper* (French-Latin, Dutch), *countship* (French, English). **3.** *Bee-keeping.* A cross-mated queen. [< F. *hybride*, < L. *hybrida*, mongrel.] — **attenuated hybrid** (*Biol.*), a hybrid in which the blood has become enfeebled as the result of frequent crossings.— **bigeneric h.** (*Biol.*), a bigener.— **extracted h.** (*Biol.*), a pure dominant, or a pure recessive. — **false h.** (*Biol.*), a mongrel organism displaying and transmitting the exclusive peculiarities of one parent alone to its descendants.— **Mendelian h.** (*Biol.*), an organism, resulting from the crossing of two thoroughbred varieties having antagonistic characteristics, which transmits to some descendants the peculiarities of one parent, and to others the peculiarities of the other. See MENDELIAN LAW.— **true h.,** the offspring of parents of two distinct species.— **hy'brid-ous,** *a.*

hy'brid-is"a-bl(e^p, etc. See HYBRIDIZABLE, etc.

hy'brid-ism, 1 hai'brɪd-[*or* hib'rɪd-]izm; 2 hȳ'brid-[*or* hўb'rid-]iṣm, *n.* **1.** The state of being hybrid; descent from differing parents; as, the mule is an instance of *hybridism*. **hy-brid'i-ty‡; hy'brid-y‡.**

Hybridism . . . is one of the greatest obstacles to the general acceptance and progress of the great principle of evolution.
DARWIN *Cross and Self Fertilisation* p. 27. [A. 1877.]

2. The act of interbreeding for the production of animal hybrids, or the act of inducing the hybridization of plants. **3.** The mingling in one word of elements derived from more than one language; as, the English language is full of *hybridisms*.— **false hybridism,** the appearance in cross-bred offspring of one parental type to the exclusion of the other.

hy'brid-ist, 1 hai'brɪd-[*or* hib'rɪd-]ist; 2 hȳ'brid-[*or* hўb'rid-]ist, *n.* One who hybridizes.

hy'brid-ize, 1 hai'brɪd-[*or* hib'rɪd-]aiz; 2 hȳ-brid-[*or* hўb'-rid-]īz, *v.* [-IZED; -IZ"ING.] **I.** *t.* **1.** To cause to produce hybrids by interbreeding or cross-fertilizing. **2.** To combine in a hybrid manner, as in forming new words. **II.** *i.* **1.** To generate hybrids by interbreeding. **2.** To be capable of cross-breeding.

The pear and the quince may be grafted together, but will not *hybridize*.
A. A. CROZIER *Popular Errors about Plants* p. 81. [R. P. CO. 1892.]

hy'brid-ise‡.— **hy'brid-iz"a-**[or **-is"a-**]**bl(e^p,** *a.*— **hy"brid-i-za'**[or **-sa'**]**tion,** *n.* The act of hybridizing, or the state of being hybridized; hybridism. **hy"brid-a'tion‡** [Rare].— **hy'brid-iz"er** or **-is"er,** *n.*

hy'brid-o-gam, 1 hai'brɪd-o-gam; 2 hȳ'brid-o-găm, *n.* A hybrid whose parents are of different species. [< *hybrid* + Gr. *gamos*, marriage.] — **hy"brid-og'a-my,** *n.* Hybridization between different species.

hyd., hydraul., *abbr.* Hydraulics.

hyd., hydros., *abbr.* Hydrostatics.

hy-dan'to-ate, 1 hai-dan'to-ēt; 2 hȳ-dăn'to-āt, *n.* *Chem.* A salt of hydantoic acid.

hy"dan-to'ic, 1 hai"dan-tō'ɪk; 2 hȳ"dăn-tō'ic, *a.* *Chem.* Of, pertaining to, or derived from hydantoin.
— **hydantoic acid,** a crystalline compound $(C_3H_6N_2O_3)$ formed by boiling hydantoin with barium hydroxid.

hy-dan'to-in, 1 hai-dan'to-in; 2 hȳ-dăn'to-ĭn, *n.* *Chem.* A colorless, crystalline, sweetish compound $(C_3H_4N_2O_2)$ derived from urea. [< Gr. *hydōr*, water, + ALLANTOIN.]

Hy-das'pes, 1 hai-das'pīz; 2 hȳ-dăs'pēṣ, *n.* **1.** The ancient name of Jehlam river, Punjab, India, where Alexander defeated Porus, 327 B. C. **2.** *Bib.* (Apocrypha). *Judith* 1, 6.

hy'da-thode, 1 hai'da-thōd; 2 hȳ'da-thōd, *n.* An epidermal cellular structure, as a gland, that exudes water. [< HYDATO- + Gr. *hodos*, way.]

hy'da-tid, 1 hai'də-tid; 2 hȳ'da-tĭd (XIII), *n.* **1.** An encysted vesicle containing an aqueous fluid, especially one formed by a larval tapeworm. **2.** An encysted larval stage of a tapeworm. [< Gr. *hydatis*, drop of water, < *hydōr* (*hydat-*), water.] **hy'da-tis‡.**— **hydatid disease,** echinococcosis.— **h. of Morgagni** (*Anat.*), a vesicular structure which, in the female, is suspended by a pedicle from the fimbriated extremity of the oviduct or the broad ligament, and in the male is situated between the tunica of the testicle and the upper globe of the epididymis, believed to be a vestige of the duct of Müller and the Wolffian body. **sessile hydatid‡.**— **hy"da-tid'i-form,** *a.* Having the form or character of a hydatid. **hy-dat'i-form‡.**— **hy"da-tid'i-nous,** *a.* Of, pertaining to, or having hydatids. — **hy"da-tig'e-nous,** *a.* Producing hydatids.

Hy"da-tin'i-dæ, 1 hai"da-tin'ɪ-dī; 2 hȳ"da-tĭn'i-dē, *n. pl.* *Helminth.* A family of illoricate ploiman rotifers, especially those with a transverse trochal disk, double wreath, malleate trophi, and furcate foot. **Hy-dat'i-na,** *n.* (t. g.) [< Gr. *hydatinos*, watery, < *hydōr* (*hydat-*), water.] — **hy-dat'i-nid,** *n.*— **hy-dat'i-noid,** *a.*

hy'da-tism, 1 hai'də-tizm; 2 hȳ'da-tiṣm, *n.* *Med.* The sound caused by the fluctuation of pus in an abscess. [< Gr. *hydōr* (*hydat-*), water.]

hy'da-to-, 1 hai'də-to-; 2 hȳ'da-to-. From the Greek *hydōr*, *hydatos*, water: a combining form, prefixed to various petrographical expressions to indicate origin by aqueous agencies.— **hy"da-to-gen'ic,** *a.* *Geol.* Derived from or modified by substances in a liquid condition: said of the genesis of ores and other minerals: contrasted with *pneumatogenic*.

hy'da-toid, 1 hai'də-teid; 2 hȳ'da-tŏid, *a.* **1.** Resembling water; aquiform. **2.** Of or pertaining to the aqueous humor. [< Gr. *hydatoeidēs*, < *hydōr* (*hydat-*), water; and see -OID.] — **hy'da-toid,** *n.* The membrane investing the aqueous humor of the eye; also, the aqueous humor.

hy"da-to-mor'phic, *a.* Modified in form through solution in water and crystallization therefrom.— **hy"da-to-pneu-mat'ic,** *a.* *Geol.* Formed or deposited through the joint agency of water and of gases or vapors.— **hy"da-to-pneu"ma-to-lith'ic,** *a.* Formed, as in certain ore deposits, by deposition from both heated waters and vapors.— **hy"da-to-py"ro-gen'ic,** *a.* Same as AQUEO-IGNEOUS.

hyde†, *v.* & *n.* Hide.

Hyde, 1 haid; 2 hȳd, *n.* **1. Anne** (3/12 1637–3/31 1671), a daughter of Lord Clarendon; queen of James II. of England; mother of Queen Mary II. and Anne. **2. Douglas** (1860–), an Irish Gaelic scholar; historian, poet, and folk-lorist; promoter of the movement to preserve the Irish language. **3. Edward,** see CLARENDON, EARL OF. **4. Henry,** see CLARENDON, EARL OF. **5. Thomas** (6/29 1636–2/18 1703), an English Orientalist and divine; a Persian scholar. **6. Arthur M.** (7/12 1877–), an American lawyer; U. S. Secretary of Agriculture, 1929– . **7.** A county in E. North Carolina; 596 sq. m.; county-seat, Swan Quartet. **8.** A county in central South Dakota; 875 sq. m.; county-seat, Highmore. **9.** A borough and market-town in Cheshire, England.

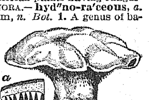
Hyde, Mr. In R. L. Stevenson's *Doctor Jekyll and Mr. Hyde*, the name borne by Doctor Jekyll when under the influence of a drug, which developed his evil personality. See JEKYLL.

Hyde Park. **1.** A suburb of Boston, Mass. **2.** A township and town, county-seat of Lamoille county, Vt. **3.** A park in Westminster, London, England; 1 1/2 by 3/4 m. **4.** A village in Hamilton county, O.

Hy"der-a-bad', *n.* Same as HAIDARABAD.

Hy'der-A'li, 1 hai'dər-ā'lī; 2 hȳ'der-ä'lī, *n.* (1728–12/7 1782). A regent of Mysore who fought against the British; father of Tippoo Sahib.

Hyd-na'ce-æ, 1 hid-nē'sɪ-ī; 2 hўd-nā'çe-ē, *n. pl.* *Bot.* A family of fungi of the order *Agaricales* and class *Basidiomycetes*. They are characterized by flat teeth or by spines or granules; the prickly fungi.— **hyd-na'ceous,** *a.*



Hyd"no-car'pus, 1 hid"no-kār'pus; 2 hўd"no-cär'pŭs, *n.* *Bot.* A genus of flacourtiaceous trees, natives of southeastern Asia. They have alternate leaves, flowers of separate sexes borne on different trees, and 1-celled fruit containing numerous seeds embedded in pulp. *H. anthelmintica* and *H. venenata* yield poisonous fruits whose seeds are used by East-Indian and Chinese doctors in the treatment of cutaneous diseases. [< HYDNUM + Gr. *karpos*, fruit.] — **hyd"no-car'pic,** *a.*— **hydnocarpic acid,** an acid $(C_{16}H_{28}O_2)$ that occurs as a glycerid in the oil obtained from the seeds of *Hydnocarpus kurzii* in India. It is homologous with chaulmoogric acid.

Hyd-noc'er-as, 1 hid-nes'ər-əs; 2 hўd-nŏç'er-as, *n.* *Paleon.* A genus of Upper Devonian sponges of the family *Dictyospongidæ*.

Hyd-no'ra, 1 hid-nō'rə; 2 hўd-nō'ra, *n.* *Bot.* A genus of root-parasitic fungus-like plants of the family *Hydnoraceæ*, of which the best-known species is *Hydnora africana*. From a creeping rhizome there are sent up large solitary flowers. See JACKAL-KOST under JACKAL. [< Gr. *hydneō*, nourish.]

Hyd"no-ra'ce-æ, 1 hid"no-rē'sɪ-ī; 2 hўd"no-rā'çe-ē, *n. pl.* *Bot.* A small family of South-African plants having fungus-like characteristics. See HYDNORA.— **hyd"no-ra'ceous,** *a.*

Hyd'num, 1 hid'num; 2 hўd'nŭm, *n.* *Bot.* **1.** A genus of basidiomycetous fungi in which the hymenium is on the surface of soft dependent spikes, hanging from the under surface of the pileus. Some of the species, as *H. repandum*, the hedgehog or spine mushroom, and *H. caputursi*, are edible. **2.** [h-] A plant of this genus. [< Gr. *hydnon*, eatable fungus.] — **hyd'noid,** *a.*

Hydnum repandum. a, vertical section of the pileus, showing spikes of the hymenium.

hy'dr-, 1 hai'dr-; 2 hȳ'dr-. From Gr. *hydōr*, water: a combining form, denoting wateriness, or in chemistry the presence of water or hydrogen.

Words beginning with this prefix will be found in alphabetical place, either singly or in groups.

hy'dra¹, 1 hai'drə; 2 hȳ'dra, *n.* [HY'DRAS OR HY'DRÆ, 1 -drī; 2 -drē, *pl.*] **1.** A calamity or misfortune springing from a multitude of sources; an evil of many phases and difficult of extirpation: so called from the Hydra of Greek mythology. See HYDRA².

The *Hydra* of the many-headed hissing crew.
DRYDEN *Threnodia Augustalis* st. 16.

2. *Zooph.* (1) A fresh-water polyp of the genus *Hydra*.

A hydra has the form of a cylindrical tube surrounded at the mouth with a circle of thread-like tentacles, by which it captures its prey, and is commonly found attached by its base on the under surface of the leaves of aquatic plants, etc. The hydra, like other low organisms, has the power of reproducing itself when artificially dissected, each part cut off developing into a perfect organism.

(2) The sexual bud or medusa of any hydroid. (3) [H-] A genus typical of *Hydridæ*. **3.** A hydrophoid sea-snake. **4.** A spirit-thermometer with an enlarged form of bulb, designed for quick registration. **5.** *Her.* A seven-headed dragon. [L., < Gr. *hydra*, Lernæan serpent, < *hydōr* (*hydr-*), water.]— **hy'dra-head"ed,** *a.* Having many heads; multifariously developed; self-multiplying and hard to suppress.

The huge *hydra-headed* subject of the social condition of London's poor.
HAROLD FREDERIC in *New-York Times* Dec. 27, 1891, p. 1, col. 1.

— **h.-tainted,** *a.* [Poet.] Poisonous.— **hy'dra-form,** *a.* Same as HYDRIFORM.

Hy'dra², *n.* **1.** *Gr. Myth.* The seven- or nine-headed water-serpent, inhabiting the Lernæan marshes of Argolis, slain by Hercules as one of his twelve labors. Two heads grew as fast as one was hewn off until he applied a firebrand to prevent their growth. **2.** A southern constellation occupying the quarter of the horizon below Cancer, Leo, and Virgo. See CONSTELLATION. **3.** An island E. of Morea, Greece; 20 sq. m. **4.** The chief town of Morea, on the northwestern coast.

Hy"dra-ca-ri'na, *n. pl.* *Arach.* A group of prostigmatous acaridans with aquatic habits, as *Hydrachnidæ*.— **hy'dra-ca"rine,** *a.*— **hy-drac'e-tin,** *n.* *Chem.* Acetyl phenyl hydrazin.— **Hy-drach'ni-dæ,** *n. pl.* *Arach.* A family of acaridans with subglobular body, short palpi, two eyes, and legs ciliate for swimming; water-mites. **Hy-drach'na,** *n.* (t. g.) — **hy-drach'nid,** *a.* & *n.*— **hy-drach'noid,** *a.*

hy-drac'id, 1 hai-dras'ɪd; 2 hȳ-drăç'id, *n.* *Chem.* An acid that contains no oxygen, as hydrochloric acid (HCl): so named to distinguish it from one formed from an oxid of an element, as hypochlorous acid (HClO). [< HYDR- + ACID.]

hy"dra-cryl'ic, 1 hai"drə-kril'ɪk; 2 hȳ"dra-crўl'ic, *a.* *Chem.* Of, pertaining to, or containing acryl and water. — **hydracrylic acid,** a sirupy liquid compound $(C_3H_6O_3)$, isomeric with lactic acid, which readily decomposes into acrylic acid and water. [< HYDR- + ACRYL.]

Hy-drac"ti-ni'i-dæ, *n. pl.* *Zooph.* A family of gymnoblastic hydroids with hydranths having a single whorl of filiform tentacles, colony unbranched, and hydrorhizæ of incrusting adherent tubules overlaid with cœnosarc. **Hy"drac-tin'i-a,** *n.* (t. g.) — **hy"drac-tin'i-id,** *a.* & *n.*— **Hy"drac-tin"i-oi'de-a,** *n. pl.* *Zooph.* A superfamily of gymnoblastic hydroids having the trophosome a colony of organically associated hydranths with a perisarc overlaid by cœnosarc.— **hy"drac-tin"i-oi'de-an** *a.* & *n.*— **hy'drad,** *n.* *Bot. Ecol.* A hydrophyte.— **hy-drad"e-ni'tis,** *n.* *Pathol.* Inflammation of a sweat gland.— **hy-drad"e-no'ma,** *n.* *Pathol.* A tumor caused by an excessive growth of the sweat glands.— **Hy"dra-deph'a-ga,** *n. pl.* *Entom.* A section of adephagous beetles having the hindmost legs flattened and fringed with hairs; a variety of water-beetle.— **hy"dra-deph'a-gan,** *n.*— **hy"dra-deph'a-gous,** *a.*—**hy'dra-gog,** *n.* *Med.* Any medicine that causes abundant watery evacuations. — **hy'dra-go"gal,** *a.*— **hy'dra-go"gy†,** *n.* The art of constructing aqueducts or artificial channels, or of conveying water in them.— **Hy-dra'les** *n. pl.* *Bot.* A former alliance consisting mainly of the pondweeds.— **Hy-dral'gæ,** *n. pl.* Same as ALGÆ.— **hy-dram'id** *n.* *Chem.* One of a series of solid crystalline compounds having the general formula N_2R_3 (in which R is any base) and derived from certain aldehydes, chiefly aromatic, by the action of ammonia.— **hy-dram'in,** *n*

Chem. One of a series or viscous alkaline bases formed artificially by the action of ammonia on ethylene oxid.—**hy-dram'ni-os**, *n. Pathol.* The presence of an unusual or excessive quantity of liquor amnii. **hy-dran'al-en**, *n.*

Hy-dran'ge-a, } hai-dran'ji-ə; ∄ hȳ-drān'ge-a, *n. Bot.* 1. A genus of trees and shrubs of the saxifrage family, with opposite usually serrate leaves and cymose clusters of perfect flowers, or with some of the outer individuals imperfect. *H. hortensis*, originally from China, is the common hydrangea or snowball of cultivation. *H. arborescens* is the American wild hydrangea, indigenous to the United States. 2. [h-] A plant of this genus. [< HYDR- + Gr. *angeion*, vessel, < *angos*, vessel.]—**climbing hydrangea**, a hardy climbing shrub (*Schizophragma hydrangeoides*) of the saxifrage family, a rapid grower, bearing white ray-garnea-like flowers.—**hy-dran'ge-ad**, *n. Bot.* A plant of the tribe *Hydrangeæ*.

Hy-dran'ge-æ-ous, } hai-dran'ji-ē'si-ə; ∄ hȳ-drān'ge-ē'-ə-ē, *n. pl. Bot.* A family of widely distributed trees and shrubs of the order *Rosales*. They have simple opposite leaves and perfect flowers, or the exterior clustered ones sterile. The carpels, 2 to 10 in number, are adnate to the calyx. There are 16 genera and about 80 species, all natives of temperate and tropical regions.—**hy-dran'ge-a'ceous**, *a.*

hy-dran'gin, } hai-dran'jin; ∄ hȳ-drān'gin, *n. Chem.* glucosid ($C_{18}H_{30}O_{11}$) occurring in *Hydrangea arborescens*.

hy'drant, } hai'drənt; ∄ hȳ'drənt, *n.* A discharge-pipe connected with a water-supply, especially one in a street for use in case of a fire, for watering the streets, etc., having a valve that leaves the pipe empty when not in use; a water-valve; fire-plug. [< Gr. *hydōr* (*hydr-*), water.]—**ball hydrant**, a hydrant having a valve formed by a ball pressed upward against a circular seat by the force of the water in the main.

A Hydrant. When the wood cover (*c*) is screwed down, as shown, the valve-chamber (*b*) is opened, permitting the escape of water and the head little depressed and inclined, from the inlet-pipe (*a*, *a*, *a*). The pipe to the discharge-pipes (*d*, *d*, *d*).

hy'dranth, } hai'dranth; ∄ hȳ'drənth, *n. Zoöph.* A proper nutritive hydroid zooid, or the part with the mouth and tentacles of such a zooid.

Hy'dra-o'tes, } hai'dra-ō'tēz; ∄ hȳ'dra-ō'tēs, *n.* Same as RAVEN.

hy'dra-pult, *n.* Same as HYDROPULT.—**hy-drar'gil-lite**, *n. Mineral.* 1. Gibbsite. 2. Wavellite.—**hy-drar'go-chlo'rid (e, n.** A double salt of mercuric chlorid with a chlorid of another base.—**hy-drar'gyr**, *n.* Quicksilver. **hy'drar-gire'**, —**hy-drar'gy-ri'a-sis**, *n. Pathol.* The morbid results produced by mercurial poisoning of the human system. **hy'drar-gyr'i-at**; **hy-drar'gyrism**; **hy-drar'gy-ro'sis**; **hy-drar'gyrism**; —**hy-drar'gyr'ic**, *a.* Of, pertaining to, or containing mercury. **hy-drar'gy-rat'**; **hy-drar'gy-rate**; —**hy-drar'gy-rol**, *n. Chem.* A reddish-brown crystallic compound, $(CH_3(OH)SO_2Hg)$, having a peppermint-like odor and employed as an antiseptic. It is less toxic than corrosive sublimate.—**hydrar'gy-rum**, *n.* Mercury: scientifically so called in pharmacy and formerly in chemistry. **hy'drar-gire'**; **hy'drar-gyre'**,—**hy'-drar-libro'sis**, *n. Pathol.* Dropsical effusion into the cavity of a joint; white swelling. **hy-drar'thrus**.—**Hy'dras-pid'i-de**, *n. pl. Zoöl.* A family of lizard-like serpents, the species having 9 plastral bones and a flaw of water and the head little depressed and inclined, from the inlet-**hy-dras'pis**, *n.* (e. g.) Hydrus. pipe to the discharge-pipes (*d*, *d*, *d*). **hy-dras'pi-did**, *n.* One of the Hydrasidæ.

hy-dras'tin, } hai-dras'tin; ∄ hȳ-dras'tin, *n. Chem.* 1. A white bitter crystalline alkaloid ($C_{21}H_{21}NO_6$) contained in the roots of goldenseal (*Hydrastis canadensis*), having tonic and febrifuge properties. **hy-dras'tine**, 2. A commercial mixture of this alkaloid with hydrastinin, used as a medicine by some eclectic physicians. [< HYDRASTIS.] —**hydras-lin'ic**, *a.* Pertaining to a transparent crystalline substance, obtained by fusing hydrastin chlorid with potassium hydroxid.—**hy-dras'ti-nin**, *n. Chem.* A crystalline base ($C_{11}H_{13}NO_2$) obtained from hydrastin by oxidation: employed as a substitute for hydrastin.—**hydras'tis-nine'**.—**hy-dras'ti-um**, *n.* Same as HYDRASTIN.

Hy-dras'tis, } hai-dras'tis; ∄ hȳ-dras'tis, *n. Bot.* A genus of herbs of the family *Ranunculaceæ*, embracing two species, *H. canadensis*, the goldenseal or yellow puccoon of North America, and an allied species from Japan. [< HYDR- + Gr. *drazō*, act.]

hy'drate, } hai'drēt; ∄ hȳ'drāt, *n.* HY'DRAT-ED; HY'-DRAT-ING.] *Chem.* To combine with water or its elements to form a hydrate. [< Gr. *hydōr* (*hydr-*), water.]

The purpose of water intermingling with flour is to combine with and *hydrate* the starch, to render the gluten more adhesive, and to moisten the minute particles of dry gluten, so as to cause them to cement together, and thus bind the whole into a coherent mass.
YOUMANS'*New Book Household Science*, p. 265, p. 258. [a. 1857.]

—**hydrated soap**, fill'd soap. See SOAP.

hy'drate, *n.* 1. A compound formed by union of the molecules of water (H_2O) with those of another body, or, more strictly, one in which there is no rearrangement of the atoms of the group H_2O: distinguished from a *hydroxid*; as, $BaO.H_2O$ is barium *hydrate*, and $Ba(OH)_2$ is barium hydroxid. Acids contain no water of crystallization, and also compounds containing the elements of water which are not in the hydroxyl form, as hydrochloric acid hydrate ($HCl+2OH$), or usually classed as hydrates.

It is often impossible to tell whether a given compound is an *hydrate* or an hydroxide. WATTS *Dict. Chem.*

2. A hydroxid: an obsolescent term. [< Gr. *hydōr* (*hydr-*), water.]

hy-dra'tion, } hai-drē'shən; ∄ hȳ-drā'shən, *n. Chem.* The act or process of causing a chemical compound to become a hydrate, especially to absorb the group H_2O, thereby forming a new compound; also, the state of being so combined. **hy'dra-ta'tion**.—**water of hydration**, the group H_2O, or water, as contained in a hydrate: water of crystallization.

These minerals as occurring in nature, . . . especially when they have been directly exposed to the weather, often, if not always, contain a small amount of water, in chemical combination (*water of hydration*).
S. W. JOHNSON *How Crops Feed* div. ii. p. 127. [c. 2. c. 1879.]

hy'dra-tro'le, } hai'dra-trō'lē; ∄ hȳ'dra-trō'lē, *n. Chem.* Designating a colorless acid ($CH_2CH(C_6H_5)CO_2H$) obtained from atropic acid by reduction.

hy-dra'ulic, } hai-drā'lik; ∄ hȳ-drā'lik, *a. Mining.* To treat (earthy deposits) by the process of hydraulic mining; as, to *hydraulic* the saprolite; to sluice; excavate by the agency of a stream of water.

hy-drau'lic, *a.* 1. Of or pertaining to hydraulics; involving the moving of water, or the force exerted by water or other liquids, conveyed mechanically through pipes or conduits; carrying or operating by water-power.

The Semites . . . have not left in the countries they inhabited any traces of such *hydraulic* works as the earlier races executed.
JAS. FERGUSSON *Hist. Arch.* vol. i, p. 69. In. M. & co. 1883.]

2. Denoting a mechanical device operated by the pressure resulting from forcing a body of water through a small aperture: as, a *hydraulic* brake. 3. Designating substances which harden under water and become impervious to its action; as, *hydraulic* cement, mortar, etc. [< F. *hydraulique*, < L. *hydraulicus*, < Gr. *hydraulikos*, pertaining to the water-organ, < *hydōr* (*hydr-*), water, + *aulos*, pipe, < *aēmi*, blow.]—**hy-drau'li-cal**;—**hydraulic forging** (*Mech.*), forging metal, heated to a welding temperature, by squeezing it in a hydrostatic press.—**h. grade**, a gauging line showing graphically the fall in pressure in a flowing liquid.—**h.-impulse ram**, same as HYDRAULIC RAM, 1.—**h. mean depth**, a form of measurement secured by dividing the area of any current of water by the length of the wetted perimeter.—**h. mining**, a method of mining in which a bank of gold-bearing earth or gravel is washed away by a powerful jet of water and carried into sluices, where the gold separates from the earth by its specific gravity.—**h. press**, a hydrostatic press.—**h. ram**. 1. An automatic device by which the fall of a comparatively large volume of water furnishes power to raise a part of a slightly greater than that of the source. Its action depends on the well-known law of mechanical forces that the effect produced by a body is as its weight multiplied into the velocity, its absolute force constituting the momentum. As a rule the efficiency of the ram is placed at two-thirds: so that 300 units of water falling from a height of 18 feet will raise 18 units of water to a height of only 200 feet instead of 300 feet as it theoretically should. Many rams can raise from 300 to 500,000 gallons of water a day.

Hydraulic Ram.

a, air-chamber; *b*, body; *c*, air and rain from the air; *d*, inner, or check-valve; *e*, waste-valve; *f*, pipe.

2. [*cap.*] The impetus-valve, located at the end of principle was first applied the supply-pipe (*f*). The water in England in 1772, but it was not patented till 1796, and in France. 2 pt. ii. The flow of water being checked the ram is hydrostatic in this direction, the check-valve press, or any ram operated (*d*) is forced open, the water passing by water-pressure.— **hy-** into the air-chamber (*a*) which acts **drau'lics**, *n.* By as an elastic cushion, forcing the water **hy-drau'lic-ist**, *n.* The prop- the tank or system. erty of hydraulic power.— **hy'-** through the delivery-pipe (*g*) to **drau-lic'ly**, *n.* The prop- the tank or system.

hy-drau'lic-ness, *n.* Hydraulic cement.—**hy-drau'lick-ing**, *n.* Hydraulic mining.

hy-drau'lics, } hai-drā'liks; ∄ hȳ-drā'liks, *n. pl.* 1. *Physics.* The science of liquids, especially water, in motion: sometimes applied to the whole science of hydrostatics, as denoting the practical application of that science. 2. *Engin.* The art that deals with moving water, the regulation of and protection against its natural action, its artificial conveyance through pipes or channels for useful purposes, and the mechanical utilization of its force; hydraulic engineering.

If the Romans had been better acquainted with the laws of *hydraulics*, they would not have neglected all the aqueducts which surround the ruins of their cities. DE TOCQUEVILLE *Democracy in America*, vol. pt. ii. bk. i, p. 15. [a. 1854.]

hy-drau'list, } hai-drā'list; ∄ hȳ-drā'list, *n.* One who studies or is expert in hydraulics. **hy'drau-li'cian**;

hy'dra-zide, *n. Chem.* A compound formed by replacing an atom of hydrogen in hydrazin with an acid radical.—**hy'dra-zin(es**, *n. Chem.* 1. A colorless stable alkaline gas ($NH_2.NH_2$) derived from diazo-acetic acid. 2. One of a known as hydrazin proper, or diamid, and the first member of one or more hydrogen atoms by another radical; as, phenyl *hydrazin* ($C_6H_5.NH.NH_2$). **hy'dra-zene**;—**hy'-dra-zets**, *n. Chem.* A salt of hydrazoic acid.—**hy-dra'zo-ben'zene**, *n. Chem.* A colorless crystalline compound ($C_6H_5NHNHC_6H_5$) obtained by the action of alcoholic ammonium sulfid on azobenzene.—**hy-dra'zo'ic**, *a. Chem.* Of or pertaining to hydrazoic acid.—**hydrazoic acid**, (*Chem.*), a colorless, very toxic acid (HN_3), obtained by the action of nitrous acid on sodium amid or of nitrous acid on hydrazin sulfate, explosive with great violence when heated. **hydronitric acid**;—**hy'dra-zone**, *n. Chem.* One of a class of organic compounds constituted according to the general formula $R'CH:NNHR$ or $R'C:NNHR$, and obtained by the action of a hydrazin on a carbonyl radical.—**hydra-zul'min**, *n. Chem.* A black substance obtained by combining cyanogen and ammonia in the dry state.—**hy'dre-dem'ma**, *n. Pathol.* A swelling due to accumulation of watery fluid in the cellular tissue. **hy'dre-de'ma**.

hy-dre'mi-a, } hai-drē'mi-ə; ∄ hȳ-drē'mi-a, *n. Pathol.* A watery state of the blood, the serous portion being in excess of the normal. [< HYDR- + Gr. *haima*, blood.] **hy-dra'mi-a**.—**hy-dre'nic** or **-dre'mic** *a.*

hy'dre-nen'ceph-a-loid, *n. Pathol.* Congenital hernia of a hydrocephalic brain projecting through a fissure of the cranium, the scalp forming the hernial sac.—**hy'dren-ceph'a-loid**, *a.* Resembling hydrencephalus.—**hy'dren-ceph'a-lus**, *n. Pathol.* A congenital hydrocephalous condition of the brain. **hy-dren'ce-phal'**.—**hy-dren'ce-phal'ic**, *a.* **hy'dren-ceph'a-lus**, *n. Pathol.* Acute hydrocephalus: water brain fever; Whytt's disease. **hy-dren'ter-o-cele**, *n. Pathol.* Intestinal hernia, the sac of which contains watery fluid. **hydres'cu-lin**, *n. Chem.* A substance obtained by mixing sodium amalgam and myth.

Hydra.

Women with hydrin drawing water at the sacred fountain of Callirrhoë. (From a Greek black-figured hydria, British Museum.)

hy'dri-a-l, } hai'dri-ə-l or hid'ri-ə-l; ∄ hȳ'dri-a-l or hȳ'di-a-l, *n.* [-s, 1-2 s-5, pl.] (*Class. Antiq.*) A vessel for carrying water, having a large body and narrow neck, with handles at the sides and a larger one at the back.—**hy'dri-ad**, *n. Gr. Myth.* A naiad or water-nymph.

hy'dri-at'ric, *a. Pathol.* Same as HYDROPATHY. [< HYDR- + Gr. *iatrikos*, curative.]—**hy-dri'a-try**, *n. Pathol.* Hydropathy.—**hy'dri-at'ric**, *a.*—**hy'dri-at'rist**, *n.*

hy'dric, } hai'drik; ∄ hȳ'drik, *a.* 1. *Chem.* Of, pertaining to, or containing hydrogen in combination. 2. Of or pertaining to water.

hy'drics, } hai'driks; ∄ hȳ'driks, *n.* [Rare.] *Physics* The science that treats of water.

hy'drid, } hai'drid, -drəd or -drəd; ∄ hȳ'drid, -drid or -drəd, } -drid, *n.* A binary compound of hydrogen; a compound of hydrogen with another element or compound radical acting as an element.—**nitrogen hydrid**, azotmid or hydrazoic acid: an erroneous name.—**palladium h.**, a singular combination produced by heating the metal palladium in hydrogen gas when it absorbs some hundred times its own bulk. The phenomenon is only partially understood by chemists.—**pelargyl h.**, same as NONANE.

hy'drid'e, *n.* One of the *Hydridæ*.

hy'drid'i, *n. Astron.* A meteor of a shower having its radiant in the constellation Hydra.

hy'dri-de, } hai'dri-dē; ∄ hȳ'dri-dē, *n. pl. Zoöph.* A family of eleutherolabiate hydroids, especially those having filiform tentacles round the mouth, and occurring in fresh water. [< HYDRA.]

hy'dri-form, } hai'dri-fôrm; ∄ hȳ'dri-fôrm, *a. Zoöph.* Having the form of a hydra. [< HYDRA + -FORM.] **hy'dra-form**†.

hy'drin, } hai'drin; ∄ hȳ'drin, *n. Chem.* One of a class of esters of polyatomic alcohols obtained by substituting one or all hydroxyl groups by halogen. [< HYDR-.]

hy'dri-od'ic, } hai'dri-od'ik; ∄ hȳ'dri-ōd'ic, *a. Chem.* Of, pertaining to, or containing hydrogen and iodin. [< HYDR- + IODIC.]—**hydriodic acid**, a colorless, suffocating gas (HI), soluble in water, formed by the union of hydrogen and iodin.—**hy'dri-o-date**, *n.* A salt of hydriodic acid: an iodid.—**hy'dri-od**, *n. Chem.* Any compound of hydriodic acid with a base. **hy-dri'o-dide**.—**triethylamine hydriodid**, the product resulting from the combination of triethylamin and hydriodic acid.

hy'dri-o-men'ſ-dæ, } hai'dri-o-men'i-dē; ∄ hȳ'dri-o-men'i-dē, *n. pl.* A large family of lepidopterous moths, allied to the geometrids, including many well-known species, as the sculloshield moth (*Coscinocera hammondi*), with yellow wings marked with fine zigzag lines, and the beggar-moth (*Euclysia mendica*), with yellowish-white, almost transparent, wings.

hy'dri-on, } hai'dri-on; ∄ hȳ'dri-on, *n. Chem.* Hydrogen in the ionic state.

hy'dro, *n.* [Colloq., Gt. Brit.] Same as HYDROPATHIC, *n.*

hy'dro-, } hai'dro-; ∄ hȳ'dro-. From Greek *hydōr*, water: a combining form. In chemistry it is prefixed to compounds containing hydrogen, or one of the groups hydroxyl (HO) or water (H_2O) in either atomic or molecular combination.

Used as an inseparable prefix with any of the following words, it designates a compound of slight importance and resembling the original compound:

acridin	bilirubin	ethenamid	naphthol
anisoin	carbostyril	cotarnin	phlorone
anthracene	carotin	cotoin	picolin
benzamid	celestin	coumarin	quinin
benzoin	chinone	gallein	quinone
berberin	cinchonin	isatin	toluquinone

It is used in the same sense as an inseparable prefix with the following adjectives:

cinnamic	fluoboric	muconic	sulfurous
cinnamic	fluosilicic	phthalic	telluric
croconic	meconic	piperic	xanthic
ferricyanic	mellitic	selenic	
ferrocyanic	molybdic	sorbic	

Prefixed to the names of minerals, it indicates the presence of water of hydration; as, *hydroboracite*; *hydrocerusite*; *hydroglobertite*; *hydromagnesite*; *hydrotalcite*.—**hydro'a-a**, *n. Pathol.* Any form of dropsical effusion, such as eczema, shingles, or sudamina.—**hy'dro-ac'ri-din**, *n. Chem.* A white crystalline substance formed by mixing hydriodic acid, phosphorus, and acridin.—**hydro-ac'ri-dinet**.—**hy'dro-ad'e-ni'tis**, *n. Pathol.* Inflammation and suppuration of the sweat-glands. **hi'dro-ad'e-ni'tis**.—**hy'dro-a-cer'le**, *a. Pathol.* Characteristic of an accumulation in a cavity of body hair air tone: said of the sound given on auscultation.—**hy'dro-a'er-o-plane**, *n.* An aeroplane fitted with devises specially adapted for alighting upon, traveling over, or rising from the surface of the water. **hy'dro-air'planet**.—**hy'dro-al'co-hol'ic**, *a.* Consisting of a mixture of water and alcohol.—**hy'dro-a-nis'o-in**, *n. Chem.* A white crystalline substance ($C_6H_4(OH)CH(OH)CH(OH)C_6H_4OCH_3$), formed by treating anisic aldehyde with sodium amalgam.—**hy'dro-an'thra-cene**, *n. Chem.* A transparent crystalline substance, $C_{14}H_{12}$, which is obtained by treating anthracene with sodium amalgam, or with hydriodic acid and phosphorus.—**hy'dro-ap'a-lite**, *n. Mineral.* A milk-white hydrous variety of apatite.—**hy'dro-ar'sen-ic-ous'ness**, *n. Chem.* Designating any aromatic compound prepared from another by the addition of hydrogen.—**hy'dro-a'mos-pher'ic**, *a.* Of or pertaining to both air and water.—**hy'dro-ba-rom'eter**, *n.* An instrument for determining the depth of a body of water by its pressure.—**Hy'dro-bat'i-dæ**, *n. pl. Ichthy.* Same as *Hydrida*. 2. *Ornithol.* Same as HYDROBEN-**zo'le**, *a. Chem.* Designating a class of compounds resulting from the addition of hydrogen to benzole-acid derivatives.—**hy'dro-ber'be-rin**, *n. Chem.* A white crystalline compound ($C_{20}H_{21}NO_4$), formed, together with oxyberberin, by treating berberin with alkali. **hy'dro-ber'-be-rinet**.—**Hy'dro-bi'ſ-dæ**, *n. pl. Conch.* A family of holostomatous pectinibranchiate gastropods, typified by the genus, often united with *Rissoidæ*, but with no cirri on the operculigerous lobe. **Hy-dro'bi-a**, *n.* (t. g.)—**hy-dro'bi-lin**, *n.*—**hy-dro'bi-lol**, *n.*—**hy'dro-bil'ſ-a'ri-a**, *n. Chem.* A reddish pigment resulting from the treatment of a solution of bilirubin in dilute alkali with sodium amalgam. It is present in feces as a coloring-matter.—**hy'dro-bi-o'sis**, *n.* The development of low organic forms in fluids.—**hy'dro-bleph'a-ron**, *n. Pathol.* Dropsical swelling of the eyelid.—**hy'dro-bo'ra-cite**, *n. Mineral.* A fibrous hydrated calcium and magnesium borate ($CaMgB_6O_{11}+6H_2O$), that crystallizes in the monoclinic system.—**Hy'dro-bran'chi-a'ta**, *n. pl. Conch.* The opisthobranchiate gastropods. **Hy'dro-bran'chi-a†**.—**hy' dro- branch**, *n.*—**hy'dro-bran'chi-ate**, *a.*

Other words beginning with this prefix will be found in alphabetical place, either singly or in groups.

hy'dro-bro'mate, } hai'dro-brō'māt; ∄ hȳ'dro-brō'māt, *n.* A salt of hydrobromic acid; a bromid. **brom-hy'drate**.

hy'dro-bro'mic, } hai'dro-brō'mik; ∄ hȳ'dro-brō'mic, *a. Chem.* Of, pertaining to, or containing bromin in combination with hydrogen.—**hydrobromic acid**, a colorless pungent gas (HBr) formed by the union of hydrogen and bromin. Its liquefies at −67° C., is soluble in water, and a ten per cent. solution (*U. S. Pharm.*) is used in medicine.—**hy'dro-bro'mid**, *n. Chem.* A compound of hydrobromic acid and a basic element or radical. **hy'dro-bro'mide**†.

hy'dro-cam'phene, *n. Chem.* A crystalline hydrocarbon ($C_{10}H_{18}$), obtained by the action of sodium on the

hydrochlorid of turpentine-oil.— **Hy"dro-cam'pi-dæ,** *n. pl. Entom.* A family of pyralid moths. **Hy"dro-cam'pa,** *n.* (t. g.) — **hy"dro-cam'pid,** *a. & n.*— **hy"dro-cam'poid,** *a.* — **hy"dro-car'bide,** *n. Chem.* A hydrocarbon.

hy"dro-car'bon, [hai"dro-kär'bun; 2 hȳ"dro-cär'bon, *n.* One of a class of compounds that contain hydrogen and carbon only. Such compounds and their derivatives are very numerous, and constitute the whole of organic chemistry known as organic chemistry. The hydrocarbons may be either aliphatic or aromatic. They occur in homologous series, as the paraffins, olefins, acetylenes, benzene series, etc. As a rule, the lower members of such series are gases at ordinary temperatures; but, as the number of carbon atoms increases, they become liquids or solids. Compare CHEMISTRY.— **hy"dro-car'bo-ceous,** *a.* Of, pertaining to, or containing a hydrocarbon. **hy"dro-car-bon'ic†; hy"dro-car'bo-nous†.**— **hy"dro-car'bo-nate.** I. *a.* Same as HYDROCARBONACEOUS. II. *n.* I. *Chem. & Mineral.* An acid carbonate or one of hydrogen with 2 mg al; as, *hydrocarbonate* of magnesia. 2†. Any hydrocarbon, as carbureted hydrogen gas.

hy"dro-car'bu-ret†, *n. Chem.* 1. Carbureted hydrogen. 2. A hydrocarbon.— **hy"dro-car'di-a,** *n. Pathol.* Same as HYDROPERICARDIUM.— **hy"dro-car'do-ite,** *n. Chem.* A transparent crystalline substance ($C_{18}H_{36}O$), very similar to cholesterol, which is obtained from carrots. **hy"dro-car'o-tin,**.— **Hy"dro-car'y-a-ce-æ,** *n. pl.* Same as THALASSIACEÆ.— **hy"dro-ceph'a-lal,** *a.* Of, pertaining to, or characterized by hydrocephalus.— **hy"dro-ceph'a-lic,** *a. Zoöl.* In hydrozoans, the confluence of the mouth and stomach. Compare HYDROCOPE.— **hy"dro-ceph'a-li"tis,** *n. Pathol.* Acute brain fever, with watery effusion; dropsy of the brain.

— **hy"dro-ceph'a-lo-cele,** *n. Pathol.* Same as **hy"dro-ceph'a-loid,** *n. Pathol.* Resembling hydrocephalus. **hy"dro-ceph'a-loid†; hy"dro-ceph'a-lous†.**

hy"dro-ceph'a-lus, [hai"dro-sef'a-lus, -kef'-; 2 hȳ"dro-cĕf'a-lŭs, *n. Pathol.* An accumulation of watery fluid within the ventricles or between the membranes of the brain. In chronic hydrocephalus the head becomes greatly distended, idiocy, as a result, usually supervenes, and convulsions may accompany it. It is an infantile disease, but persons advanced in years have been known to suffer from it.

She died of *hydrocephalus* internus, as the doctors often supposed that the premature expansion of the intellect in cases of that class is altogether morbid. DE QUINCEY *Opium-Eater, Suspiria* pt. i, p. 107, notes. *tr. a.* s. 1854.]

[< Gr. *hydrokephalon,* < *hydōr* (*hydr-*), water, + *kephalē,* head.] **hy"dro-ceph'a-ly†.— internal hydrocephalus,** water brain fever or Whyt's disease: an accumulation of water within or on the brain, consequent usually on tubercular disease of the investing membranes: observed particularly during childhood and very acute, often proving fatal in a few hours.

hy"dro-ce-ram'ic, *a.* Describing porous pottery, such as the goglet, through which water exudes and causes coolness by evaporation.— **hy"dro-ce-ram'ics,** *n. pl.* The art of making lead carbonate crystallizing in the hexagonal system.— **hy"dro-ch'ra-tod,** *n.* Any plant of the natural order *Hydrocharitaceæ.*— **Hy"dro-cha-ri'da-ceæ,** *n. pl.* Same as VALLISNERIACEÆ.— **Hy"dro-cha-ri'da-ce-æ†; Hy"dro-cha-rid'e-æ; Hy"dro-char'i-din'e-æ; Hy"dro-char'i-da'ceous,** *a.*— **hy"dro-cha-rid'an,** *a. Phytogeog.* Able to swim freely, either upon or beneath the water, or emerging from the surface of, the water.— **Hy-droch'a-ris,** *n. Bot.* A genus of herbs of the family *Vallisneriaceæ,* the only species being *H. morsus-ranæ,* the frog-bit.— **Hy"dro-char'i-ta'ceæ,** *n. pl.* The *Vallisneriaceæ.*— **hy"dro-char'i-ta'ceous,** *a.*— **Hy"dro-chel'i-don,** *n. Ornith.* A genus comprising the black terns.— **hy"dro-chil'none,** *n. Chem.* Hydroquinone.— **hy"dro-chlo'rate,** *n. Chem.* A salt of hydrochloric acid. 2. A hydrochlorid.— **hy"dro-chlor-au'ric,** *a. Chem.* Chlorauric.

hy"dro-chlo'ric, [hai"dro-klō'rik; 2 hȳ"dro-clō'ric, *a. Chem.* Of, pertaining to, or containing chlorine in combination with hydrogen. **chlor-hy'dric†; chlo"ro-hy'dric†; chlo-ry'dric†.**

— **hydrochloric acid,** a colorless, corrosive, gaseous compound (HCl), exceedingly soluble in water, in which form, generally under the trade name of *muriatic acid,* it is largely used in manufactures. It is an important by-product in the manufacture of sodium sulphate by the action of NaCl on H_2SO_4 at — 105° C., and at 112.5° it solidifies to a crystalline mass which is a non-conductor of electricity. When liquefied it is a weak solvent, and, in the form of solution of ammonia, does not attack the metals. It is usually obtained from the action of strong sulfuric acid upon common salt, the resulting gas being purified by passing it through water. The acid, as used commercially, is a strong solution, whose yellow color is due to impurities. It can be formed by the union of chlorin and hydrogen when exposed to a strong light, or if a flame be approached to the vessel or an electric spark passed through the gases, when the combination takes place with a violent explosion. *Antidote:* water, lime, or magnesia. It is the only known compound of chlorin and hydrogen, and as a gas occurs in a natural state in the exhalations from active volcanoes, especially those from Vesuvius.

hy"dro-chlo'rid, [hai"dro-klō'rid; 2 hȳ"dro-clō'rid, *n. Chem.* A compound produced by the union of hydrochloric acid with an element or radical; as, aniline *hydrochlorid* ($NH_2.C_6H_5HCl$). **hy"dro-chlo'ride.**

hy"dro-chlor"pla-tin'ic, *a.* Same as CHLOROPLATINIC, etc.

Hy"dro-chœr'i-dæ, *n. pl. Mam.* A family of large hystricoidean rodents having the third molars very long and with many transverse lamine, as capybaras. **Hy"dro-chœ'rus,** *n.* (t. g.) — **hy"dro-chœ'rid,** *n.*— **hy"dro-chœ'roid,** *a. & n.*

— **Hy"dro-chœ-ri"næ,** *n. pl., Mam.* The *Hydrochœridæ* as a subfamily of *Cavidæ.*— **hy"dro-chœ'rine,** *a. & n.*— **hy"dro-chol"e-cys'tis,** *n. Pathol.* Dropsy of the gall-bladder.— **hy"dro-chore,** *n. Phytogeog.* A plant distributed by means of water, as by streams and ocean currents.— **hy"dro-cin'cho-nin,** *n. Chem.* Cinchotin. **hy"dro-cin'cho-ninet,**.— **hy"dro-cin-nam'ic,** *a. Chem.* Pertaining to hydrogen and cinnamic acid in combination.— **hydrocinnamic acid,** a transparent crystalline substance ($C_6H_5CH{=}CHCOOH$) obtained from cinnamic acid by reduction with nascent hydrogen; occurs among the putrefactive products of albumin, oxeumin, and storax.— **hy"dro-cin'na-mid(e,** *n. Chem.* A transparent substance obtained by treating cinnamon oil with ammonia.— **hy"dro-cir'so-cele,** *n. Pathol.* Varicocele with decomposition of the effused blood.— **hy"dro-cla'di-um,** *n. Zoöph.* One of the branches of a plumularian which bear the hydrotheca.— **hy"dro-clas'tic,** *a. Geol.* Same as AQUEOUS.— **hy"dro-cleis,** *n. pl.* Same as CRYPTOCLEIS.— **hy"dro-cleys,** *n. Bot.* A small genus of tropical American aquatic plants of the family *Butomaceæ,* with tuberous rootstocks, long-stalked, radical, lanceolate, or ovate leaves, and large yellow flowers, in umbels on a short scape. In cultivation they are known as water-poppies.— **hy"dro-co-bal"ti-cyan'ic,** *a. Chem.* Same as **hy"dro-cole,** *n. Zoöl.* That part of the embryo of an echinoderm which gives rise to the water-vascular system supplying the tube-feet.— **hy"dro-col'li-din(e,** *n. Chem.* A ptomain ($C_8H_{11}N$) resulting from putrefaction of albumin.— **hy"dro-co'ni-on,** *n. An* apparatus for reducing a liquid to a fine spray, used in the medical treatment of throat; an atomizer.— **hy"dro-cop'ra,** *n.* The pedunole of a hydrocoan.— **Hy"dro-co-ra'ti-a,** *n. pl. Zoöph.* An order or suborder of coralligenous hydroids having a skeleton formed by calcareous coral permeated by coenosarcal tubes from which project polyps, as in the genus *Millepora.* **Hy"dro-cor'al-li'næ,**.— **hy"dro-co-ral'li-an, hy"dro-cor'al-line** (es, *a. & n.*— **hy"dro-cor'al-lin,** *n. Chem.* A ptomain ($C_{10}H_{13}N$) found in decomposed tissue, derived from the culture-products of some bacteria on peptone agar, and existing in microscopic crystals.— **Hy"dro-cor'ise,** *n. pl. Entom.* A subdivision of heteropterous insects, especially those with short antennæ concealed in subocular cavities, and adapted for swimming, as in *Notonectidæ* and *Nepidæ.*

hy"dro-cor'ses†; Hy"dro-cor'i-sæ.— **hy"dro-co"san,** *a. & n.*— **hy"dro-co-tar'nin,** *n. Chem.* An alkaloid ($C_{11}H_{13}NO_3$) derived from opium, and used as an oxytoxic.

— **hy"dro-co'to-in,** *n. Chem.* A pale-yellow crystalline compound ($HOC_6H_3(CO)_2C(OCH_3)CO$) obtained from oak-bark.— **Hy"dro-cot'y-le,** *n. Bot.* A large and widely distributed genus of herbs of the family *Apiaceæ,* with palmately nerved or lobed leaves and small greenish-white flowers: popularly known as *water-pennyworts.*— **hy"dro-cou-ma'ric,** *a. Chem.* Designating one of three isomeric acids isolated from formic acid by sodium, and obtained from the corresponding coumaric acids are reduced. **hy"dro-cu-mar'ic†.**— **hy"dro-cou'ma-rin** (es, *n. Chem.* A white crystalline substance ($C_9H_8O_2$) obtained by the distillation of anhydrohydrocoumaric acid. It is also called *coumarin.*— **hy"dro-cro-con'ic,** *a.* Applied to a yellowish-brown acid obtained by treating croconic acid with hydriodic acid. Its salts are mostly red.— **hy"dro-cu'pre-in,** *n. Chem.* A brownish-white substance prepared by treating curcumin with sodium amalgam.

hy"dro-cy'a-nate, [hai"dro-sai'a-nēt; 2 hȳ"dro-cȳ'a-nāt, *n.* A salt of hydrocyanic acid.

hy"dro-cy-an'ic, [hai"dro-sai-an'ik; 2 hȳ"dro-cȳ-ăn'ic, *a. Chem.* Of, pertaining to, or containing cyanogen in combination with hydrogen. **cy"an-hy'dric†.**— **hydrocyanic acid,** an unstable, volatile, colorless, and extremely poisonous liquid compound (HCN) formed by decomposing metallocyanids with hydrochloric acid. It is only slightly dissociated in water, and has a characteristic odor resembling that of bitter almonds.

Pure hydrocyanic acid is one of the most powerful and rapid of known poisons. When a small quantity of the vapour of the pure substance is drawn into the lungs instant death ensues.

HOLMES *and* BLYTHE *Chemistry of Common Life,* vol. i, p. 305.]

hy"dro-cy'a-nid(e, *n. Chem.* A compound produced by the union of hydrocyanic acid with an element or radical.— **hy"dro-cy'a-nite,** *n. Mineral.* A pale-green, brownish, or yellowish translucent aggregate of crystals, which crystallizes in the orthorhombic system.— **hy"dro-cy'a-nu"ric,** *a. Chem.* Designating the acid ($C_3H_3N_3O_3$) obtained by heating cyanuric acid.— **hy"dro-cy'clic,** *a.* Designating a closed vehicle designed for use on water and which is propelled by the passenger treading cranks which revolve as in a bicycle.— **hy"dro-cy'clist,** *n.*— **hy"dro-cy'clo-sis,** *n. Pathol.* Dropsy containing water. 2. *Zoöph.* One of the saccular coenosarcal processes borne with groups of gonophores on a common stem in siphonophores.— **hy"dro-cys'tic,** *a.*— **hy"dro-cys'tis,** *n. Pathol.* A cyst containing a serous or watery fluid.— **hy"dro-cyt'o-sis,**.— **Hy"dro-da-mal'i-dæ,** *n. Zoöl.* Same as RHYTINIDÆ.— **Hy"dro-dic'ty-on,** *n.* 1. *Bot.* A genus of fresh-water algæ of the family *Chlorophyllaceæ,* the species forming *utriculatum,* the water-net of North America and Europe. 2. A form of bacterium occurring in net-like aggregates.— **hy"dro-dic'ty-oid,** *a. Bot.* Like the genus *Hydrodictyon.*— **hy"dro-dol'o-mite,** *n. Mineral.* A yellowish-white hydrated calcium-magnesium carbonate from Vesuvius, probably a mixture of hydromagnesite and calcite.— **hy"dro-dra'ba,** *n.* A kind of cloud that glides on the water by the use of its wings, planes or otherwise.— **Hy"dro-drom'i-ca,** *n. pl. Entom.* A section of trochalopodous bugs, especially those with interposed claws.— **hy"dro-drom'ic,** *a.*

hy"dro-dy-nam'ic, [hai"dro-dai-nam'ik; 2 hȳ"dro-dȳ-năm'ic, *a.* Of or pertaining to hydrodynamics; relating to the force or pressure of water or other fluids. **hy"dro-dy-namt'ic†.**

hy"dro-dy-nam'ics, [hai"dro-dai-nam'iks; 2 hȳ"dro-dȳ-năm'ics, *n.* The branch of mechanics that treats of the dynamics of fluids. Like dynamics, it has two divisions, in its more restricted sense it is considered as treating of the laws of motion of liquids, as studied theoretically or empirically; when used as a general term it includes *hydraulics* and *hydrostatics,* as well as *aerostatics* and *pneumatics.* See DYNAMICS. **hy"dro-ki-net'ics†.**

hy"dro-dy"na-mom'e-ter, *n.* An instrument for determining the velocity of a fluid.— **hy"dro-e-lec'tric,** *a.* Same as **hydro-el'um,** *n.* [<L.*a, pl.*] *Zoöph.* A saccular chamber or cavity of the swimming-bell into which the coenosare is retractile in calycophoræ.— **hy"dro-em'py-sis,**.— **hy"dro-e-con'o-mics,** *n.* That branch of economics that treats of waters and their uses, of water-rights, etc.; the science of the economic uses of water.

hy"dro-e-lec'tric, [hai"dro-e-lek'trik; 2 hȳ"dro-e-lĕc'tric, *a.* Of or pertaining to electricity developed by water power or by the escape of steam under high pressure, etc.— **hy"dro-e-lec'tric"i-ty,**.

— **hydroelectric bath** (*Therapeut.*), a bath in which the water is used as the conducting medium for applying electric currents to the patient.— **h. machine,** a machine for developing electricity by the friction of condensed steam against the walls of a shallow orifice or the surface of water.

— **hy"dro-e-lec'tri-za'tion,** *n. Therapeut.* The use of water and electricity in combination as a remedial agent.

hy"dro-e-lec'tro-ther'mic, *a.* Pertaining to a method of welding by electricity invented by Slavianoff. **hy"dro-ex-tract',** *n.* To dry (yarn, etc.) by means of the hydro-extractor.— **hy"dro-ex-trac'tor,** *n.* An apparatus for removing moisture from yarns, cloths, or other material, in process of manufacture.— **hy"dro-fer'ro-cy'a-nate,** *n.* Ferrocyanid.— **hy"dro-fer"ro-cy-an'ic,** *a.* Same as FERROCYANIC.— **hy"dro-flu"o-bo'ric,** *a.* Same as FLUOBORIC.

hy"dro-flu-or'ic, [hai"dro-flū-or'ik; 2 hȳ"dro-flu-ŏr'ic, *a. Chem.* Of, pertaining to, or containing a compound of fluorin and hydrogen.

— **hydrofluoric acid,** a volatile, colorless, hygroscopic corrosive fluid compound (HF) formed by decomposing metallic fluorids. The acid obtained is a very dangerous substance, and requires extreme care in handling, as death may result from inhalation of the fumes. A drop on the skin will produce an obstinate sore. From its great volatility, the anhydrous acid can only be kept in platinum bottles, closed by a platinum plate coated with paraffin. When dry it will not act upon glass, but when any moisture is present its readily attacks silica, hence is used for etching on glass.

hy"dro-flu'or-id, *n. Chem.* A compound of a basic element or radical with hydrofluoric acid.— **hy"dro-flu"o-sil'i-cate,** *n. Chem.* A salt of hydrofluosilicic acid.

hy"dro-flu"o-sil-ic'ic, *a.* Fluosilicic.— **hy"dro-flu-o-si-lic'ic acid.** Same as FLUOSILICIC ACID.

hy"dro-frank'lin-ic, *n. Mineral.* Chalcophanite.— **hy"dro-fuge,** *n. Zoöl.* Impervious to water, as the plumage of aquatic birds; shedding water.— **hy"dro-gal-van'ic,** *a.* Pertaining to galvanic currents transmitted through liquid.

— **hy"dro-gel,** *n. Biol.* As in the plasm the interstices among the gelatinous particles are filled with water.

hy"dro-gen, [hai"dro-jen; 2 hȳ"dro-gĕn, *n. Chem.* A colorless, odorless, tasteless, gaseous element, the lightest liquefies under great pressure, and is a very low temperature. See ELEMENT. Hydrogen is the lightest substance known, being $14\frac{1}{2}$ times lighter than air and 11,160 times lighter than water, hence it is used as a standard in comparing atomic weights and volumes. It is very abundant in nature, occurring as a constituent of water, of which it forms 11.19 per cent., and in all animal matter. In its elemental state it occurs in large quantities in the sun and stars, but only in very small amounts upon the earth. It is readily isolated by decomposing its compounds, and, like a metal, serves as a replaceable base in salts, forming acids, which are salts of hydrogen. Hydrogen burns with a hot, blue flame, the heat formed upon burning one gram of it was being 33,950 units. The gas is absorbed by such metals as palladium. *Hydrogen* is an electropositive element and exists as a positive ion when acids become dissociated. As a gas it is used in inflating balloons, in a compressed state, for producing low temperatures; and in the nascent state, for reducing chemical compounds.

Compounds of hydrogen with metallic radicals, of phosphorus, sulfur, etc., equivalent to hydrids, are called **arseniureted hydrogen, carbureted h., phosphoreted h., sulfureted h.,** etc., the various elements it forms compounds, for which see phrases.

Hydrogen, presented to students of chemistry for a century as one of the indivisible elements, was shown to be only a mixture of *parahydrogen* and *orthohydrogen* by having different melting and boiling points, different heat conductivities, and different spectra. *New York Times* Sept. 14, 1899, p. 26.

— **bicarbureted hydrogen, "heavy carbureted h.,** same as ETHYLENE.— **cosmic h.,** the substance to which is due a series of lines, in the spectrum of the star Zeta Puppis, different from those of hydrogen, so named by Pickering.— **h. bromid,** hydrobromic acid.— **h. chlorid,** hydrochloric acid, especially when non-ionized.— **h. cyanid,** hydrocyanic acid.— **h. dioxid** (or **peroxid**), hydrogen dioxid (H_2O_2) having a chlorous odor. Its aqueous solutions are important as antiseptics and bleaching agents, the usual solution being a slightly acid one containing about 3 per cent. by weight of pure hydrogen dioxid, which is equivalent to nearly 10 volumes of available oxygen. It is made by treating barium dioxid with dilute acids. Solutions of hydrogen dioxid when brought in contact with platinum in violent frothing, oxygen gas being liberated; hence they are valuable in removing the false membrane of diphtheria. In nature, hydrogen dioxid exists in the atmosphere, in the small amounts, especially after heavy storms. **h. peroxid.**— **h. disulfid,** a yellow oily liquid prepared from diluted hydrochloric acid and a solution of calcium polysulfid.— **h. fluorid,** hydrofluoric acid.— **h. iodid,** hydriodic acid.— **h. monoxid,** same as HYDROGEN OXID.— **h. nitrate,** nitric acid.— **h. oxid,** water, H_2O: a technical name.— **h. peroxid,** hydrogen dioxid.— **h. phosphid,** phosphoretted h.— **h. protoxid,** hydrogen oxid.— **h. selenid,** a colorless, irritating, and toxic gas, the hydrogen compound of selenium, H_2Se, corresponding to H_2S.— **h. sesquisulfid,** a yellow acid.— **h. silicid,** the hydrogen compound of silicon (SiH_4) corresponding to methane. It is a spontaneously inflammable gas, as commonly prepared.— **h. sodium phosphate.** 1. Same as SODIUM PHOSPHATE, 2. 2. The acid phosphate of sodium (NaH_2PO_4).— **h. sulfate,** sulfuric acid.— **h. tellurid,** a colorless, inflammable gas (H_2Te), of unpleasant odor, corresponding to hydrogen sulfid (H_2S).— **h. trifluorid,** same as HYDRAZOIC ACID.— **hydroxylic h.,** the hydrogen atom or atoms of a compound contained in the hydroxyl groups; thus, in glycerin, the three hydroxylic hydrogens.

— **light carbureted h.,** same as MARSH-GAS.— **liquid h.,** the condition assumed by hydrogen at a very low temperature. See ELEMENT.— **ozone h.,** hydrogen dioxid when set free by the passage of electricity through water which contains a small quantity of sulfuric acid.— **phosphureted h.,** same as PHOSPHORETTED HYDROGEN.— **sulfureted h.,** same as HYDROGEN SULFID.— **tellureted h.,** same as HYDROGEN TELLURID.

hy"dro-gen-a'se, *n. Chem.* A name for any ferment or enzym; a reductase.— **hy"dro-gen-ate,** *v.* To hydrogenize.— **hy"dro-gen-a'tion,** *n. Chem.* The act of hydrogenating, or the state of being hydrogenated.— **hy"dro-gen'ic,** *a.* Hydrogenous.— **hy"dro-gen-id,** *n.* [Rare.] Same as HYDRID.— **hy"dro-ge-nif'er-ous,** *a.* Containing or yielding hydrogen.— **hy"dro-gen'i-um,** *n.* Hydrogen in a condensed form, as when occluded by palladium.

hy"dro-gen-ize, [hai"dro-jen-aiz; 2 hȳ"dro-gĕn-īz, *v.* [<ENG. + -IZE.] *Chem.* To combine with hydrogen.— **hy"dro-gen-ized,** *p. a.* To produce (in a compound) chemical action by hydrogen, as that of reduction: distinguished from *oxidize.* **hy"dro-gen-iset.**— **hy"dro-gen'i-za'tion** =**za"tion,** *n.*

hydrog'e-nous, [hai-droj'e-nus; 2 hȳ-drŏg'e-nŭs, *a. Chem.* Containing or pertaining to hydrogen.

hy"dro-ge-ol'o-gy, [hai"dro-ji-ol'o-ji; 2 hȳ"dro-ge-ŏl'o-gy, *n.* [Rare.] The science treating of the condition, circulation, and work of water, on or below the surface of the earth, particularly its grading and depositing action. **hy"dro-ge'o-log'ic,** *a.*— **hy"dro-ge-ol'o-ger'tic** =**ger'ic,** *n. Mineral.* A white, hydrated magnesium carbonate and hydrate ($Mg_5(OH)_2CO_3.2H_2O$), that is found in spherical forms.

hy"drog"no-sy, [hai-drog'no-si; 2 hȳ-drŏg'no-sy, *n.* The systematic description of the waters of the earth; a hydrographic treatise. [< HYDRO- + Gr. *gnōsis,* knowledge, < *gignōskō* (*gno-*), know.]

hy"drog-ode, *n.* [Rare.] *Elec.* A negative pole; cathode.

hy"dro-graph, [hai"dro-graf; 2 hȳ"dro-grăf, *n. Geol. & Engin.* A chart or diagram indicating or recording

graphically any of the phenomena of hydrography as the periodic volumes of water discharged by a river.

The relation between the quantity in flood and in low water is shown graphically upon the discharge diagrams or *hydrographs* of the various rivers. *U. S. Geol. Survey 18th Annual Rep. U. S. Geol. Survey* pt. 2, 1898–1891, p. 227. [gov. prg. off.]

hy-drog'ra-pher, 1 hai-drog'ra-fər; 2 hȳ-drŏg'ra-fer, *n.* One who is versed in hydrography; a maker of maps or charts of the sea or other waters; specif., a superintendent of hydrographic surveys.

It is doubtful if any *hydrographer* would treat seriously his [Dr. Nansen's] theory of polar currents. A. W. Greely in *The Forum* Aug., 1891, p. 771.

hy''dro-graph'ic, 1 hoi'dro-graf'ik; 2 hȳ'dro-grăf'ic, *a.* Relating to or of the nature of hydrography. **hy''dro-graph'i-cal.**— **Hydrographic Office,** in the United States, a branch of the Navy Department, established in 1866, having control of all matters pertaining to maritime surveying, making of charts, etc.

hy-drog'ra-phy, ⌊ 1 hai-drog'ra-fi; 2 hȳ-drŏg'ra-fy, *n.* **1.** **hy-drog'ra-fy²,** ⌋ The science and art of determining and making known the conditions of navigable waters, whether ocean or inland, charting the coasts and rivers, determining the depths, the quality of the bottom, the times of the tides, and measuring the currents. **2.** The hydrographical features of a map. **3†.** Writing with water. [M.] [< hydro- + -GRAPHY.]

hy-drog'u-ret, *n.* [Rare.] A hydrid.— **hy-drog'u-ret'ed, hy-drog'u-ret'ted,** *a.*— **hy''dro-hem'a-tite,** *n. Mineral.* Same as HÆMATITE.— **hy''dro-hem'al-a,** *n.* Same as HYDRÆMIA.— **hy''dro-hem'mo-thu'rax,** *n.* Serum fluid and blood in the pleural cavity.— **hy''dro-her'der-ite,** *n.* A form of herderite found in Hebron, Me.— **hy''dro-hy'a-las,** *n.* A preparation of powdered soda and water, used at Athens, Greece, to conserve the color of the statuary preserved in the archeological museum.— **hy''dro-hy'men-i'tis,** *n.* Same as HYDROMENINGITIS.

hy'droid, 1 hai'droid; 2 hȳ'droid. **I.** *a. Zoöph.* Of or pertaining to the *Hydroida, Hydroidea,* or *Hydriæ.* **II.** *n.* **1.** One of the *Hydroida, Hydroidea,* or *Hydriæ.* **2.** A simple polyp or zoöid of a hydrozoöphyte. **3.** Same as TRACHOMEDUSA.

Hy-droi'da, 1 hai-droi'də; 2 hȳ-droi'da, *n. pl. Zoöph.* An order of hydrozoans with generative elements discharging externally and never with a hydriform trophosome united with the gonosome into a natatory colony: including most *Hydrozoöphytes.* [< Gr. *hydroïdēs,* like water, < *hydōr,* water, + *eidos,* form.]

Hy-droi'de-a, 1 hai-droi'di-ə; 2 hȳ-droi'de-a, *n. pl. Zoöph.* **1.** The *Hydroida.* **2.** The *Eleutheroblastea.*— **hy-droi'de-an,** *a.* & *n.*

hy'dro-ig'ne-ous, *a. Geol.* Same as AQUEO-IGNEOUS.

hy'dro-ker'a-tin, *n.* Hydrophobin.

hy''dro-l'sa-tin, *n. Chem.* A transparent volatile compound obtained by the decomposition of isatin.— **hy''dro-ki-ne'ter,** *n.* A device for stimulating the circulation of the water in a steamboiler by the introduction of a jet of steam below the water-level.— **hy''dro-ki-net'ic,** *a. Physics.* Relating to the motion of fluids and the energy involved in their motion: opposed to *hydrostatic.* **hy''dro-kinet'i-cal.**— **hy''dro-ki-net'ics,** *n. Physics.* The science of fluids in motion; also, hydrodynamics. Compare KINETICS.— **hy''dro-l'a,** *n. Chem.* A crystallized derivative of phenole phthalein. It is hypothetical and has never been isolated.— **Hy''dro-la-rol'da-ce,** *n. pl. Zoöph.* A superfamily of gymnoblastic hydroids having unsupported hydrocaulus, with only one or two lateral tentacles.— **hy''dro-la-rol'dean,** *a.*— **hy-drol'a-try,** *n.* The worship of water.

hy-drol'o-gy, 1 hai-drol'o-ji; 2 hȳ-drŏl'o-gy, *n.* The branch of physical geography that treats of the waters of the earth, their distribution, phenomena, properties, and laws. In the usage of the United States Geological Survey *hydrology* is restricted to subterranean waters.— < Gr. *hydōr* (*hydr-*), water, + -λογία, < λέγειν, speak.— **hy''dro-log'ic,** *a.* Relating to or of the nature of hydrology. **hy''dro-log'i-cal;**— **hy''dro-log'i-cal-ly,** *adv.*— **hy-drol'o-gist,** *n.* One versed in hydrology.— **hy''dro-lu'lin,** *n. Chem.* A substance whose composition is $C_7H_{11}N$.— **hy''dro-lu'ti-dine;,** — **hy''dro-lymph,** *n.* A watery fluid constituting the blood of the lower orders of some of the higher invertebrates.

hy-drol'y-sis, 1 hai-drol'i-sis; 2 hȳ-drŏl'y-sis, *n. Chem.* The chemical decomposition of a compound that ensues when the group H_2O (water) is absorbed by it, causing the formation of new compounds.

When an ester is treated with boiling water or steam, *hydrolysis* takes place, the ester breaking up into an alcohol and an acid through the addition of the hydrogen and hydroxyl ions of the water. This action is slow, but it becomes accelerated upon the addition of a mineral acid which acts as a catalytic agent. During the process of digestion hydrolysis also occurs, the enzymes which act as catalyzers, accelerating the action. The cleansing action of soap is due to the presence of small amounts of free alkali produced by the hydrolysis of the sodium or potassium salts of the fatty acids.

The so-called soluble starch, which by *hydrolysis* is slowly converted into a mylodextrin. T. S. Hunt *Systematic Mineralogy* p. 65. [sci. pub. co. 1891.]

— **hy-dro-lyst,** *n. Chem.* Any agent capable of effecting hydrolysis.— **hy''dro-lyte,** *n. Chem.* Any substance affected by a hydrolyst.

hy''dro-ly'ic, 1 hai'dro-lit'ik; 2 hȳ'dro-lȳ'ic, *a. Chem.* Of, pertaining to, or causing hydrolysis; causing the elimination of water.— **hydrolytic ferments,** a ferment whose action takes place only in the presence of water and results in hydrolysis. The digestive ferments are chiefly of this class.

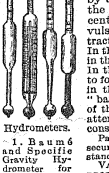
hy''dro-lyze, *v.* [-LYZED, -LYZING]. *Chem.* To cause to undergo the process of hydrolysis.— **hy-drol'y-za'tion,** *n.*— **hy''dro-mag'ne-site,** *n. Mineral.* A basic magnesium carbonate, crystallizing probably in the monoclinic system.— **hy''dro-man'cy,** *n.* Divination by means of water. **hy''dro-mancer,**— **hy''dro-man'cer,** *n.*— **hy''dro-man'tic,** *a.* Of or relating to divination.— **hy''dro-man'ti-cal-ly,** *adv.*— **hy''dro-ma'ni-a.** *n. Pathol.* **1.** A form of mental derangement characterized by a propensity to suicide by drowning. **2.** An insatiable craving for water, or for some other liquid, as in diabetes.— **hy''dro-ma'ni-ac,** *n.*— **hy''drome,** *n. Bot.* Tissue that conducts water.— **hy''dro-me-chan'ics,** *n. Physics.* The mechanics of fluids, including hydrostatics, hydrodynamics, hydraulics, and pneumatics. See HYDRAULICS.— **hy''dro-me-chan'i-cal,** *a.*— **hy''dro-me-con'ic,** *a. Chem.* Designating a transparent, insipid acid ($C_7H_8O_7$), obtained when meconic acid is reduced.

hy''dro-me-du'sa, *n.* [-sæ, *pl.*] One of the *Hydromedusæ.*— **hy''dro-me-du'san,** *a.* & *n.* [all'dro-mi-dū'sən; 2 hȳ'dro-me-dū'sə]. *n. pl. Zoöph.* **1.** A division of scelenterates, chiefly marine organisms, especially a subclass of hydrozoans without gastral filaments and generally with medusiform sexual individuals, known as cryptocarpous *Discophora, Craspedota,* etc. The jellyfish and medusans are among the creatures included in the division. They exist in compound colonies, the responsibility of feeding the community being reposed in one, another assuming the duty of protecting the community, and upon another devolving the office of reproduction. These thus reproduced, they usually attached to some object, may either remain attached or become free-swimming and grow from buds produced by the feeding medusæ, while the latter proceed from the eggs of the former. Buds producing branching colonies in tremendous numbers spring from one individual, those buds remaining undeveloped being known as *gonophores.* **2.** Formerly, a more extensive subclass of *Hydrozoa.* **Hy''dro-me-du'sa-dæ;** **Hy''dro-me'du-sæ;** — **hy''dro-me-du'san, hy''dro-me-du'soid,** *a.* & *n.*

hy''dro-mega-therm, 1 hai'dro-mi'gə-thəm; 2 hȳ'dro-mē'ga-thêrm, *n.* A plant needing heat and moisture to attain full growth.

hy'dro-mel, 1 hai'dro-mel; 2 hȳ'dro mĕl, *n.* **1.** A liquor, usually fermented, consisting of honey diluted with water: when fermented it is called *vinous hydromel* and *mead.*

A fountain! — yes, but flowing deep
With nectar and with *hydromel.*
Owen Meredith *Tannhäuser* st. 15.



2. *Pharm.* A laxative of which honey and water are ingredients. [F., < L. *hydromeli,* < Gr. *hydromeli,* < *hydōr* (*hydr-*), water, + *meli,* honey.]

hy''dro-mel-lit'ic *a. Chem.* Designating a white crystalline acid, $C_6H_{12}O_{10}$, formed by the reduction of mellitic acid.— **hy''dro-men'in-gi'tis,** *n. Pathol.* Meningitis with effusion of serum; Wyatt's disease; internal hydrocephalus.

— **hy''dro-met'al,** *n. Chem.* & *Pathol.* A watery meningeal hernia of the brain.— **hy''dro-met'al-lur'gy,** *n.* The process of assaying or reducing ore by means of liquid reagents.— **hy''dro-met'al-lur'gic,** *a.*— **hy''dro-met'al-lur'gi-cal-ly,** *adv.*— **hy''dro-met'a-mor'phism** *n. Geol.* Metamorphism, as of rocks, produced by water and heat at low pressure and temperature, contrasted with *pyrometamorphism, pyrometasomatism,* and *thermometamorphism.*

— **hy''dro-met'a-mor'phic,** *a.*— **hy''dro-me'te-or,** *n.* A watery meteor; in the plural, all the meteorological effects involved in rain, hail, snow, hail, etc.— **hy''dro-me'te-or'ic,** *a.*— **hy''dro-me'te-or-ol'o-gy,** *n.* The branch of meteorology that treats of hydrometeors, or of water in the atmosphere, as in rain, clouds, etc.— **hy''dro-me'te-or-o-log'i-cal,** *a.*

hy-drom'e-ter, 1 hai-drom'i-tər; 2 hȳ-drŏm'e-ter, *n.* **1.** *Phys. Sci.* An instrument for determining the specific gravity of solids and liquids by flotation, usually consisting of a weighted glass bulb or hollow metal cylinder with a long stem. When used with solids, the instrument is floated in water; with liquids, in the fluid whose density is to be measured.

Hydrometers.

Hydrometers are of two general classes: (1) those of *constant volume,* so called because each always displaces the same volume of fluid at the close of the measurement, the determination being made by the weight required to sink them to a fixed point; (2) those of *variable volume,* in which the observer notes the point, on the graduated stem, to which his instrument sinks. **Nicholson's hydrometer** and **Baumé's hydrometer** are examples of the two types. Hydrometers of variable volume, for measuring the specific gravity of special liquids, are known as *alcoholometers, lactometers,* etc.

The specific gravity of fluid is frequently ascertained by the *hydrometer,* a well-known instrument which is of great service when handy estimates of only moderate accuracy are required. Faraday *Chemical Manipulation* § 2, p. 66. [c. & j. 1851.]

2. An instrument for measuring the flow of water in rivers, conduits, etc.; a current-gage. [< Gr. *hydrometrion,* < *hydōr* (*hydr-*), water, + *metron,* measure.] — **hydrometrical,** *a.* and thermometer.

Cartier hydrometer, a hydrometer used over condenser for liquids weighing less than water; specific gravity 1.000 corresponds to 13° on the Cartier scale, 1.850 to 100°. Specific gravity 0.90 is heavier than 25.3°; specific gravity 0.80 to 43°, etc.— **hydrometer of Tralle's,** a hydrometer each of whose degrees represents 1 per cent. of pure alcohol, when used in a mixture of alcohol and water.

hy''dro-met'ra, *n. Pathol.* A collection of water or serum in the uterus, usually caused by inflammation of the endometrium.— **hy''dro-met'ric,** *a.* Pertaining to a hydrometer, or to the determination of the specific gravity of solids or liquids by means of a hydrometer. **hy''dro-met'ri-cal;**— **hydrometric pendulum,** a current-gage consisting of a hollow ball suspended in a graduated quadrant.— **hy''dro-me'tri-um,** *pl. n. Entom.* A family of hydrocorisan bugs. **hy-drom'e-try,** (z. g.) **hy''dro-e-tra';**— **hy-drom'e-trid,** *a.* & *n.*— **hy''dro-met'ro-graph,** *n.* An instrument for finding and recording the quantity of water discharged from an orifice in a given time. lart of using the hydrometer.

hy-drom'e-try, 1 hai-drom'i-tri; 2 hȳ-drŏm'e-try, *n.* The **hy''dro-mi'ca,** *n. Mineral.* Mica altered by loss of alkalis and assumption of water.— **hy''dro-mi'ca-ceous,** *a.*— **hy''dro-min'er-al,** *a.* Pertaining to mineral waters: denoting the cure of diseases by the aid of medicinal springs.— **hy''dro-mon'ad-in,** *n. Chem.* A mineral substance.— **hy''dro-mor'phic,** *a.* Of or pertaining to hydromorphism.— **hy''dro-mor'phism,** *n.* The process of water ejected from the sides or stern.— **hy''dro-mor'phous,** *a. Bot.* Growing in soil or serous fluid at the navel.— **hy''dro-mu-con'ic,** *a. Chem.* Designating either one of two isomeric dibasic crystalline acids ($C_6H_8O_5$), — **hy''dro-mu-cron'ic,** *a. Mineral.* Designating a fibrous muscovite mica; a species of hydromica or damourite.

They appeared, in fact, to be converted merely into *hydromuscovites.* G. P. Merrill *Rocks, Rock Weathering, and Soils* p. 181. [macm. 1897.]

— **hy''dro-my'e-lo-cele,** *n. Pathol.* A tumor due to the accumulation of liquid within the interior of the spinal cord. — **Hy''dro-my'i'næ,** *n. pl. Mam.* An Australian subfamily of muroid rodents with two rooted molars divided into transverse lobes in each ramus. **Hy'dro-mys,** *n.* (t. g.) **hy''dro-my'i-nous,** *a.*— **hy''dro-my'o-ma'ta,** *n.*— **hy''dro-mys'ta,** *n.* In the early Christian church, one who sprinkled the congregation with holy water as they entered or left the church. **hy''dro-mys'tes,** *n.*— **Hy''dro-na-ma'te-æ,** *n. pl. Bot.* The algæ: an early name.— **hy''dro-neph'e-lite,** *n. Mineral.* A massive white or dark-gray translucent hydrous sodium-aluminum silicate ($H_2Na_2Al_2Si_4O_{13}$), allied to nephelite, that crystallizes probably in the hexagonal system.— **hy''dro-neph'ros,** *n. Pathol.* Dropsy of the kidney.— **hy''dro-ne-phro'sis,** *n. Pathol.* Distention of the kidney from accumulation of urine due to obstruction of the urinary passages.— **hy''dro-ne-phrot'ic,** *a.*— **hy''dro-nette,** *n.* [F.] A small force-pump for watering flowers; syringe.— **hy''dro-neu-ro'sis,** *n.* A morbid fondness for water.— **hy''dro-ni'tro-prus'sic,** *a. Chem.* Nitroprussic. — **hy''dro-par'a-sorbic-ic,** *a. Chem.* Noting an acid found in feces resulting from putrefaction of proteids.— **hydroparacoumaric acid** ($C_9H_8O_3$), a derivative of tyrosin found in feces; para-oxyphenyl propionic acid.— **Hy''dro-pa'ra-ta'lia,** *n. pl.* Same as AQUATALIA.

hy''dro-path'ic, 1 hoi'dro-path'ik; 2 hȳ'dro-păth'ic, *a.* Pertaining to or of the nature of hydropathy. **hy''dropath'i-cal.**

hy''dro-path'ic, *n.* [Colloq., Gt. Brit.] A temperance hotel, or a summer resort, where board is given at a stated price, and where guests can have hydropathic treatment.

hy-drop'a-thy, 1 hai-drop'a-thi; 2 hȳ-drŏp'a-thy, *n. Med.* The treatment of diseases by the use and application of water internally and externally: water-cure. A widely accepted word formed after the supposed analogy of *allopathy, homeopathy,* and intended to signify "water-cure" or " water-treatment," but etymologically signifying "water-suffering." The vernacular compound word *water-cure* is preferable on etymological and lexical grounds. [< HYDRO- + -PATHY.] — **hy-drop'a-thist,** *n. Med.* One who believes in or practises hydropathy. **hy''dro-path'ic.**

hy''dro-per'i-card'i-um. *n. Pathol.* Accumulation of serous fluid within the pericardium; dropsy of the heart.— **hy''dro-per''i-pneu-mo'ni-a.** *n. Pathol.* Inflammation of the lungs complicated with dropsical effusion.— **hy''dro-per''i-to'ne'um,** *n.* Dropsy of the abdominal cavity.— **hy''dro-per-ox'id,** *n. Chem.* Hydrogen dioxid.— **hy''dro-phane,** *n. Mineral.* A whitish or light-colored opal, opaque when dry, but translucent when wet.— **hy-drop'ha-nous,** *a.* Rendering transparent when placed in water.— **Hy-droph'i-dæ,** *n. pl. Herp.* A family of snakes with fixed poison-fangs and a compressed tail; sea-snakes. **Hy'dro-phis,** *n.* (t. g.)— **hy'dro-phid,** *n.*— **hy'dro-phoid,** *a.*— **hy'dro-phil,** *n.* **1.** Able to assimilate water; absorbent; bibulous: hygroscopic. **2.** *Zoöl.* Hydrophilous.— **hy''dro-phil'ic,** *a. Bot.* Same as HYDROPHILOUS.— **Hy''dro-phil'i-dæ,** *n. pl. Entom.* A family of clavicorn beetles having the dorsal abdominal segments partly membranous, the central segments free, and the palpi distant and slender: containing the genus **Hydrophilus.** (t. g.)— **hy''dro-phile,** *n.*— **hydrophil-id,** *a.* & *n.*— **hy-droph'i-loid,** *a.*— **hy-droph'i-lite,** *n. Mineral.* A transparent, very delicate variety of xanthophyllite, crystallizing in the isomeric system.— **hy-droph'i-lous,** *a.* **1.** *Bot.* Having the flowers pollinated by the agency of water: said of certain higher plants and of lower algæ. **2.** *Entom.* Relating to beetles of the family *Hydrophilidæ* and the genus *Hydrophilus.*— **hy''dro-phite,** *n. Mineral.* A subvitreous green magnesium hydrate and silicate with ferrous oxid that is found massive.— **hy''dro-pho'bi-a,** *n. Chem.* An impure transparent crystalline substance obtained by treating phlorone with sulfur dioxid.

hy''dro-pho'bi-a, ⌊ 1 hoi'dro-fō'bi-ə; 2 hȳ'dro-fō'bi-a, *n.* **hy''dro-fo'bi-a²,** ⌋ *Pathol.* A disease communicated by the bite of a rabid animal, due to a specific virus in the saliva, characterized by great disturbance of the central nervous system, difficult deglutition, convulsive dread of water, and spasmodic muscular contractions; rabies. In hydrophobia there are three stages. In the first, the *premonitory stage,* there are pain and irritation in the vicinity of the bite, and the victim becomes excited. In the second, the *stage of excitement,* which lasts from one to four days, convulsions set in and a vivid secretion collects in the throat. The choking caused, which produces the "barking of a dog," is merely the effort to clear the throat of this mucous secretion, and not, as formerly thought, an attempt at barking. In the third, the *paralytic stage,* unconsciousness begins and death occurs. See RABIES.

Pasteur is inclined to the belief that the protection which he secures against *hydrophobia* is due to the action of a chemical substance, or a ptomaine, and not to a living organism.

Vaughan and Novy *Ptomaines and Leucomaines,* p. 109. [t. mack. & co. 1888.]

2. Any unnatural or morbid dread of water. [< F. *hydrophobie,* < LL. *hydrophobia,* < Gr. *hydrophobia,* < *hydōr* (*hydr-*), water, + *phebomai,* fear.] **hy'dro-pho''by‡.**

hy''dro-pho'bi-ac, *n.* [Rare.] A person affected with hydrophobia. **hy''dro-pho'bi-cal;**— **hy''dro-phobic,** *n.* A victim of hydrophobia. **hy''dro-pho'bi-ac;**— **hydrophobic bite,** *n.* [Rare.] **1.** A specialist in the treatment of hydrophobia. **2.** One having a marked aversion to water.— **hy''dro-pho''bo-pho'bi-a.** *n. Pathol.* A morbid dread of hydrophobia, sometimes so extreme as to manifest symptoms of the real disease.— **hy-droph'o-bous,** *a.* Hydrophobic.

hy''dro-phone, 1 hai'dro-fōn; 2 hȳ'dro-fōn, *n.* **1.** An electrical instrument to give notice to a fleet or port of a torpedo attack, as by suspended bells. **2.** An instrument used for the purpose of detecting leaks in water-pipes. **3.** A device to aid in stethoscopic examination by placing a bag of water over the chest to intensify the sound. **hy''dro-pho'ni-ous,** *a.*— **hy''dro-phor,** *n.*

Hy-droph'o-ra, *n. Zoöph.* The *Hydromedusæ* restricted: opposed to *Discophora* and *Siphonophora.*— **hy-droph'o-ran,** *a.* & *n.*— **hy-droph'o-rous,** *a.* **1.** Pertaining to the apparatus for obtaining water from any required depth. — **hy''droph-thal'ic,** *a. Chem.* Designating an acid obtained by treating phthalic acid with nascent hydrogen. Used in investigating the constitution of phthalic acid.— **hy''droph-thal'mi-a,** *n. Pathol.* Enlargement of the eyeball by increase in the aqueous or the vitreous humor; dropsy of the eye.— **hy''dro-phyl'a-cis,** *n.* [-CES, *pl.*] Distention of the eyeball by a watery effusion.— **hy''dro-phy'la-ci-um,** *n.* [-CI-A, *pl.*] A basin, either natural or artificial, for storing up water.— **Hy''dro-phyl'a-ce-æ,** *n. pl. Bot.* A family of hirsute herbs of the order *Polemoniales,* mainly of western North America: the waterleaf family, with alternate or basal leaves, and regular perfect cymose flowers. Of the 17 genera, *Hydrophyllum, Nemophila,* and *Phacelia* are the best-known. The species number about 160.— **hy''dro-phyl-la'ceous,** *a.*— **hy''dro-phyl'li-um,** *n.* [-LI-A, *pl.*] *Zoöph.* One of the zoöids of a hydrozoan, the entire protective coverings of the hydranths, as in siphonophores.

— **hy''dro-phyl'li-a'ceous,** *a.*— **hy''dro-phylis,** *n. pl.* Plants of the waterleaf family (*Hydrophyllaceæ*).— **Hydroph'yl-lum,** *n. Bot.* A genus of North-American herbs of the waterleaf family, with ample petioled leaves and white, purple, or blue cymose-clustered flowers.— **hy''dro-phy''so-me'tra,** *n. Pathol.* An abnormal collection of water and gas in the uterus.— **hy''dro-phyte,** *n. Phytogeog.* A plant living in water or in wet ground.— **hy''dro-phyt'ic,** *a.* **1.** Of or pertaining to hydrophytes. **2.** Growing in wet places or in water, as marsh-plants: opposed to *xerophytic* and *mesophytic.*— **hy''dro-phy'ti-um,** *n.* A water-plant formation.— **hy''dro-phy-tog'ra-phy,** *n.* [Rare.] The branch of descriptive botany that treats of water-plants.— **hy''dro-phy-tol'o-gy,** *n.* That branch of botany which treats of water-plants.— **hy-droph'y-ton,** *n.* [-TA, *pl.*] *Zoöph.* The main portion or trunk of a hydroid compound including

the hydrorhiza (root) and hydrocaulus (stem) — **hy-droph'y-toŭs,** *a.*

hy-drop'ic, 1 hŭ-drop'ĭk; 2 hȳ-drŏp'ĭc. *Pathol.* I. *a.* 1. Dropsical, affected with dropsy. 2. Transluicent. **hy-drop'i-cal-ĭ.**

My complexion is grown very sallow, my pulse low, and my body *hydropical.* Addison *Spectator* Maro, 29, 1711.

II. *n.* 1. A person suffering from dropsy. 2. A medicine efficacious in the treatment of dropsy. [< F. *hydropique,* < L. *hydropicus,* < Gr. *hydrōpikos,* < *hydōr* (*hydr-*), water.] — **hy-drop'i-cal-ly,** *adv.*

hy-dro-pic'o-din(e), *n. Chem.* A colorless, mobile liquid ($C_9H_{13}N$) formed by the action of nascent hydrogen on β-methylpyridin.— **hy'dro-pi''per,** *n.* A species of knotweed (*Polygonum hydropiper*) common in wet grounds; water-pepper; smartweed.

hy'dro-plane, 1 hai'dro-plēn; 2 hȳ'dro-plān, *n.* 1. A plane constructed like a fin which governs the course of a submarine boat vertically in the same way that the elevator changes the course of an aeroplane; also, a plane used on surface boats to lift the boat partially from the water, thereby decreasing resistance and increasing the speed. 2. A motor-boat of extremely light construction driven either by submerged screws or by aerial propellers. Its flat bottom, an inclined plane sloping upward to the bow, causes the boat to "lift" when driven at high speeds, thereby reducing the displacement and frictional surface and consequently increasing the speed. They are at their best in smooth water.

The *hydroplane* is an adaptation of the gun punt to the purposes of the motor-boat. *The Sphere* March 20, '09, p. viii.

3. An attachment to an aeroplane or a balloon providing for headway if it fails to rise or steer.

hy''dro-plan'u-la, *n.* [-læ, *pl.*] *Zoöph.* A larval stage of a coelenterate intermediate between the planula and actinula. — **hy'dro-plas''ty,** *n.* The art of electrically molding or depositing metals from the solution of their salts. **hy''dro-plas'tics†.** — **hy''dro-plat''i-no-cy-an'ic,** *a. Chem.* Platinocyanic.— **hy'dro-pin-to-nic'ic,** *a. Geol.* Relating to or produced by the joint action of water and the internal heat in fusion at a lower temperature than by heat alone; aqueous-igneous.— **hy''dro-pneu-mat'ic,** *a.* Relating to or produced or worked by the compressed action of water, air or gas.— **hy''dro-pneu''ma-to'sis,** *n. Pathol.* An unnatural collection of fluid and gas in an organ.— **hy''dro-pneu-mo'ni-a,** *n. Pathol.* The hydropleural effusion into the lungs; the filtration of serum into the substance of the lungs.— **hy''dro-pneu''mo-per''i-car'di-um,** *n. Pathol.* Gas and a fluid resembling water in the pericardial cavity.— **hy''dro-pneu''mo-tho'rax.** *n. Pathol.* Gas and a fluid effusion in the pleural cavity.— **hy'dro-pol'yp,** *n. Zool.* A single person or polyp of a hydrozoan animal; hydrula.— **hy'dro-pore,** *n.* In the larvæ of certain echinoderms, an opening from the left hydrocele outward.— **hy'dro-pot,** *n.* A watering-drinker.— **hy''dro-po-tas'sic,** *a. Chem.* Being composed of hydrogen and potassium.— **hy''dro-pro-pul'sion,** *n.* Propulsion by a hydrometer.

hy'drop-sy, 1 hai'drop-si; 2 hȳ'drŏp-sy, *n. Pathol.* Dropsy. [< F. *hydropisie,* < L. *hydropisis,* < Gr. *hydrōpisis,* dropsy, < *hydrōps,* -*ōpos,* *hydōr* (*hydr-*), water.] **hy'-drops†; hy'drop-si-at.— hy'drop-si-cal,** *a.*

Hy'drop-sych'i-dæ, *n. pl. Entom.* A family of caddis-flies with setaceous antennæ, third pair of maxillary palpi filiform, and feet spurred. **Hy''drop-sy'che,** *n.* (t. g.) — **hy''drop-sy'chid,** *a.* & *n.*— **hy''drop-sy'choid,** *a.*— **hy''drop-sy'che'sis,** *n. Psychol.* Any abnormal feeling connected with the sight, or thought, of water.— **hy''drop'ter-lid'e-as,** *n. pl. Bot.* The *Salviniales.*— **hy-drop'ter-id,** *n.*

hy-drop'tic, 1 hai-drop'tĭc; 2 hȳ-drŏp'tic, *a.* [Rare.] Relating to or affected with dropsy; dropsical; also, thirsty.

Hy''drop-til'i-dæ *n. pl. Entom.* A family of caddis-flies with short antennæ, simple palpi, and downy body. **Hy-drop'til-id,** *n.* (t. g.)— **hy-drop'til-oid,** *a.* & *n.*— **hy-drop'til-oid,** *a.*— **hy'dro-pult,** *n.* A force-pump worked by hand; a garden-pump. **hy'dra-pult.**— **hy''dro-pul'tic,** *a.*— **hy''dro-py-re'tos,** *n.* Fever accompanied by profuse sweating; the sweating-sickness.— **hy''dro-pyr-ret'ic,** *a.*— **hy''dro-py-rid'ic,** *a. Chem.* Of or pertaining to hydropyridins.— **hy''dro-pyr'i-din,** *n. Chem.* One of a class of compounds derived from pyridin by reduction with sodium, nascent hydrogen; specif., dihydro-, tetrahydro-, and hexahydropyridin or piperidin. **hy''dro-pyr'i-dine†.**

hy''dro-quin'one, 1 hai''dro-kwĭn'ōn; 2 hȳ''dro-kwĭn'ōn, *n. Chem.* A white crystalline compound ($C_6H_6O_2$) derived variously, as by oxidizing quinic acid with lead dioxid. In medicine it is used as a reducing and antipyretic, and in photography as a developing agent.

hy-dror'a-chis, *n. Pathol.* Congenital accumulation of serum between the membranes of the spinal cord; spinal dropsy. **hy-dror'rha-chis†.**— **hy''dro-sal'pinx,** *n. Pathol.* Hydrosalpinx of a graptolite.— **hy''dro-rhi'za,** *n.* [-æ or -zæ *pl.*] The root-stock by which a hydroid is attached to its support; the basal part of the hydrophyton.— **hy''dro-rhi'zal,** *a.*— **hy''dro-rhe'a,** *n. Pathol.* A copious watery discharge, specifically of the amniotic fluid from the womb. **hy''dror-rhœ'a†.**— **hy''dro-sal'pinx,** *n. Pathol.* Dropsy of one or both of the Fallopian tubes.— **hy'dro-salt,** *n. Chem.* A salt containing hydrogen in either the acid or the base; rarely and specifically, an acid salt.— **hy''dro-sar'co-cele,** *n. Pathol.* Cancer of the testicle complicated with dropsy of the vaginal coat of the testicle.— **hy''dro-sau'ri-a,** *n. pl. The Crocodilia.*— **hy''dro-scaph'i-de,** *n. pl. Entom.* A family of minute cleaviform beetles with 6 or 7 abdominal segments, 3-jointed tarsi, wings fringed with long hairs, and short antennæ. **Hy-dros'ca-pha,** *n.* (t. g.)— **hy-dros'ca-phid,** *a.* & *n.*— **hy-dros'ca-phoid,** *a.*— **hy-dros'che-o-cele,** *n.* Dropsical hernia of the scrotum.— **hy'dro-scope,** *n.* 1. An instrument for detecting moisture, especially in the air. 2. An instrument for measuring time by the amount flow from a graduated tube. 3. An apparatus used for looking through water: used for examining the bottoms of lakes, seas, etc.— **hy''dro-scop'ic,** *a. Physics.* Same as HYGROSCOPIC.— **hy''dro-sco-cel'ic,** *n.* **hy''dro-sco-pist,** *n.* A water-diviner.— **hy''dro-sel'e-nid,** *n. Chem.* A compound corresponding to sulfhydrates or mercaptans and prepared by substituting one-half the hydrogen of hydrogen selenid by a metal or organic radical.— **hy''dro-sil'i-cate,** *n. Chem.* A hydrous silicate.— **hy''dro-so'dic,** *a. Chem.* Having both hydrogen and sodium.— **hy'dro-soul,** *n. Chem.* A water solution of a colloid.— **hy''dro-so'ma,** *n.* [-ma-ta, *pl.*] A hydroid colony as a whole. **hy'dro-some†.**— **hy''dro-so'mal, hy''dro-so'ma-tous,** *a.*— **hy''dro-sorb'ic,** *a. Chem.* Designating a liquid acid ($CH_3CH:CH.CH:CH.COOH$) obtained by the reduction of sorbic acid.— **hy'dro-sphere,** *n.* 1. *Meteor.* The atmospheric moisture enveloping the globe. in distinction from the underground streams. — **hy''dro-sphyg'mo-graph,** *n.* An apparatus used to render visible and to record the quantity of blood driven, at each beat of the heart, through a limb enclosed in the manikin, as shown by the rise and fall of a column of water.— **hy'dro-spire.** *n. Echin.* One of the parallel slits or lamellar tubes on the antambulacral surface of certain crinoids.— **hy''dro-spi'ric,** *a.*— **hy'dro-stach'y-da'ce-æ.** *n. pl. Bot.* A monocotyledonous family of water-plants.— **hy''dro-stach'y-da'ceous** *a.*— **Hy''dro-sta'chys,** *n. Bot.* A genus of water-herbs found in Madagascar and formerly referred to as *Podostemaceæ,* now constituting the family *Hydrostachydaceæ.* They have unisexual flowers and fruit consisting of two carpels that form but a single cavity.

hy''dro-stat, 1 hai'dro-stat; 2 hȳ'dro-stăt, *n.* 1. A contrivance for preventing the explosion of steam-boilers. 2. An electrical device for making known the presence of water, as a protection against leakage, overflow, etc.

hy''dro-stat'ic, 1 hai'dro-stat'ĭc; 2 hȳ'dro-stăt'ic, *a.* Of or pertaining to hydrostatics; by

Hydrostatic Press.
a, power attachement; *b,* pressure-gage; *c, h,* pipes.

means of or in accordance with its principles. [< Gr. *hydrostatēs,* hydrostatic balance, < *hydōr,* water, + *histēmi,* stand.] **hy'dro-stat'ical; — hydrostatic arch** (*Arch.*), an arch constructed to carry at all points a pressure in proportion to the depth below a datum-plane.— **h. balance,** a balance for weighing bodies in water to determine their specific gravity.— **h. bed,** a water-bed.— **h. bellows,** a device for illustrating the law that fluid pressure is proportional to area. It consists usually of two disks of board connected by leather, with a long vertical tube attached; when the whole is filled with water, the water in the tube will balance a weight on the bellows as much greater than its own weight as the area of the disk of the bellows is greater than the sectional area of the tube.— **h. head,** the pressure resulting from a greater or less column of water in a double pump, operated by the motion.— **h. joint,** a joint for large engine-cranks or water-mains.— **h. paradox,** the principle that (*a*) to force up the depth through corresponding molecular forces) any quantity of fluid, however small, may balance any other quantity, however great, as in the hydrostatic bellows.— **h. press,** a press operated by water, the differential pressure of water on pistons of different diameters. In the ordinary form a small piston is worked in a water-cylinder by means of a lever, and the water exerts a steady pressure on a larger piston or ram. Should the larger piston be 100 times the area of the smaller one, the lower piston will rise 1 inch for every 100 times over the force applied on the lever, the advance being reduced in a similar proportion.— **h. pressure,** the pressure exerted by any liquid, as water, at rest.— **h. test,** same as PNEUMOSTATIC.— **hy''dro-stat'i-cal-ly,** *adv.*

hy''dro-stat'ics, 1 hai'dro-stat'ĭks; 2 hȳ'dro-stăt'ics, *n. Physics.* 1. The branch of science that treats of the pressure and equilibrium of practically incompressible fluids, such as water and mercury. 2. The mathematical theory of incompressible fluids at rest.— **hy'dro-sta-ti'cian,** *n.* A student of or expert in hydrostatics. **hy'dro-stat'ist†.**

hy'dro-stome, *n. Zool.* The mouth of a hydroid. [W.]— **hy''dro-su-dop'a-thy,** *n. Med.* The mode of treating disease by cold water and sweating.— **hy''dro-sul'fa-ni-on,** *n. Chem.* The ion HSO existing in solutions of sulfuric acid and acid sulfates.— **hy''dro-sul'fate,** *n. Chem.* A hydrosulfid: an obsolescent term.— **hy''dro-sul'fid, hy''dro-sul'-phid,** *n. Chem.* A compound derived from hydrogen sulfid (H_2S) by replacing one of the hydrogen atoms with a basic radical or a base; sulfhydrate. **hy''dro-sul'fu-ret†.**— **hy''dro-sul'-phate,** *n. Chem.* 1. A salt of hydrosulfuric acid. Sodium *hydrosulfate* is an important and very energetic reducing agent. 2. An acid sulfite or bisulfite; as, *sodium hydrosulfite* (SO_2 $(NaH)_2$), formerly called *hyposulfite.*— **hy''dro-sul'phu-ret,** *n.* **hy''dro-sul'fu-ret-ed,** *a. Chem.* Combined with sulfur, as a hydrosulfid.— **hy''dro-sul-fu'ric,** *a. Chem.* Designating a compound contained in sulfhydrates and mercaptans.— **hy''dro-sy-rin'go-my-e'li-a,** *n. Pathol.* Serous distention of the central canal of the spinal cord with the formation of cavities.— **hy''dro-tach'y-lyte,** *n.* A hydrous variety of tachylyte. **hy''dro-tach'y-lite†.**— **hy''dro-ta-chym'e-ter,** *n.* A regulator that shows the speed made by a hydraulic turbine.— **hy''dro-tach'y-lyte,** *n. Mineral.* A white, waxy, translucent hydroxid ($H_{14}Mg_2Al_2O_{12}$), crystallizing in the hexagonal system.— **hy''dro-ta-sim'e-ter,** *n.* An electrically operated apparatus showing at a distance the exact level of water in a reservoir by an electric light and low-water indicator.— **hy''dro-tax'is,** *n.* 1. *Physiol.* The property of moving under the influence of humidity. 2. *Biol.* The power of determining the direction of motion, as in protoplasm.— **hy''dro-tac'tic,** *a.*— **hy''dro-tech-nol'o-gy,** *n.* The study of hydrotechny.

hy''dro-tech'ny, 1 hai'dro-tek'nĭ; 2 hȳ'dro-tĕk'ny, *n.* The work, collectively, of utilizing water. [< HYDRO- + Gr. *technē,* art.]

If we were permitted to coin a word, we should call all the arts combined that relate to the getting, preserving, and utilizing of water, *hydrotechny;* but that would furnish rather a long term for the study of these arts — *hydrotechnology* — though it is not lacking in euphony.

MASON *Aboriginal American Mechanics* p. 82. SCHAUFFLER SUB. CO.]

— **hy''dro-tech'nic, hy''dro-tech'ni-cal,** *a.* Of or pertaining to the use of water for mechanical purposes or for hydraulic engineering.

hy''dro-tel'lu-rate, *n. Chem.* A salt of hydrogen tellurid, H_2Te.— **hy''dro-tel'lu-ric,** *a.*— **hydrotelluric acid** (*Chem.*), tellurated hydrogen.— **hy''dro-teph'ro-ite,** *n. Mineral.* A pale-red, hydrated manganese silicate that is closely related to tephroite, from which it has probably been altered.— **hy''dro-ter'pene,** *n. Chem.* Any hydrocarbon obtained by reduction of a terpene with hydrogen.— **hy''dro-the'ca,** *n.* [-cæ, *pl.*] *Zoöph.* The chitinous receptacle protecting the hydranth in calyptoblastic hydroids.— **hy''dro-the'cal,** *a.* — **hy''dro-ther''a-peu'tics,** *n. Med.* Hydropathy. **hy''dro-the-rap'ics†; hy''dro-ther'a-pyt.— hy''dro-ther'a-peu'tic,** *a.*

hy''dro-ther'mal, 1 hai'dro-thēr'mal; 2 hȳ'dro-thĕr'mal, *a. Geol.* Of, pertaining to, or produced by action of heated or superheated water, especially the action of such water in dissolving, transporting, and redepositing mineral matter.— **hydrothermal fusion,** aqueo-igneous fusion. See AQUEO-IGNEOUS.

hy''dro-thi''o-ne'mi-a, *n. Pathol.* The existence of hydrogen sulfid in the blood.— **hy''dro-thi-on'ic,** *a. Chem.* Of, pertaining to, or containing sulfur in combination with hydrogen.— **hydrothionic acid,** hyposulfurous acid.— **hy''dro-thi''o-nu'ri-a.** *n. Pathol.* The presence of hydrogen sulfid in the urine.— **hy''dro-tho'rax,** *n. Pathol.* Dropsy of the chest.— **hy''dro-tho-rac'ic,** *a.*— **hy-drot'ict.** I. *a.* Causing a discharge of water. **hy-drot'i-cal†.** II. *n.* A hydragogue; purge.— **hy''dro-tim'e-ter,** *n.* An apparatus for determining the hardness of water.— **hy''dro-ti-met'ric,** *a.*— **hy''dro-tim'e-try,** *n.*— **hy-dro'tis,** *n. Pathol.* Dropsy of the ear.— **hy-drot'o-mous,** *a.* The arrangement of tissues by forcing water into them.— **hy-dro-trophe,** *n.* A pump for raising water by condensation of steam; a steam vacuum-pump. **hy'dra-trophe.**

hy''dro-tro'pic, 1 hai'dro-trop'ĭc; 2 hȳ''dro-trŏp'ic, *a.* Exhibiting or affected by hydrotropism.

hy-drot'ro-pism, 1 hai-drot'ro-pizm; 2 hȳ-drŏt'ro-pism, *n. Bot.* The phenomena of plant-curvature determined by moisture. *Positively hydrotropic* when turned toward it, and *negatively hydrotropic* when away from it. [< HYDRO- + Gr. *trepō,* turn.]

hy'drous, 1 hai'drus; 2 hȳ'drŭs, *a.* 1. Watery; containing water of crystallization or hydration. 2. Containing hydrogen. [< Gr. *hydōr* (*hydr-*), water.]

hy'dro-vane, *n.* Same as HYDROVANE, *n.* 1.

hy''dro-va'ri-um, 1 hai'dro-vē'ri-um; 2 hȳ'dro-vā'ri-ŭm, *n. Pathol.* Dropsy or hydrocyst of the ovary.

hy''dro-am'ic, *a. Chem.* Designating a compound containing the group NOH, and having the general formula $R.C(NOH)OH$, the NOH group taking the place of one of the oxygen atoms of a carboxyl group. [< HYDROXYL + AMIN.] — **hy''dro-ax'ial-ite,** *n.*

hy-drox'id, } 1 hai-droks'id, -id *or* -aid; 2 hȳ-drŏks'id, **hy-drox'ide,** } -id *or* -id, *n. Chem.* A compound containing the group hydroxyl, and formed by the union of the molecules of a base, as the rearrangement of the atoms takes place, yielding hydroxyl. Thus, barium hydroxid is $Ba(OH)_2$. Compare HYDRATE.— **aluminum hydroxid,** a white tasteless and odorless powder ($Al_2(OH)_6$) used as an external application in skin-diseases.— **cupric h.,** a compound ($Cu(OH)_2$) which when heated changes from a blue gelatinous precipitate into black cupric oxid and water.— **sodium h.,** a white compound (NaOH) producing strongly alkaline solutions when dissolved in water. It is now prepared electrolytically from brine solutions, and is extensively used in soap, bleaching, and dyeing industries.— **strontium h.,** a white powder used in the separation of sucrose from beet-root molasses.— **hy''drox-id-i'on,** *n.* The hydroxyl ion.

hy-drox'y, 1 hai-droks'i; 2 hȳ-drŏks'y, *a. Chem.* Containing the compound radical hydroxyl: said of certain compounds. When used as a combining form it is often shortened to *oxy-.* See OXY- and words beginning with this form.

— **hydroxy acid,** an organic compound having the properties both of an alcohol and of an acid, and containing the group hydroxyl of the carboxyl group and an alcoholic hydroxyl group.

hy-drox'y-a-ce'tic, *a. Chem.* Glycolic.— **hy-drox''y-ac'e-tin(e),** *n. Chem.* Acetol.— **hy-drox''y-am'mo'ni-a,** *n. Chem.* Hydroxylamin.— **hy-drox''y-ar''o-mat'ic,** *a. Chem.* Designating any organic aromatic compound that contains any of the hydroxyl groups.— **hy-drox''y-ben'zene,** *n. Chem.* Same as OXYAZO-: a combining form.— **hy-drox''y-ben'zene,** *n. Chem.* A phenol.— **hy-drox''y-car-bam'id(e,** *n. Chem.* Hydroxylcarbamid.— **hy-drox''y-co-men'ic,** *a. Chem.* Designating a colorless crystalline acid obtained by treating meconic acid with hydrogen peroxid.— **hy-drox''y-cy'mene,** *n. Chem.* Thymol.— **hy-drox''y-dil-meth''yl-py'rone,** *n. Chem.* A colorless crystalline compound ($(CH_3)_2HO_2H_2O$) formed by oxidizing dimethylpyrone with hydrogen peroxid.

hy-drox'yl, 1 hai-droks'il; 2 hȳ-drŏks'yl, *n.* An unisolated compound radical (HO) which enters into alcohols, most acids, and many organic compounds. [< HYDR- + OXYGEN + -YL.] — **hy-drox'yl-ic,** *a.*

hy-drox''yl-a'mi-ne, } 1 hai-droks'il-am'in, -in *or* -in; 2 hȳ-**hy-drox''yl-am'ine,** } drŏks'yl-a'min, -in *or* -in, *n. Chem.* An organic base (NH_2OH) formed by the partial reduction of nitric acid. It is usually isolated, but is known in the aqueous solution, in which form it acts as an energetic reducing agent. [< HYDROXYL + AMIN.]

hy-drox'yl-ate, *vt. Chem.* [-at''ed; -at'ing.] To introduce one or more hydroxyl groups into.— **hy-drox''yl-a'tion,** *n.*— **hy-drox''yl-a'tion,** *n.*— **hy-drox''yl-car-bam'id(e,** *n.*— **hy-drox''yl-ic-za'tion,** *n.*— **hy-drox''yl-u're-a,** *n. Chem.* Hydroxylcarbamid.

hy-drox''y-ma-lon'ic, *a. Chem.* Tartronic.— **hy-drox''y-py'rone,** *n. Chem.* A transparent crystalline substance obtained by distilling meconic acid.— **hy-drox''y-ste-a'ric,** *a.* Designating a hydroxy derivative of stearic acid.— **hy-drox''y-suc-cin'ic,** *a.* Malic.— **hy-drox''y-sul'fid,** *n.* A substance of which hydroxyl and sulfur are constituents.

hy''dro-zinc'ite, 1 hai'dro-zink'ait; 2 hȳ'dro-zinc'it, *n. Mineral.* An incrusting, white to yellow, basic zinc carbonate ($Ha_2Zn_5O_{C7}$), found chiefly as a decomposition product in zinc-mines.

Hy'dro-zo'a, 1 hai'dro-zō'ə; 2 hȳ'dro-zō'a, *n. pl. Zoöph.* A class of coelenterates, especially those without a sharp differentiation of the archenteric cavity into axial, digestive, and perisarcal septate portions, as in Aydra, medusæ, jellyfishes, sea-blubbers, etc. They are chiefly marine, compound more often than simple, are world-wide in distribution, and differ considerably in form and structural complexity. They consist of a soft jelly-like sac made up of an inner and an outer cell-layer, and their mouths are generally surrounded with tentacles. Some are dioecious, and others are attached throughout their lives, and many exhibit both characteristics, undergoing alternation of generations. [< HYDRO- + Gr. *zōon,* animal.] — **hy''dro-zo'al,** *a.*— **hy''dro-zo'an,** *a.* & *n.*— **hy''dro-zo'ic,** *a.*— **hy''dro-zo'ön,** *n.*

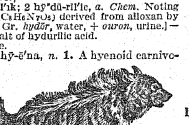
hy'dru-la, 1 hai'dru-le; 2 hȳ'dru-la, *n. Zool.* 1. A suppositious primitive hydroid. 2. A stage in the development of many hydroid polyps, during which they are attached as one end, the other having a circlet of tentacles. By the budding of the *hydrula* branched colonies are formed. [< Gr. *hydōr,* water.]

Hy-dru'rus, 1 hai-drui'rus; *or* -tin; 2 hȳ-drŭ'rŭs *or* -tin, *n.* Of or pertaining to Hydruntum, the ancient name of Otranto, in Calabria, Italy.

hy''dru-re'sis, 1 hai'dru-ri'sis; 2 hȳ'dru-rē'sis, *n. Pathol.* The discharge of excessively watery urine. [< HYDR- + UNESIS.] **hy-dru'ri-al,** *a.*— **hy-dru'ric,** *a.*

hy'dru-ret, *n.* Same as HYDRID.

hy'dru-ret''ed, 1 hai'dru-ret'ed; 2 hȳ'dru-rĕt'ĕd, *a. Chem.* [Rare or Obs.] Combined with hydrogen. **hy'dru-ret'ted†.**



Hy'drus, 1 hai'drus; 2 hȳ'drŭs, *n.* 1. *Herp.* A genus typical of *Hydridæ.* 2. [*l.c.*] A mythical watersnake. 3.

Astron. See CONSTELLATION. [< Gr. *hydros*, water-snake, < *hydōr* (*hydr-*), water.]

hy-du-ril'ic, 1 hī'dū-rĭl'ĭk; 2 hȳ'dū-rĭl'ĭk, *a. Chem.* Noting a strong dibasic acid ($C_6H_8N_2O_6$) derived from alloxan by the action of heat. [< Gr. *hydōr*, water, + *ouron*, urine.]—**hy-du'ri-date**, *n.* A salt of hydurilic acid.

hyer, *v.* & *n.* Hie; haste.

hy-e'na, 1 hī-ē'nə; 2 hȳ-ē'nə, *n.* 1. A hyenoid carnivorous mammal having fourtoed feet with blunt non-retractile claws, prickly catlike tongue, the fore legs higher than the hind, and very powerful jaws and teeth adapted for crushing bones. The **striped hyena** (*Hyena striatа*), of southern Asia and Africa, is nocturnal and cowardly, feeding mainly on carrion, and even digging up graves, but also hunts living prey. The **spotted hyena** (*H. crocuta*), of the southern half of Africa, is more ferocious. The **brown hyena** (*H. brunnea*) inhabits southern Africa. The bones of the extinct **cave-hyena** (*H. spelæa*) are found in the cavern deposits of Europe.

Striped Hyena. 1/12

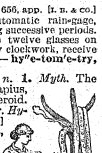
2. The zebra-wolf, or thylacine dasyure, of Tasmania. [< L. *hyæna*, < Gr. *hyaina*, in reference to its bristly mane, like a hog's, < *hys*, hog.] **hy'en'i**; **hy'ene't**.

—**hy-e'na-dog"**, *n.* **1.** The hunting-dog (*Lycaon pictus*). See illus. under CYNOHYENA. **2.** The aardwolf.—**h.-poison**, *n.* Same as WOLVESBANE.—**painted h.**, the Cape dog.—**hy-e'nid**, *n.* One of the *Hyænidæ*.—**hy-e'nid-i-form**, *a.* Having the form of a hyena. **hy-e'ni-form**.—**hy-e'nin**(es, *n.* Of or pertaining to the *Hyænidæ*.—**hy-e'noid**, *a.* Of or pertaining to the *Hyænoidea*.—**hy-e'noid**, *n.*

hy-en'ic, 1 hī-en'ĭk; 2 hȳ-en'ĭc, *a.* Like a hyena. **hy-en'ĭc**; **hy'e-na'ĭc**.—**hyenic acid**, a transparent substance that occurs with glycerol in the posterior glandular pouches of the striped hyena (*Hyæna striata*), as well as in the grease obtained from sheep's wool.

Hy'ères', 1 Ē'är'; 2 Ē'ĕr', *n.* A manufacturing seaport town in Var department, S. France; a winter resort.

Hy'ères' Is'lands, A group of islands in the Mediterranean sea off Var department, France.



hy'et-, 1 hī'et-, hī'ĭt-to-; 2 hȳ'ĕt-, hȳ'e-to-. From *hyet-o-to-*, Greek *hyetos*, rain (< *hyō* send rain): combining forms.—**hy'e-tal**, *a.* **1.** Of or pertaining to rain or the amount of the rainfall at different places and seasons. **2.** Rainy.—**hy'e-to-graph**, *n.* A chart showing the distribution of rainfall over the earth, or over any part of it.—**hy'e-to-graph'ic**, *a.* Relating to or showing the amount of rainfall: as, a *hyetographic* map. **hy"e-to-graph'i-cal-ly**, *adv.*—**hy"e-tog'ra-phy**, *n.* The branch of meteorology which treats of the distribution of rainfall, and of the methods of it graphically in charts, maps, etc.—**hy"e-tol'o-gy**, *n.* That branch of meteorology which treats of rain.—**hy"e-tom'e-ter**, *n.* A device for measuring rainfall; a rain-gage. See PLUVIOGRAPH.

Instruments for determining the quantity of rain, are called rain-gages, pluviometers, and hyetometers.

B. SILLIMAN, JR. *Physics* § 979, p. 655, app. [s. n. & co.]

—**hy"e-to-met'ro-graph**, *n.* An automatic rain-gage, registering the amount of rainfall during successive periods. In Hermann's hyetometrograph (1789) twelve glasses on the rim of a horizontal wheel, turned by clockwork, receive the rain successively, each for one hour.—**hy"e-tom'e-try**, *n.* The measurement of rainfall.

Hy-ge'la, 1 hī-jē'ə; 2 hȳ-gē'a (XIID), *n.* **1.** *Myth.* The goddess of health, daughter of Æsculapius, the god of medicine. **2.** The tenth asteroid.

Hygeia. (From an antique relief in terracotta in the British Museum.)

See PLANET. [< L. *Hygea*, *Hygia*, < Gr. *Hygieia*, goddess of health, < *hygiēs*, healthy.]

Hy-ge'ian, *a.* **1.** Pertaining to Hygeia, the goddess of health. **2.** [*h.*] Relating to health or to hygiene. **II.** *n.* [*h.*] One who teaches or advocates the laws of health. **hy-gē'an**.

hy'gel-o'ry, *n.* Excessive regard for health.—**hy"gel-o'ric**, *n.*

hy'gi-ene, 1 hī'jĭ-ēn or haĭ'jĭn; 2 hȳ'gi-ēn or hȳ'gēn (XIII), *n. Med.* The branch of medical science that relates to the preservation and improvement of health, to individuals and in communities; sanitary science.

The only successful attempt yet made to connect *hygiene* with the social order was made by Moses, who intervenes its requirements with those of religion.

THOMAS *On the Threshold* ch. 0, p. 125. [s. m. & co. 1888.]

[< F. *hygiène*, < Gr. *hygieinos*, be healthy, < *hygiēs*, health, healthy.] **hy'ge-ine't**.—**hy"gi-en'ic**, *a.* Of or pertaining to hygiene or in accordance with its laws: promotive of health; wholesome; sanitary. **hy"gen-ĭc'**[Rare]; **hy"gi-e-in-al'ĭ**; **hy"gi-en'al**ĭ; **hy"gi-en'i-cal**;—**hy"gi-en'i-cal-ly**, *adv.*—**hy'gi-en-ist**, *n.* One who studies or is versed in the principles of hygiene or the preservation of health. **hy'ge-ĭst**ĭ; **hy'gie-ĭst**ĭ.

hy"gi-en'ics, 1 haĭ-jĭ-en'ĭks; 2 hȳ'gi-ēn'ĭcs, *n. Med.* A system of principles for preserving and promoting health; sanitary science; hygiene. **hy"gi-en-ism'**.

hy-gi'nus, 1 hī-jaĭ'nŭs; 2 hȳ-gī'nŭs, **Caius Julius**. A Roman grammarian and librarian; a native of Spain; a freedman of Augustus; lived about 10 B. C.

hy"gi-ol'o-gy, 1 haĭ"jĭ-ŏl'o-jĭ; 2 hȳ"gi-ŏl'o-gy, *n. Med.* The science of hygiene; a treatise on the laws of health. [< Gr. *hygieia*, health, + -OLOGY.] **hy"ge-ol'o-gy**.

hy'grin, 1 haĭ'grĭn, -grĭn *or* -grĭn; 2 hȳ'grĭn, -grĭn *or* **hy'grine**, -grĭn, *n. Chem.* A pale-yellow, thick, volatile, pungent, oily alkaloid contained, together with cocain, in the leaves of coca (*Erythroxylon coca*). [< Gr. *hygros*, moist.—**hy-grin'ic**, *a. Chem.* Designating the crystalline acid ($CH_3NC_4H_7COOH$) resulting from the oxidation of the alkaloid hygrin.

hy'gro-, 1 haĭ'gro-; 2 hȳ'gro-. From Greek *hygros*, wet: a combining form, denoting relation to moisture; not distinguishable in general use from *hydro-*.—**hy"gro-ble-phar'ic**, *a.* Same as HYGROBLEPHARIC.—**hy'gro-dek**, *n.* A form of hygrometer in which the atmospheric humidity is found by adjusting two sliding pieces to the height of the mercury in a wet-bulb and a dry-bulb thermometer respectively. These pieces together control the position of an index which points out the number sought. See PSYCHROMETER.—**hy"gro-der'ma**, *n.* An unnaturally moist condition of the skin.—**hy'gro-graph**, *n.* A recording hygroscope.

Other words beginning with this prefix will be found in alphabetical place, either singly or in groups.

hy-grol'o-gy, 1 haĭ-grŏl'o-jĭ; 2 hȳ-grŏl'o-gy, *n.* The branch of physics dealing with humidity, especially the humidity of the atmosphere.—**hy"gro-log'i-cal**, *a.*—**hy"gro-log'i-cal-ly**, *adv.*

hy-gro'ma, 1 haĭ-grō'mə; 2 hȳ-grō'ma, *n.* [-GRO"MA-TA, *pl.*] *Pathol.* A small saccular cavity containing serum; a vesicular growth or watery cyst. [< Gr. *hygros*, wet.] **hy-grom'a-tous**, *a.*

hy-grom'e-ter, 1 haĭ-grom'ĭ-tər; 2 hȳ-grŏm'e-ter, *n.* Any form of apparatus for measuring the humidity of the atmosphere. Among instruments of many forms, three of the commonest types are the **condensing hygrometer**, in which the thing directly observed is the dewpoint, or temperature at which the atmosphere's moisture begins to condense; the **chemical hygrometer**, in which the moisture in a given bulk of air is chemically absorbed and weighed; and the **wet-bulb thermometer**. See PSYCHROMETER, in another form the effect of moisture on some sensitive material is noted, as on the length of a human hair in the **hair-hygrometer**. [< HYGRO- + Gr. *metron*, measure.]

—**solf-ĭ-hydrometer**, *n.* An instrument for measuring the moisture of the soil.

hy'gro-met'ric, 1 haĭ'gro-met'rĭk; 2 hȳ'gro-mĕt'ric, *a.* **1.** Of or pertaining to hygrometry or the estimation of the atmosphere as to moisture. **2.** Readily absorbing and retaining moisture.

It is highly important that the pupil should be aware of the *hygroscopic* nature of many substances which, when they are reduced to powder, is so greatly developed by the enlargement of surface, as very seriously to increase the whole weight of the mixture.

BARKER *Chem. Manip.* p. 170. [s. s. & s. 1851.]

hy"gro-met'ri-cal;—**hygrometric balance.** **1.** A normally horizontal balance-beam bearing an absorbent substance which, by varying amount of moisture it contains causes variations in the level of the beam. **2.** A rough form of hygroscope, depending on the change of relative buoyancy of a bubble of air when it comes in with change of humidity.—**hy"gro-met'ri-cal-ly**, *a.*—**hy"gro-me-trĭc'i-ty**, *n.* The quality or degree of being hygrometric.

hy'gros-co-py, 1 haĭ-grŏs'kŏ-pĭ; 2 hȳ-grŏs'e-ĕry, *n.* The branch of physics that treats of the measurement of degrees of moisture, especially the moisture of the air.

hy"gro-pha-ne'ty, *n. Mineral.* The property of being translucent when moist and non-translucent when dry.—**hy"gro-phan'ous**, *a.*—**hy'gro-phant**, *n.* A hygrometer that shows both the humidity and the temperature.—**hy'gro-phil**, *a.* Same as HYGROPHILOUS.—**hy-groph'i-la**, *n. pl. Conch.* A suborder of section of basommatophorous pulmonate gastropods having flattened or cylindrical tentacles, and living in fresh water; including pond-snails.

hy"gro-phil'ic, 1 haĭ"gro-fĭl'ĭc; 2 hȳ"gro-phy'lĭc, *a.*—**hy'gro-phil'ous**, *a. Bot.* Preferring or growing in fresh water or marshes.—**hy-groph'i-ly**, *n. Biol.* Adaptability to life in wet localities.—**hy"gro-pho'bi-a**, *n. Med.* An exaggerated fear of liquids.—**hy"gro-phob'ic**, *a.*—**hy'gro-phta'lmic**, *a.* Moistening the eyes: said of the tear-ducts.—**hy"groph-thal'my**, *n. Pathol.* Inflammation of the membrane of the eyeball, accompanied by a profuse secretion of tears. **hy"grŏph-thăl'mĭ-a**.—**hy'gro-phyte**, *n.* **1.** A plant which thrives under conditions of great moisture. **2.** = HYDROPHYTE.—**hy'gro-phyt'ic**, *a.*—**hy'gro-plasm**, *n. Biol.* The liquid part of protoplasm: opposed to *stereoplasm*.—**hy"gro-plas'ma**, *n.*

hy'gro-scope, 1 haĭ'gro-skōp; 2 hȳ'gro-scōp, *n.* A device for indicating roughly the moisture of the air, depending usually on the hygroscopic properties of some substance. In **Saussure's hygroscope**, known as the *hair-hygrometer*, which is not properly a hygrometer, a human hair, lengthening as it increases, and shortening as it lessens, moves a pointer over a scale. Other popular hygroscopes depend on the property possessed by certain chemicals of changing color with increase of moisture.

hy"gro-scop'ic, 1 haĭ"gro-skŏp'ĭk; 2 hȳ"gro-scŏp'ic, *a.* **1.** Of or pertaining to the hygroscope, or capable of being detected only by it; as, a *hygroscopic* quantity of moisture. **2.** Apt to absorb or condense moisture from the atmosphere, as glycerin.

Organic substances, . . . from their *hygroscopic* quality, maintain the activities of the soil in a constant state of moisture.

S. W. JOHNSON *How Crops Feed* p. 138. [o. j. co. 1870.]

3. *Bot.* So constituted as to expand or shrink according to the amount of moisture; fitted to perform certain movements according to the presence or absence of moisture.

These filaments [the elaters of *Equisetum*] are *hygroscopic*, and they roll and unroll with the variations of moisture in the air.

C. E. BESSEY *Botany* p. 367. [H. H. & CO. 1880.]

hy"gro-scop'i-cal;—**hygroscopic stone**, any stone that readily absorbs atmospheric moisture: specif., one used as a crude hygroscope.—**hy"gro-scop'i-cal-ly**, *adv.*—**hy'gro-sco-pĭc'i-ty**, *n. Bot.* The property of being hygroscopic.

hy'gros'co-py, 1 haĭ-grŏs'kŏ-pĭ; 2 hȳ-grŏs'e-py, *n.* **1.** Hygrometry; **2.** the art of using hygroscopes.

hy"gro-spec'tro-scope, *n. Meteor.* A spectroscope used to observe the rainband.—**hy"gro-stat'ics**, *n.* Hygrometry.—**hy"gro-sto'ma**, *n. Pathol.* An abnormal increase in the flow of saliva; ptyalism.—**hy"gro-ther'mal**, *a.* Characterized by a specified degree of humidity and temperature; as, a *hygrothermal* condition.

hyk', 1 haĭk; 2 hȳk, *n.* An Arab outer garment; a haik.

hyke†, *n.* A medieval garment. **heuk**†; **huke**†.

hyk'sos, 1 hĭk'sos; 2 hȳk'sos, *n. pl.* [Gr.] See SHEPHERD KINGS.

hyl-, 1 haĭl-, haĭ'lə-, haĭ'lo-; 2 hȳl-, hȳ'la-, hȳ'lo- From *hyl-o-*, Greek *hylē*, wood, stuff: combining forms denoting relation to wood, or to matter in general as opposed to immaterial.

Words beginning with these prefixes will be found in alphabetical place, either singly or in groups.

Hy'las, 1 haĭ'lăs; 2 hȳ'las, *n. Myth.* A beautiful youth, a favorite of Hercules; captured by Naiads at Mysia while bathing in a spring.

hylde†, *n.* To pour.

hyld'ing†, *n.* Vile; mean: base.

hy'le, 1 haĭ'lē; 2 hȳ'lē, *n.* [Gr.] **1.** *Philos.* Matter. The Greek word originally meant wood, was applied later by Aristotle to matter in general, and finally used by philosophers and rhetoricians as the word *matter* is used in English. **2.** The facts or material that form the basis for inductive processes of reasoning. **3.** [*H.*] *Ch. Hist.* In the Manichean system, the ruler of the world of darkness.

hy'les, 1 haĭ'lēz; 2 hȳ'lēz, *n.* [Ar.] *Astrol.* The planet which rules at the hour of one's birth, as being in that sign of the zodiac which is immediately above the eastern horizon.—**hy'le-gĭ'a-cal**, *a.* **hy-le'gĭ-al**.

hy'lic, 1 haĭ'lĭc; 2 hȳ'lĭc, *a.* Relating to or of the nature of matter: material. [W.]—**hy'li-cism**, *n.* Materialism.—**hy'li-cist**, *n.* A believer or teacher of materialism; specif., one of the early Ionic philosophers.—**hy'lics**, *n.* The science of the general properties of matter.

hy'li-dæ, 1 haĭ'lĭ-dē; 2 hȳ'lĭ-dæ, *n. pl. Herp.* A family of arciferous amphibians, especially those with maxillary teeth, sacral diapophyses dilated, and toes generally dilated: including numerous tree-toads and tree-frogs. [< HYLA.]—**hy'lid**, *n.*—**hy'loid**. **I.** *a.* Of or pertaining to the *Hylidæ*. **II.** *n.* One of the *Hylidæ*.

hy'lism, 1 haĭ'lĭzm; 2 hȳ'lĭsm, *n.* **1.** Materialism; hylicism. **2.** The theory that matter is the principle or source of evil.

hy'lo-. See HYL-.

Hy-lob'a-tes, 1 haĭ-lob'ə-tēz; 2 hȳ-lŏb'a-tes, *n. Mam.* **1.** A genus typical of *Hylobatinæ*. **2.** [*h.*] An ape of this genus; a gibbon. See illus., under GIBBON.

The *hylobates* or gibbon is as much longer in the arms than the gorilla as the gorilla is than the man.

E. B. TYLOR in *Encyc. Brit.* 11th ed., vol. ii, p. 110.

[< Gr. *hylobatēs*, one who walks the woods, < *hylē*, wood, + *batnō*, go.] —**hy'lo-bate**, *n.* A hylobatine ape; a gibbon.—**Hy"lo-bā'ti-næ**, 1 haĭ-lo-bē'tĭ-nē; 2 hȳ-lo-bā'ti-næ, *n. pl. Mam.* An Oriental subfamily of simioid apes; gibbons or long-armed apes.—**hy-lob'a-tine**, *a.* & *n.*

Hy'lo-chœ'rus, 1 haĭ'lo-kē'rŭs; 2 hȳ'lo-cē'rus, *n.* A genus of *Suidæ*, represented by four or more species of equatorial Africa, termed black forest-pigs and midway in stature between the bushpigs and the wart-hogs. The forest-pigs are of large size, and are black with yellowish patches on the angles of the jaw.

Hylochœrus (Black Forest-pig). Male, female, and young.

The species of British East Africa is *H. meinertzhageni*.

hy'lo-des, 1 haĭ-lō'dēz; 2 hȳ-lō'dēz, *n.* A North-American tree-frog (*Hyla pickeringi*) whose piping is heard in early spring. [< Gr. *hylōdēs*, woody, < *hylē*, wood, + *eidos*; see -ODE.]

hy"lo-gen'e-sis, *n.* The origin of matter. **hy-log'e-nyt.**—**hy-log'no-sy**, *n.* The sciences collectively that relate to matter.

hy"lo-i-de'al-ism, 1 haĭ"lo-ĭ-dē'al-ĭzm; 2 hȳ"lo-ĭ-dē'al-ism, *n.* A combination of materialism with idealism.

The philosophical creed which, under Dr. Lewins's teaching, Miss Nadon accepted is called *Hyle-Idealism*.

R. W. DALE in *Contemporary Review* APR., 1891, p. 520.

hy'lo-ism, *n.* Hylotheism.—**hy'lo-ist**, *n.*—**hy-lol'o-gy**, *n.* The doctrine of matter as distinguished from that of mind. An extreme position of materialism.—**hy"lo-mor'phism**, *n.* An interpretation of the universe through the medium of matter.—**hy"lo-mor'phist**, *n.*—**hy"lo-mor'phous**, *a.* *Philos.* Having a material form.—**Hy'lo-myş**, *n. Zoöl.* A genus of spinedless East-Indian hedgehogs of the subfamily *Gymnurinæ*.—**hy'lo-nism**, *n.* Speculative materialism.—**Hy"lo-no'mi-dæ**, *n. pl. Herp.* In a former system, a Permocarboniferous family of labyrinthodonts having sculptured scutes and narrow skull with nearly smooth bones. **hy'lon'o-mus**, *n.* (r. g.) = HYLONOMIDÆ.—**hy"lo-no'moid**, *a.*—**hy-lop'a-thism**, *n.* **1.** The theory that matter is sentient: a form of hylozoism. **2.** The doctrine that spirit and matter are capable of transmutation, each into other. **3.** The theory that disease is caused by variations in the constitution of matter.—**hy"lo-path'ic**, *a.* **hy"lo-pa'thist**.—**hy-lop'e-thism**, *n.*—**hy-lop'ĭ-sous**, *a.* Wood-eating, as certain insects.—**hy'lo-phyte**, *n. Phytogeog.* A wood-plant; a plant native in forests.—**hy"lo-stat'ĭcs**, *n.* Pertaining to the placing or arrangement of matter.—**hy"lo-stat'i-cal**.

hy'lo-the"ism, 1 haĭ'lo-thĭ'ĭzm; 2 hȳ'lo-thē'ism (XIII), *n.* The doctrine that the material universe is God; pantheism. [< HYLO- + Gr. *theos*, God.]—**hy'lo-the'ist**, *n.*—**hy"lo-the-ĭs'tĭc**, *a.* Relating to the theory that God and matter are one, for there is no God apart from the universe. **hy"lo-the-ĭs'ti-cal**.

hy'lo-to'mous, *a.* Wood-cutting, as certain insects.—**hy"lo-trop'ĭc**, *a. Chem.* Capable of change of form without alteration of component parts.—**hy-lot'ro-py**, *n.* The act of hylotropic change or the condition during which it occurs.

hy"lo-zo'ĭc, 1 haĭ"lo-zō'ĭk; 2 hȳ"lo-zō'ĭc, *a.* Of or pertaining to hylozoism. **hy"lo-zo'ĭ-cal**.

God and matter are identical; in other words, the Stoic doctrine is *hylozoic* pantheism. DOMINGO GONZALEZ *Thoughts and Law* tr. by Darwell, vol. i, p. 349. [t. a. & c. co. 1862.]

hy"lo-zo'ĭsm, 1 haĭ"lo-zō'ĭzm; 2 hȳ"lo-zō'ism, *n.* The doctrine that life and matter are inseparable; or, the doctrine that all matter is endowed with life. In the Greek philosophy it was applied to the crude physical speculations of the Ionieschool, to the doctrine of Strato, who demanded a purely physical explanation for all phenomena, and to those Stoics who regarded the universe as a whole after the analogy of a living being. Compare ANIMISM.

There is a common tendency at present in several schools to adopt a middle theory between the Epicurean theory of fortuitous combinations and the Platonistan of intelligent choice. This mongrel theory is nothing else than the old theory of *hylozoism*, which attributes to matter sympathies, antipathies, affinities, preferences. JAMES *Final Causes* tr. by Affleck, p. 379. [s. 1883.]

[< HYLO- + Gr. *zōon*, animal.] **hy'lo-zĭsm**†.

hy'lo-zo'ĭst, 1 haĭ'lo-zō'ĭst; 2 hȳ'lo-zō'ist, *n.* One who advocates or believes in hylozoism.—**hy"lo-zo-ĭs'tĭc**, *a.* Relating to hylozoism or the hylozoists; characterized by hylozoism.—**hy"lo-zo-ĭs'ti-cal-ly**, *adv.*

hy-mar', 1 haĭ-mär'; 2 hȳ-mär', *n.* The onager.

hy'men, 1 hai'men; 2 hȳ'mĕn, *n. Anat.* A thin membrane, especially that which usually partially closes the vagina in virgins. In the embryo it marks the separation of the genital canal from the urogenital sinus. [< Gr. *hymēn*, membrane.] — **hy'men-al**, *a.*

hy'men, *n.* 1. *Gr. Myth.* The god of marriage, son of Apollo and a Muse, or of Dionysus and Aphrodite: represented as a winged youth carrying in his hand a bridal veil and torch. He is introduced as a character in Shakespeare's *As You Like It*.

Since love our hearts, and Hymen did our hands,
Unite commutual in most sacred bands.
SHAKESPEARE *Hamlet* act iii, sc. 2.

2. [*h-*] A marriage union; also, the wedded state.

Pausing to trace
The advantage derived from a Hymen so fit.
OWEN MEREDITH *Lucile* pt. i, can. 3, st. 15.

[L., < Gr. *Hymēn*, god of marriage.]

Hy"me-næ'us, *n.* Hymen, from a Pompeian fresco.

hy'men-, } 1 hai'men-, hai'mĕn-,
hy'men-o-, } or-o 2 hȳ'mĕn-, hȳ'mĕn-o. From Gr. *hymēn* (*hymēn-*), a membrane: combining forms.

Words beginning with these prefixes will be found in alphabetical place, either singly or in groups.

Hy"me-næ'a, 1 hai"mi-nī'o; 2 hȳ"me-nē'a, *n. Bot.* A genus of large tropical American trees of the family *Cæsalpiniaceæ*, with bifoliolate leaves, white flowers in dense terminal clusters. *H. courbaril*, the varnish- or locust-tree of the West Indies, is the best-known species. [< L. *Hymenæus*: see HYMENEAL.]

Hy"me-næ'us, 1 hai"mi-nī'us; 2 hȳ"me-nē'ŭs, *n. Bot.* 1. A heretic in the time of Paul. *1 Tim.* i, 20. 2. *Myth.* See HYMEN, 1. **Hy-me'nal-ist**, **Hy-me'ne-al-ist**, *n.* [Gr.].

Hy"men-a'ic, 1 hai"men-ē'ik; 2 hȳ"mĕn-ā'ic, *a.* Belonging or relating to Hymen or his marriage-hymns. See HYMENEPITHALAMIUM. [< Gr. *Hymenaios*, < *Hymēn*, Hymen.] — **Hymenaic meter** (*Pros.*), a dactylic dimeter acatalectic.

hy'men-al, 1 hai'men-ol; 2 hȳ'mĕn-al, *a.* Of or pertaining to the hymen; as, *hymenal* carunculæ.

hy"me-ne'al, 1 hai"mi-nī'ol; 2 hȳ"me-nē'al, *a.* Belonging or relating to marriage; nuptial. — **hy"me-ne'al-ly**, *adv.*

And sweet was heard
The voice and sound of *Hymeneal* song.
HOMER *Iliad* tr. by Cowper, bk. xviii, l. 617.

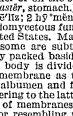
[< L. *Hymenæus*, < Gr. *Hymenaios*, < *Hymēn*, Hymen.]

hy"me-ne'al; } **hy"men-e'al**; } **hy-me'ne-al**; } **hy-**
men'e-al. See MATRIMONIAL. } **men"e-ne'an**;

hy"me-ne'al, *n.* A wedding song; an epithalamium.

hy"me-ne'als, *n. pl.* [Rare.] Same as NUPTIALS.

hy-me'nal-al, 1 hai-mī'nol-ol; 2 hai-mī'nal-al, *n.* 1. *Anat.* Of or pertaining to the hymen. 2. *Bot.* Of or pertaining to the hymenium. — **hymenial goniidia**, algal cells in the sporocarp of lichens. — **h. layer**, same as HYMENIUM.



hy"men'ic, 1 hai"men-ī'ik; 2 hȳ"mĕn-ī'ic, *a.* Same as HYMENAL.

hy"men-i'tis, 1 hai"men-ai'tis; 2 hȳ"mĕn-ī'tis, *n. Pathol.* Inflammation of the hymen.

hy-me'ni-um, 1 hai-mī'ni-um; 2 hȳ-mē'ni-ŭm, *n.* [-*a* or -*ums*, 2. -*a* or -*ums*, *pl.*] *Bot.* The fruit-bearing surface or stratum in the higher fungi of the *Basidiomycetes*, as the two vertical faces on the gills of the common mushroom. It consists of a collection of spore-mother-cells, sometimes interspersed with sterile cells in a layer or stratum. [< Gr. *hymenion*, dim. of *hymēn*, membrane.] — **hy"me-nic'o-lar**, *a. Bot.* Inhabiting the hymenium. [C.] — **hy"me-nif'er-ous**, *a.* Bearing or producing a hymenium.

hy"men-o-cal'lis, 1 hai"men-o-kal'is; 2 hȳ"mĕn-o-cal'is, *n. Bot.* A genus of herbs of the family *Amaryllidaceæ*, mostly tropical American and many of them cultivated for ornament. They have bulbous roots, strap-shaped leaves, and white, fragrant flowers in umbels. Several species are found wild in the southern and western United States. [< HYMEN + Gr. *kallos*, beauty.]

Hy"men-o-car'i-dæ, 1 hai"men-o-kar'i-dī; 2 hȳ"mĕn-o-cär'i-dē, *n. pl.* A Cambrian family of crustaceans of uncertain relations but supposed to be near the nebalocaeans; generally united with the *Ceratocaridæ*.

Hy"men-o-car'is, *n.* [< Gr. *hymēn*, membrane, + *karis*, a shrimp.] A genus of Cambrian crustaceans, the type of the family **Hymenocaridæ**.

hy"men-o-car'i-na, *n.* A Cambrian suborder of *Phyllocarida*, characterized by strong lateral spines on the undivided carapace, and 8 or 9 abdominal segments terminating in six stylets.

hy"men-o-dic'ty-o-nin, 1 hai"men-o-dik'ti-o-nin; 2 hȳ"mĕn-o-dic'ty-o-nin, *n.* A crystalline alkaloid ($C_{32}H_{46}N_2$) occurring in the bark of *Hymenodictyon excelsum*. [< HYMENO- + Gr. *diktyon*, net.] **hy"men-o-dyc'tini**, **hy"men-o-gas-trac'e-æ**, **hy"men-o-gas-trac'e-i**, **hy"men-o-gas-trē'te-ē**, *n. pl. Bot.* A family of gasteromycetous fungi of the order *Hymenogastrales*, growing under or on the surface of the ground. — **hy"men-o-gas'tric**, *a.* Of the stomach.

Hy"men-o-gas-trō'des, 1 hai"men-o-gas-trō'iz; 2 hȳ"mĕn-o-gas-trō'ēs, *n. pl. Bot.* An order of basidiomycetous fungi, found in Europe and the southern United States, the species of which grow on the ground, but some are subterranean. The hymenium, formed of closely packed basidia, lines the chambers into which the fruit body is divided.

hy"men-og'e-ny, *n.* Reproduction of the hymen as the result of contact between two liquids, as albumen and fat, when the former gives a membranous covering to the latter.

—hy"men-og'e-nous, *a.* Of the *Hymenolichenes*.

Hy"men-o-li-che'nes, *n. pl. Bot.* Same as BASIDIOLICHENES. — **hy"men-o'li-gy**, *n.* 1. A discourse or treatise upon membranes. 2. The science of membranes. — **hy"men-o-log'i-cal**, *a.* — **hy"men-o-my'cete**, *n. Bot.* A hymenomycetous fungus. — **Hy"men-o-my-ce'tes**, *n. pl. Bot.* An order or suborder of fleshy, leathery, or woody fungi very rich in genera and species, characterized by a compound sporophore, usually of considerable size, and a finally naked hymenium containing numerous spore mother-cells (basidia) which bear on their extremities 4, rarely 2, 6, or 8, awl-shaped projections (sterigmata), each of which bears a single spore (basidiospore); the *Agaricales*. Conidia occur in some genera. — **Hy"men-o-my"ce-tin'e-æ**; — **hy"men-o-my-ce'tal**, *a.* — **hy"men-o-my-ce'toid**, **hy"men-o-my-ce'tous**, *a.* — **hy"men-o-phore**, *n. Bot.* The stem and pileus of a hymenomycetous fungus; more specif., that part of the sporophore which bears the hymenium. **hy"men-o-phore'i**; **hy"men-o-pho'rum**; — **hy"men-o-phyl-la'ce-æ**, *n. pl. Bot.* An order of true ferns — the filmy-fern or lace-fern family — being small, often epiphytal, with long creeping rootstocks and thin, delicate fronds. The sporangia are borne on an elongate filiform receptacle. It embraces the two genera *Hymenophyllum* and *Trichomanes*, of about 100 species each, and the monotypic genus *Loxsoma*. — **hy"men-o-phyl-la'ceous**, *a.*

Hy"men-o-phyl'lum, 1 hai"men-o-fil'um; 2 hȳ"mĕn-o-fil'ŭm, *n. Bot.* A large genus of mostly tropical ferns closely allied to *Trichomanes*, both genera being called filmy ferns. They are the smallest and most membranous of the fern family, and are found on rocks and trees in damp and shady forests. The two valves of the involucre are separate. [< HYMEN + Gr. *phyllon*, leaf.]

Hy"men-op'ter-a, 1 hai"men-op'tar-a; 2 hȳ"mĕn-ŏp'ter-a, *n. pl. Entom.* An order of insects having four membranous wings, mandibulate mouth with a lower lip or tongue sheathed by maxillæ, and mostly a vermiform larva and inactive pupa, as the bees, wasps, ants, etc.

The *Hymenoptera* are justly regarded as the group of highest rank in all respects among insects, and they exhibit some of the most remarkable instincts and adaptations in the animal world, especially among the social forms, as the ants, termites, bees, and wasps. Here are grouped nearly all the insects, excepting silk-worms, useful to man, including not only the honey-producers but the principal parasites (ichneumon-flies, chalcids, etc.) which assist him in controlling insect-pests. Structurally the hymenopters are highly specialized, the head being always distinct, the mouth-parts fitted for both biting and suction, and the perceptive senses highly developed; a peculiarity is the union of the first abdominal segment with the thorax. An artificial division is made into *boring* and *stinging Hymenoptera*, the former having their ovipositors furnished with powerful piercers and saws enabling them to penetrate plant-tissues, etc., and thus lay their eggs deeply in these substances, and the latter having the ovipositor sharpened into a stiletto-like weapon (the sting) furnished with the means of injecting poison. The sting in many species becomes a benumbing effect upon the nerve-centers of small creatures and may seriously annoy the largest animals. The larvæ are usually footless, campodeiform or eruciform, and their locomotion, movement and entirely dependent on the provision made for them in advance by the adult insects, or an maternal attention, in the latter case. The species are legion, the number of species is very large and remarkably diversified.

[< Gr. *hymenopteros*, membrane-winged, < *hymēn*, membrane, + *pteron*, wing, < *petomai*, fly.] — **hy"men-op'ter**, *n.* — **hy"men-op'ter-an**, *a.* and *n.* — **hy"men-op'ter-ic**, *a.* & *n.* — **hy"men-op'ter-id**, *a. Bot.* Adapted for pollination by hymenopterous insects. — **hy"men-op'ter-ol-o-gist**, *n.* A student of hymenopterology. — **hy"men-op'ter-ol-o-gy**, *n.* The branch of entomology treating of the *Hymenoptera*. — **hy"men-op'ter-ous**, *a.* — **hy"men-op'ter-ous**, *a.* Of or pertaining to the *Hymenoptera*.

Hy"men-o-som'i-dæ, *n. pl.* A family of grapsoidean crabs with a flat triangular subcircular carapace extending into a horizontal rostrum. — **Hy"men-o-so'ma**, *n.* (*g.*) — **hy"men-o-som'id**, *a.* & *n.*

Hy"men-o-sto'ma-ta, *n. pl.* A suborder of holotrichous ciliate infusorians in which the mouth is surrounded by an undulating membrane.

hy"men-o-stom'a-tous, *a.* — **hy"men-ot'o-my**, *n. Surg.* 1. Dissection of membranes. 2. The operation of cutting through the hymen in case of imperforation.

hy-men'u-lum, 1 hai-men'yu-lum; 2 hȳ-mĕn'yu-lŭm, *n. Bot.* A disk containing asci, but without exciplulum.

Hy"mer, 1 hai'mer; 2 hȳ'mĕr, *n. Norse Myth.* A giant of the winter sea, who owned the kettle taken by Thor to brew ale for Ægir's banquet to the gods. He took Thor in his boat and rowed him to the land of the frost-giants, where Thor's present Thjrmr cut the line and for his pains was flung by the ears into the sea. **Hy'mir**.

Hy-met'tus, 1 hai-met'us; 2 hȳ-mĕt'ŭs, *n.* A mountain range (modern Trelo Vuno) of Athens, Greece, now called Trelo Vuno; noted for its marble and for its heath-honey; 3,370 ft. high. — **Hy-me't'i-an**, **Hy-met'tic**, *a.*

hymn, 1 himn; 2 hȳmn, *n.* [< ME. *hymne*, < AS. *hymn*, < L. *hymnus*, < Gr. *hymnos*, hymn.]

hymn, *v.* [< AS. *hymnian*, < *hymnus*, < Gr. *hymnos*, hymn.]

hympne'—**hymn'book"**, *n.* A hymnal.—**h.-tune**, *n.*—**h.-writer**, *n.* A hymnist.—**hym'nic**, **i.** *a.* Of or pertaining to hymns. **ii.** *n.* A hymn. — **hym'nist**, *n.* A writer of hymns. As a hymn.— **hym'nist**, *n.* A writer or composer of hymns.— **hymn'tess**, *a.*

hym'nal, 1 him'nel; 2 hȳm'nal, *n.* A book or collection of hymns.

We place their [Wesley's and Toplady's] stirring songs in our *hymnals*. W. M. BLACKBURN *Hist. Christian Church* p. 628. [s. a. R.]

hym'nar, 1 hym-nar'i-um; 1 hȳm-nā'ri-ŭm; 2 hȳm'nar-i-ŭm, *n.* = GRAPHY.]

Hym'ni-a, 1 him'ni-o; 2 hȳm'ni-a, *n. Myth.* A surname of Artemis.

hym-nog'ly, 1 him'no-di; 2 hȳm'no-dy, *n.* [-DIES, 1 -dis; 2 -dĭs, *pl.*] 1. Hymns collectively, especially all those of any age, country, church, or composer; hymnology.

Dr. Watts was 'the father of English *hymnody*.' F. M. BIRD in *Century Magazine, Kwanlecon* (c. s.) Jan., 1891, p. 479.

2. The act or practise of singing hymns. [< LL. *hymnodia*, < Gr. *hymnōdia*, < *hymnos*, hymn, + *aeidō*, sing.] — **hym'no-dist**, *n.* A hymnist.

hym-nog'ra-pher, 1 him-nog'ra-fer; 2 hȳm-nŏg'ra-fer, *n.* A hymn-writer; hymnist.

hym-nog'ra-phy, 1 him-nog'ra-fi; 2 hȳm-nŏg'ra-fy, *n.* The art of composing hymns; hymn-writing. [< Gr. *hymnographia*, writing hymns, < *hymnos*, hymn, + *-graphia*, < *graphein*, write.]

hym-nol'o-gist, 1 him-nol'o-jist; 2 hȳm-nŏl'o-ĝist, *n.* 1. One who studies or is versed in hymnology. 2. One who composes or compiles hymns.

Cowper . . . one of the sweetest of *hymnologists* . . . of his generation. J. W. ROGAN in *Hamilton Review* Mar., 1880, p. 207.

hym-nol'o-gy, 1 him-nol'o-ji; 2 hȳm-nŏl'o-gy, *n.* [-GIES, 1 -jiz; 2 -ĝĭs, *pl.*] 1. The study or science of hymns, including their history, use, and classification; also, a treatise on hymns, or hymns collectively.

The story of the *hymnology* of Germany in the sense we have given it, begins properly speaking with the Reformation.
CARNEGIE WERNWORTH *Christian Singers* ch. 1, p. 5. [N.]

2†. The act of singing hymns; hymnody. [< Gr. *hymnologia*, < *hymnos*, hymn; and see -OLOGY.] — **hym"no-log'i-cal**, *a.* — **hym"no-log'i-cal-ly**, *adv.*

hymn'o-ter, *n.* A hind; peasant. Hym. 1.

Hynd'la, 1 hünd'le; 2 hünd'la, *n. Norse Myth.* A giantess, sister of Freyja, skilled in genealogies and fates of gods, giants, and men. About her Freyja kindled a fire signifying the flaming aurora of the morning, so as to gain from her a "drink of remembrance."

Hynd'man, 1 hand'man; 2 hȳnd'man, *n.* 1. A manufacturing borough in Bedford County, Pa. 2. A mountain in S. central Idaho; 12,078 ft. high.

hynd'ster, *a.* Hindermost.

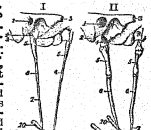
hyne, 1 hain; 2 hȳn, *adv.* [North. Eng. & Scot.] Away from this place; hence; also, out of this life.

Hyn'nis, 1 hin'is; 2 hȳn'ĭs, *n. Ich.* A genus of shorter-tailed cavalines of the family *Carangidæ*, frequenting warm seas. *H. hopkinsi* is found off the west coast of Mexico.

hy"o-, hy"o-, 1hai"o-; hai"-; 2hȳ"o-; hȳ'-. Combining forms of HYOID. — **hy"o-bran'chi-al**, *a.* Of or pertaining to the hyoid bone and the branchial arches. — **hy"o-cha'ta**, *n. Chem.* Designating an acid ($C_{21}H_{42}O_4$) obtained from hyoglycocholic acid by partial degradation.

Other words beginning with these prefixes will be found in alphabetical place, either singly or in groups.

hy"o-cho'lic, 1 hai"o-kō'lik; 2 hȳ"o-cō'lic, *a. Chem.* Noting a crystalline acid ($C_{24}H_{40}O_5$) found in the bile of pigs.



[< Gr. *hys*, pig, + *cholos*, bile.] — **alphahyocholeic acid** (*Chem.*), a granular substance ($C_{24}H_{38}O_4$) obtained by the action of caustic potash on hyoglycocholic acid. — **beta-hyocholeic acid** (*Chem.*), a dextrorotatory compound, $C_{24}H_{38}O_4 + 1\frac{1}{2}H_2O$(?), obtained by treating β-hyoglycocholic acid with caustic soda.

Hy"o-don'ti-dæ, *n. pl. Ich.* An American family of malacopterygian fishes having a herring-like form, posterior dorsal fin, and ova falling into the abdominal cavity; mooneyes.

Hy"o-don, *n.* (*z. g.*) [< Gr. *hys*, pig, + *odous*, tooth.] — **hy"o-don't**, *a.* & *n.* — **hy"o-don'tid**, *a.* — **hy"o-don'toid**, *a.* & *n.* — **hy"o-op'y-glot'ic**, *a.* Of or pertaining to the hyoid bone and the epiglottis. — **hy"o-py'o-gen-ic-ol'ic-ac'id**, *n.* — **Hy"o-ga-nol'de-i**, *n. pl. Ich.* A superorder of ganoid fishes with the hyoid apparatus and branchiostegal rays developed, as in garpikes and bowfins. — **hy"o-gan'oid**, *a.* & *n.* — **hy"o-ge-ne'al**, *a.* [< Gr. *genea*, race.] — **hy"o-gen'ic**, *a.* Of or pertaining to the hyoid bone and the tongue. **II.** *n.* The hyoglossus. — **hy"o-glos'sus**, *n.* [-si, *pl.*] *Anat.* One of the muscles of the tongue, attached to the hyoid bone. — **hy"o-gly"co-cho'late**, 1 hai"o-glai'ko-kō'let; 2 hȳ"o-glȳ"co-cō'lāt, *n. Chem.* A salt of hyoglycocholic acid. — **hy"o-gly"co-cho'lic**, *a.* — **hy"o-gly"co-cho'lin** (C$_{26}$H$_{43}$NO$_6$), derived from the bile of pigs. [< Gr. *hys*, pig, + *glykos*, + Gr. *cholos*, bile.]

Hy"o-ga-ta, 1 hai"o-gō'ta; 2 hȳ"o-gō'ta, *n.* Ken in S.W. Honshu

hy'oid, 1 hai'oid; 2 hȳ'oid. **I.** *a.* 1. Having the form of the Greek letter upsilon (Υ, υ). 2. Of or pertaining to the hyoid bone or hyoidean arch. — **hy-oi'de-al**; **hy-oi'de-an**. **II.** *n.* The hyoid bone. [< Gr. *hyoeidēs*, < *y*, upsilon, + *eidos*, see -OID.] — **hyoid apparatus**, in fishes, the structures that represent the skeleton of the second branchial arch of vertebrates, developed in man by the styloid processes of the temporal bone, the stylohyoid ligament, and the lesser cornua of the hyoid bone. — **h. arch**, the branchial arch, of which the hyoid bone is the principal part. — **h. bar**, a cartilage on the side of the hyoid arch of a selachian or embryonic vertebrate. — **h. bone**, the U-shaped bone at the base of the tongue, serving for the attachment of muscles and ligaments. — **hyoid process**, in fishes, a bony or cartilaginous appendage of the hyoid arch.

Hyoid Apparatus.

Part of the base of the bas must, showing the hyoid bone and connections of the hyoid bone. 1. Usual form. 11. Unusual form. 2. Epihyal. 3. Ceratohyal. 4. Basihyal. 5. Lingual. 6. Extra-temporal auditory meatus. 7. Mastoid process. 8. Zygomatic process cut across.

hy"o-ilith'i-dæ, *n. pl. Conch.* A Paleozoic family of shells, Tymanophyal. 5. Styloid generally referred to pteropods. — **hy"o-ilith'i-form**, *a.* Spiwith a straight trihedral thick hyal. 7. Stylohyoid ligament, shell and a cancerous opercu- 8. Lesser cornua of the hyoid lum. **Hy"o-i'thoi**, } **hy"o-i'thid**, } bone, or ceratohyal. 9. Apex **—hy-oi'i-thid**, } **—hy-oi'i-** of the hyoid bone or basihyal. **thoid**, *a.* — **hy"o-man-dib'u-** 10. Lesser cornua of the **lar**, 1. *a.* Of or pertaining hyoid bone, or thyrohyals. to the hyoid arch and the lower jaw. **II.** *n.* The upper element of the hyoid arch, articulating in fishes with the cranium. — **hyomandibular cleft** (*Embryol.*), the first visceral cleft, being that between the hyomandibular and mandibular arches. In fishes it is an opening by which water passes over the branchiæ; in man it is not a true cleft, but a membranous pouch denominated the first pharyngeal pouch, closed to the eighth week. — **hy"o-men'tal**, *a.* Of or pertaining to the hyoid bone and the chin. — **hy"o-plas'tron**, *n. Herp.* One of the second pair of plates on the ventral endoskeleton. — **hy"o-plas'tral**, *a.* — **Hy"o-pot'a-mi'næ**, *n. pl. Mam.* A subfamily of *Anthracotheriidæ* with premolars differentiated from the true molars. **Hy"o-pot'a-mus**, *n.* (*g.*) — **hy"o-po'tal-mus**, *n.* (*g.*) [< Gr. *hys*, pig, + *potamos*, river, + *mys*, mouse.] — **Hy"op-sod'i-dæ**, *n. pl. Paleon.* An extinct family of small animals resembling lemurs, found in the Wasatch and Bridger Eocene. — **Hy"op-sod'us**, *n.* (*g.*) A genus referred to the insectivores and proposed for the *Hyopsodontidæ*. — **hy-op'so-dont**, *n.* — **Hy"op'so-don'ti-dæ**, *n. pl. Paleon.* An Eocene family of small mammals of uncertain relations, by some referred to the lemuroideans and later to the insectivores in the Wasatch and Bridger beds of North America. **Hy"op-sod'o-dont**, **Hy"op-sod'o-nus**, *n.* (*g.*) — **hy"op'so-don'tid**, *n.*

— **hy"o-scap'u-lar**, *a.* Of or pertaining to the hyoid bone and the scapula.

hy"os-cin, 1 hai'os-in, -on *or* -in; 2 hȳ'ŏs-in, -in *or* -in, *n.* = HYOSCINE, *Chem.* A colorless, syrupy liquid compound ($C_{17}H_{23}NO_3$), isomeric with hyoscyamin, contained in henbane (*Hyoscyamus niger*), and used in medicine. [< HYOSCYAMUS, + -amorphous hyoscyamin.

hy"os-cy'a-mine, } 1 hai'os-ai'a-min, -min *or* -min, *n.* *Chem.*
hy"os-cy'a-min, } 2 hȳ"ŏs-ȳ'a-min, -min *or* -min, *n.*

A white, crystalline, poisonous alkaloid ($C_{17}H_{23}NO_3$), isomeric with atropin, contained in henbane (*Hyoscyamus niger*), thorn-apple, deadly nightshade, and other plants. It forms salts that are used in medicine. [< HYOSCYAMUS.]

Hy"os-cy'a-mus, 1 hoi"e-sai'a-mus; 2 hỹ"ō-sī'a-mŭs, *n. Bot.* 1. A genus of Old World poisonous herbs of the family *Solanaceæ*, with toothed leaves and yellow flowers in one-sided leafy clusters. 2. [h-] The henbane (*Hyoscyamus niger*). Its dried leaves are used in medicine. [L., < Gr. *hyoskamos*, henbane, < *hys*, hog, + *kyamos*, bean.]

hy"o-ster'nal, *a.* **1.** Of or pertaining to the hyoid bone and the sternum. **2.** Of or pertaining to a hyoplastron.—**hy"o-ster'num,** *n.* See *hyoplastron*.

hy"os-ty'lic, *a.* Having the jaws suspended from the cranium by the mandibular portion of the hyoid arch, as most fishes.—**hy"os-ty'ly,** *n.* A condition of the suspensorial apparatus of the lower jaw of fishes, etc., in which the proximal element of the hyoid arch (hyomandibular) is enlarged and becomes the main element.—**hyostyly proper,** the typical phase of hyostyly as manifested in all sharks except the hexanchids and heterodontids.—**hy"o-sus"pen-so'ri-al,** *a.* Pertaining to the hyoid and suspensorium.—**hy"o-tau"ro-chol'ic,** *a.* Applied to an organic acid ($C_{26}H_{45}NSO_6$) from which hyocholeic acid and taurin are obtained by decradation.—**Hy"o-the'ri-um,** *n. Paleon.* A genus of marsh-haunting pigs typical of the family *Suidæ*, in the Miocene age of the warmer parts of the Old World. **Hy-oth'e-ret.**—**hy"o-thy'roid,** *a.* Of or pertaining to the hyoid bone and the thyroid cartilage.

hyp, 1 hip; 2 hỹp, *n.* [Colloq.] To render hypochondriac; hip.

hyp, [Colloq.] Hypochondria; hips.

hyp-. See HYPO-.—**hyp"a-bys'sal,** *a. Geol.* Having become consolidated from sudden immersion, under conditions intermediate between deep-seated and superficial conditions, and therefore differentiated by special structural features: said of certain igneous rocks, sometimes called **dike-rocks.**—**hy-pac'tic,** *a. Med.* Laxative.—**hyp"a-cu'si-a,** *n. Pathol.* The state of being slightly deaf. **hyp"a-cu'sis.**

hyp"æ-mi'a, *n.* Same as HYPERÆMIA.

hyp"æs-the'si-a, *n.* Same as HYPESTHESIA.

hyp-æ'thron, 1 hip-ī'thron *or* hai-pī'thron; 2 hỹp-ē'thron *or* hỹp-pē'thron, *n.* [-THRA, *pl.*] *Arch.* A temple with uncovered central portion.

It is now established that the supposed existence of such temples in classical antiquity is based on a misunderstanding, as no such type existed in reality.

You can scarce . . . combine two ideas together upon it . . . without an *hypæthron*.

SYDNEY SMITH *Tristram Shandy* vol. viii, p. 278. [a. a s. 1826.]

[LL., < Gr. *hypaithros*, < *hypo*, under, + *aithēr*, sense ETHER.] **hyp-æ'thros.**—**hyp-æ'thral,** *a.* [Idool.]

Same as HYPÆTHRAL.

hyp"al-bu'mi-no'sis, *n.* A deficiency of albumin in the **hyp-al'gi-a,** 1 hip-al'jī-a *or* hai-pal'jī-a; 2 hỹp-āl'jī-a *or* hỹp-pāl'jī-a, *n. Pathol.* A state of comparative immunity from pain; a total reduction of the sense of pain; a form of physical suffering. [< HYP- + Gr. *algos*, pain.] **hyp"al-ge'si-a,** [pain.]—**hyp-al'gic,** *a.*

hyp-al'le-lo'mor'phic, 1 hip-al'e-jī *or* hai-pal'e-jī; 2 hỹp-āl'ē-lō-mŏr'fic, *a.* Relating to allelomorphs which are of a compound nature under certain circumstances.—**hyp"al-le'lomorph,** *n.*

Hyp"a-nis, 1 hip'a-nis; 2 hỹp'a-nĭs, *n.* Same as BUG, 1.

hyp-an"i-sog'na-thous, 1 hip-an'i-sog'na-thus; 2 hỹp-ăn'ĭsŏg'na-thŭs, *a.* Having the teeth of the lower jaw narrower than those of the upper. [< HYP- + Gr. *anisos* (< *an-*, not, + *isos*, equal) + *gnathos*, jaw.]—**hyp-an"i-sog'na-thism,** *n.*

hyp-an'thi-um, 1 hip-an'[or hai-pan']thi-um; 2 hỹp-ăn'[or hỹp-păn']thĭ-ŭm, *pl.* -THIA. Or -THI-UMS, *pl.*] *Bot.* An enlargement of the axis of a flower under the calyx. [< HYP- + Gr. *anthos*, flower.]—**hyp-an'thi-al,** *a.*

hyp"an-thod'i-um, 1 hip-an-thō'di-um; 2 hỹp-ăn-thō'dĭ-ŭm. *n. Bot.* Same as SYCONIUM. [< HYP- + ANTHODIUM.]

hyp-an'trum, 1 hip-an'trum *or* hai-pan'trum; 2 hỹp-ăn'trum *or* hỹp-păn'trum, *n.* [-TRA, *pl.*] *Anat.* A vertebral neural arch that receives a hyposphene. [< Gr. *hypantros*, ravenous, < *hypo*, under, + *antron*, cave.]

Hyp"as-pan'ti-a, 1 hip"as-pan'shi-a; 2 hỹp"ăs-păn'shĭ-a, *n. Ch.* A festival commemorating the meeting of the child Jesus and his mother with Simeon and Anna in the temple: corresponding to the *Candlemas* or *Purification* of the Western Church. In the Armenian Church it is kept on February 14. [< Gr. *hypapantē*, < *hypo*, under, + *antaō*, meet with, < *anti*, opposite.] **Hyp-an'tei.**

hyp"a-phe'nic, 1 hip"a-fī'nic; 2 hỹp"a-fē'nĭc, *n. Chem.* A crystalline alkaloid occurring in several species of *Erythrina*. [< HYP- + Gr. *aphoros*, barren.]

hyp"a-poph'y-sis, 1 hip"a-paf'i-sis; 2 hỹp"a-pŏf'ĭ-sĭs, *n.* [-SES, *pl.* -SIZ; 2 -sēz, *pl.*] *Anat.* A median ventral process of a vertebra. [< HYP- + APOPHYSIS.]—**hyp"a-poph'y-sial,** *a.*

hyp"ar-ca-a'le, 1 hip"ār-ka-ā'li; 2 hỹp"ār-cā-ā'lē, *n. Anat.* A basilorsal arch of bone, which constitutes the neural arch on the dorsal side of the notochord; the basidorsal of Gadow. [HYP- + L. *arcus*, arch.]

hyp"ar-te'ri-al, 1 hip"ār-tī'ri-al; 2 hỹp"ār-tē'rĭ-al, *a.* Below an arterial trunk: as, a *hyparterial* bronchus.

hy-pas'pist, 1 hai-pas'pist; 2 hỹ-păs'pĭst, *n.* [Rare.] *Philos.* Subsistence; entity; existence in a subject.

hy-pas'pist, 1 hi-ĭc hai-pas'pist; 2 hỹ-ĭc hỹ-păs'pĭst, *n. Gr. Antiq.* A shield-bearer or armor-bearer; specifically, one of the royal foot-guards of the Macedonian army. [< Gr. *hypaspistēs*, shield-bearer, < *hypo*, under, + *aspis*, shield.]

hyp"a-te, 1 hip'a-tī; 2 hỹp'a-tē, *n.* **1.** The lowest tone of the two lowest tetrachords. **2.** The longest string on the lyre.

Hy-pa'tia, 1 hai-pē'shi-a; 2 hỹ-pā'shĭ-a, *n.* (—415.) A Greek Neo-Platonic philosopher and teacher at Alexandria; daughter of Theon; killed by a mob excited by the denunciations of Cyril, the archbishop. Introduced in Kingsley's *Hypatia*, as its heroine.

hyp"a-ton, 1 hip'a-ten; 2 hỹp'a-tŏn, *n.* [Gr.] See under TETRACHORD.

hyp"ax'i-al, 1 hip-aks'[or hai-paks']i-al; 2 hỹp-ăks'[or hỹpăks']ĭ-al, *a.* Situated ventrally from the axis of the body; as, *hypaxial* actinophores; the *hypaxial* muscles of the spine.

hype, *n.* & *a.* Same as HYPO.

hyp-e'mi-a. *n. Pathol.* Same as HYPHÆMIA.

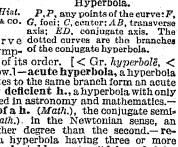
Hy"pe-nan'tron, 1 hai"pi-nan'tron; 2 hỹ"pe-năn'trŏn, *n. Bot.* A large genus of marchantiaceous liverworts. [< Gr. *hypenantios*, opposite.]

hyp'en-chyme, 1 hip'en-kaim; 2 hỹp'ĕn-cỹm, *n. Embryol.* The connective tissue, distinguished from mesenchyme, which forms in the intestinal canal of the embryo. [< HYP-; and see ENCHYMA.]

Hy-pen'i-dæ, 1 hai-pen'i-dī; 2 hỹ-pĕn'ĭ-dē, *n. pl. Entom.* A family of noctuid moths with an acute projection on the front, and long, ploice, porrect compressed palpi alike in both sexes. **Hy-pe'na,** *n.* (t. g.) [< Gr. *hypenē*, mustache.]—**hop-vine Hypena** (*Hypena humuli*), a moth whose larva bore into the stem of the hop-plant.—**hy-pe'nid,** *a.* & *n.*—**hy-pe'noid,** *a.* [tively; bustle.

hy'per, 1 hai'pər; 2 hỹ'pĕr, *pt.* [Local, U. S.] To move a-

hy'per-, 1 hai'pər-; 2 hỹ'pĕr-, *prefix.* Over; above; above measure; used specif.: (1) in chemistry, to denote the highest in a series of compounds: (2) in ancient music, to denote (*a*) modes or scales beginning at a higher point, (*b*) intervals measured upward, as *hyperdiapason*, *hyperdiapente*, *hyperdisdiapason*, *hyperdisdiapente*, *hyperditonus*; (3) to distinguish certain ecclesiastical modes, as the *Hyperdorian*, *Hyperlydian*, *Hyperphrygian*, from those with the prefix HYPO-. See MODE. [< L. *hyper-*, < Gr. *hyper-*, < *hyper*, over.] Greek *hyper-*, was used, more especially with verbs, to express motion over or beyond, or in the sense of exceedingly, with adjectives to signify the possession of a quality beyond the ordinary degree, and with nouns to express position beyond or elevation above: a few of these Greek words found their way into English speech, as *hyperbole*, and *hyperborean*. Since the Renaissance it has been extensively used as a prefix of adjectives and nouns, on lines analogous to its primal Greek use, and conveys the idea of excess; as, *hypercritity*, over-activity. The following words express this sense:



hyperacidity	hyperdiffusion	hyperoxidation
hyperactivity	hyperdynamic	hyperoxygenated
hyperacuity	hypergenetic	hyperoxygenation
hyperacuteness	hyperglobulin	hyperoxygenized
hyperadrenalism	hyperglycemia	hyperperfection
aly	hyperidrosis	hyperperistalsis
hyper-Calvinist	hyperkatabolism	hyperpigmentation
hypercarbureted	hyperkinesia	hyperpituitarism
hypercathartic	hyperleucocytosis	hyperplatyrhine
hyperchromatism	hypermedication	hyperpressure
hyperchromatosis	hypermetaphorical	hyperpurist
hypercircle	hypermoral	hyperrespiration
hypercircumflex	hypernutrition	hyperrhythmical
hypercritical	hyperorganic	hypersecretion
hypercritically	hyperorthodox	hypersensibility
hypercritic	hyperorthodoxy	hypersensitive
hypercritique	hyperosmotic	hypersensitiveness
hyperdeification	hyperosmotically	hypertrichosis
hyperexcitability	hyperotheography	

—hy"per-a-bel'i-an, *a.* Resembling an Abelian function, integral, etc., but more complicated.—**hy"per-ac'a-tho'sis,** *n. Pathol.* Abnormal increase or excessive development of the prickle-cell layer of the epidermis. **hy"per-ak'a-tho'sis†.**—**hy"per-a-cu'sis,** *n. Pathol.* Morbid acuteness of hearing, often attending facial paralysis. **hy"per-a-cu'sia.**—**hy"per-a-cu'ter,** *a. Anomalously* or *abnormally* acute.—**hy"per-ad"e-no'sis,** *n. Pathol.* Hypertrophy of a gland; particularly, abnormal growth of the lymphatic glands.—**hy"per-æs'the-sia,** **hy"per-æs'the-ize,** **hy"per-æs'thete,** **hy"per-es-the'tic,** see HYPERESTHESIA, etc.—**hy"per-al-bu'mi-no'sis,** *n. Pathol.* A state of the blood showing an abnormal quantity of albumin.—**hy"per-al'ge-si-a,** *n. Pathol.* Morbidly excessive sensibility to pain. **hy"per-al'ge-si-a†.**—**hy"per-al-ge'sic,** *a.*—**hy"per-al"i-men-ta'tion,** *n.* Nutrition beyond what is needed for the support of the body.—**hy"per-a-nal'o-lism,** *n. Pathol.* Abnormal development of an organ or part resulting in hypertrophy.—**hy"per-an'a-lyt'ic,** *a.*—**hy"per-an'a-lyt'ic-al,** *a.* Excessively acuteness of the sense of touch.—**hy"per-aph'ic,** *a.*—**hy"per-aph"ro-dis'i-a,** *n. Pathol.* Excessive sexual appetite.—**hy"per-a-spid'y-sis,** *n.* [-SES, *pl.*] A projection from the neural spine of a vertebra by which it locks with the one next in series.—**hy"per-ap'o-phys'i-al,** *a.*—**hy"per-as'pist,** *n. Gr. Antiq.* An attendant who held a shield over a warrior in battle; hence, a defendant; champion.—**hy"per-as-the'ni-a,** *n. Pathol.* Excessive weakness.—**hy"per-auxe'sis,** *n. Pathol.* Excessive enlargement of an organ or part due to some morbid condition of the system.

Other words beginning with this prefix will be found in alphabetical place, either singly or in groups.

hy-per'ba-ton, 1 hai-pĭr'bə-tan; 2 hỹ-pĕr'bə-tŏn, *n.* [-TA, *pl. Rhet.* An inversion of words from their grammatical order; inversion, as "the hills among" for "among the hills." It is one of the features that distinguish poetry from prose, and an important element in figurative and impassioned diction. [L., < Gr. *hyperbaton*, transposed, < *hyper*, over, + *bainō*, go.] **hy"per-bat'ic,** *a.*—**hy"per-bat'i-cal-ly,** *adv.*

hy-per'bo-la, 1 hai-pĭr'bə-lə; 2 hỹ-pĕr'bo-la, *n. Geom.* **1.** A plane curve such that the difference of the distances from any point of the curve to two fixed points, the foci, is a constant. It is one of the conic sections, and is composed of two hyperbolic branches which nowhere meet. See CONIC and ASYMPTOTE.

Hyperbola.

All the curved lines used in the Doric order† were either *hyperbolas* or parabolas.

LAURA FERGUSON *Hist. Arch.* vol. i, p. 251. [D. M. & CO. 1883.]

P, P, are points on the curve: *F, G*, foci; *C*, center; *AB*, transverse axis; *ED*, conjugate axis. The dotted curves are the branches having one more asymptote than the number of the conjugate hyperbola.

2. Any algebraic curve of the second order, as *hyperbola*, a hyperbola such that the asymptotes to the two branch form an acute angle— **deflective h.** or **deficient h.**, a hyperbola with only one real asymptote: used in astronomy and mathematics.—**imaginary semi-axis of a h.** (*Math.*), the conjugate semi-axis.—**infinite h.** (*Math.*). In the Newtonian sense, an algebraic curve of higher degree than the second.—**redundant h.** (*Math.*), a hyperbola having three or more asymptotes.—**hy-per'bo-la-toid,** *n.* A solid bounded by two parallel planes and by a surface generated by a straight line intersecting both, and moving as to return to its initial position.—**hy"per-bol'i-form,** *a.* Having the form of the hyperbola.—**hy"per-bol'o-graph,** *n.* An instrument for describing or drawing hyperbolas.

hy"per-bo-le'on, *n.* See TETRACHORD.

hy-per'bo-le, 1 hai-pĭr'bo-lī; 2 hỹ-pĕr'bo-lē, *n. Rhet.* A figure that consists in a change in the degree or quantity of the represented object; poetic or rhetorical overstatement; exaggeration. Examples of *hyperbole* are "They were swifter than eagles, they were stronger than lions" (*2 Sam.* i, 23), and "So frown'd the mighty combatants, that hell Grew darker at their frown" (MILTON *P. L.* bk. ii, l. 719). [L., < Gr. *hyperbolē*; see HYPERBOLA.] **hy"per-bo'lic,** **hy"per-bo'li-cal,** *a.*—**hy"per-bo'lism,** *n.* One given to hyperbole.

hy"per-bol'ic, 1 hai"pər-bol'ik, -i-kal; 2 hỹ"pĕr-bŏl'ĭc, **hy"per-bol'i-cal,** *a.* **1.** *Rhet.* Relating to or containing hyperbole; exaggerating. **2.** *Math.* (1) Of, pertaining to, or having the shape of a hyperbola.

By throwing two equal stones into a pool of water, . . . it will be seen that there are certain lines of a *hyperbolic* form where the water is quite smooth. BREWSTER *Nat. Magic* p. 199. [a. 1838.]

(2) Having relations to the hyperbola similar to those of the ordinary trigonometrical functions to a circle; as, the *hyperbolic* functions, including the *hyperbolic* sine, cosine, secant, etc. (written *sinh*, *cosh*, etc.). See TRIGONOMETRIC. [< L. *hyperbolicus*, < Gr. *hyperbolikos*, extravagant, < *hyperbolē*; see HYPERBOLA.]—**hyperbolic branch** (*Geom.*), a branch of a curve having a real asymptote.—**hy"per-bol'i-cal-ly,** *adv.*

hy"per-bo-lism, 1 hai-pĭr'bo-lizm; 2 hỹ-pĕr'bo-lĭzm, *n.* **1.** *Rhet.* Addiction to hyperbole; use of exaggerated style. **2.** *Geom.* A curve whose equation is derived from that of another by the substitution of xy for y.

hy-per'bo-lize, 1 hai-pĭr'bo-laiz; 2 hỹ-pĕr'bo-līz, *v.* [-LIZED; -LIZ'ING.] **I.** *t.* To express in hyperbolical terms; manifestly overstate. **II.** *i.* To express oneself hyperbolically; make use of hyperbole. **hy-per'bo-lizer,** *n.*

Others among them . . . *hyperbolize* much higher concerning it. PRIDEAUX *Mahomet* p. 39. [DA. 1808.]

hy-per'bo-lo-graph, *n.* An instrument for tracing hyperbolas.

hy-per'bo-loid, 1 hai-pĭr'bo-loid; 2 hỹ-pĕr'bo-lŏid, *n.* **1.** A surface of the second degree some of whose plane sections are hyperbolas. It may belong to either of two classes, the hyperboloid of one nappe, which may be generated by the motion of a straight line, and that of two nappes, formed of two like and completely distinct surfaces. **2.** A hyperbola of a higher order. [< HYPERBOLA + -OID.]—**hy-per"bo-lof'al,** *a.* Pertaining to or having the nature of a hyperboloid.

Hy"per-bo're-an, 1 hai"pər-bo'ri-ən; 2 hỹ"pĕr-bo'rē-an, *a.* **1.** Belonging or relating to the Hyperboreans. **2.** [h-] Situated or dwelling in the extreme north; arctic; hence, very cold. The **Hyperborean mountains** were supposed to exist at the north of the earth, and were identified by later geographers with various mountains, as the Caucasus, or the Riphæan mountains. The name appears on maps down to the 16th century. [< LL. *Hyperboreanus*, < L. *hyperboreus*, < Gr. *hyperboreos*, < *hyper*, beyond, + *boreas*, north wind.]

Hy"per-bo're-an, *n.* **1.** *Gr. Myth.* One of a people, favorites of Apollo, supposed to dwell beyond the north wind, where they enjoyed perpetual spring and unbroken peace, and eternal youth. Hecatæus of Abdera, in the 4th century B. C., wrote a book concerning this ideal people. A geographical knowledge grew by degrees more and more difficult to assign them a local habitation, and all lands were attributed to them, including the island of Britain. The legend remained for many centuries among the traditions of Europe.

On the north there was the delicious country of the *Hyperboreans*, beyond the reach of winter. DRAPER *Intell. Devel. Europe* vol. i, p. 42. [H.]

2. [h-] Any dweller in the extreme north.

We,—I mean our party of American *hyperboreans*,—are mere carpet knights aside of these indomitable savages. KANE *Arctic Explorations* vol. ii, p. 24. [c. a. P. 1856.]

hy"per-bou'li-a, *n. Psychol.* Heightened control of the bodily organism, in certain states of auto-suggestion.—**hy"per-brach'y-ce-pha'li-a,** *n. Craniom.* Excessive brachycephalic; having a cephalic index of 85 to 89.—**hy"per-brach'y-u-ran'ic,** *a. Craniom.* Possessing a very short palate; having a very high palatomaxillary index.—**hy"per-brau'chi-al,** *a. Zool.* Situated over the gills.—**hy"per-bu'li-a,** *n.* Same as HYPERBOULIA.—**hy"per-Cal'vin-ism,** *n.* Extreme Calvinism.—**hy"per-car'bon-ize'ted,** *a.* Containing an excess of gaseous hydrocarbons, as water-gas.—**hy"per-car'di-a,** *n. Pathol.* Enlargement of the heart.—**hy"per-cat'a-lec'tic,** *a. Pros.* Having a final incidental syllable; hypermetric; as, "They gave the whole long day to idle laughter"; "Cromwell, I charge thee fling away ambition."—**hy"per-cat"a-lex'is,** *n. Pros.* Redundancy of a final syllable or foot beyond the measure.—**hy"per-cel'sus-pen'so'sis,** *n. Pathol.* Excessive growth of the dental cement.—**hy"per-ce-no'sis,** *n. Pathol.* Excessive depletion; abnormal evacuation, as of bodily vessel by bleeding.—**hy"per-chi-me'ra, hy"per-chi-me'ra,** *n.* A chimera which is composed of a mosaic of tissues derived from the two contituent forms that typify the grafted hybrid. See CHIMERA; GRAFT-HYBRID.—**hy"per-chlor-hy'dri-a,** *n. Pathol.* A condition showing the presence in the gastric juice of an excess of hydrochloric acid.—**hy"per-chlor-hy'dric,** *a.*—**hy"per-chlo'ric,** *a. Chem.* Same as PERCHLORIC.—**hy"per-chlo'ri-da'tion,** *n. Med.* Overdosing with chlorin, or one of its compounds, such as common salt.—**hy"per-chromat'se-a,** *n. Pathol.* A disease of the skin characterized by excessive deposit of coloring-matter.—**hy"per-chro-mat'ic,** *a.* **1.** *Pathol.* Containing an abnormal amount of pigment. **2.** *Micros.* Very sensitive to stains.—**hy"per-chro'ma-ton-sy,** *n. Pathol.* A defect of sight by which everything seems to be colored.—**hy"per-chro'mi-a,** *n. Pathol.* Same as HYPERCHROMATOSIS.—**hy"per-ci-ne'sis, hy"per-ci-ne'sis,** same as HYPERKINESIA, etc.—**hy"per-com'plex,** *a. Math.* Having or pertaining to more than two different units; complex in the third or a higher degree.—**hy"per-con'ic,** *a. Math.* Relating to or produced by the intersection of two quadric surfaces.—**hy"per-cor'a-coid,** *n. Ich.* The scapula, or upper element of the pectoral arch in typical fishes.—**hy"per-cos'mic,** *a.* Same as SUPRAMUNDANE.

hy"per-crit'ic, 1 hai"pər-krit'ik; 2 hỹ"pĕr-crĭt'ĭc, *n.* A very severe critic.

hy"per-crit'i-cal, 1 hai"pər-krit'i-kal; 2 hỹ"pĕr-crĭt'ĭ-cal, *a.* **1.** Given to overmuch or captious criticism; unduly harsh in judgment; censorious; faultfinding. **2.** [Rare.] Overnice; unduly exact.

It would have been *hypercritical* to object to 'The Prairie,' that it was not strictly nautical or true in its details.

COOPER *Pilot* p. 7. [P. Y. C.]

SYN.: see CAPTIOUS.—**hy"per-crit'i-cal-ly,** *adv.*—**hy"per-crit'i-cism,** 1 hai"pər-krit'i-sizm; 2 hỹ"pĕr-crĭt'ĭ-cĭsm, *n.* Excessively fastidious criticism.—**hy"per-crit'i-cize** or **-cise,** *vt.*

hy"per-cry"a-ge'si-a, *n. Pathol.* An abnormal state of sensitiveness to cold.—**hy"per-cy'cle,** *n. Math.* **1.** A sextic curve having the line at infinity as a double tangent. **2.** In Lobachevskian geometry, a curve whose center is ideal. —**hy"per-cy'cloid,** *n. Math.* In non-Euclidean geometry, a surface generated by a hypercycle revolving about its rectilinear equidistant axis. **hypercycloid of revolution.**—**hy"per-cy-e'sis,** *n. Pathol.* A too frequently recurring state of pregnancy; supergestation.—**hy"per-cyr-to'sis,** *n.*

Pathol. Morbid or enlarged curvature.—**hy"per-dac-tyl'i-a,** *n.* The possession of more than the usual number of fingers. **hy"per-dac'ti-ly†.**—**hy"per-der"ma-to'sis,** *n. Pathol.* A morbid increase and abnormal thickening of the skin; skin hypertrophy.—**hy"per-der'mal-mal.** *Math.* **I.** *a.* Invariative. **II.** *n.* **1.** A determinant formed of operators instead of quantities. **2.** A determinant of four dimensions.—**hy"per-dil"a-ta'sion,** *n. Anc. Mus.* An octave higher.—**hy"per-dil"a-pa'son,** *n. Anc. Mus.* A perfect fifth higher.—**hy"per-di"a-tes'sa-ron,** *n. Anc. Mus.* A perfect fourth higher.—**hy"per-di"a-zeuc'tic,** *a. Anc. Mus.* The condition always occasioned by the intervention of an octave between two tetrachords, as of the hyperboleon and hypaton.—**hy"per-dis-syl'la-ble.** **I.** *a.* Polysyllabic. **II.** *n.* A polysyllable.—**hy"per-dis'tri-bu-tive.** **I.** *a. Math.* Distributive as to several sets of variables simultaneously: said of an operation or a function. **II.** *n.* A hyperdistributive function.—**hy"per-dy'tone,** *n. Anc. Mus.* A major third higher.—**hy"per-di"u-re'sis,** *n. Pathol.* Same as POLYURIA.—**hy"per-dol"ĭ-cho-ec-pha'lic,** *a. Craniom.* Having a cephalic index from 66 to 69.9.—**hy"per-don-ţog'e-ny,** *n.* A third dentition, occurring late in life.—**Hy"per-do'ri-an,** *a.* See GREEK MODES, under MODE.—**hy"per-du'li-a,** *n. R. C. Ch.* Worship given to the Virgin Mary as the highest of the saints: distinguished from *dulia*, the worship addressed to the saints, and from *latria*, that which is given to God. **hy"per-du'ly‡.**—**hy"per-du'li-cal,** *a.*—**hy"per-dy-na'mi-a,** *n. Pathol.* Excessive muscular energy; overexcitability with its accompaniment of increased physical strength.—**hy"per-dy-nam'ic,** *a.*—**hy"per-elec-tri'ic,** *a. Math.* More complicated than the elliptical, denoting certain classes of curves, functions, and integrals.—**hyperelliptic curve,** a curve having its axes of coördinates rationally expressed by a parameter, and the square root of a whole function, Bz, of the degree of $2z + 2$, provided the curve is of the z class.—**h. functions,** functions arising from the conversion of hyperelliptical integrals.—**hy"per-eur'e-sis,** *n. Pathol.* Continued and violent vomiting.—**hy"per-e-met'ic,** *a.*

hy"per-é'mi-a, } 1 hai"per-ĭ'mi-ə; 2 hȳ"per-ĭ'mi-a, *n.* **hy"per-es'thĭ-a,** } *Pathol.* Abnormal accumulation of the blood in any part of the body, characterized as *active* when due to increased flow of blood to a part, and *passive* when due to obstruction in the return of blood from a part. [< HYPER- + Gr. *aisthēsis*, perception.] **hy"per-en-ceph'a-lus,** *n. Biol.* A monster with brain extruded from theskull.—**hy"per-en'er-get'ic,** *a.* Superior to and independent of ordinary laws of energy.—**hy"per-en'er-gy.** The existence in the blood of an unusual number of eosinophilic corpuscles.—**hy"per-e"o-sin"o-phil'ic,** *a.*—**hy"per-ep'i-dro'sis,** *n.* Hyperidrosis.—**hy"per-e"qua-to'ri-al,** *a.* Of a temperature like that of the equator.—**hy"per-e"te-thĭs'i-a,** *n.* Extraordinary irritability.—**hy"per-e'te-thism‡.**—**hy"per-es"o-pho'ri-a,** *n. Pathol.* In strabismus, direction of the visual line upward and inward.—**hy"per-es-the'sĭ-a,** } 1 hai"per-es-thĭ'si-ə; 2 hȳ"per-ĕs-thē'sĭ-a. } thē'si-a, *n.* Exaggerated sensibility. [< HYPER- + Gr. *aisthēsis*, perception.] **hy"per-es-for'-ses-the'sis.** See **-ses-the'sis.**—**hy"per-es'sĭ-al-ĭst.** A supersensitive person.—**hy"per-es-[or -ess-]thet'ic,** *a.* Morbidly sensitive. **hy"per-es-[or -ess-]thet'sist.**

hy"per-eu-tec'tic, *a. Metal.* Containing combined carbon in the form of cementite in excess of .90 per cent., as a steel.—**hy"per-eu-tec'toid,** *a.*—**hy"per-ex"o-pho'ri-a,** *n. Pathol.* In strabismus, direction of the visual line outward and outward.—**hy"per-fal-sca'u,** *n.* [F.] *Geom.* The aggregate of the lines determined by three lines (noting the same pencil) each intersecting the other two.—**hy"per-fe'cal-ĭ-a,** *n. Phot.* Denoting the effect produced when all objects are in focus when a lens is focused on infinity.—**hy-per'ga-my,** *n. Hindu Law.* Marriage between persons of equal caste or of a woman with one of a superior caste. Women are forbidden to marry into an inferior caste.—**hy-per'ga-mous,** *a.*—**hy"per-gas,** *n.* Matter in the state called by Crookes the "fourth state."—**hy"per-gen'e-sis,** *n.* Same as **hy"per-ge-nē'sis,** *n.* Excessive development, as of a part or tissue.—**hy"per-ge-net'ic,** *a.*—**hy"per-ge'o-met'ric,** *a. Math.* Designating a series related to the form

$$1 + \frac{\alpha\beta}{1.\gamma} z + \frac{\alpha(\alpha+1)\beta(\beta+1)}{1.2.\gamma(\gamma+1)} z^2 + \text{etc.}$$

hy"per-ge"o-met'ri-cal‡.—**hypergeometric equation,** Gauss's equation. See under EQUATION.—**hy"per-ge-om'e-try,** *n.* Geometry of more than three dimensions.—**hy"per-geu'sĭ-a,** *n.* Abnormal sensitiveness in the organs of taste.—**hy"per-glo-bu'lĭ-a,** *n.* Excess of red blood-corpuscles.—**hy"per-gly'ce-mi,** *n.* Same as **-cē'mi,** excessive amount of sugar in the blood.—**hy"per-gly-ce'for -cor'i-mie,** *a.*

hy"per-gon, 1 hai"per-gon; 2 hȳ"per-gŏn. *n.* A wide-angled lens of the Goerz system. It is a double anastigmat and symmetrical doublet consisting of two very thin semispherical single lenses. It embraces an angle of 135 degrees. [< HYPER- + Gr. *gōnia*, angle.]

hy"per-he-do'ni-a, *n. Pathol.* A morbid erethism in which the pleasurable sensation of agreeable acts is increased.—**hy"per-he-red'i-ty,** *n.* The accumulation of inherited qualities in the progeny through long-deferred mating.—**Hy"per-hex-ap'o-da,** *n. pl. Zool.* A section of the *Arthropoda* embracing those with numerous legs.—**hy"per-hex'a-pod,** *a.* & *n.*—**hy"per-hex-ap'o-dous,** *a.*

hy-pe'ri-an, 1 hai-pi'ri-ən; 2 hȳ-pē'ri-an. **I.** *a.* Of or pertaining to the *Hyperitæ*. **II.** *n.* One of the *Hyperitæ*.

Hy"per-ia-ce'æ-a, 1 hai"per-ĭ-a-sē'ĭ-ə; 2 hȳ"per-ĭ-a-sē'ĭ-a. *Bot.* A family of herbs, shrubs, and (rarely) trees—the St.-John's-wort family of the order *Hypericales*—with opposite, entire, dotted leaves, solitary or cymose clusters, and flowers of regular perfect flowers, having the stamens commonly collected in three or more clusters. It embraces 10 genera and about 280 species, found in all temperate and warm parts of the world. [< HYPERICUM.] **Hy"per-i-cin'e-æ‡;** **Hy"per-y-cin'e-æ‡.**—**hy"per-i-ce'a-ceous,** *a.*

Hy"per-i-ca'ĭes, 1 hai"per-ĭ-kē'ĭz; 2 hȳ"per-ĭ-ē'ĭz. *n. pl. Bot.* An order of dicotyledonous plants of the subclass *Archichlamydeæ*. There are 29 families, characterized generally by a placenta attached to the wall of the ovary and by sepals overlapping or rolled together lengthwise. *Clusiaceæ*, *Violaceæ*, and *Hypericaceæ* are the most important families. [< HYPERICUM.]

hy"per-i-cum, 1 hai-per-ĭ-kum; 2 hȳ-pĕr'ĭ-cŭm (XIII), *n.* **1.** A large genus of herbaceous or somewhat shrubby plants, of the family *Hypericaceæ* — the St.-John's-worts — having pentamerous yellow flowers with the stamens clustered in 3 or 5 bundles. **2.** [cf. A form of the genus

Hypericum all bloom, so thick a swarm

[L., < Gr. *hypereikon*, St.-John's-wort, < *hypo*, under, + *ereikē*, heath.]

hy"per-ĭ'de-a'tion, *n.* Excessive and abnormal mental activity.

Hy"per-ĭ'des, 1 hai"per-ai'dĭz; 2 hȳ"per-ĭ'dēz, *n.* (389–322 B. C.) An Athenian orator who supported Demosthenes against the Macedonian party, and fled with him, when the Confederate Greeks were defeated, to the temple of Poseidon in the island of Calauria. He was arrested and put to death by the emissaries of Antipater. It is related that he cut out his tongue to avoid betraying party secrets. **Hy-per-aï'des;** [Gr.].

hy"per-i-dro'sis, *n.* Abnormal sweating. **hy"per-eph"i-dro'sis;** **hy"per-bi-dro'sis‡.**

Hy"per-ĭ'lĭ-a, 1 hai"per-ai'lĭ-ə; 2 hȳ"per-ĭ'lĭ-a. *n. pl. Crust.* A family of hyperideans, especially those with the first antennus straight, flagella filiform, appendix with rami, and mandibles without palp. **Hy"per-ĭ'le-an** (-lē-ən), *n.*—**Hy"per-ĭ-dæ'i.**—**hy"per-id, hy-pe'ri-id,** *n.*—**hy-pe'ri-oid,** *a.*

Hy"per-i-id'e-a, 1 hai"per-ai-id'i-ə; 2 hȳ"per-ĭ-id'e-a. *n. pl. Crust.* An order of amphipods, usually free-living, with (1) pairs of pleopods (fifth and sixth without endopodites), and maxillipeds. **Hy"per-ĭ'na‡.**—**hy"per-i-id'e-an, hy"per-in'(e)-an,** *a.* & *n.*

hy"per-i-no'sis, *n.* Excess of fibrin in the blood. [< HYPER- + Gr. *is* (*in-*), strength.]—**hy"per-i-not'ic,** *a.*—**hy"per-in"du-lation,** *n. Mad.* Excessive reduction in the size of the uterus after labor, leading to atrophy.

Hy"per-ĭ'on, 1 hai-pi'ri-on *or* hai"per-ai'on; 2 hȳ-pĕr'ĭ-ŏn *or* hȳ"per-ĭ'ŏn. *n.* [Gr.] **1.** *Gr. Myth.* (1) A Titan, son of Uranus and Ge and father of Helios, Selene, and Eos. (2) Helios or the sun-god himself, the incarnation of light and beauty. **2.** *Astron.* The seventh satellite of Saturn. **3.** A poetical fragment by Keats: thoroughly Greek in spirit and treatment. **4.** A romance by Longfellow.

Hy"per-i-on'ĭc, 1 hai"per-ai-on'ik; 2 hȳ"per-ĭ-ŏn'ĭc, *a. Mus.* Same as **hypodorian.** [< Gr. *Hyperiōn*, *a.*] **hy"per-i-on'ic.**

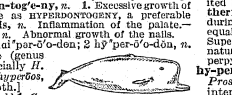
Hy"per-ĭ'on-ĭst‡, *a.* Of, pertaining to, or resembling Hyperion.

I see nothing to prevent our people reassuming the old *Hyperionic* type, the Apollo, and shoulders to match. . . . Boston is full of it, as the apostle says, with all the fulness of God. SYLVESTER JUDD *Margaret* (ed. 1871), p. 41. [P. S. & CO. 1851.]

hy"per-ĭ'son-ĭst, *n. Psychol.* Exciting a greater amount of osmotic pressure than is necessary to preserve the red blood-corpuscles: said of saline solutions.

hy"per-ite, 1 hai"per-ait; 2 hȳ"per-it, *n. Petrol.* Olivine norite: so called as characterized by orthorhombic pyroxene and olivine. [Probably < HYPER- + -ITE.] **hy"per-yte‡.**

hy"per-ker"a-to'sis, *n. Pathol.* **1.** Excessive increase in the horny layer of the epidermis. **2.** A conical cornea.—**hy"per-ki-ne'sĭ-a,** *n. Pathol.* Exaggerated muscular action; spasm. **hy"per-ki-ne'sis‡.**—**hy"per-ki-net'ic,** *a.* **hy"per-le'thal,** *a. Med.* More than enough to kill: applied to a dose of a poison.—**hy"per-li-thu'ri-a,** *n. Pathol.* Gouty excess of uric acid in the blood.—**hy"per-lo'gĭ-an,** *n.* Excessive talkativeness, as a mental symptom.—**Hy"per-lyd'i-an,** *a.* Designating a variation of the Lydian mode. See GREEK MODES, under MODE.—**hy"per-ma-cro'bĭ-ote** (-krō'-), *n.* Same as **hy"per-ma-ture',** *a. Pathol.* Developed to a condition unfit for operation: said of a cataract.—**hy"per-meg"a-cra'ni-ous,** *a. Craniom.* Having a capacity exceeding 1600 cubic centimeters for a male and 1,460 for a female.—**hy"per-me-ga'li-a,** *n.* Excessive size in an organ.—**hy"per-meg"a-sper'ma-tism,** *n. Pathol.* Excessive capacity of the seminal cavities exceeding 790 cubic centimeters for males and 630 for females.—**hy"per-mes'a-ti-ce-phal'ic,** *a. Craniom.* Having a cephalic index from 75 to 79.—**hy"per-met'a-mor'pho-sis,** *n. Entom.* A metamorphosis in which the larva passes through two or more widely differing forms before the pupa stage.—**hy"per-met"a-troph'ism,** *n. Pathol.* Excessive nutrition.—**hy"per-met'o-pism‡.**—**hy"per-met'o-pho'ĭ-ĭc,** *a.*—**hy"per-me-ter,** *n. Pros.* A hypercatalectic line; a period containing a redundant colon.—**hy"per-met'ric, hy"per-met'ri-cal,** *a.*—**hy"per-met'ri-cal-ly,** *adv.*—**hy"per-me'tron-ism,** *n.* **hy"per-met'rope,** *n. Med.* A person affected with hypermetropia.—**hy"per-me-tro'pi-a,** *n. Pathol.* An abnormal condition of the eye in which, during relaxation of effort at accommodation, parallel rays of light are focussed behind the retina: opposed to *myopia*. Persons affected with this defect of vision are obliged to accommodate their objects near at hand. The error in vision is corrected by wearing convex glasses. Compare EMMETROPIA. **hy"per-met'ro-pyi‡.**—**hy"per-o'ba-sis,** *n.* **hy"per-mes'o-cor"pus-cles,** *n. pl.* **hy"per-o'pes-o-pous,** *a. Craniom.* Having a capacity in the facial cavities of less than 460 cubic centimeters for the male and 400 for the female.—**hy"per-ne'sĭ-a,** *n. Morbid activity of memory.* **hy"per-nē'sis‡.**



Hy"per-mne'stra, 1 hai"per-mnes'trə; 2 hȳ"per-mĕs'tra, *n. Myth.* One of the Danaïdes; wife of Lynceus, whose life she spared when his brothers were murdered by their wives on the bridal night. The story forms the plot of Æschylus's *Supplices*. See LYNCEUS.

hy"per-mny'ro-ra-ma, *n.* An exhibition of a large number of views.—**hy"per-neph'ro-ma,** *n. Pathol.* A tumor formed of adrenal tissue.

hy"per-nic, 1 hai"per-nik; 2 hȳ"per-nĭc, *n.* [U. S.] Nicaragua wood, or any red dyewood or dyewood-extract. [< HYPER- + *Nicaragua* wood.]

hy"per-ni-da'tion, *n.* Excessive formation of menstrual caudings.—**hy"per-nit'ro-gen-ize,** *v. t.* Same as **hy"per-no'mi-an,** *n.* [Rare.] Outside the scope of law.—**Hy"per-o-ar't-al,** *n. pl. Ich.* An order or other section of myzonts with the palate imperforate, the gill-pouches internal, as in the lampreys. **Hy"per-o-ar'tĭ-a‡.**—**hy"per-o-ar'ti-an,** *a.* & *n.*—**hy"per-o-ar'ti-ous,** *a.*—**Hy"per-o-dap'e-don,** *n. Paleon.* A genus of Triassic bucklewheadian ganoids.—**hy"per-o"don-tog'e-ny,** *n.* **1.** Excessive growth of the teeth. **2.** Same as HYPERODONTOGENY, a preferable form.—**hy"per-o-dyn'a,** *n.* Inflammation of the testicle.—**hy"per-o-ny'mi-an,** *n.* Abnormal growth of the nails.

hy"per-o'o-don, 1 hai"per-ō'o-don; 2 hȳ"per-ō'o-dŏn, *n.* A bottlenose whale (genus *Hyperoodon*), especially *H. rostratus*.

Hyperoodon.

Anat. An upwardly directed fold of the mucous membrane gallery in a mouse. **2.** The roof of the mouth.—**hy"per-o'-pi-a,** *n.* Hypermetropia.—**hy"per-op'ic,** *a.*—**hy"per-op'-si-a,** *n.* Abnormal acuity of vision.—**hy"per-or'ĭ-fice,** *n.* Inordinate revival in the foo food. **hy"per-o-rex'ĭ-a.**—**hy"per-o-rex'ic.** *Med.* **I.** *a.* Stimulating to the appetite. **II.** *n.* A stimulant for the appetite.—**hy"per-os'mi-a-thous,** *a.* Having a keen sense of smell.—**hy"per-os'mi-a,** *n.* Abnormal keenness in the sense of smell.—**hy"per-os'mic,** *a.* Pertaining to hyperosmia. **2.** Relating to the acid osmium hyperoxid.—**hy"per-os-mot'ic,** *a.* Inducing rapid osmosis.—**hy"per-os"te-og'e-ny,** *n.* Excessive growth of bony tissue.—**hy"per-os"te-o-gen'ic,** *a.*—**hy"per-os-to'ma,** *n. pl. Ich.* An order or other section of myzonts with the palate perforated.—**hy"per-os-tot'ic,** *a.*—**Hy"per-o-tre'ti,** *n. pl. Ich.* An order or other section of myzonts with the palate imperforate, the gill-pouches external.—**hy"per-o-tre'tous,** *a.*—**hy"per-ox'y-mu'ri-ate,** *n. Chem.* A salt of perchloric acid.—**hy"per-par'a-site,** *n.* An insect that is parasite in another parasite insect, as certain ichneumons.—**hy"per-par"a-sĭt'ĭc,** *a.*—**hy"per-par'a-sit-ism,** *n.*—**hy"per-pel'vi,** *n. Geom.* A shell formed by all the lines of all the flat pencils determined by a plane and a right line through the common point.—**hy"per-pep'si-a,** *n. Pathol.* Indigestion from the presence of chloride in the gastric juice.—**hy"per-pha'gi-a,** *n. Pathol.* Same as **hy"per-pep'tic,** *a.*—**hy-per'per,** *n. Numis.* Same as SOLIDUS, 3.—**hy"per-per-fec'tion,** *n.* A specialization of organization to excess and that ceases to be useful.—**hy"per-pha-lan'gism,** *n. Zool.* Development of more than five phalanges. **hy"per-pha-lan'gy‡.**—**hy"per-pha-lan'ge-al,** *a.*—**hy"per-phan'ta-sy,** *n. Pathol.* Situated on the outside of invisible rays, which may affect a photographic plate.—**hy"per-pho-phor'ic,** *a. Chem.* Designating a tetrabasic acid, $H_4P_2O_8$, resulting from the slow oxidation of moist phosphorus.—**hy"per-phre'ni-a,** *n. Pathol.* A morbid condition producing extraordinary excitement of the intellectual faculties.—**hy"per-phryg'i-an,** *a.* See GREEK MODES, under MODE.—**hy"per-phys'i-cal,** *a.* Superior to the physical; supernatural.—**hy"per-pi-e'sis,** *n. Pathol.* Same as HYPERTONIA.—**hy"per-pla'ne,** *n. Math.* Situated on the boundary of the supernatural.—**hy"per-pl-e'sis,** *n.* Abnormal increase of blood-pressure.—**hy"per-plane,** *n. Math.* In hyperspace, the analog of a plane in ordinary space: a hypersurface without curvature.—**hy"per-pla'si-a,** *n. Pathol.* Excessive reproductive action in a part; enlargement from increase of elements: distinguished from *hypertrophy*.—**hy"per-pla'ti,** hai"per-plat'ai, *n. pl. Craniom.* Same as **hy"per-pla'ti-rhine,** *a. Craniom.* Having a nasal index (German) over 53.—**hy"per-pne'a,** *n. Pathol.* Excess of respiration, existing due to a deficiency of oxygen in the blood.—**hy"per-po-ro'sis,** *n.* Excessive formation of callus when a broken bone is healing.—**hy"per-pra'gi-a,** *n. Pathol.* Excessive activity, especially of the insane.—**hy"per-pro"cho-re'sis,** *n. Pathol.* Excessive increase in propulsion: usually applied to abnormally rapid ejection of food from the stomach into the intestines.—**hy"per-pro-me'the-an,** *a.* Having a spirit of foresight above the normal: a hypothetical explanation of premonitions, forecasts, etc.—**hy"per-pseł'a-phe'sĭ-a,** *n. Pathol.* Abnormal sensitiveness to touch.—**hy"per-pu'ri-ty‡.**—**hy"per-ta,** *n. Pathol.* Very high fever: of 107° F. or more.—**hy"per-py-rex'i-al,** *a.* **hy"per-py-rec'tĭc‡; hy"per-py-rex'tĭc‡.**—**hy"per-re'ni-a,** *n. Pathol.* Excessive secretion of urine.—**hy"per-re-percus'sion,** *n. Pathol.* Excessive resonance on percussion.—**hy"per-res'o-nant,** *a.*—**hy"per-sar-co'ma,** *n. Pathol.* An excrescence appearing on ulcers and open wounds: proud flesh.—**hy"per-sar'co-sis,** *n. Pathol.* Same as **-sar'ki-a,** *n. Pathol.* Excessive growth of muscular tissue.—**hy"per-se'le-nal,** *a. Zool.* Above the anal opening.—**hy"per-sen'sĭ-al,** *n. Psychol.* Not perceptible to the senses; spiritual.—**hy"per-sol'id,** *n. Math.* In hyperspace, a form of .the same number of dimensions as the space in which it exists, analogous to a solid in ordinary three-dimensional space.—**hy"per-space,** *n.* An imaginary space having more than three dimensions.—**hy"per-spa'tial,** *a.*—**hy"per-sphere,** *n. Math.* In hyperspace, a form bounded by curved spaces of three dimensions one fewer than those of the space, all points of which are equally distant from a point within.—**hy"per-spher'i-cal,** *a. Math.* Arising from properties of the boundary of a spherical harmonic: said of a class of functions.—**hy"per-spir'i-al-ĭst,** *a.* Having an excess of spirituality.

hy"per-spha'sic, *a. Pathol.* Hyperspastic.—**hy"per-spha'si-a,** *n. Pathol.* Same as HYPERTONIA.—**hy"per-spas'tic,** *a. Pathol.* Characterized by permanent contraction.—**hy"per-sphe'nĭ-al,** *a. Zool.* Above the anal opening.—**hy"per-spon'dy-lism,** *n. Pathol.* Excessive development of the vertebræ.—**hy"per-sta'sis,** *n. Pathol.* Excessive nutrition.—**hy"per-ste'a-to'ma,** *n. Pathol.* Hypertrophy of the sebaceous glands.—**hy"per-ste'a-to'sis,** *n. Pathol.* Excessive secretion of sebum.—**hy"per-ste'ne,** *n. Pathol.* Excessive strength.—**hy"per-sthe'nĭ-a,** *n. Pathol.* Excessive strength; abnormal vigor.—**hy"per-sthe'nĭ-al,** *a. Pathol.* Characterized by excessive strength.—**hy"per-sthe'nĭ-ant,** *n. Pathol.* A medicine which increases the vital phenomena. [< HYPER- + Gr. *sthenos*, strength.]

hy"per-sthen'ĭc, 1 hai"per-sthen'ik; 2 hȳ"per-sthĕn'ĭc, *a.* Containing or like hypersthene.

hy"per-sthen'ite, *n. Petrol.* Of pertaining to hypersthenia; overexcited.—**hy"per-strophi'e,** *n.*—**hy"per-stro-phy,** *n.* The gyration of a univalve shell in one direction to such an extreme as to simulate the coiling of a bivalve.—**hy"per-stuffed** *Lanistes* and some planorbids: ultradextrality or ultrasinistrality.—**hy"per-sur'face,** *n. Math.* In hyperspace, an extent of dimensions less by one number than those of the space in which it exists, analogous to the surface in ordinary three-dimensional space.—**hy"per-tel'ic,** *a.* **1.** Of or pertaining to hypertely. **2.** Tending to develop abnormal or monstrous and extravagant. *Sci. American* May 25, 1907, vol. xcvi, p. 428.—**hy"per-te-ly,** *n.* Extreme mimetism, especially of coloration, as when a mantid insect simulates the leaf of a tree which is itself of a color which is distributed beyond the degree required for protection.—**hy"per-therm,** *n. Meteor.* A line connecting places at which, during a specified time, the mean temperature has been equally in excess of the normal.—**hy"per-ther'mal,** *a.* Superheated.—**hy"per-ther'mal-ge'sĭ-a,** *n. Pathol.* Unnatural sensitiveness to heat.—**hy"per-ther'mi-a,** *n.* **Hy"per-pyrexia.** **hy"per-ther'my‡.**

hy"per-thĭc-sis, 1 hai-pər'thi-sis; 2 hȳ-pĕr'thĭ-sĭs, *n.* **1.** *Pros.* Change of place in a logaœdic series, involving interchange of arsis and thesis. **2.** A long vowel where a short is normally expected, and the reverse. **2.** *Philol.* Transposition of letters from one syllable to another; metathesis; as, in Latin, *certus* for *cretus*. **3.** An extra beat in the Greek dance. **hy"per-thĭ'sis‡.**

hy"per-thy'mi-a, *n. Pathol.* Violence or recklessness as a symptom of insanity.—**hy"per-thy'roi-a'tion,** *n. Pathol.* Immoderate activity of the thymus gland, causing a toxic condition.—**hy"per-thyr'i-on,** *n. Arch.* A cornice over a door or window.—**hy"per-thy'roid-a'tion,** *n. Pathol.* A diseased condition produced by excessive activity of the thyroid gland. **hy"per-thy'roid-ism‡; hy"per-thy"roid-i-za'tion.**—**hy"per-thy'rism,** *n.* Same as HYPERTHYROIDISM.—**hy"per-to'ni-a,** *n. Physiol.* Excessive irritability or tonicity of muscle-fibers. **hy"per-to-nic'i-ty.**—**hy"per-ton'ic,** *a.*—**hy"per-tri-cho'sis,** *n.* An extraordinary profusion of hair. **hy"per-trĭ'chi-men-sion-al,** *a.* Having more than three dimensions.

hy"per-troph'ic, 1 hai"per-traf'ik; 2 hȳ"per-trŏf'ic, *a.* Of, pertaining to, or tending to hypertrophy. **hy"per-troph'i-cal;** hy-per'tro-phous.

hy-per'tro-phy, 1 hai-pŭr'tro-fi; 2 hȳ-pĕr'tro-fy, *n.* 1. *Biol.* The undue or excessive growth or development of an organ or part of an animal or a plant. 2. *Pathol.* The morbid enlargement of a part from increased nutrition without increase of waste; an abnormal increase of a part from enlargement of its elements: opposed to *atrophy.*

Thus it is readily granted that the action of a muscle tends to the increase of the circulation in its tissue, and, if long continued, to the *hypertrophy* or increase of its substance.

CHARLES ELAM *Physician's Problems* ch. 2, p. 212. [L. & a. 1889.]

3. Figuratively, any excessive development.

There are obvious reasons for doubting whether the existence of mythology can be due to any 'disease,' abnormality, or *hypertrophy* of metaphor in language.

FREKE *Myths and Mythmakers* ch. 7, p. 309. [o. & co. 1874.]

[< HYPER- + Gr. *trophḗ,* nutrition, < *trephō,* nourish.]

— compensatory hypertrophy, increase in size of an organ to supply some physical defect, especially of the heart when its valves are defective. **— eccentric h.,** enlargement of the cavity of a hollow organ of the body as well as a thickening of its walls. **— false h.,** unusual multiplication of cells in the stroma of the connective tissue, unaccompanied by any increase of function. **— functional h.,** enlargement of a member or part, resulting from additional use. **— idiopathic or true h.,** increase in the size of a part that does not due to defective structure. **— numerical h.,** same as HYPERPLASIA. **— physiological h.,** increase of size consequent on increased use. **— quantitative h.,** same as HYPERPLASIA.

hy-per'tro-phy, *vt.* & *vi.* To affect with hypertrophy.

hy"per-tro'pi-a, 1 hai"per-tró'pi-ə; 2 hȳ"per-trō'pi-a, *n. Ophthalm.* A form of strabismus in which the visual axis of one eye rises above that of the other, making habitual binocular vision impossible.

hy"per-type, *n.* An individual showing abnormal development of the characteristics of its species. **— hy"per-typ'ic, hy"per-typ'i-cal,** *a.* **— hy"per-u"ri-ce'tor-ēxe"mi-a,** *n. Pathol.* Excess of alloxan in the blood. **— hy"per-vas'cu-lar,** *a.* Pertaining to or an excessive number of vessels or ducts. **— hy"per-vas'cu-lar'i-ty,** *n.* **— hy"per-ve-nos'i-ty,** *n.* Unnatural development of a vein or the venous system.

hy"pes-es'thē'sia, *n. Pathol.* Diminished sensitiveness; partial loss of capacity for sensation. **— hy"pes-(or -æs-)thet'ic,** *a.*

hy"per-thrīd, 1 hai"pŭr-fŭrsd; 2 hȳ-pĕr'thral, *a.* Roofless, as a building; open to the sky: said of a building whose roof has been destroyed or never completed, or of a sanctuary, etc., never intended to be roofed. See HYPÆTHRON.

hy'pha, 1 hai'fə; 2 hȳ'fa, *n.* [HY'PHÆ, 1-fī; 2-fē, *pl.*] A long, thread-like, branching body in the thallus of a fungus, consisting of a membrane containing protoplasm, growing apically, and usually becoming transversely partitioned in the process of its growth. The vegetative hyphæ, as opposed to the reproductive ones, constitute the vegetation of fungi.

The plants afflicted with the malady [potato-disease] are found to be infested by a mould, consisting of fine tubular filaments, termed *hyphæ,* which burrow through the substance of the potato plant. HUXLEY *Science and Culture* ch. 7, p. 176. [a. 1882.]

[< Gr. *hyphḗ,* weaving, < *hyphaínō,* weave.] **— Woronin's hypha** (*phra.*), a singular cellular appendage found in *Xylaria* and certain other fungi. It takes no part in forming the ultimate sporogenous hyphæ and no trichogyne arises from it. See **hyphal, a.**

Hy-phæ'ne, 1 hai-fī'nē; 2 hȳ-fē'nē, *n. Bot.* A genus of branching palms, natives of tropical Africa, with large fan-shaped leaves and dicecious flowers. *H. thebaica* is the doom-palm.

[< Gr. *hyphainḗs,* weaving.]

hy-phær'e-sis. *n.* Same as HYPERESIS.

hy-phas ma, 1 hat-faz'mə; 2 hȳ-fāz'ma, *n. Bot.* The mycelium of moulds and dismod. = HYPHA, 1.

hy"phe-do'ni-a, 1 hai"fi-dō'mi-ə; 2 hȳ"fe-dō'ni-a, *n. Pathol.* A morbid decrease in the pleasurable sensations accompanying acts of sexual agreement. [< Gr. *hyphḗ,* weaving, + *hēdonḗ,* pleasure.]

hy"phe'mi-a, 1 hai-fī'mi-ə; 2 hȳ-fē'mi-a, *n. Pathol.* 1. **hy-phæ'mi-a,**] Deficiency of blood, or a lack of supply of the red corpuscles in the blood. 2. EXTRAVASATION of the blood into a cavity or tissue, esp. in the eye. [< Gr. *hyphaítmos,* bloodshot, < *hypo,* under, + *haíma,* blood.]

hy'phen,] 1 hai'fen; 2 hȳ'fēn, *n.* 1. To insert a hyphen **hy'fen,**] between the parts of; compound. 2. To connect by means of a hyphen.

hy'phen, *n.* 1. A mark (- or =) indicating connection, placed between the elements of words. It is used to show that two or more words are to be considered as connected in one word, or connects separated syllable elements, as when a word is divided at the end of a line, in spelling to indicate pronunciation, and for other special purposes. In this work the single hyphen (-) is used to indicate syllable division of words and the double hyphen (=) to show that two or more words are connected into one word.

It is not, and can not be, the intermediate of the *hyphen* to indicate that a name is misapplied. F. H. TRALL *Compounding of English Words* ch. vi, p. 71. [c. r. 1891.]

2. Originally, a tie-mark placed beneath Greek words, connecting them into a compound word. [< Gr. *hyphen,* < *hyph'hen,* under or into one, < *hypo,* under, + *hen,* neut. acc. of *heis,* one.] **— hy-phen'ic,** *a.* Pertaining to the hyphen.

hy'phen, 1 hai'fen; 2 hȳ'fēn-ā, *n.* [L. *vt.* -A'TED; -A'TING.] To hyphen. **hy'phen-ize,** *vt.* **II.** *n.* [Collog.] A person of foreign birth naturalized in the United States, as a German-American. **— hy'phen-at'ed,** *a.* Implying, or relating to, hyphenates, esp. to their sympathies are with the land of his birth rather than with that of his adoption.

hy'phen-a'tion, 1 hai'fen-ē'shən; 2 hȳ'fēn-ē'shon, *n.* The act or practice of hyphenating, or the state of being hyphened. **hy'phen-i-za'tion†.**

hy'phend, *pp.* Hyphened.

hy-phe'o-sis, 1 hai-fə'ī-o-sis; 2 hȳ-fē'ō-sis. *n. Philol.* The taking away or omission of a letter or syllable. [< Gr. *hyphaíreisis,* < *hypo,* under, + *haíreō,* take.]

hy"phi-dro'sis, 1 hip'hi-drō'sis; 2 hȳp"hi-drō'sis, *n. Pathol.* Deficiency of perspiration.

hy'pho-, 1 hai'fō-; 2 hȳ'fo-. Derived from Greek *hyphḗ,* weaving (see HYPHA): a combining form. **— hy'pho-drome,** *a. Bot.* Having concealed veins: said of leaves in which the veins are almost or quite hidden by the thick leathery tissue. **— Hy"pho-my-ce'tes,** *n. pl. Bot.* Same as MONILIALES. **— hy"pho-my-ce'tic,** *a.* **— hy'pho-my-ce'tous,** *a.* **— hy"pho-pod'i-um,** *n. Mycol.* A knob-like branch of the mycelium of various parasitic fungi, serving to attach them to the host plant. **— hy"pho-stro'ma,** *n. Bot.* Mycelium.

hyp-id'i-a-nor'phic, 1 hip-id'i-o-nōr'fik; 2 hȳp-id'i-o-nŏr'fic, *a. Crystal.* Partly idiomorphic. [< HYP- + IDIOMORPHIC.] **— hyp-id"i-o-mor'phi-cal-ly,** *adv.*

hyp"i-no'sis, 1 hip'i-nō'sis; 2 hȳp'i-nō'sis, *n. Pathol.* Diminished capacity of the blood for forming fibrin. [< HYP- + Gr. *is (ín-),* fiber.] **— hyp"i-not'ic,** *a.*

hyp"i-son'er-ous, 1 hip"i-sō-sen'ər-əs; 2 hȳp"i-sōm'er-ōs, *a.* Having the transverse ridges on contiguous molar teeth increasing successively by one. [< HYP- + ISOMEROUS.]

hyp-i"so-ton'ic, *a.* Same as HYPOTONIC.

hyp-nes'thē'sia, 1 hip"nes-thī'zhə; 2 hȳp"nēs-thē'sis, *n. Pathol.* A strong desire for sleep; drowsiness. [< Gr. *hypnos,* sleep, + *aísthēsis,* desire.] **hyp"næs-thē'sis†. — hyp"nes-thet'ic.** See **hyp"næs-thet'ic.**

hyp'nic, 1 hip'nik; 2 hȳp'nic. I. *a. Med.* Calculated to induce sleep; pertaining to sleep. **II.** *n.* A sleeping-draft. [< Gr. *hypnikós,* < *hypnos,* sleep.]

hyp'no-, 1 hip'nō-; 2 hȳp'no-. Same as HYPN-: a combining form. **hyp'no-base,** *n.* A sleep-waker: somnambulist. **— hyp'no-bat'ic,** *a.* Sensitive to hypnotic influence. **— hyp'no-cyst,** *n.* An encysted protozoan that does not sporulate.

hyp'no-dy, 1 hip'nō-di; 2 hȳp'no-dy, *n.* [-DIES, 1-diz; 2-dis, *pl.*] The state of long-continued sleep in the life-cycle of insects, as the larva of the seventeen-year locust. [< Gr. *hypnōdía,* sleepiness.]

hyp'no-ĕ, 1 hip'nō-ē'ti; 2 hȳp'no-ē'ic, *a. Psychol.* Of or pertaining to mental processes which, while logical, are not consciously so, and connote no effort at ratiocination: opposed to *noetic.*

hyp"no-gen'e-sis, *n.* The production of hypnotic sleep; trance-creation. **hyp-nog'e-nyt.— hyp"no-ge-net'ic,** *a.* Pertaining to or generating the hypnotic trance. **hyp"no-ge-net'ic-al-ly,** *adv.* **hyp"no-ge-nif'er-ous,** *a.* Same as *hypnogenic.* **hyp"no-ge-net'i-cal-ly,** *adv.*— **hyp'noid,** *a. Psychol.* Inducing or resembling hypnosis. 2. *Bot.* Relating to or resembling members of the genus *Hypnum* or its allies. — **hyp-noi'dal,** *a.*— **hyp"noi-di-za'tion,** *n.* A means used to produce a state of light hypnosis.— **hyp'no-lep'sy,** *n. Pathol.* Abnormal sleepiness. **hyp"no-lep'tic,** *a.*— **hyp"no-lep'tic,** *a.*— **hypnoleptic state** (*Pathol.*), a short interval that supervenes between the two states of double consciousness.— **hyp-nol'o-gist,** *n.* One who studies or is proficient in hypnology.— **hyp-nol'o-gy,** *n.* The science of the phenomena of sleep; a treatise on sleep. **hyp-nog'ra-phy†.— hyp"no-log'i-cal,** *a.*— **hyp'none,** *n. Chem.* Acetophenone.— **hyp"no-pæ'di-a,** *n.* Morbid drowsiness. **hyp"no-pho'by†.— hyp"no-pho'bic,** *a.*— **hyp"no-pom'pic,** *a.* Conveyed from sleep: applied to mental impressions that occur in dreams. **hyp"no-pom'pous†.**

Hyp'nos, 1 hip'nəs; 2 hȳp'nos, *n. Gr. Myth.* God of sleep; brother of Oneiros (dreams) and Thanatos (death). See SOMNUS.

hyp'no-scope, *n.* A small hollow magnet claimed to produce peculiar sensations when held on the finger of a good hypnotic subject.— **hyp"no-si-gen'e-sis,** *n.* The induction of hypnotic sleep.

Mental influences play a large part in *hypnosigenesis.*

A. MOLL *Hypnotism* p. 27. [s. w. 1890.]

hyp'no-sis, 1 hip-nō'sis; 2 hȳp-nō'sis, *n.* 1. The hypnotic state or condition; the changed state of mind of the hypnotized person.

Note the power of *hypnosis* — the power of one will to enslave another.

hyp-not'ic, *n. Med.* **1.** An agent efficacious in producing sleep. **2.** A person subject to hypnotism.

hyp'no-tism, 1 hip'nō-tizm; 2 hȳp'no-tĭsm, *n.* **1.** The theory and practise of inducing hypnosis, or hypnotic sleep; less properly, the state thus induced, or the hypnotic trance. Braidism.

The practise of hypnotism in some form goes back to remote antiquity and is to be recognized among all peoples. The modern name "hypnotism," or more "hypnosis," is due to the observations of Dr. James Braid, whose attention was called to the phenomena of what was then named mesmerism. On the physiological side, the condition of the hypnotized person is characterized, primarily, by more or less profound changes in the rate of respiration and of the pulse, by increased insensibility to painful stimuli, by relative or almost total cessation of the senses of the organs of special sense with a remarkable hyperesthesia of other organs, and by other changes in the general appearance and inorganic functions resembling those found in the case of natural sleep. On the psychical side, the most distinctive phenomenon is the marvelous increase of suggestibility which is such as even to permit the hypnotizer to alter the sensations, produce definite lesions on the skin, and to evoke all manner of positive and negative hallucinations. To this suggestibility must be added an almost total loss of self-control and a partial or nearly complete loss of memory on emerging from the hypnotic state. The methods employed in the practise of hypnotism are numerous, among which concentrating the gaze on something bright or on the eye of the experimenter, placing in conditions favorable to sleep, inducing monotony in the sensations or train of ideas, and even the imperative and persistent command, are prominent. The great majority of normal youths and adults are more or less hypnotizable, if they wish to be hypnotized; but successful resistance is also possible with the majority. In yielding to hypnotic influences habit, as everywhere, is especially powerful. **Post-hypnotic suggestions** are those made to be carried out after waking from the hypnotic state in which they are made. **Self-hypnotization** can be produced by many people. See CATALEPTOMANIA. The division by some authorities into three stages, **lethargic, cataleptic,** and **somnambulistic hypnosis,** and by others into two stages, the **light** and **heavy hypnotic sleep,** is of value only as a convenience for the individual. As a therapeutic agency, hypnotism has been used with some success in the treatment of nervous diseases, and in curing the liquor and drug habits, etc. Compare MESMERISM, SOMNAMBULISM.

Hypnotism, mesmeric states, table-tipping, second sight and kindred facts . . . involve an unusual suspension of some powers, and an unusual activity of others.

Bot.* An order of ascomycetous fungi containing about 60 genera and 800 species, most of them distinguished by bright-colored perithecia. Some of the species are parasitic; others are saprophytic. There is only one family, *Hypocreaceæ*.

hy'po-cri-sy, 1 hi-pok'ri-si; 2 hī-pŏc'ri-sy, *n.* [-SIES, 1 -si; 2 -sĭz, *pl.*] 1. Simulation or feigning to be what one is not; the acting of a false part; especially, the assuming of a false appearance of virtue or religion; a deceitful show of good character or a counterfeiting of religion.

The leaven of the Pharisees, which is *hypocrisy*. *Luke* xii, 1.

2. Disingenuous concealment of one's real character, belief, or motives; extreme insincerity; dissimulation.

Hypocrisy is a fawning and flexible art, which accommodates itself to human feelings, and flatters the weakness of men in order that it may gain to its own ends.
BUCKLE *Hist. Civilization* vol. i. p. 135. [L. 1850.]

3. The character of a hypocrite as shown in dissimulation or simulation.

But he, knowing their *hypocrisy*, said unto them, Why tempt ye me? *Mark* xii, 15.

hyp'o-crite, [1 hip'o-krit; 2 hĭp'o-crĭt, *n.* One who **hyp'o-crite,**] practises or is characterized by hypocrisy; one who acts a false part or assumes a character other than the real with the design of gaining commendation; especially, one who makes false professions of his virtues, views, or beliefs.

Hypocrite, in its best shadeth to shew him such as he is, and sheweth him to seem such as he is not.
ROGER ASCHAM *C. T., Parson's Tale, De Superbia.*

[F., < LL. *hypocrita*, < Gr. *hypokritēs*, one who answers on the stage, < *hypo*, under, + *krinomai*, contend.]

Syn.: cheat, deceiver, dissembler, impostor, pretender. A *hypocrite* is one who acts a false part, or assumes a character other than the real. *Deceiver* is the most comprehensive term, including all the other words of the group. The *deceiver* seeks to give false impressions of any matter where he has an end to gain. The *dissembler* or *hypocrite* seeks to give false impressions in regard to himself. The *dissembler* is content if he can keep some base conduct or evil purpose from being discovered; the *hypocrite* seeks not merely to cover his vices, but to gain credit for virtue. The *cheat* and *impostor* endeavor to make something out of those they may deceive. The *cheat* is the inferior and mere mercenary, as the thimblerig gambler; the *impostor* may aspire to a fortune or a throne. Compare synonyms for AFFECTATION.—ANT.: The antonyms of *hypocrite* are to be found under the words denoting the adjectives candid, honest, ingenuous, sincere, true, etc.

hyp'o-crit'i-cal, 1 hip'o-krit'i-kol; 2 hĭp'o-crĭt'i-cal, *a.* Of or pertaining to hypocrisy; characterized by hypocrisy; as, *hypocritical* professions. **hyp'o-crit'ic** [Archaic]; **hyp'o-crit'ish‡.**—**hyp'o-crit'i-cal-ly,** **hyp'o-crit'ly,** *adv.* [ematic hypocrisy.

Pathol.* Deficiency of eosinophile leucocytes.—**hy'po-e'so-phu'ri-a,** *n. Pathol.* Deviation of the visual axis inward and downward, in strabismus.—**hy'po-es-thet'ic,** *a.* Same as HYPESTHETIC.—**hy'po-eu-tec'tic,** *a. Phys. Chem.* Having a smaller percentage of carbon than the eutectic: said of steel having about 0.90 per cent. carbon.—**hy'po-ex'o-pho'ri-a,** *n.* Downward and outward strabismus.

hy'po-ga'ic, 1 hip'o-[or hoī'po-]jī'ik; 2 hĭp'o-[or hŷ'-po-]gē'ic, *a. Chem.* Of, pertaining to, or derived from the peanut (*Arachis hypogæa*). [< HYPO- + Gr. *gaia*, earth.]—**hypogeic acid,** a white crystalline compound ($C_{16}H_{30}O_2$) said to exist in peanuts.

hyp'o-gas-tra'le, 1 hip'o-gas-trē'lē; 2 hŷp'o-găs-trā'lē, *n.* [-LI-A, *pl.*] *Spong.* A spicule whose tangential rays lie in the gastral wall. [< HYPO- + Gr. *gastēr*, belly.] **hyp'o-gas'tral.**

hyp'o-gas'tric, 1 hip'o-[or hoī'po-]gas'trik; 2 hŷp'o-[or hŷ'po-]găs'trĭc (XIII), *a.* **1.** Of or pertaining to the hypogastrium; as, the *hypogastric* region. 2. *Comp. Anat.* Metagastric.—**hy'po-gas'tro-cele,** *n. Terat.* A double monster united abdominally below the navel.

hy'po-gas'tri-um, 1 hip'o-[or hoī'po-]gas'tri-um; 2 hŷp'o-[or hŷ'po-]găs'trĭ-ŭm, *n.* [-TRIA, *pl.*] The region at the lower part of the abdomen on the middle line. [< Gr. *hypogastrion*, lower belly, < *hypo*, under, + *gastēr*, belly.] [are united below the navel.

hyp'o-gas'tro-cele, *n. Pathol.* A double monster whose bodies **hyp'o-ga'ta,** 1 hip'o-[or hoī'po-]jī'tă; 2 hŷp'o-[or hŷ'po-]gē'tă, *n. pl.* [-TAL, *a.*] *Geol.* Situated beneath the surface of the earth, underlying the superficial rocks and soils. [< Gr. *hypogeios*, < *hypo*, under, + *gaia*, earth.] **hyp'o-ge'al;** **hyp'o-ge'ic.**

hyp'o-ge'ic, 1 hip'o-[or hoī'po-]jī'ik; 2 hŷp'o-[or hŷ'po-]jē'-ic, *a. Geol.* Pertaining to or derived from eruptive and interior movements in the earth; as, the *hypogeic* work of mountain-making. See HYPOGEAL. [HYPO- + Gr. *gē*, earth.]

hyp'o-ge'o-dy, 1 hip'o-[or hoī'po-]jī'o-di; 2 hŷp'o-[or hŷ'-po-]ē'o-dy, *n.* Subterranean surveying.

hyp'o-gene, 1 hip'o-jīn *or* hoī'po-jīn; 2 hŷp'o-gēn *or* hŷ'-po-gēn (XIII), *a. Geol.* 1. Formed beneath the earth's surface; pertaining to or designating the deeper-seated rocks; plutonic: contrasted with *epigene* and *volcanic*. 2. Of or pertaining to crystalline rocks as supposed to be of subterranean formation.

The existence of white-coal under, even in rocks which have reached the surface, is a fact of no little significance in the theoretical consideration of *hypogene* action.
ARCH. GEIKIE *Hist. Geology* ch. i, p. 227. [MACM. 1882.]

hyp'o-gen'e-sis, *n. Biol.* 1. Embryonic development into an organism resembling the parent life. See MONOGENESIS. Opposed to *metagenesis*. 2. Imperfect development or retarded development.—**hyp'o-ge-net'ic,** *a.*—**hy-pog'e-nous,** *a.* 1. *Bot.* Growing beneath, as fungi on the under surface of a leaf. Compare EPIGENOUS and EPIPHYLLOUS. 3. Hypogeous.

hyp'o-ge'ous, 1 hip'o-[or hoī'po-]jī'us; 2 hŷp'o-[or hŷ'po-]gē'us, *a.* Underground; especially, in botany, growing or fruiting underground, as truffles and other fungi. **hyp'o-ge'an;** **hyp'o-ge'ous‡.**—**hyp'o-ge'ous-ly,** *adv.*

hyp'o-ge'um, [1 hip'o-[or hoī'po-]jī'um; 2 hŷp'o-[or **hyp'o-ge'um,**] hŷ'po-]gē'ŭm, *n.* [-GEA, *pl.*] *Arch.* The part of a building situated beneath the surface of the ground; especially, a vault or subterranean construction, such as many of the deep rock-tombs of antiquity. **hyp'o-geu.**

The gymnasium itself reposed afar off, deep down in the *hypogeum* of Babel-Molonk, just as in the mastabahs of the Ancient Empire the *mummy reposed at the bottom of an inaccessible well.*
M. MITCHELL-HEDGES *Monuments of Upper Egypt* tr. by A. Mariette, p. 188. [ILL. & CO. 1877.]

[L., < Gr. *hypogeion*, < *hypo*, under, + *gaia*, ground.]

hy'po-geu'si-a, *n. Pathol.* Deterioration of the sense of taste.—**hy'po-glos'sal.** **I.** *n.* Same as HYPOGLOSSUS, as, the *hypoglossal* nerve. **2.** Of or pertaining to the hypoglossal nerve. **II.** *n.* A hypoglossal nerve.—**hy'po-glos'sis,** *n.* The under surface of the tongue.—**hy'po-glos'sus,** *n. Pathol.* Inflammation under the tongue.—**hy'po-glot-tid'i-an'a,** *n.* Situated under the tongue.—**hy'po-glot'tis,** *n.* **1.** *Entom.* A sclerite usually present in between the *mentum* and labium, as in *claviconn* and *serricorn* beetles. 2. Same as HYPOGLOSSIS.—**hy'pog'na-thous,** *a. Zool.* Having a longer lower than upper jaw.—**hy'pog'na-thism,** *n.*—**hy'po-go-na'ti-on,** *n.* Same as ERGONION.

hy'pog'y-nous, 1 hi-[or hoī-]poj'i-nus; 2 hy-[or hŷ-]pŏg'y-nus, *a. Bot.* Situated on or growing from the axis beneath the ovary or pistil. [< HYPO- + Gr. *gynē*, female.] **hyp'o-gyn'ic.**—**hy'po-gyn,** *n. Bot.* A hypogynous plant.—**hy'pog'y-nus,** *n. pl. Bot.* A division of gamopetalous plants characterized by a hypogenous corolla.—**hy'-pog'y-ny,** *n. Bot.* The state of being hypogynous.

hy'po-hy'al, *a. & n. Bashyal.*—**hy'-po-hy'a-lin,** *n. Petrog.* Glassy in part.—**hy'po-i'o-se'mi-a,** *n. Pathol.* Deficiency of fibrin in the blood, inducing decrease in its coagulability.—**hy'po-ion'ic,** *a. Chem.* A variety of ionic (HIO), resulting from the action of water on iodin. It is obtained in aqueous solu- below the ovary. tion. **Hy'po-i'o-nous,** *a.* See GREGORIAN MODES, under MODE.—**hy'po-is'chi-um,** *n. Zool.* A small bone or cartilage beneath the cloaca in lizards.—**hy'po-i'so-ton'ic,** *a. Physiol.* With a lower osmotic pressure than an isotonic solution.—**hy'po-ja-cob'i-an,** *a.* Jacobian; opposed to *hyperjacobian*.—**hy'po-kel'me-nom'e-try,** *n.* The science of substance and its affections, whereby the construction of the universe should be formed from its primary essence. J. MARTINEAU *Study of Spinoza* II, i, 165. [M.]—**hy'po-ki-ne'si-a,** *n.*—**hy'po-ki-ne'sis,** *n. Pathol.* Diminished power of movement due to weakness or disease of the musculature.—**hy'po-ki-net'ic,** *a.*—**hy'po-lem'nis'cus,** *n.* The character —; a lemniscus having the dot only on the lower side. See LEMNISCUS.—**hy'po-leth'-ar-gy,** *n.* A low degree of lethargy, or state of abasing, inert sleep, in a hypnotized person.—**hy'po-leu'co-cy-to'-sis,** *n. Pathol.* Lack of leucocytes in the blood.—**hy'po-lith'ic,** *a. Bot.* Descriptive of plants that grow beneath stones, as lichens.—**Hy'po-loc'ri-an,** *a.* See GREGORIAN MODES, under MODE.—**hy'po-lo'gism,** *n. Math.* The rela-

Hypodermic injection Apparatus.
a, needle; cross-

tion of four numbers when the first is to the second in a less ratio than the third to the fourth.— **Hy'po-ly'd'i-an,** *a.* See GREEK and GREGORIAN MODES, under MODE.— **hy'po-ma'ni-a,** *n. Pathol.* A slight and temporary mental disturbance; moderate mania.— **hy'po-ma-nik'-on,** *n.* Same as EPIMANIKION.— **hy'p'o-mas'tous,** *a. Bot.* Springing from beneath an organ without adhering to it: free.— **hy'p'o-mere,** *n. 1. Spong.* The lower part of certain sponges in which no flagellated chambers are developed. *2. Embryol.* One of the segments from which the walls of the pleuro-peritoneal cavity are formed.— **hy-pom'er-al,** *a.*— **hy'p'o-mi'crons,** *n. pl. Biol.* Submicroscopic particles.— **hy'p'o-mi'ō-sis,** *n.* Same as GREGORIAN MODES, under MODE.— **hy'p'om-ne-mat'ic,** *a.* In the nature of notes or memoranda.— **hy'p'om-ne'sis,** *n. Pathol.* Diminished power of memory.— **hy'p'o-mne'si-ac,** *n. Mach.* The tuterum of a lever.— **hy'p'o-moch'l-ion'.**— **Hyp'o-my'ter-i,** *n. pl. Mam.* A section of fissiped carnivores with external nostrils occupied by cartilages, maxilloturbinal bones, including ethmoids and ectoturbinals.— **hy'p'o-my'o-to-mi-a,** *n. Pathol.* Want of tone in the muscles.— **hy'p'o-nas'ic,** *n. Pathol.* A deceased secretion of mucus.

hyp'o-nas'tic, *a.* [hy'p'o- + Gr. *nastos*, solid, < *nassō*, press.] — **hyp'o-nas'tic,** *a.*

hy'p'o-neu'ri-a, *n. Pathol.* A morbid diminution of nervous energy.— **hy'p'o-nī'trous,** *a. Chem.* Designating an unstable white crystalline nitrogenous acid, (HNO_2) or $H_2N_2O_3$, formed by the union of hydroxylamin and nitrous acid, and in other ways.— **hy'p'o-no'ēa,** *n. Theol.* A deeper m ystical or hidden sense supposed to underlie the plain meaning of the language of the Bible.— **hy'p'o-nome,** *n. Conch.* The funnel or infundibulum in cephalopods.— **hy'p'o-nō'mi-a,** *n.* **Hyp'o-nou-mat'i-dæ,** *n. pl. Entom.* A family of moths, the *Yponomeutidæ*.— **hy'p'o-nych'i-al,** *a. Anat.* Underlying a nail; subungual.— **hy'p'o-nych'i-um,** *n. Anat.* 1. The sensitive nail. 2. The layer of skin beneath the nail: the nail-bed.— **hy-pon'y-chon,** *n. Med.* An effusion of blood under a nail, presenting a purple appearance and due to injury.— **hy-pon'y-chous,** *a.*

hy'po-os'mi-ous, *a. Chem.* Denoting a low valence possessed by osmium as seen in certain compounds of that metal.— **hy'po-pa'ti-a,** *n. pl. Paleon.* The most primitive order of trilobites, having free cheek-pieces forming a continuous ventral marginal plate of the head, and frequently lacking eyes.— **hy'po-pep'sy,** *n. Pathol.* Defective digestion.— **hy'p'o-pep'sic,** *a.*— **hy'p'o-pep'tic,** *a.*— **hy'p'o-phan'gi-a,** *n. Anat.* Having fewer than the normal number of phalangesin the digits.— **hy'p'o-phare,** *n. Zool.* The lower region of the body-wall of a dermopterous ganoid, without chambers or pores.— **hy'p'o-pha-ryn'ge-al.** I. *a.* 1. Situated below or at the lower part of the pharynx, as the lower pharyngeal bones in fishes. 2. *Entom.* Of or pertaining to the hypopharynx. **II.** *n.* A lower pharyngeal bone.— **hy'p'o-pha'rynx,** *n. Entom.* 1. A tongue-like organ on the ental surface of the labium, in the hollow formed by the lower margin of the pharynx.— **hy'p'o-phet,** *n.* [Rare.] An interpreter; expounder.— **hy-po-phice-od'ic,** *a. Bot.* Existing beneath the bark, as certain liber.— **hy'p'o-phlœ'o-dal,** *a.*— **hy'p'o-phlœ'ous,** *a.*— **hyp'o-phon'ous,** *a. Mus.* Subsidiary, as by way of accompaniment or response. **hyp'o-phon'ic.**

Hypophonous chants, which consisted of responses to the intonation, the reading, and the prayers of the clergy, and of the so-called Acrotoalia, or responses to the psalms. Kurtz *Church History* (by Smith), book ii, p. 233. [< a *n.* 1860.]

hy-poph'o-ra, 1 hı-pof'o-ra; 2 hy-pŏf'o-ra, *n. Rhet.* A statement intended to forestall an objection or argument that will or may be used by the opponent of a speaker or writer. The counter-argument to this is called the *anthypophora*. When the statement takes the form of a series of questions it becomes *eperotesis* or *erotesis*. [LL., < Gr. *hypophora*, < *hypo*, under, + *phora*, bear.]

hy'po-phr'i-a, *n. Pathol.* A downward tendency of the visual axis of one eye.— **hy'po-phos'phite,** *n. Chem.* A salt of hypophosphorous acid.— **hy'po-phos'phor-al,** *a.* Of debility, anemia, etc.— **hy'p'o-phos-phor'ic,** *a.* Noting a crystalline tetrabasic acid ($H_4P_2O_6$) formed from moist phosphorus by oxidation.— **hy'p'o-phos'phor-ous,** *a. Chem.* Characterizing a white crystalline substance obtained by heating phosphorus with phosphoric acid. It is a monobasic acid of phosphorus.— **hy'p'o-phos'phu-ret'ed,** *a. Anat.* Below the diaphragm.— **hy'p'o-phryg'i-an,** *a.* See GREEK and GREGORIAN MODES, under MODE.— **hy'p'oph'y-sis,** *n.* A bursiform process under a corbel, or abacus, in archaic Doric capitals; an apophyge; a scotia.— **hy'p'o-phyll,** *n. Bot.* A reduced or rudimentary leaf.— **hy'p'o-phyl'li-um,** *n.*; *pl.* **-li-a.** *Bot.* A form of sheath-like petiole seated below a leaf-like branch, as in asparagus. **hyp'o-phyl'lum** ?.— **hy'p'o-phyl'lous,** *a. Bot.* Growing on the under side of a leaf, as certain fungi.— **hy'p'o-phyl'y,** *n.* A leaf-like branch, as a rudimentary or reduced leaves including bud-scales, scale-leaves of seedlings, etc.— **hy'p'o-phys'i-cal,** *a.* Lower than the physical: opposed to *hyperphysical*.

hy-poph'y-sin, 1 hı-pof'i-sin; 2 hy-pŏf'y-sin, *n. Physiol. Chem.* A substance derived from the pituitary body of the ox, sometimes used for the same purposes as ergot.

hy-poph'y-sis, 1 hı-pof'i-sis; 2 hy-pŏf'y-sis, *n.* [-ses, 1 -siz; 2 -sēz, *pl.*] **1.** The pituitary body. **2.** *Bot.* (1) In mosses, an inflated part of the pedicel under the capsule. (2) In flowering plants, a cell of the embryo from which the primary root and root-cap are derived. [< Gr. *hypophysis*, undergrowth, < *hypo*, under, + *phyō*, make to grow.] — **hyp'o-phys'i-al,** *a.*

hy-po'pi-al, 1 hai-pō'pi-al; 2 hy-pō'pi-al, *a.* Of, pertaining to, or designating the heteromorphous nymphal forms of certain insects, as typified in the hydrophilus. **hy'p'o-pi-a.**

Hy-pop'i-tys, 1 hı-pop'i-tis; 2 hy-pŏp'i-tys, *n. Bot.* A genus of monotropaceous fragrant herbs constituted by the species *H. hypophegea*, the pinesap or pinedrop.

hyp'o-plank'ton, *n. Biol.* The organisms, animal and vegetable, that float or swim feebly immediately above the bottom of a body of water: distinguished from NEPTONIC PLANKTON; NEKTON.— **hyp-o'plank-ton'ic,** *a.*— **hy'p'o-pla'si-a,** *n. Pathol.* Backward growth or excessively slow or incomplete development of an organ or part. **hy'po-plasm'i-** [C.] — **hy'po-plas'tic,** *a. Pathol.* Deficient in formative power.— **hy'po-plas'to-type,** *n. Mineral.* A phenotype that retains information obtained subsequent to its production.— **hy'p'o-plas'tron,** *n.* [-nа, *pl.*] *Herp.* One of the third pair of plates on the typical chelonian plastron.— **hyp'o-plas'tral,** *a.*— **hy'po-plas'ty,** *n. Pathol.* Same as HYPOPLASIA.— **hy'p'o-plax,** *n. Conch.* An accessory plate that lies beneath the hinge, as in *Pholadidæ*.— **hy'p'o-po'di-um,** *n.* [-di-a, *pl.*] *Bot.* The stalk of a carpel.— **hy'po-prax'i-a,** *n. Pathol.* Want of activity.— **hy'po-pres'sure,** *n. Meteor.* Atmospheric pressure below the normal.— **hy-pop'ter-ate,** *a.* [Rare.] *Bot.* Having a wing produced beneath or at the base.— **hy-pop'ter-on,** *n. Ornith.* The line of feathers in a wing commencing from the axilla.— **hy-pop'ter-al,** *a.*— **Hyp-op'ter-yg'e-i,** *n. pl. Bot.* A family of pleurocarpous mosses having the leaves in two rows with a median row of stipuliform leaves below. **Hyp-op'ter-yg'i-a'ce-æ,** — **hy-pop'ti-lum,** *n.* [-la, *pl.*] *Anat.* Same as HYPOPTYSIS.— **hy'po-pty'a-lism,** *n. Pathol.* A decreased secretion of saliva.

hy'p'o-pus, *n. The* hypopial stage of certain acarids.— **hyp'o-pyg'i-um,** *n.*; [-a, *pl.*] *Entom.* 1. The under surface of the tenth segment of the abdomen. 2. The last visible under abdominal segment.— **hy'p'o-pyg'i-al,** *a.*

hy-po'py-on, *n. Pathol.* A collection of pus in the chambers of the eye; also, an effusion of lymph under the eye constituting discoloration or "black eye." **hy-po'pi-on**; **hy-po'py-um**?.— **hy'p'o-que-brach'i-a,** *n. Chem.* An alkaloid obtained from quebrachobark in the form of 2 yellow amorphous mass ($C_{24}H_{28}O_4N_2$). **hy'p'o-que-brach'ine**?.— **hy'p'o-ra'chis,** *n.* [-RACH'I-DES, *pl.*] *Ornith.* The stem of the aftershaft; also, the aftershaft. See FEATHER.— **hy'p'o-ra-chis'i-ty;** **hy'p'o-ra'chi-al.**— **hy'p'o-ra-chid'i-an,** **hy'p'o-rha-chid'i-an, hy'p'or-rha-chid'i-an.** *a.*— **hy'p'o-ra-di'o-lus,** *n.* [-li, *pl.*] One of the barbules of an aftershaft.— **hy'p'o-ra-di'al,** *a.*

hy'p'or-che-mat'ic, 1 hı'p'or-ki-mat'ik; 2 hy'p'ŏr-ce-mă'tic, *a.* Of or pertaining to hyporchesis.— **hyporchematic prosodiac** (*Anc. Pros.*), an anapestic tripody combined conjunctively with an iambic dimeter catalectic. See PROSODIAC.

hy'p'or-che, *n. Gr. Antiq.* A choral ode, originally in honor of Apollo, accompanied with music and pantomimic dance. See CHORAL. **hyp'or-chem'; hyp'or-che'mat.**— **hyp'or-che'sis,** *n.* [Gr.] A dance accompanied by the hyporcheme.

hy'po-rhined, *a.* Possessing small nostrils.— **hy'por-rhyth'mic,** *a. Anc. Pros.* Lacking rhythm, as a hexameter in which the feet of each foot coincides with the end of a word and in which there is no proper cesura.— **hy'po-sce'ni-um,** *n.* [-NI-A, *pl.*] A low wall under the proscenium next the orchestra; the scene theater.

The *hyposcenium* had been painted to represent rocks.
KINGSLEY *Hypatia* p. 346. [MACM. 1880.]

—hy'po-scle'ral, *a. Anat.* Beneath the sclerotic.— **—hy'po-scope,** *n.* A form of periscope for military use, as a sighting attachment to a rifle or as a hand instrument for taking observations.— **hy'p'o-se-cre'tion,** *n. Pathol.* Decreased secretion.— **hy'p'o-sper'ŏ-cal,** *a.* Developed within the endosketon: said of muscles.— **hy'p-os'mi-a,** *n.* Deficiency in the sense of smell.— **hy'po-so'di-a,** *n. Chem.* Sodium suboxid.— **hy'p'o-spad'i-as,** *n.* Sodium chlorid in tanning.— **hy'p'o-spa'di-as,** *n. Teral.* A malformation in which the urethra opens on the under surface of the penis. **hy'po-spon'dy-lous,** *a.* & *n.*— **hy'p'o-sphene,** *n. Herp.* A median wedge-shaped process of a vertebral neural arch in certain Permian reptiles.— **hy'p'o-spher'al,** *a.*— **hy'p'o-spon'dy-lous,** *a.*— **hy'p'o-spore,** *n. Bot.* The indusium of a fern when it grows from below the spore-case; the indusium inferior.

hy'pos-ta'sis, 1 hai-pos'ta-sis; 2 hy-pŏs'ta-sis (XIII), *n.* [-ses, 1 -siz; 2 -sēz, *pl.*] **1.** That which forms (civil) in fact or hypothesis a groundwork or support for anything; a fundamental principle or postulate; a basis. **2.** *Metaph.* (1) The mode of being by which any substantial thing exists independently, distinguishing it as individuality; that in which the self-subsistent reality of a thing consists: distinguished from the substance or being in which the modes inhere. Compare ESSENCE; SUBSTANCE.

If the individual nature be rational, the substance as having it is a person. In this sense the hypostasis was regarded by the scholastic philosophers as the third degree in the evolution of being. See SECOND, *a.*, 2 (*b*).

(2) A logical substance; anything, whether a substance, quality, action, or a phenomenon, relation, etc., conceived or considered as having distinctive characteristics. **3.** *Theol.* (1) *Early & Eccl. Hist.* (i) Any one of the persons of the Holy Trinity.

Hence, we call the three persons of the Trinity three *hypostases* or substantives. — Bp. Pearson *On the Creed*, p. 440.

(2) The separate personal subsistence of each of the three persons of the Trinity in one divine substance or essence: distinguished from the unitary divine essence of the Godhead. See TRINITY.

The Nicene Creed is a real substance . . . not identical with the substance, for there are not three substances. It is not identical with attributes, for the three Persons each and equally possess all the divine attributes.
W. G. T. SHEDD *Hist. Christian Doctrine* vol. i, p. 365. [a. 1863.]

4. *Pathol.* (1) A settling down of a fluid of the body, as the blood: passive congestion. (2) A morbid deposit of sedimentary matter within the body. **5.** *Alchemy.* One of the three elements — salt, sulfur, and mercury — of which all material things were supposed to consist. **6.** The suspensor of an embryo. [< Gr. *hypostasis*, supporting, < *hypo*, under, + *histēmi*, stand.] **hy'pos'ta-sy.**

hy'pos-tat'ic, 1 hai'pos-tat'ik; 2 hy'pŏs-tăt'ic, *a.* [Also *Theol.* & *Metaph.*] Relating to, or consisting in the personality or substance; distinctly personal. **2.** Of, relating to, or proceeding from hypostasis; elemental.

We do not find, indeed, that the *hypostatic* prexistence of Christ was ever taught by the Nazarenes! — Rev. Thomas Erskine Bannan *Supernat. Origin of Christianity* essay v, p. 319. [a. 1886.]

3. *Pathol.* Resulting from downward pressure; as, *hypostatic* congestion, which is the result of mechanical gravitation of the blood to the part affected. **hy'po-stat'ic.**

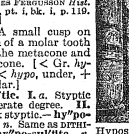
hy'pos-ta'ti-cal, *a.* [< Gr. *hypostatikos*, < *hypostasis*, < *hypo*, under, + *histēmi*, stand.] **hy'po-stat'i-cal?.**— **hypostatic union,** the union of two natures in the one person of Christ. See HYPOSTASIS, 2 (2).

The union of the two natures in Christ is a personal or *hypostatic* union. C. HODGE *Syst. Theol.* vol. ii, p. 390. [a. 1872.]

hy'pos-ta'tize, 1 hai-pos'ta-taiz; 2 hy-pŏs'ta-tīz, *vt.* **hy'pos'ta-tise,**] [-TIZ-ED; -TIZ'ING.] To ascribe substantial or personal existence to; assume to be real; treat as an actual or as a personal being.

This tendency to *hypostatize* abstractions into real agencies has prevailed in all ages.
FOSTER *Nature versus Man* p. 39. [D. M. & CO. 1871.]

hy-pos'ta-size or **-sise**?.— **hy-pos'ta-si-za'tion** or **-sa'tion,** *n.*— **hy-pos'ta-tiz'er** or **-sa'tion.** *n.*



hy'po-ster'nal, *a.* **1.** Situated under the sternum. **2.** Of or pertaining to the hypoplastron.— **hy'po-ster'num,** *n.* [-NA, *pl.*] *Herp.* The hypoplastron.— **hy'po-sthe'ni-a,** *n. Pathol.* Want of vital energy.— **hy'po-sthe'nic,** **hy'po-sthen'ic,** *a.*— **hy'po-sthen'ic,** *n.*— **hy'pos'the-nu'ri-a,** *n. Pathol.* Decrease in the secretion of urine due to defect in the power of the kidney.— **hy'p'o-stig'ma,** *n.* [-MA-TA, *pl.*] *Paleog.* A punctuation-mark (.) in ancient manuscripts, having the value of the comma.— **hy'po-stil'bite,** *n. Mineral.* A variety of stilbite having a less than normal silica content.

hy-pos'to-ma, 1 hı-pos'to-ma; 2 hy-pŏs'to-ma, *n.* [-MA-TA, *pl.*] **1.** *Zool.* A part or organ lying below the mouth. (1) The under lip of a trilobite. (2) The distal prolongation of a hydrotath having the mouth at its summit. (3) The broad curved sclerite behind the lamina labialis of a myriapod. (4) *Entom.* The clypeus of a fly. **2.** *pl.* [it.-] *Echin.* The stereidians as a class. [< HYPO- + Gr. *stoma*, mouth.] **hy'p'o-stome;**.— **hy'p'o-sto'mal-al,** *a.*— **Hyp'o-stom'a-ta,** *n. pl.* 1. *Ich.* The *Hypostomides*. 2. *Echin.* The *Asteriidea*. 3. *Protoz.* A section of turbellarians having an inferior mouth.— **hyp'o-sto-mat'ic,** *a. Bot.* Having stomata on the under side only: applied to leaves.— **hyp'o-stom'e-tous,** *a.* Having the mouth inferior or ventral. **hy-pos'to-mous?.**

Hyp'o-stom'i-des, 1 hip'o-[or hai'po-]stom'i-dēz; 2 hĭp'o-[or hī'po-]stŏm'i-dēz, *n. pl. Ich.* An order or suborder of fishes including *Pegasidæ*. [< HYPO- + Gr. *stoma*, mouth.] — **hyp'o-stom'i-dan,** *a.* & *n.*

hy-pos'tra-cum, *n.* The undermost of the three layers of the investment of mites, the first being the epidermoid and the second the ectostracum.— **hy'p'o-stra'cal,** *a.* Same as MYCELIUM.

hy'pos'tro-phe, 1 hı-pos'tro-fi; 2 hy-pŏs'tro-fē, *n.* **1.** *Rhet.* Parenthesis with return to the subject. **2†.** *Med.* (1) The act of a patient in turning. (2) A relapse. (3) Displacement backward of the uterus. See RETROVERSION. [< Gr. *hypostrophē*, turning about, < *hypo*, under, + *strephō*, turn.] **hyp'o-style,** 1 hip'o-stail *or* hai'po-stail; 2 hĭp'o-stīl *or* hī'po-stīl, *n.* 1. *Arch.* Any structure having a ceiling resting upon columns; a covered colonnade; a pillared hall; specif., one of the halls with huge pillars characteristic of Egyptian architecture: used also attributively.

Hypostyle Hall in the Temple of Karnak, Egypt. (Restored.)

The culminating point and climax of all this group of building [temples at Thebes] is the *hypostyle* hall of Mamephthah. JAMES FERGUSSON *Hist. Arch.* vol. i, pt. i, bk. i, p. 119. [D. A. & CO.]

2. *Zool.* A small cusp on the crown of a molar tooth between the metacone and the hypocone. [< Gr. *hypostylos*, < *hypo*, under, + *stylos*, pillar.]

hy'po-styp'tic. I. *a.* Styptic in a moderate degree. **II.** *n.* A weak styptic.— **hy'po-sul'fate,** *n.* Same as HYPOSULFITE.— **hy'po-sul'fite,** *n. Chem.* I. A chlosulfite used as a fixing agent in photography. **2.** A salt of hyposulfurous acid, more properly a thiosulfate.— **hyposulfite silver-extraction process,** the process of extracting silver by washing in successive baths of hyposulfite of soda and cuprous hyposulfite.— **alkaline hyposulfite,** a compound resulting from the action of hyposulfurous acid on an alkaline base; sodium hyposulfite.— **hy'po-sul-fu'ric,** *a.* Same as BRIMSTONIC.— **hyposulfurous acid.** **1.** Hydrosulfurous acid. **2.** Thiosulfuric acid.— **hyposulfuric acid.** = **hy'po-sul'fu-ret,** *n.* Lacking in sylloglistic form, the not necessarily incorrect: said of arguments.

hy'po-syn'a-phe, 1 hip'o-[or hai'po-]sin'a-fi; 2 hĭp'o-[or hī'po-]sĭn'a-fē, *n.* In ancient music, the separation of two tetrachords by the interval of a tetrachord. [< Gr. *hyposynaphē*, < *hypo*, under, + *syn*, with, + *haptō*, join.]

hy'po-tæ'ta-e, *n. pl. Pathol.* Defect or diminution in the systole of the heart.— **hy'po-tæ'tic,** *a.* Of or pertaining to grammatical subordination; as, a *hypotactic* clause.— **hy'po-tar'sus,** *n. Ornith.* The proximal posterior process of the tarsometatarsus; the calcaneum; or calcaneal process.— **hy'p'o-tar'sal,** *a.*— **hy'po-tax'is,** *n. Gram.* Subordinate arrangement; dependence: opposed to *parataxis*.— **hy'po-tax'ion,** *n.* A decree of the senate.

hy-pot'e-nuse, 1 hai-pot'i-nūs; 2 hy-pŏt'e-nūs, *n. Geom.* The side of a right-angled triangle opposite the right angle. The square described on this side is equal to the sum of the squares described on the sides containing the right angle. [< F. *hypoténuse*, < LL. *hypotenusa*, < Gr. *hypoteinousa*, ppr. of *hypoteinō*, subtend, < *hypo*, under, + *teinō*, stretch.] — **hy-pot'e-nu'sal,** *a.*

hypoth., *abbr.* Hypothesis; hypothetical.

hy'po-thal'us, 1 hai'po-[or hip'o-]thal'us; 2 hy'p'o-[or hĭp'o-]thăl'us, *n.* [-LI, 1 -li; 2 -l, *pl.*] *Bot.* 1. The delicate hyphal filaments upon which the fruit-body is directly developed: a mycelial or hyphal outgrowth from the margin of the thallus of a crustaceous lichen. 2. In fungi, an under thallus on which spore-cases are produced. [< HYPO- + Gr. *thallos*, young shoot, < *thallō*, be luxuriant.] — **hy'po-thal'line,** *a.*

hy-poth'ec, 1 hai-poth'ik; 2 hĭ-pŏth'ĕc, *n.* 1. *Civ. Law.* (1) A pledge or mortgage of either lands or goods as security for debt where the property pledged remains in possession of the debtor.

This custom was borrowed from the Greeks by the Romans, and appeared in France in the 13th century under the name of **obligatio bonorum,** where, owing to its secrecy, it wrought many inconveniences, and it was not until 1795 that publicity was enforced by law. Hypothecation by **legal, judicial, or conventional;** legal in the case of married women and minors, judicial when resulting from a judgment of the courts of law, and conventional when resulting from a special contract. The hypothec ceases by repayment of the obligation incurred, by renunciation on the part of the creditor, or by prescription. In Scots civil law the term is restricted to real property; in French law it extends to movables when it is known as a *privilege*; in Spanish law it is restricted to contractual mortgages on real property.

The possession of the pledge (*pignus*) passed to the creditor; but the possession of the thing hypothecated (*hypotheca*) did not.
KENT *Commentaries* vol. ii, pt. v, p. 575.

(2) The thing pledged or hypothecated. [< Gr. *hypothēkē*, < *hypotithēmi*, put under.] **2.** *Scots Law.* A security established by law in favor of a creditor on a thing remaining in the debtor's hands; specif., the landlord's lien on the crop and stock of his tenant for rent.

The same practical results which the English system produces by allowing landlords to distrain for rent are chiefly attained in Scotland by applying to landlord and tenant the Romanized Law of *Hypothek*.
H. S. MAINE *Early Hist. Institutions* p. 277. [L. M. 1875.]

[< F. *hypothèque*, < LL. *hypotheca*, < Gr. *hypothēkē*, pledge, < *hypo*, under, + *tithēmi*, place.] **hyp'o-the'cal; hy-poth'ek'al.**— **hy-poth'e-ca-ry, hy-poth'e-ca-to-ry,** *a.* — **hypothecary action,** an action for possession of property

pledged as security for debt when the debtor is in default of payment, or for its sale in payment of the debt.

hy-poth'e-cate, 1 *hai-poth'i-kēt;* 2 *hȳ-pŏth'e-cāt, rt.* [-CAT'ED; -CAT'ING.] *Law.* To give (personal property) in pledge as security for debt. In financial usage, delivery to the creditor of the property pledged usually takes place, by civil law possession of the hypothec did not pass.

He [William] had no power to *hypothecate* any part of the public revenue. MACAULAY *England* vol. iii, p. 117. [P. S. & CO. 1856.]

[< LL. *hypothecatus,* p.p. of *hypotheco,* < *hypotheca;* see HYPOTHEC.] — **hy-poth'e-ca"tor,** *n.* One who pledges or pawns property as security for debt.

hy-poth'e-ca'tion, 1 hai-poth'i-kē'shon, 2 hȳ-pŏth'e-cā'shon, *n. Law.* **1.** A lien given by contract by a debtor to his creditor on movable property as security for debt, but without passing possession of the property hypothecated. **2.** The act of pledging personal property as collateral security; as, the *hypothecation* of bonds. **3.** *Mar. Law.* Bottomry. [< LL. *hypothecatio(n-),* < *hypotheco;* see HYPOTHECATE.] — **hypothecation certificate** *(Chm.),* a certificate lodged by the seller with the buyer of a bill of exchange drawn against a shipment of property; it describes the nature of the shipment and states that the bill of lading, insurance policy, etc., are lodged and pledged with the holder of the bill of exchange as security for the payment of the bill (or for the acceptance of the bill) by the drawee. Sarris's *Financial Dictionary.* — **hypothecation clause** *(Com. Law),* a hypothecation of property resulting from an operation of the law. — **hy-poth'e-ca-tiv(es),** *a.* [Rare.] Relating to hypothecation.

hy"po-the'ci-um, 1 hai"po-[or hip'o-]thī'si-um; 2 hȳ"po-[or hȳ'o-]thē'ç-um, *n.* [-CI-A, *pl.*] **1.** A dense plexus of hyphal tissue beneath a fruit body, as in certain pyrenomycetous fungi, the top, asci-bearing layer of the disk-like body in which the asci are produced, as in the *Pezizales* and their allies. [< HYPO- + *-the'cium, -thē'ci,* case, < *tithēmi,* place.] hy"po-the'ce-l.— **hy"po-the'ce-al,** *a.*

hy-poth'e-nar, 1 hai-poth'i-nar; 2 hȳ-pŏth'e-nar. **I.** *a.* Situated on the palm at the base of the little finger, or at a corresponding part in the foot; as, the *hypothenar* fold; as, the *hypothenar* eminence. **II.** *n.* The hypothenar eminence. [< Gr. *hypothenar,* < *hypo,* under, + *thenar,* palm.] — **hy-poth'e-nal.**

hy-poth'e-nuse, *n.* Same as HYPOTENUSE.

Hy"po-the'ri-a, 1 hai"po-thī'ri-a; 2 hȳ"po-thē'ri-a, *n.* A hypothetical group of fossil mammals or mammal-like vertebrates from which the recognized types are supposed to have originated; prommammals. — **hy"po-the'ri-an,** *a. & n.*

hyp-o-therm, 1 hai"po-[or hip'o-]thērm; 2 hȳ"po-[or hȳ'o-]thēm, *n. Meteor.* A line connecting places at which, during a specified time, the mean temperature has been equally far below the normal. [HYPO- + Gr. *thermē,* heat.] — **hy"po-ther'mal,** *a.* **1.** Moderately warm; lukewarm. **2.** Calculated to lower temperature. **hy"po-ther'mic,** — **hy"po-ther'mi-a,** *n. Pathol.* Temperature of the body lower than the normal. **hy"po-ther'my†.**

hy-poth'e-sis, 1 hai-poth'i-sis; 2 hȳ-pŏth'e-sis, *n.* [-SES, 1 -siz; 2 -sēs, *pl.*] **1.** A statement of fact or of theory which, without itself being proved, is taken for granted as a premise from which to test or discover an assured conclusion; a logical supposition; more widely, a supposititious or imaginary state of things assumed as a basis of reasoning; as, the principles being equal by *hypothesis,* the sides must be equal.

Hypotheses, that is, propositions which are assumed with probability, in order to explain or prove something else which cannot otherwise be explained or proved. HAMILTON *Logic* p. 188. [6. & t. 1860.]

2. *Logic.* (1) The condition or alternative involved in a hypothetic judgment. (2) The conclusion or supposition of an argument from consequent (or consequences) to antecedent. **3.** In the sciences, a tentative conjecture assigning provisionally a cause for known facts, to be used as a basis for further investigation and discussion, and as a starting-point for experiment and investigation which, by the discovery of new facts, may uphold or disprove the conjecture, and aid in reaching the true theory; a working hypothesis.

Scientific *hypotheses* are not (as Apelt expresses himself) 'assertions which have been floating in the air, and are laid hold of'; they are the results of observation, experiment, induction, and premises in tentative deductions, form the necessary preliminaries to adequate knowledge. TRENDELENBURG *Logic* tr. by T. M. Lindsay pt. v. p. 308. [T. & CO. 6. CO. 1877.]

4. The relation existing between two propositions or facts which are the subject of a condition or hypothesis. **5.** Loosely and generally, an unsupported or ill-supported theory; a supposition proceeded with in order to warrant it; a mere guess or conjecture. [< Gr. *hypothesis,* supposition, < *hypo,* under, + *tithēmi,* place.]

SYN: conjecture, guess, scheme, speculation, supposition, system, theory. *An hypothesis* is a statement of what is deemed possibly true, assumed and reasoned upon as if certainly true, with a view of reaching truth not yet surely known; especially, such an *hypothesis* as to be a comprehensive tentative explanation of certain phenomena which is meant to include all other facts of the same class, and which is assumed as a working basis for practical purposes, to bring all the related facts into comparison; if the *hypothesis* explains all the facts, it is regarded as verified; till then it is regarded as a *working hypothesis,* i. e., one that may answer for present practical purposes. A *hypothesis* may be termed a comprehensive *guess. Theory* is used of the mental coordination of facts and principles, that may or may not prove correct; a machine may be perfect in *theory,* but useless in fact. *Scheme* may be used as nearly equivalent to *theory,* but is more frequently applied to proposed action and in the sense of a preliminary plan. A *speculation* may be wholly of the brain, resting upon no facts worthy of consideration; a *system* unites many facts, phenomena, or doctrines into an orderly and consistent whole; we speak of a *system* of theology. Compare synonyms for GUESS. — Ant., certainty, demonstration, discovery, fact, proof. — **double-fluid hypothesis** *(Elec.),* the hypothesis that electricity consists of two quantities and imponderable fluids, positive and negative. See ELECTRIFICATION. — **filar h.** *(Biol.),* the view taken that protoplasm consists essentially of separate threads. — **glacial h.** *(Geol.),* see GLACIAL THEORY, under GLACIER. — **granular h.** *(Biol.),* the theory that protoplasmic granules are the basis of every organism. — **Olbers's h.** *(Astron.),* a hypothesis which explains the asteroids as fragments from the explosion of some primordial planet. — **planetismal h.,** a modified meteoritic hypothesis of the origin of the solar system, proposed by T. C. Chamberlin, according to which the small solid masses in the original nebula move together in similar orbits, so that collisions are infrequent and not violent and aggregation is gradual. — **Prout's h.** *(Physiol. Chem.),* a hypothesis substantially to the effect that all elemental weights are multiples, by integers, of the atomic weight of hydrogen. This hypothesis, advanced by William Prout, has not been of material aid in disclosing the nature of matter. — **single-fluid h.** *(Elec.),* the hypothesis that electricity consists of a single tenuous imponderable fluid, the particles of which repel each other, but attract and are attracted by all matter. — **Suess's h.** *(Geol.),* a theory put forward by Suess to account for the chief irregularities on the globe's surface. He supposes that certain areas, which he terms *horsts,* at an early period became dry and stable, and that they formed nuclei around which the rest of the crust has become grouped during the contraction of the earth. — **working h.,** same as HYPOTHESIS, *n.*, 3.

hy-poth'e-sist, 1 hai-poth'i-sist; 2 hȳ-pŏth'e-sist, *n.* One who suggests or defends a hypothesis.

The notion of objecting *hypothetist* . . . is singularly at variance with the facts of the case. S. P. TREGELLES *On Daniel, Defence of Authenticity* p. 225. [BAGS. 1864.]

hy-poth'e-size, 1 hai-poth'i-saiz; 2 hȳ-pŏth'e-sīz, *vi.* [-SIZED; -SIZ'ING.] To conceive or suggest hypotheses.

We can *hypothesize* even if the theory proves not established. H. MELVILLE *Moby-Dick* p. 415. [n. 1851.]

hy-poth'e-sist†, hy-poth'e-tize or **-tise†.** — **hy-poth'e-siz'er,** *n.*

hy"po-thet'ic, } 1 hai"po-[or hip'o-]thet'ik, -i-kal; 2
hy"po-thet'i-cal, } hȳ"po-[or hȳ'o-]thĕt'e, -i-cal (XIII), *a.* **1.** Having the nature of or based on hypothesis; assumed conditionally or tentatively as a basis for argument or investigation; conjectural; supposititious.

Geometry would be undistinguishable from a mere *hypothetical* science, if it had no credentials beyond its strict reasoning. MANSEL *Prolegomena of Logical Theory* vol. i, p. 281. [MACM. 1851.]

2. [Rare.] Given to using hypotheses; as, a *hypothetical* historian. [< LL. *hypotheticus,* one proceeding hypothetically, < Gr. *hypothetikos,* < *hypothasis;* see HYPOTHESIS.] — **hypothetical clause, period,** or **sentence** *(Gram.),* a clause, period, or sentence expressing condition or supposition. — **h. imperative** *(Ethics),* a command or claim of obligation which law imposes on conduct, not for some end beyond itself: contrasted with *categorical imperative.* — **h. inference,** see INFERENCE. — **h. judgment,** a judgment connecting something on the ground of some circumstance which must be granted as real before the assertion becomes literally or actually *true.* The supposition may be either a condition, giving a *hypothetical judgment,* or an alternative, giving a *disjunctive judgment,* or both these combined, giving a *dilemmatic judgment;* as, if the wind changes, it will grow warmer (conditional); either the wind will change or it will not (alternative); if the wind changes, it will either grow warmer or storm (dilemmatic). — **h. question** *(Law),* a question put to an expert witness containing a recital of facts assumed to have been proved, the proof of which is offered in the case, and requiring the opinion of the witness thereon. — **h. realism or h. dualism,** the metaphysical doctrine that the external world consists of what is offered in the case, and requiring the opinion of the witness thereon. — **h. realism or h. dualism,** the metaphysical doctrine that the external world consists of what is offered by a kind of inference: opposed to *presentational realism,* which teaches that the soul immediately perceives material things as such. — **h. syllogism,** a conditional syllogism in wh..h the reasoning turns upon the assertion or denial of a hypothesis embodied in the major premise, in a hypothetic judgment. It embraces two classes. See HYPOTHETIC JUDGMENT, above. — **hy"po-thet'i-cal-ly,** *adv.* As in the manner of a hypothesis; conditionally, as an alternative.

hy"po-thet'i-cal, n. A conditional judgment or syllogism.

hy"po-thet'ic-ism, *n.* Same as HYPOTHESIST. — **hy"po-thy'roid-ism,** *n. Pathol.* A morbid condition characterized by a diminution of activity in the thyroid gland. **hy"po-thy"roi-dis'ma,** 1 hai"po-thai"roi-dis'mo; 2 hȳ"po-thȳ"roi-dĭz'mo, *n.* Diminished activity or tone of any bodily member, or of the whole body. **hy-pot'o-nus†.** — **hy"po-ton'ic,** *a.* **1.** *Chem.* Possessing less concentration than isotonic: applied to a saline solution of less strength than another of the same class in experiments with blood-serum. **2.** *Pathol.* Characterized by hypotonia. — **hy"po-tox-ic'i-ty,** *n. Med.* A diminution or lessening in the powerful toxic properties of a poison. — **hy-pot'ri-che'll-um,** *n.* [-LI-A, *pl.*] *Arch.* In the Greek Doric column, a narrow cut or bevel, in some inferior examples doubled or trebled, marking the junction of the capital and the shaft. The exact meaning of the term is doubtful. Vitruvius used it, but applied it to the entire neck of the capital. Compare CORONA, *n.*, 3.

Hy-pot'ri-cha, 1 hi-pot'ri-ks; 2 hȳ-pŏt'ri-ca, *n. pl. Protoz.* An order of ciliate infusorians with locomotive cilia restricted to the ventral surface of the body. Often these cilia are variously modified, some of them being changed into setæ, used as organs of locomotion. [< HYPO- + Gr. *thrix* (*trich-*), hair.] — **hy-pot'ri-chous,** *a.* — **hy-pot'ri-chous-ly,** *adv.*

hy"po-troch'oid, 1 hai-pō'tro-koid; 2 hȳ-pŏ'tro-cŏid, *n. Geom.* A curve traced by a point, either upon the radius or radius produced, but not upon the generating circle, which rolls upon the interior of another circle. [< HYPO- + TROCHOID.] — **hy"po-tro-choi'dal,** *a.*

hy-pot'ro-phy, *n.* **1.** Same as ATROPHY. **2.** *Pathol.* A morbid state resulting from insufficient nourishment. **3.** *Biol.* The condition between the extremes of power and size. [Gr. *hypotrophē,* < *hypo,* under, + *trophē,* nourishment.]

hy"po-tym'pa-nal, 1 hai-pō'tim-pa-nal; 2 hȳ-pŏ'tim-pa-nal, *n. Anat.* The lowest part of the tympanum. **II.** *n.* The quadrate bone of birds, reptiles, etc. — **hy"po-type,** *n. Biol.* Same as PLESIOTYPE. — **hy"po-typ'ic,** *a.* Short of being typical; subtypical. — **hy"po-typ'i-cal-ly,** *adv.*

hy"po-ty'po-sis, 1 hai"po-tai-[or hip'o-ti-]pō'sis; 2 hȳ"po-tȳ-[or hȳ'o-t-y-]pō'sis, *n.* [-SES, 1 -siz; 2 -sēs, *pl.*] *Rhet.* **1.** Vivid delineation; word-painting. **2.** A sketch or outline, as of a science; as, the *Hypotyposes* of Sextus Empiricus set forth Pyrrhonism. [< Gr. *hypotypōsis,* < *hypo,* under, + *typos;* see TYPE.]

hy"po-van'a-date, *n. Chem.* A salt of hypovanadic acid. — **hy"po-van'ad'ic,** *a. Chem.* — **hypovanadic acid** (H$_4$V$_2$O$_6$) known in the form only of its salts, *hypovanadates.*

hy"po-xan'thin, } 1 hai"po-zan'thin, -thin *or* -thin; 2
hy"po-xan'thine, } hȳ"po-zăn'thin, -thin *or* -thin (XIX), *n. Chem.* A crystalline compound ($C_5H_4N_4O$) found in various organs, and especially in the muscular tissue of animals, also in certain seeds: formed on the decomposition of proteids. [< Gr. *hypoxanthos,* yellowish-brown, < *hypo,* under, + *xanthos,* yellow.] — **hy"po-xan'thic,** *a.*

Hy-pox'is, 1 hi-[or hai-]poks'is; 2 hy-[or hȳ-]pŏks'is, *n. Bot.* A notable genus of stemless herbs of the amaryllis family (*Amaryllidaceæ*), with solid bulbs, narrow grass-like leaves, and a slender few-flowered scape of frequently yellow flowers. *H. hirsuta* of the eastern United States is known as *star-grass.* [< HYP- + Gr. *oxys,* sharp.]

hy"po-zeug'ma, *n. Gram.* The connection of several subjects by a single verb.

hy"po-zeux'is, 1 hai"po-[or hip'o-]ziuks'is; 2 hȳ"po-[or hȳ'o-]zŭks'is, *n. Gram. & Rhet.* The use of a verb with each subject in successive clauses, as in "the earth moves, the stars twinkle, night comes on apace." [LL., < Gr. *hypozeuxis,* < *hypo,* under, + *zeugnymi,* yoke.]

Hyp-o-zo'a, 1 hai"po-[or hip'o-]zō'a; 2 hȳ"po-[or hȳp'o-]zō'a, *n. pl. Zool.* The *Protozoa.* [< HYPO- + Gr. *zōon,* animal.] — **hy"po-zo'an,** *a. & n.*

hy"po-zo'ic, 1 hai"po-zō'ik; 2 hȳ"po-zŏ'ic, *a.* **1.** Of or pertaining to the *Hypozoa.* **2.** *Geol.* Anterior in age to the lowest rocks which contain organic remains. [< HYPO- + Gr. *zōē,* life, < *zōō,* live.]

hy"po-zy'gal, 1 hai"po-zai'gal; 2 hȳ"po-zȳ'gal, *n. Zool.* In crinoids, the lower ossicle without cirrhi of a syzygy: contrasted with *epizygal.*

hypped, hypp'ish, same as HIPPED, etc.

hyps, *n. pl.* [Collog.] Hypochondria.

hyp-sal'o-graph, 1 hip-sal'o-graf, 2 hȳp-săl'o-grăf, *n.* An instrument which automatically registers the rise and fall of the sea. [< Gr. *hypsos,* height, + *halis,* sea, + -GRAPH.]

hyp'se-lo-dont, 1 hip'si-lo-dont; 2 hȳp'se-lo-dŏnt, *n.* Hypsodont.

hyp'si-, } 1 hip'si-, hip'so-; 2 hȳp'si-, hȳp'so-. From Gr.
hyp'so-, } *hypsi,* on high (prob. connected with *hyper,* above): combining forms denoting possession of or connection with something very high or unusually high. — **Hyp'si-brach"y-ceph'a-li,** *n. pl. Ethnol.* The races that have high, broad skulls, as the Malays of Madura. — **hyp"si-brach"y-ce-phal'ic,** *a.* **hyp"si-brach"y-ceph'a-lous†.** — **hyp'si-brach"y-ceph'a-lism,** **hyp'si-ce-phal'ic-i-ty,** *n. Craniom.* Having a vertical index over 75. **hyp"si-ceph'a-lous†;** **hyp"so-ce-phal'ic†;** **hyp"so-ceph'a-lous†.** — **hyp'si-ceph'a-ly,** *n.* **hyp"so-ceph'a-ly.**

Other words beginning with these prefixes will be found in alphabetical place, either singly or in groups.

Hyp'si-cles, 1 hip'si-klēz; 2 hȳp'si-clēz, *n.* Greek mathematician of uncertain date, who lived probably in the 2d century. **Hy-psi-cles'†** [Gr.].

hyp"si-con'chous, *a. Craniom.* Having an orbital index exceeding 85. **hyp"si-con'chi†.** — **hyp'si-con"chy,** *n.* The condition in which the orbital index is hypsiconchous. *Biometrica* March-July, '04, p. 256. [C.] — **hyp"si-cra'ni-al,** *a. Craniom.* Having a skull of more than average altitude. — **hyp"si-dol'i-cho-ceph'a-ly,** *n. Craniom.* Unusual height and length of skull.

hyp'si-lold, 1 hip'si-loid; 2 hȳp'si-lŏid, *a.* Having the form of Greek upsilon or U; hyoid. [< Gr. *hypsiloeidēs,* < *ypsilon,* upsilon, + *eidos;* see -OID.]

Hyp"si-lo-ph'o-don'ti-dæ, *n. pl. Herp.* A Mesozoic family of dinosaurians. **Hyp"si-lo-ph'o-don,** *n.* (t. g.) — **hyp"si-loph'o-dont, hyp"si-loph'o-don'told,** *a.* — **hyp"si-loph"o-don'tid,** *a. & n.* — **Hyp"si-pryn'ni-æ,** *n. pl. Mam.* The *Potoroinæ.* — **hyp"si-pryn'nine,** *a. & n.* **hyp"si-pryn'nic, hyp"si-pryn'noid,** *a.* — **Hyp"si-pryn"no-don'ti-næ,** *n. pl. Mam.* A subfamily of small macropodoid marsupials having feeble molars and a highly developed incisable hallux. **Hyp"si-pryn'no-don,** *n.* (t. g.) — **hyp'si-pryn"no-don'tine,** *a. & n.*

Hyp-sip'y-le, 1 hip-sip'i-li; 2 hȳp-sĭp'y-lē, *n. Gr. Myth.* The daughter of Thoas, king of Lemnos, who saved her father's life when the Lemnian women massacred all the men on the island. She was made queen, and when Jason with the Argonauts landed at Lemnos she bore him twin sons.

Hyp'sis-ta'ri-an, 1 hip'sis-tē'ri-an; 2 hȳp'sĭs-tē'ri-an, *n. Ch. Hist.* One of a heretical sect (4th century) in Cappadocia that worshiped God only as the Most High, and regarded fire and light as his special symbols. It was reenforced by all the religionists in Asia Minor, Egypt, Syria, Persia; but the strongest monotheistic strand in its texture was contributed by Judaism, from which circumcision was rejected, while the following of the Sabbath and the Jewish dietary rules were retained. G. KRUGER in *The New Schaff-Herzog Encyc.* vol. v, p. 433. [r. & w. '09.] [< Gr. *Hypsistarioi,* < *hypsistos,* highest, < *hypsi,* on high.]
